HEBDEN BRIDGE,  
Yorkshire.

# Sutcliffes' Terms of Business.

## READ THEM CAREFULLY

**MARTINS BANK LTD., HEBDEN BRIDGE,** are our bankers, and all clients have to do is to ask their own bankers to obtain references for them regarding the credentials of our firm. We particularly want all our friends to know they are in perfectly safe hands when they post their order to us. Clients who make a firm practice of payment on delivery only, can adopt this method immediately they hand us the name of their bankers for reference.

**YOU WILL BE PERFECTLY SAFE.** We wish all transactions between clients to be absolutely profitable to both parties, to be above-board in every detail, and we want you to make the strictest investigation before you actually pass an order. Unless you can obtain the same reasonable terms of business from other firms as offered by Sutcliffes' you must not pass your orders; remember it is so easy to offer low-priced goods, but it is very seldom they give lasting satisfaction. Perhaps you have at some previous period parted with your money and not received good value; it is for this special reason we invite you to make the most careful investigation of any firm before you place an order. When you see advertisements of goods at a big discount, you can generally take it for granted there is either very weak construction, or something wrong financially with these offers. Sutcliffes' never have any so-called bargain sales; the demand for goods is constant and increasing, and there is no firm in this country in a position to give better value.

**CARRIAGE PAID TO NEAREST STATION.** Sutcliffes' pay carriage on all goods to your nearest station in England and Wales, and to certain parts of Scotland, say 50 miles over the border, but they are compelled to charge ten per cent. extra to the Isle of Wight, ten per cent. extra to certain parts of Ireland, and ten per cent. extra if in the Channel Islands and remote parts of Scotland and Ireland. Never forget that many firms to-day only put their goods on rail, they do not pay any carriage, and this is most important to you: never buy any goods carriage forward or you will be astonished at the carriage you have to pay.

**DELIVERY BY MOTOR IN SOME CASES.** When specially requested clients can have portable buildings delivered by motor (providing the motor can get to the site), at the following extra charges: ten to fifteen miles from Hebden Bridge, 15s., twenty miles, 20s. extra, twenty-five miles, 25s. extra.

**A PERSONAL INTERVIEW.** In many cases it will be profitable for intending purchasers to visit our works and have a personal interview. We have always several kinds of sheds erected and single sections of others in course of erection; in fact, we have an exceptionally fine show room, and intending clients are invited to call during working hours. Our Works, named Victoria Mills, are adjoining Hebden Bridge Station, mid-way between Manchester and Leeds.

**TO VISIT PROSPECTIVE CLIENTS.** Sutcliffes' are prepared when absolutely necessary to visit prospective clients to go over the site with them and to advise the best and most suitable kind of building to erect. Where visits are made by request, we should just charge railway fares and ordinary expenses. We wish to suggest to clients it is usually far better for them to visit our works and see our goods than for us to visit them.

**ANY FAIR SYSTEM OF PAYMENT AGREED TO.** The prices in this book have been cut to the lowest figures for a direct trade straight from our factory to the buyer, with no middlemen.

All the prices are strictly nett, and no discounts are allowed. Sutcliffes' expect all clients to send cheque with order for buildings below £20 in value. If this method of payment is strongly objected to, it will be quite all right to send half with order and balance on delivery, providing the name and address of bankers is given in order that we can obtain the usual references. Well-known firms who make a firm practice of payment on delivery can adopt this method on receipt of their bankers.

**FREE BOOKLET OF POULTRY HOUSES.** Sutcliffes' are large manufacturers of poultry houses and issue a splendid complete booklet of poultry appliances. Interested clients should ask for a copy.

**VARIATION IN DESIGNS.** If we build any sheds different in any way from the catalogue designs and sizes they cannot be sent out on approval, but every effort will be made to give satisfaction and intending buyers may order with confidence.

**DEFECTS IN TIMBER.** We only employ high grade timber in all our buildings and use every endeavour to keep the timber in dry condition, but we do not hold ourselves responsible for contraction or expansion due to weather conditions, or any cause whatever.

## Deferred Terms can be Arranged.

For those who desire to purchase any of our buildings on the monthly payments system we offer special facilities. With this book is sent a form to complete and post direct to our address, Messrs. F. & H. Sutcliffe, Ltd., Wood Top, Hebden Bridge; the fullest particulars are given on the form and if by any chance this has been mislaid we will gladly post one to you on application. We have also appointed Messrs. J. G. Graves, Ltd., Sheffield, as our specially authorised agents, and clients who desire to purchase through them will have particulars posted on application to our agents.

F. & H. SUTCLIFFE, Ltd.

Dixon & Stell, Ltd., Printers, Cross Hills, Keighley.

# Something worth Reading about Sutcliffes'

**A REALLY FINE FACTORY.** Sutcliffes' have two distinct factories for making portable buildings of all kinds. The largest place adjoins Hebden Bridge Station, on the Lancashire and Yorkshire Railway main line, situated mid-way between Manchester and Leeds, and we welcome visitors and intending purchasers during working hours. We have always something to show you, either sheds erected or in course of erection, and, good as this catalogue is, it is not half as useful to you as seeing the actual article.

**THE WOOD TOP FACTORY.** Sutcliffes' factory at Wood Top is engaged solely in the production of poultry houses, chicken coops, etc., and this is also the home of the incubator house, where over thirty thousand chickens are hatched each year and despatched to clients throughout the length and breadth of the British Isles.

**THE REASON FOR LOW PRICES.** Sutcliffes' can give many genuine reasons why their prices are kept so low. In the first place, we have tremendous purchasing power. Our works consume about fifteen hundred tons of timber annually. This is bought direct from the great timber ports of Hull, etc., and is unloaded right from the station to the factory with limited haulage expenses.

**MASS PRODUCTION ADOPTED.** It is well-known that in order to get very heavy production the men must be thoroughly accustomed to their work and labour under most congenial conditions. Sutcliffes' believe in treating all their men well, if they have a grievance any of the men quite openly come to the principals and talk the matter over. All Sutcliffes' men are specially trained for the job. You cannot make portable buildings without proper training. Each workman keeps to one job, that is he makes portable sheds all the time, never anything else, and this is why we get from each bench a large output.

**GO TO THE LOCAL CARPENTER.** Should you doubt our prices just go to the local joiner. Ask him to give you a price for any of the sheds in this booklet, finished and constructed on the same lines as we show them, and you will find that our prices are lower, in most cases very much lower.

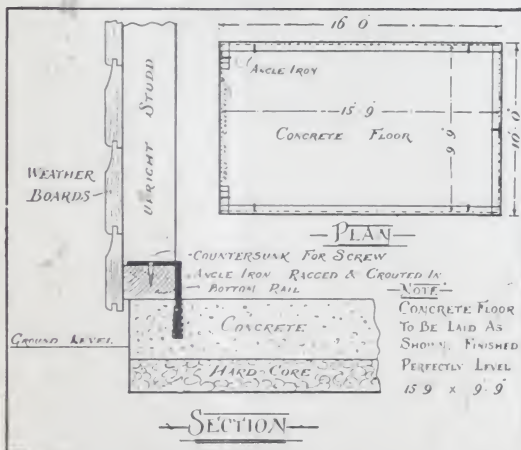

**FIRST-CLASS MACHINERY.** The days of the old-fashioned hand saw have gone, never to return. Sutcliffes' men have all their boards cut for them just to the proper length: no energy is expended in this direction. The framing is fixed on the same lines, and the men get remarkably quick in constructing all kinds of sheds. Just as an illustration of the remarkable production methods adopted, combined with the latest labour-saving machinery, we can turn out poultry houses finished and complete one in every ten minutes. This is the real secret of Sutcliffes' low prices and you get the benefit.

**TRAIN LOADS OF TIMBER.** When you pass through Hebden Bridge Station very often, if you will look out, you will see wagon after wagon of timber being unloaded for Sutcliffes'. At certain seasons of the year this comes in such huge quantities that the station is almost blocked with it. Surely this must convince you that we get the raw material at the right prices and, afterwards, the latest system of up-to-date machinery, combined with specially trained men, produces for you portable buildings at prices which are so low you wonder how it can be done.

**ONE CONTINUAL STREAM.** So great is the output from Sutcliffes' factories that if you pay a visit to Hebden Bridge any day you will see load after load from early morn to late afternoon of finished buildings being sent away from Hebden Bridge Station to clients in all parts of the British Isles. You need have no fear in dealing with Sutcliffes'. Their motto at all times is satisfaction or money back—very few ask for their money back.

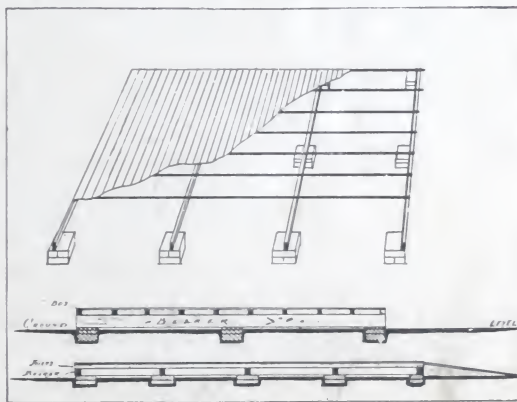

## Foundation Plans for Portable Buildings.

PLAN FOR MAKING CONCRETE FLOOR.

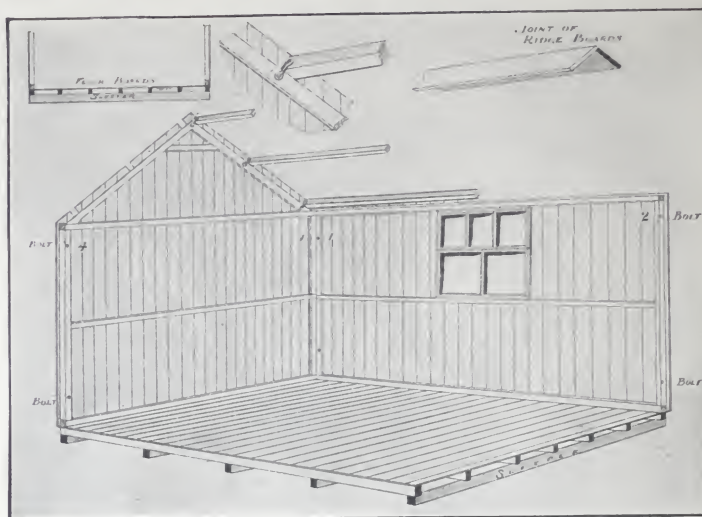

This sketch plan shows very clearly how to make a concrete floor for a building 16ft. by 10ft. wide. It is necessary for floors of all sizes to reduce the length and the width 3 inches. This is clearly shewn on plan.

FOUNDATION FOR WOODEN FLOOR.

Shewing simple form of foundation where wood floor is required.

# Sutcliffes' Special Sketches showing how to erect their Portable Buildings.

**No. 1** Sketch in the left-hand corner we illustrate the double-strength floor resting on sleepers; for motor houses these sleepers should be at least 4ins. by 3ins., for bungalows 6ins. by 3ins., but for small sheds, summer houses, and in fact all buildings below 12ft. long and 8ft. wide, no sleepers are necessary, but if you have them, or can easily obtain them, it is better to use them. Sutcliffes' do not provide sleepers for their houses unless specially quoted for. The purchaser provides his own sleeper foundations.

**No. 2** Sketch shows how to fix on the roof so that it will be absolutely safe. Specially devised Roof "Links" are provided free, to screw into

roof purlins and end framing, these are the very best method of making any roof secure and safe in all weathers.

**No. 3** Sketch shows how the ridge is joined together, close fitting, and with barge boards front and back.

**No. 4** Sketch shows four sleepers supplied by the purchaser, on which rests our double-strength floor. On the top of the floor, which must be laid down perfectly level, begin to fix one side and one end in the manner illustrated. The roof spars will fit into notches specially cut out, as shown in the illustration.

"If you wish in this world to advance,  
Your merits your bound to enhance;  
You must stir it and stump it  
And blow your own trumpet,  
Or trust me, you haven't a chance."  
—W. S. Gilbert.

## Deferred Payment Terms.

Any of the buildings in this Catalogue can be purchased on deferred terms, as follows:—

Example—Cash price of building, **£20/0/0**      Or 6 monthly payments of **£3/10/0**  
Or 12 monthly payments of **£1/16/8**

# Hints on Erection of Buildings.

## PLANS FOR LOCAL AUTHORITIES.

12/6

**FOR TIMBER STRUCTURES SUCH AS MOTOR HOUSES, Lock-up Shops, Workshops, Bungalows, etc.,** Local Authorities demand proper Architect's Plans. These have to be drawn, and to the necessary scale. Our own Architect is prepared to supply plans to meet the requirements of Local Authorities, and in order to assist our clients we are supplying them at the greatly reduced price of 12/6 each. We are sure these extremely low prices will be appreciated by our many friends.

12/6

**GET A LEVEL FOUNDATION READY—THIS IS THE MAIN POINT.** The smaller sizes suitable for motor cycles and side cars are built in the following manner: the sides are made in one complete section for each side and both ends will be constructed in the same way, thus sides and ends form four sections, the doors in one end, the opposite end will be plain unless specially ordered with windows. The floor for small sheds will be made in one section, but when we get say a floor 12ft. by 8ft. wide and upwards, these are all made in two sections.

**ALL SHEDS MADE IN CONVENIENT SECTIONS.** The floors in all cases must be laid down on a level foundation first, on the top of the floor fix one side and one end, then add the other side and end. Fix two bolts in each corner both top and bottom, that will be eight bolts in all, more if you think necessary.

The roofs will be made in two complete sections in houses below 12ft. in length, the felt and battens will be fixed over the boards, the ridge and barge boards will be nailed separately to one of the sections, ready for fixing when the house is erected.

**THE FLOOR MUST BE LAID DOWN FIRST.** If you have a level foundation for fixing any shed, this is half the battle, and very often our moderate sized sheds are fixed up complete in two hours.

**THE FIXING OF LARGE BUILDINGS.** Buyers of large buildings often have an idea that the erection costs will be heavy. This is not the case. If you get, say, one good man and one or two unskilled men to give assistance with the heavy sections, we are prepared at all times, when requested, to send out one of our skilled fixers to erect any of the buildings ordered and merely to charge the lowest possible expenses; we do not expect a penny profit on this work.

If the purchaser finds board and lodging for our men it saves a great deal of time and prevents having to look for lodgings on arrival. All the men we send out are highly respectable and perfectly trustworthy in every sense. The only charges we should make would be simply the wages of our expert fixer, plus out-of-pocket expenses, such as railway and tram fares.

Our men must not be expected to fix in the glass. If they have time, and putty is provided, also a little paint to treat the frames, they will do this work, but it must be optional.

**PORTABLE BUILDINGS TO BE FIXED QUICKLY.** In sending out our men we give all of them strict instructions to get back to the works at the earliest possible moment, and they must not be expected to finish jobs absolutely in detail. There is, however, no hard and fast rule, but we desire all purchasers to bear in mind that the fixers are expected to be home again very quickly.

## An Invitation to our large SHOWROOM at our HEBDEN BRIDGE WORKS.

We have fixed up a very fine Showroom at our Works near Hebden Bridge Station. In this Room we have erected quite a number of our Designs—Motor Houses, Garden Sheds, Kennels, Greenhouses, Pavilions, Summer Houses, etc., and we give a very hearty invitation to prospective buyers to visit our Showroom at any time during working hours, and are confident that all who visit the Works will be amply repaid; they will see at a glance the actual buildings, and will be able to study the sturdy construction at leisure.

## BUY IN THE NORTH.

**GREATER STRENGTH, SOLID CONSTRUCTION.** It will be found that in nine cases out of ten it will pay you handsomely to buy all your portable buildings from firms in the North of England. The weather conditions are far more boisterous than in the Midlands and the South, and in order to make all outdoor structures stand up to the severe weather conditions, great strength is essential. Now it is reasonable to assume that a building of more robust construction, built for Northern conditions, will be even more profitable to you who may, perhaps, reside in a more sheltered neighbourhood. So once again we say: "Buy in the North."

**WONDERFUL MILLS AND UP-TO-DATE MACHINERY.** In the North you find the finest mills equipped with wonderful labour-saving machinery. Transport charges and rents are not so high. Everything is favourable for rapid production. So here again we can truthfully say: "Buy in the North."

**THE WORKERS ARE BETTER CRAFTSMEN.** It is an acknowledged fact that in the great industrial centres of the North the workers are far superior to those in the South. Climatic conditions, taken all the year round, are more suitable, and you can get more and better production in the North than in the South. This means higher quality and lower prices for a similar job. So once more we tell you for your own personal benefit, to "Buy in the North."

**SUTCLIFFES' FACTORY RIGHT IN THE CENTRE OF THE BIGGEST INDUSTRIAL AREA.** We are situated right in the middle of the biggest industrial centre in the country, mid-way between Manchester and Leeds, with dozens of other large towns all in a thirty-mile area. Local conditions lend themselves in every direction, and this accounts for the remarkable offers we are able to make in this free book. We tell you once more to "Buy in the North," and there is no better firm for portable buildings than Sutcliffes'.

## Sutcliffes' Ornamental, Planed, Tongued and Grooved Weather Boards.

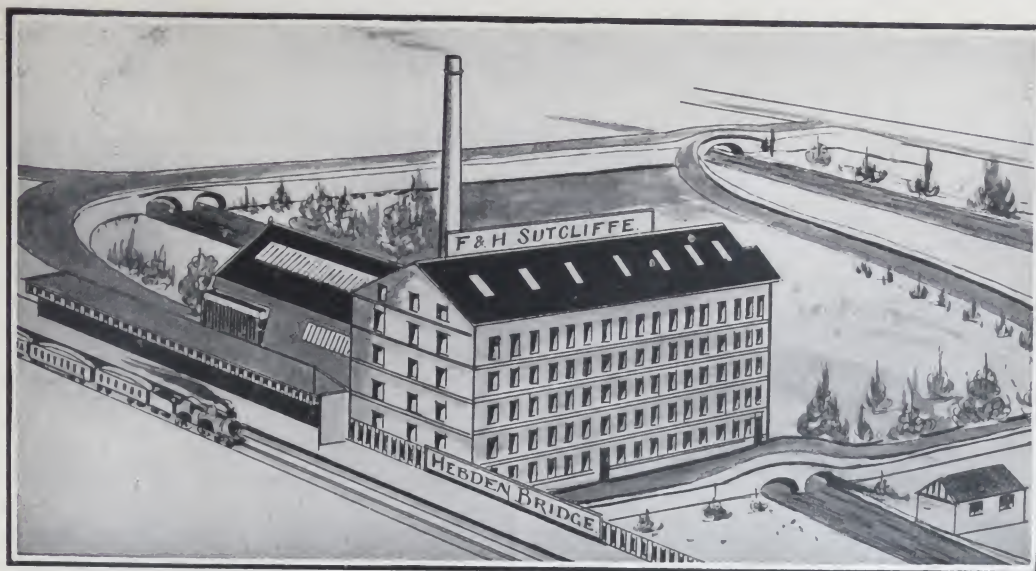

Sutcliffes' now construct their Bungalows, some Motor Houses, and Large Buildings where illustrated of 1-in. ornamental moulded planed tongued and grooved weather boards. These special boards can only be produced by the most expensive machinery, and are far in advance of the usual weather boards. The wide tongue and deep groove make it impossible for them to let a drop of water through in any weather. It does not matter how hot the temperature is they never contract sufficient to cause the slightest opening, and when you have the great thickness combined, then you get the best class of timber boarding that can be produced.

### Send for a Free Sample.

In order to thoroughly convince those who feel a little doubtful regarding the great superiority of this kind of boarding over any other, we are prepared to send a free sample by post to all interested.

## Sutcliffes' Huge Factory, where the Portable Buildings come from.

This illustration will convey to you an accurate idea of the big Factory we occupy for the production of all kinds of Portable Buildings. It is situated within 50 yards of Hebdon Bridge station on the London, Midland & Scottish Railway, midway between Manchester and Leeds.

The large Factory and the Annex are both stone built, extra well lighted and equipped with the latest saw mill machinery for the conversion of enormous stacks of selected red and white deal into the necessary requirements for the rapid production of all kinds of sectional buildings.

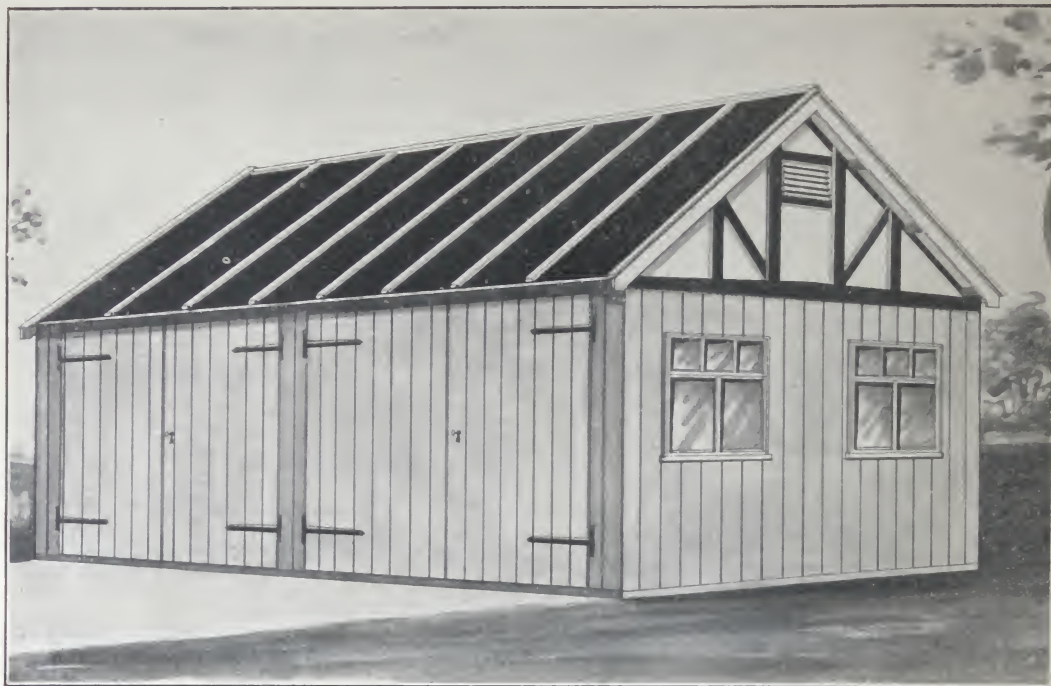

**SIZE OF ROOMS.** In the large building there are five separate rooms; each room has a floor area of over 4,000 square feet. The Annex building has three distinct floors with an approximate combined floor area of nearly 10,000 square feet. It is customary for us to keep over 250 tons of timber inside these rooms, all perfectly dry, and quite distinct from the huge stacks kept in the separate storage ground.

**WHAT A BIG FACTORY MEANS TO YOU.** We are in a most favourable position for buying seasoned timber in bulk at the very lowest cash prices direct from port; the factory equipment and special facilities for mass production mean low selling costs; we are able to sell direct to clients straight from the factory, and the savings effected are clearly demonstrated in the prices shown in the booklet.

Whatever you want, from a Dog Kennel to a Chapel, **SUTCLIFFES' CAN DO IT.** If it's a portable building you are wanting, then we can do it at a price far below local quotations, and deliver carriage paid right to your nearest station. If you obtain a price below those shown in this catalogue, then you may rest assured there is something wrong either with materials, methods of construction or workmanship. Whatever you want in the portable building line, just write to Sutcliffes' about it; you are almost certain to save money and still be thoroughly satisfied.

## ANOTHER BIG FREE BOOK.

**S**UTCLIFFES' issue another big free book with three colour illustrations, and many photos of all kinds of Poultry Houses and all manner of Poultry Appliances. You can obtain a fully equipped Poultry Farm, along with all the necessary birds, from Sutcliffes'. If you are interested in poultry keeping, for pleasure or profit, be sure to send for Sutcliffes' free Poultry House Book.

### DESIGN A.

For PRICES  
SEE LIST  
ENCLOSED.

**CONSTRUCTION—SIDES AND ENDS.**—There is something different about Sutcliffe's motor houses; the boards used are ½ in. planed, tongued and grooved, and superior quality; the framing is also very heavy, much stronger than employed by many other firms. If you go in for motor houses at lower prices than Sutcliffe's, you are sure to receive correspondingly lower quality. Sutcliffe's do not use any home grown timber; this is much cheaper than foreign, but not half as good. Be sure you are guaranteed all best foreign timber before you pass an order. This is very important, though probably you are not aware of it.

**A FIRST-CLASS ROOF.**—Sutcliffe's are fully aware that it is most essential to have a perfectly dry roof—one that can be depended on in all weathers. This is how we make the roofs:—Extra quality ½ in. tongued and grooved boards. On top of these we fix superb Ruberoid or similar felt, and over the felt handsome battens to keep the felt in position—you could not wish for a better roof, and it will always keep the interior quite dry. Sutcliffe's guarantee all their goods.

**RED ASBESTOS ROOF TILES.**—If you desire to have a red tiled roof, we can supply the necessary tiles and ridging pieces, also the special nails and battens. For the extra cost see List.

**WOOD EAVES TROUGHS.**—We offer very fine eaves troughs, cut out of solid wood. See List.

**DOORS AND HINGES—GREAT STRENGTH.**—All doors are made very strong and properly braced, while the hinges are an improved type and well able to carry the weight of the doors without sagging, this is most important with all large doors. Both doors are supplied with lock and key.

**SIZE OF DOORS.**—In the 16ft. square motor house we can make each set of doors approx. about 6½ft. wide and 8ft. high; in the other sizes the doors are proportionately wider.

**DOUBLE STRENGTH FLOORS.**—Sutcliffe's double strength floors, as supplied with motor houses, are an extra charge, but well worth it.

**WINDOW DETAILS.** The windows are very well built and of special design. The top portion opens inwards to give ample ventilation. Overall dimensions and approximate sizes: Length 37ins., width 32ins., size of bottom pane 18ins. by 14ins., size of glass for top pane 9ins. by 12ins. We provide 21 oz. best quality glass free.

**QUALITY, DESIGN AND POSITION OF WINDOWS.**—The windows used in these motor houses are of the latest and most successful pattern, admitting plenty of light and, in summer, the top half can be dropped inwards to allow of ventilation. In this double-car shed the windows are fixed in each end.

**ORNAMENTAL TIMBER WORK—LOUVRE VENTILATION.**—On both ends over the eaves we introduce ornamental timber work, this gives the motor house a pleasing appearance and still does not add to the cost; while in both ends, as shown in the illustration, we fix the well-known Louvre ventilation.

**MOTOR HOUSES ON ONE INCH MOULDED WEATHER BOARDS.**—For the small extra cost of 10 per cent. only, we are able to include our special 1 in. planed, tongued and grooved rustic-jointed weather boards for the sides and ends; these boards are exactly the same as used in our bungalows and are far in advance of any other kind.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**INTERIOR LINING.**—When required we are prepared to line the sides to eaves and ends to ridge with ½ in. planed, tongued and grooved boards. For the extra cost for lining see List.

**A FINAL NOTE.**—You do not purchase motor houses every day, but when you do you want a good one. In your interests it is better to deal with a firm of long standing with whom you can place implicit trust. Remember Sutcliffe's guarantee of satisfaction.

**A FIRST-CLASS SPECIFICATION.** This design is one of the finest models in the entire catalogue. It is a garage you will be proud of and one that will give a touch of dignity and charm wherever erected. The four walls are built on one-inch planed, tongued and grooved ornamental moulded weather boards, these are our own special production and are only used in buildings of superior character, the framing is of great strength, nicely planed and generously employed, there is no skimping, from first to last, inside and out everything is of the best.

**THE RED TILED ASBESTOS ROOF.** The roof is built in sections on  $\frac{1}{2}$  inch planed, tongued and grooved boards, then stripped with narrow battens in readiness for the Red Asbestos Tiles and Ridge Pieces which we provide along with special nails, etc., for fixing. In addition we send out extra wide, nicely finished barge boards and finials, while in both gable ends we insert louvre ventilators and finish off to show the Old English half timbered effect depicted in the illustration. The design "W.P." has been introduced to give those who want a particularly fine motor house an opportunity of satisfying themselves. We have made no attempt to cut the price, we have centred in quality from first to last, and every nook and corner will stand the strictest investigation.

**EAVES TROUGHS AND RAINWATER PIPES FREE.** We include a set of wood gutters cut out of solid wood and also the necessary fall pipes and brackets. There is no extra cost for these with this design.

**EXCEPTIONALLY FINE DOORS.** Well built handsome doors improve any garage, but it is only possible to include them in the better class houses. The doors supplied with this design are of very fine construction throughout, deal framed, ledged and braced, with glass cut to size provided for the top portion. The door fittings are of exceptional strength and we are certain these doors will give to all purchasers the fullest satisfaction. It must always be remembered that the doors are so frequently used, and so noticeable that only the very best design should be considered.

**WONDERFUL SLIDING DOORS AT 40/- EXTRA.** On the inside page you will see a small coloured inset of the design "W.P." with sliding doors. In many cases these doors are preferred to the folding pattern, especially in places where the garage is near to the street or footpath. It is for this reason we offer them. This design can be fitted with sliding doors of very superior quality, with glass in the top portion and equipped with Henderson's "TANGENT" Sliding Door Gear. This is the best in the country, very efficient, most ingenious, enables even a child to slide the doors "at a touch" and also allows individual entrance without revolving the whole door,

## DESIGN WP.

For PRICES  
SEE LIST  
ENCLOSED.

or when entirely closed. Henderson's "TANGENT" Sliding Door Gear is British-made and is the most wonderful sliding door gear you have ever seen. We most strongly recommend it, knowing how very good it is after an extended test under severe conditions.

**WINDOW PARTICULARS.** Two windows are fixed up each side giving ample light and ventilation. The window frames are built from high grade materials morticed and tenoned together and made so that the top portion opens outwards. All necessary window fittings are included along with 21 oz. glass cut to size ready for fixing on arrival. The window frames are at least 3 feet square. Both light and ventilation are essential in all good garages, and these features have been carefully embodied in this design.

**WOOD OR CONCRETE FLOOR.** For all better class garages we advise a concrete floor, but the wood floors we supply at an extra cost are most reliable and will give satisfaction. Still we feel certain that most of our friends who decide on this design will go in for a concrete floor and when this is the case we send concrete floor plans free of charge.

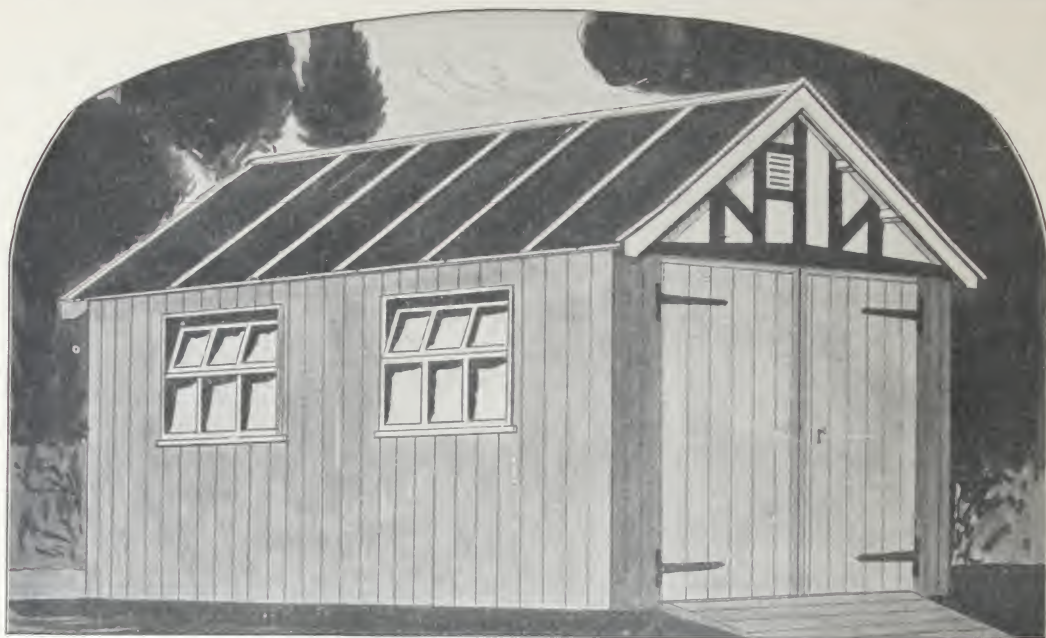

**THE INTERIOR CAN BE LINED.** If you wish to still further improve this really beautiful garage we can line both sides to eaves and both ends to ridge with  $\frac{3}{4}$  inch planed, tongued and grooved boards. This means increased warmth in winter and is strongly advised. The extra cost see list. Asbestos sheets can also be supplied for lining the interior along with the necessary stripping laths if preferred at the same price.

**THE DESIGN "W.P." IS SECTIONALLY BUILT.** All sections are built complete at works before despatch, bored and bolts provided, everything possible is done to facilitate easy erection. You will find that even a large garage is fixed up very speedily and without the slightest danger of anything going wrong.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**THE "W.P." IS DELIVERED CARRIAGE PAID TO STATION.** We send this garage carriage paid to your station. Although the larger sizes weigh between one and two tons we pay the carriage to any station in England and Wales—this is a feature you must not overlook. To stations beyond the boundary we are compelled to charge extra.

**THIS DESIGN IS ON VIEW AT HEBDEN BRIDGE.** We have one of these garages fixed up at Hebden Bridge and we feel confident that once you have actually seen the real building you will be so well pleased that you will not fail to order. It is remarkably attractive and is confidently recommended to all who can possibly afford a better class garage. Quite naturally it costs more money than most of the designs in the catalogue, but when you take everything into consideration it is one of the best value for money garages Sutcliffe's have ever placed on the market, and will prove just as good as we say it is over a long number of years.

Carriage Road to nearest Station England and Wales.

**CONSTRUCTION—SIDES AND ENDS.** Sutcliffes' motor houses are built on  $\frac{1}{2}$  in. planed, tongued and grooved, matchboards of the finest quality. Remember there is as much difference in timber as in other goods, you can get low-grades that are dear at a gift, and you can have the finest quality which is always most expensive. Sutcliffes' make a strong point of buying nothing but selected timber, this is where you benefit most.

**AN EXCELLENT ROOF.** The roof of Sutcliffes' motor house is built on best  $\frac{1}{2}$  in. boards, just the same as the sides and ends, but in addition we fix on top some extra good Ruberoid or similar felt, then on top of this handsome battens, so that the felt can never blow off, and always keep the shed perfectly dry in all weathers.

**RED A BE TO: TILES FOR ROOF.** A red-tiled roof forms a beautiful finish to any garage, and we are prepared to supply the necessary tiles, also ridge pieces, nails and stripping; for extra cost see List.

**WINDOWS ON BOTH SIDES.** We fix windows of handsome pattern, as per sketch, on both sides. If you prefer the windows, say four feet apart, we can do this without extra charge. The quality of the windows is of the best and, opening at the top, are most convenient to use at all times. All glass is provided free.

**SIZES OF WINDOWS.** The windows in this motor house are morticed and tenoned together, beautifully finished off, very strong and attractive in design, giving ample light. Approximate sizes of each complete window, 40ins. by 36ins., the top half hinged as illustrated.

### DESIGN B.

For PRICES  
SEE LIST  
ENCLOSED.

**SIZE OF DOORS.** In the number one and two sizes the doors are about 7ft. wide and 6ft. high; numbers three and five, 8ft. wide and 7ft. high, and in numbers four and six, 8ft. wide and similar height; rather more width can be given in these two sizes if required.

**ORNAMENTAL TIMBERS.** These are included over the eaves, both back and front, they give a very smart appearance and are certainly greatly admired. Quite true, you can see sheds far more ornamental; but they are so expensive it is impossible for the majority of buyers to purchase them.

**THE INSIDE CAN BE LINED.** We are prepared to line the sides to eaves and ends to ridge with  $\frac{1}{2}$  in. planed, tongued and grooved boards, for extra cost see List. If you have the inside lined no heat should be required, even in very cold weather. Clients who wish to make their garages fireproof can also easily line the garage themselves with asbestos sheets and cover the joints with wood strips.

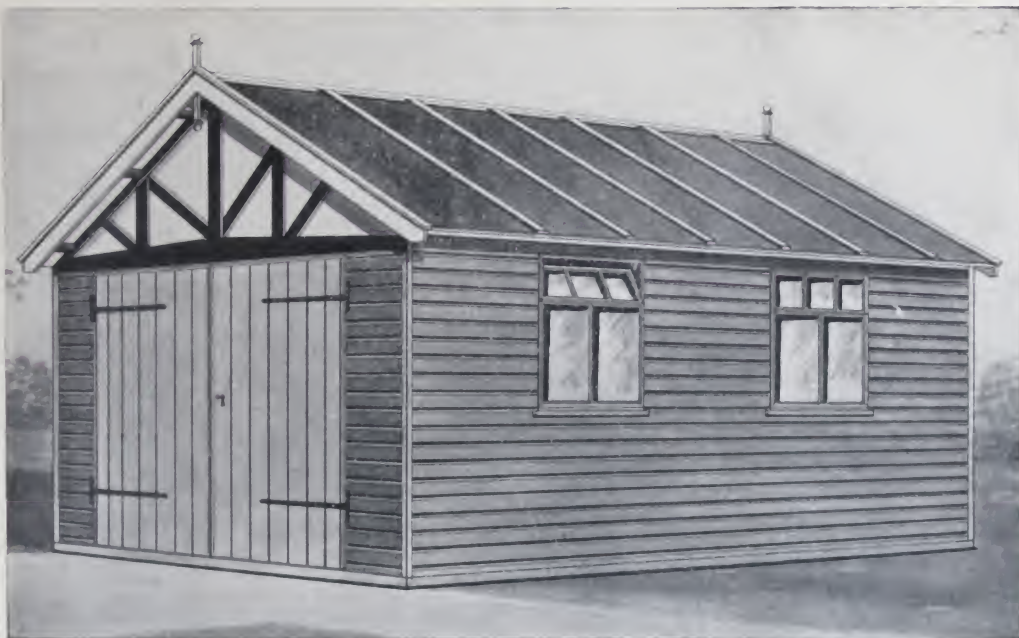

**FLOOR AND RUNNER-UP.** The floor is an extra charge, but is built on enormously strong lines; extra thick battens, then  $\frac{1}{2}$  in. floor-board on top, this gives you a floor that will carry any weight without sagging and such a floor is well worth the cost.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**MADE IN SECTIONS.** All Sutcliffes' motor houses are made in sections, no loose boards sent, and this is what you must watch when getting quotations. The sections fit together quite easily, and all bolts are provided. You get a properly finished house at a price which only a firm that specialises could possibly touch.

**IMPORTANT FEATURES.** Sutcliffes' motor houses have extra strong double doors, complete with lock and key. The door hinges are of special design and strongly made; the runner-up is included with all houses and, over the eaves, we introduce Louvre ventilation.

Carriage Paid to nearest Station England and Wales.

**CONSTRUCTION, SIDES AND ENDS.** In this motor house we offer the finest heavy-grade materials, exactly the same as we use in bungalow construction. This means you will get a motor house that will stand the worst weather conditions with never a fear regarding the safety of the car. The four outer walls are constructed on lin. prepared and moulded weather boards; very few firms offer such high-grade goods, and although the price is rather more, it will be the best-spent money if you decide on this double strength motor house.

**FRAMEWORK, ROOF AND OTHER DETAILS.** You will never find weak timber framing in any of Sutcliffes' motor houses. Sutcliffes' give framing of ample strength; this is one reason why their houses stand out so very good and why they keep in good condition for so many years. The roofs are constructed on lin. tongued and grooved boards, with extra heavy roof supports, while the outside is also covered with Ruberoid or similar high-grade felt, then stripped with nice battens.

**RED ASBESTOS TILES FOR ROOF.** The extra cost see list.

**EAVES TROUGHS, IF DESIRED.** We can include eaves troughs, cut out of solid wood, at an extra cost, see list.

**ORNAMENTAL TIMBERS, WINDOWS, etc.** Over both gable ends we fix ornamental timbers to give the Old English effect. The windows are properly morticed and tenoned, glass provided, and the top portion opens inwards for ventilation. All garages are extremely well lighted.

### DESIGN LO.

For PRICES  
SEE LIST  
ENCLOSED.

**SIZE OF WINDOWS.** Overall dimensions: Approximate length, 37ins., width 32ins. Size of glass provided: Top panes 12 by 6ins., bottom panes 18ins. by 14ins. Two windows are included up each side.

**THE DOORS ARE VERY STRONG.** The doors are built on lin. tongued and grooved boards and heavy framing; the hangars are most substantial construction, and all who see them will be well pleased.

**SIZE OF DOORS.** In the number 2 and 3 sizes, the doors are about 7ft. wide and 6ft. 6ins. in height; number 3, 4 and 5, the doors are about 7ft. 6ins. in width and 7ft. 6ins. in height; in the number 6 size, greater width of doors is given, usually about 8ft. by 7ft. in height.

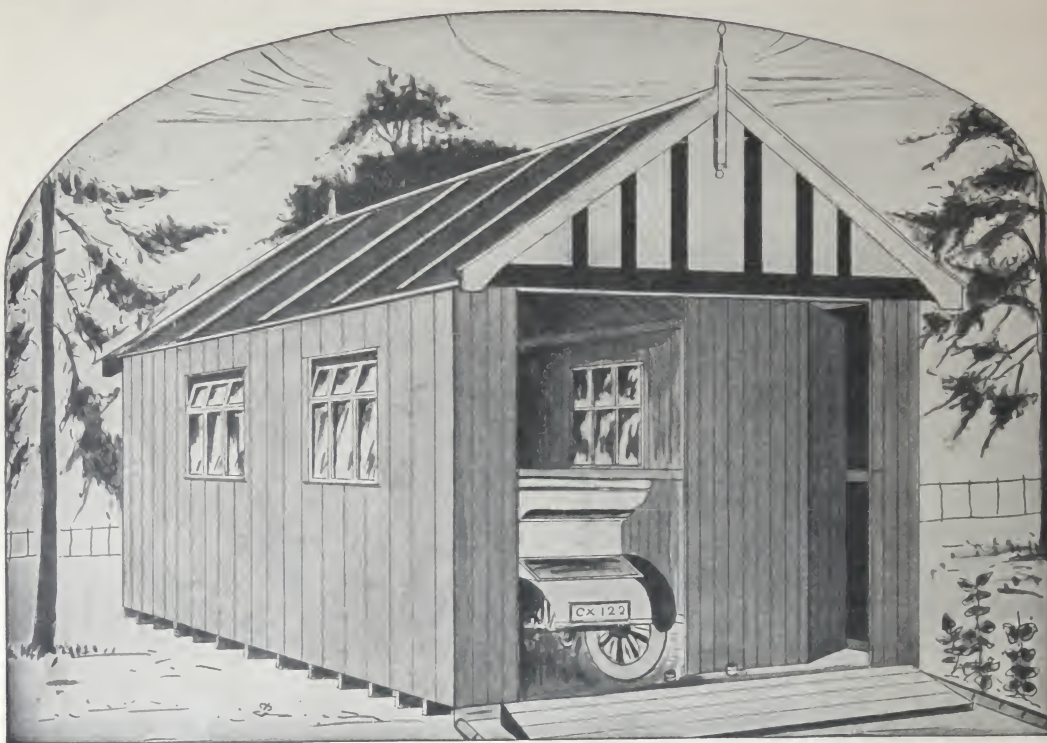

**WONDERFUL SLIDING DOORS.** This design can be fitted with Henderson's "TANGENT" Sliding Door Gear, the best in the country, most efficient, very ingenious, and enables even a child to slide the doors "at a touch," and also allows individual entrance without revolving the whole door or when entirely closed. For illustration see Design "H.M." Garage. Henderson's "TANGENT" Sliding Door Gear is entirely British-made. The extra cost of fitting the above doors is 40/- only.

**FLOOR AND RUNNER UP.** The floor, an extra charge, is made on lin. tongued and grooved boards with extra heavy battens below; it is a floor that will carry a couple of tons and never any sign of sagging. The price of the floors have been fixed very low, and we strongly recommend them.

**THE INSIDE CAN BE LINED.** The extra cost see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**MADE IN SECTIONS—BOLTS FREE.** All Sutcliffes' motor houses are built in easy fitting sections. All bolts, etc., provided; lock and key for door and glass for windows. You get a perfect motor house at a reasonable figure and one that will give you sound service.

## Sutcliffes' No. 4 Motor House, suitable for Motor Lorry or Char-a-banc.

	Length	Width	Height Eaves	Height Ridge	Floor Extra
1—	20ft.	10ft.	8ft.	11ft.	
2—	30ft.	15ft.	8ft.	11ft.	
3—	35ft.	18ft.	10ft.	14ft.	
4—	40ft.	20ft.	11ft.	15ft.	
5—	60ft.	25ft.	10ft.	14ft.	

**CONSTRUCTION OF WALLS.** The four sides are built on very superior quality 3in. planed, tongued and grooved boards of narrow widths, the framing is exceptionally heavy, usually 3in. by 2in. and ever stronger for large sheds. Sutcliffes' sheds are listed at a fair price, but there is never anything jerr-built about them.

**THIS GARAGE SHOULD BE VERY STRONG.** Personally, we are quite sure clients would be well advised if they had the outer walls built on 1in. planed, tongued and grooved ornamental weather boards, as illustrated in the booklet; they are far superior to ordinary boards and the increased wear, combined with better service, makes them easily cheapest in the end. Although these boards are most expensive to produce we only charge ten per cent. extra for including them in this garage.

**A SMART ROOF—ALWAYS DRY.** The roof is a good one; you could not wish for a better, built on 3in. prepared tongued and grooved boards, then covered with Ruberoid or similar felt, and on top of the felt we fix battens to prevent any damage; this gives a most pleasing appearance and any builder will tell you that the roof is about as good as one can wish for on a portable building.

**RED ASBESTOS TILES FOR THE ROOF.** If we provide red tiles and ridging pieces, also special nails and strapping, the additional cost see list.

**EAVES TROUGHS MAY BE WANTED.** We offer these, cut out of solid wood, at an extra cost, see list.

**TENANT'S FIXTURES.—BUILT IN SECTIONS.** Sutcliffes motor sheds are all built in handy sections, all bolts provided, and they can be easily erected.

### DESIGN C.

**For PRICES  
SEE LIST  
ENCLOSED.**

**WINDOWS. DOORS, AND ORNAMENTAL TIMBERS.** The windows are of a strong and useful type with the top half to open and drop inwards, the doors as illustrated are the latest pattern, "Slide-Easy." These doors slide easily round the corner of the house and take up no room; this is absolutely the latest idea in door construction, and is far better than hinged doors that are apt to be most troublesome in windy weather and take up a lot of room when open. If you prefer the old pattern double doors, then the shed can be had at 12 reduction. Handsome barge boards, finials and ornamental timbers are inserted in both ends over the eaves, these give a pretty effect but still keep the price very reasonable.

**SIZE OF DOORS.** In this design we can make the doors about 7½ft. in height in the first two sizes, width about 8ft. and 12ft. respectively. In the other sizes the doors can be made both wider and of greater height when required.

**THE DOUBLE-STRENGTH FLOOR.** Look how these floors are built—extra thick battens, edge up, are placed down, then to these we nail 1in. floor boards; such a floor must cost a fair price, but is worth it, every penny.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**CARRIAGE PAID TO NEAREST STATION.** A most important item in these days of high carriage rates; remember that frequently the carriage on a big motor house leaves nothing out of a ten pound note if a long journey, so make safe and deal with Sutcliffes'.

## Sutcliffes' Red-tiled Roof Motor House, with Patent Sliding Doors.

	Length	Width	Height Eaves.	Height Ridge Extra.	Floor
1—	13ft.	9ft.	7ft.	9ft.

4—	18ft.	10ft.	8ft.	10ft.	
5—	20ft.	10ft.	8ft.	10ft.	
6—	20ft.	12ft.	8ft.	11ft.	
7—	20ft.	16ft.	8ft.	13ft.	

Carriage Paid to nearest Station England and Wales.

**A GENEROUS SPECIFICATION.** This motor house is one of the finest models obtainable—suitable for any car, handsome in appearance, well-lighted, ample head room, and built to give over twenty years excellent service—still reasonable in cost. The sides and ends are built on lin. muntied weather boards. If you have the special boards used in this house you get the longest wearing and the most beautiful boards obtainable, well worth the little extra cost. The framing employed by Sutcliffes' is always of great strength, and varies according to size of house ordered.

**THE RED-TILED, ORNAMENTAL ROOF.** The best grade diagonal asbestos roof tiles supplied with this house give a beautiful finish. The roof itself is built in sections on lin. planed, tongued and grooved boards on heavy framing, and sufficient lathe is sent to nail over the boards, in order to leave a cavity before the tiles are fixed; naturally we cannot fix the tiles before dispatch, these must be fixed on arrival. If you want absolutely the best-class of motor house then don't forget to have the red-tiled roof.

**EAVES TROUGHS AND RAINWATER PIPES.** With all orders for this garage we provide, entirely free of charge, a set of eaves troughs for both sides; these are cut out of solid wood and are most reliable.

**FULL WINDOW DETAILS.** Two windows included on each side giving ample light. Overall dimensions: length 47 in., width 22 in. Size of glass provided: top pane 12 by 9 in., bottom pane 18 in. by 14 in.

**ORNAMENTAL TIMBERS AND FINIALS.** Both gable ends are most attractive in design, and form a pleasing addition.

### DESIGN HM.

For PRICES  
SEE LIST  
ENCLOSED.

**WONDERFUL SLIDING DOORS WITHOUT EXTRA COST.** This design is fitted with Henderson's "TANGENT" Sliding Door Gear, the best in the country, most efficient, very ingenious, and enables even a child to slide the doors "at a touch," and also allows individual reframes without involving the whole door, or when tightly closed. Henderson's "TANGENT" Sliding Door Gear is British-made and will add many pounds to the value of the garage.

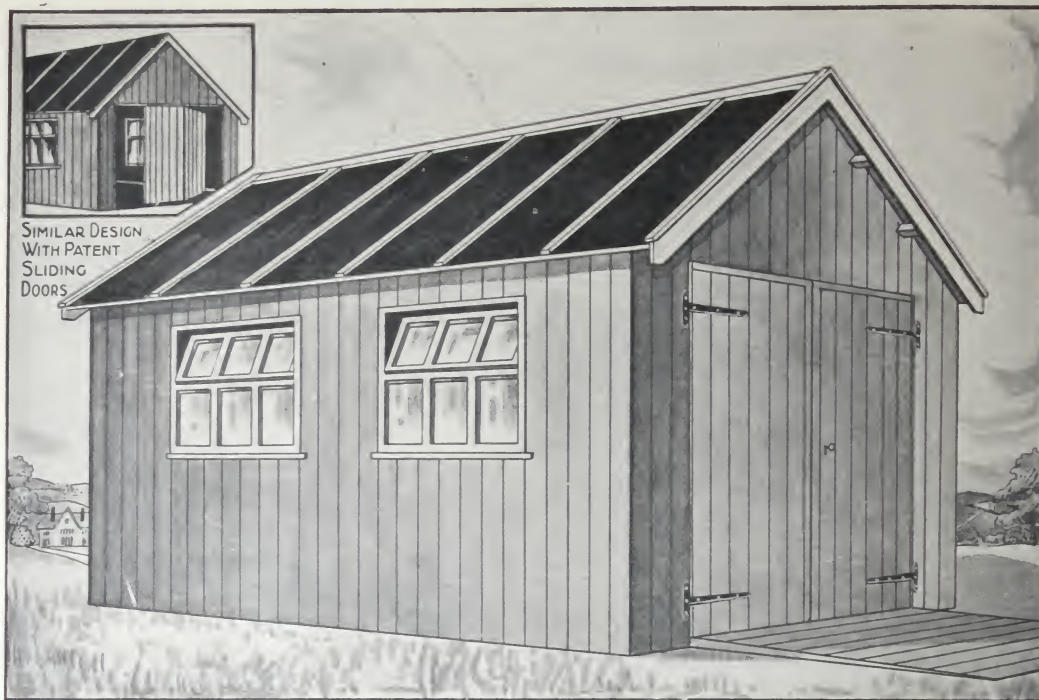

**THE SIZE OF DOORS.** In the first two sizes the doors are about 7ft. wide and 6ft. 6 in. in height; in the next three sizes, 7ft. 6 in. high by about the same width, while in the largest size the doors are usually made about 8ft. in width and 7ft. 6 in. high.

**THE FLOOR IS OF ENORMOUS STRENGTH.** The floor of this house is an extra charge, but is well worth it. Built on lin. tongued and grooved boards, with a large number of extra heavy battens below, it gives a solid foundation for any car, and will stand over one ton weight in any position without sagging.

**THE INTERIOR CAN BE LINED.** If you wish to still further improve this fine motor house, we can line the sides to eaves and ends to ridge with lin. planed, tongued and grooved boards; this makes the interior most attractive. The house is warmer in winter and cooler in summer. The extra cost see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before dispatch at an extra cost of 7s 6d per coat, only. Perfectionists can then finish off in any desired colour after erection.

**BUILT IN SECTIONS AND CARRIAGE PAID.** All motor houses are made in sections and sent carriage paid, this is a great convenience, and will be appreciated by our clients. You can obtain motor houses at a great reduction on these prices, but get a good one and you will never regret the step.

**FULL SPECIFICATION.**—The four walls are built on  $\frac{1}{2}$ in. planed, tongued and grooved boards, best Swedish deal. The framing is nicely planed deal, and is always of ample strength for the house selected. This particular design has been produced in order to offer a nice low priced motor house of substantial construction, easy to erect, and to provide adequate housing accommodation for clients who must of necessity study carefully every penny expended.

**ROOF CONSTRUCTION.**—The boards used are exactly the same as for the walls; the framing is also nicely planed and of ample thickness. Over the boards we nail really good non-tarring "Ruberoid" or similar felt, then strip with narrow battens, forming a rainproof roof of handsome appearance.

### DESIGN F.

For PRICES  
SEE LIST  
ENCLOSED.

**THE DOORS AND WINDOWS.**—The double doors are hung on heavy weight special design motor shed hangers. The framing is extra good, and all doors are complete with lock and key. The windows are made to open properly, morticed and tenoned, and all glass is provided, cut to proper size, ready for fixing on arrival.

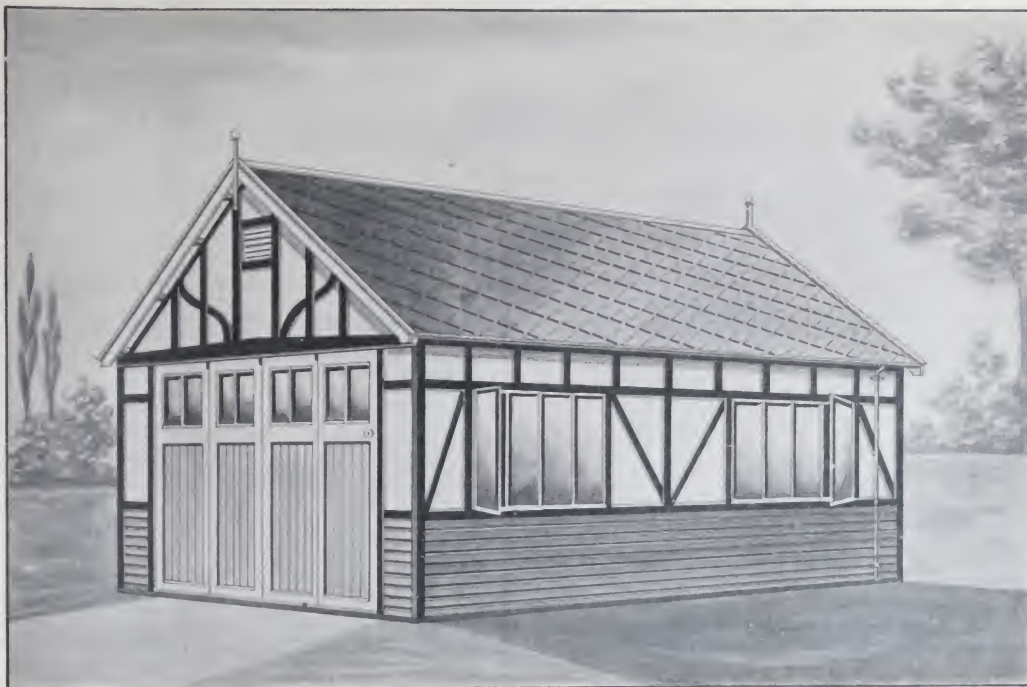

**"SLIDE EASY" DOORS.** With this design we can include, where desired, special "Slide Easy" doors to run on metal track. These are a great convenience where space is at a premium, and the extra cost for the doors is only 20/.

**A DOUBLE STRENGTH FLOOR.**—The floors supplied with the design F. at an extra charge (see List), are built on 1in. planed, tongued and grooved boards, on extra heavy floor joists; and these floors will carry any weight.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**SECTIONALLY BUILT AND CARRIAGE PAID.**—These motor houses are all sectionally built, and all sections are built up complete at our own works before despatch; in addition, we pay carriage to your nearest station in either England or Wales.

**THE FINEST MOTOR HOUSE BUILT BY SUTCLIFFES'.** All our Motor Houses are very good, but this stands out above the others in solid construction and ornamental design. If you are wanting something of outstanding appearance and extra heavy construction; a motor house that will prove better than all others in your district, and one that is fit to house a Rolls Royce car, then you will be quite pleased if you choose this design. It costs a fair price, but it is more than good value for money, and is thoroughly rain and draught-proof in all weathers, and is sure to give twenty years' wear.

**THE EXTERNAL APPEARANCE IS EXCEPTIONALLY SMART.** The base is boarded to a height of approximately 3ft. with our special lin. ornamental weather boards, the remainder for the sides and ends is first covered ½ in. tongued and grooved boards and asbestos sheets, complete with nicely finished overlays, gives the appearance as shown in the illustration.

**THE RED TILED ROOF LOOKS WELL.** The roof is built on extra strong principles, purlins and ½ in. planed, tongued and grooved boards, lathed at approximately 8 ins., centres ready for fixing the red asbestos diagonal tiles and ridge pieces which are also supplied, together with special nails and fittings; also instructions for fixing, or Sutcliffes' will provide a man and just charge the bare expenses. Wood eaves, gutters and rainwater pipes are supplied, together with brackets for fixing. The nicely shaped timber finials with wide barge boards, give a delightful finish to a very reliable roof.

### DESIGN VS.

For PRICES  
SEE LIST  
ENCLOSED.

**INTERIOR CAN BE LINED WITH PLANED BOARDS.** For extra prices see list.

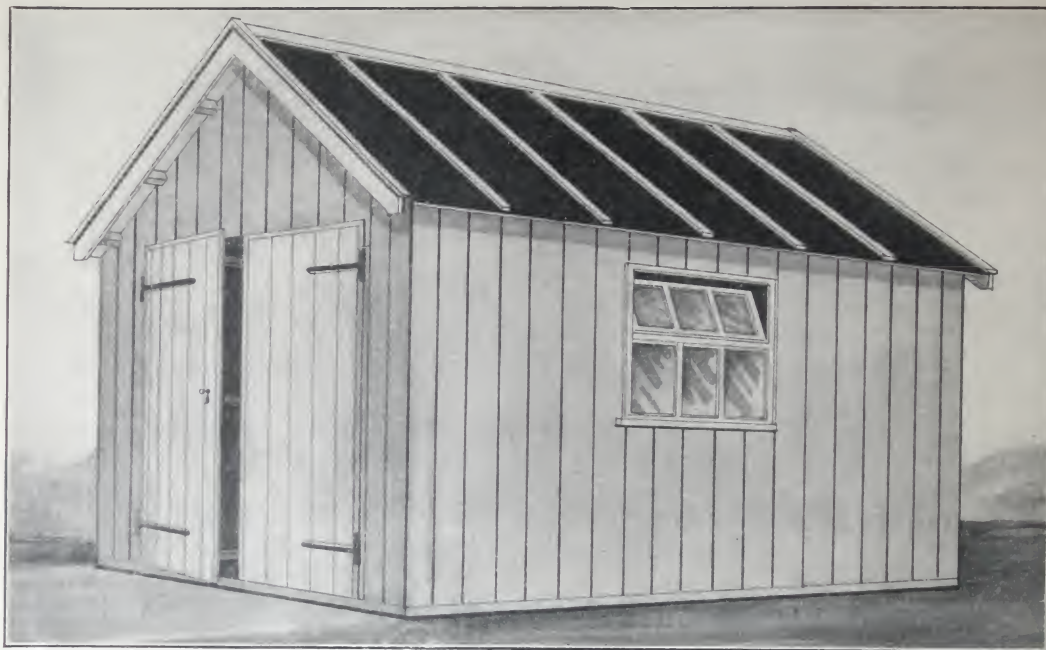

**WONDERFUL SLIDING DOORS WITHOUT EXTRA COST.** This garage is fitted with very superior sliding doors with glass at the top as illustrated. The doors are equipped with "Henderson's TANGENT" Sliding Door Gear, the best in the country, most efficient, very ingenious, and enables even a child to slide the doors "at a touch," and also allows individual entrance without revolving the whole door or when entirely closed.

**CASEMENT WINDOWS ARE INCLUDED.** The two-pane casements are 39 ins. by 30 ins., and three-pane casements 44 ins. by 39 ins., giving ample light, and all the windows are beautifully made and morticed and tenoned together.

**THE FLOOR IS ENORMOUSLY STRONG.** A concrete floor is undoubtedly best for a motor house, but the floor we supply with this house is exceptionally strong built on 1 in. tongued and grooved boards and 4 by 2 floor joists, and where concrete is not desired this floor can be recommended.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**CARRIAGE PAID TO NEAREST STATION.** Sutcliffes' pay carriage to your nearest station, in addition, you are guaranteed satisfaction, and no sale is considered complete until you are satisfied.

Carriage Paid to nearest Station England and Wales

**A NEW DEPARTURE.** Sutcliffes' had originally intended to include only the highest-class Houses in this booklet, but in response to numerous enquiries for a well-made Motor Cycle or Small Two-Seater Motor House at a very low price, they have decided to produce this special design, but instead of making it of  $\frac{1}{2}$ in. tongued and grooved boards, to substitute  $\frac{1}{2}$ in. planed planks, with a tongued and grooved finish about  $\frac{1}{2}$ in. thick. The framing will be substantial, we will never turn out flimsy goods, we value our reputation too highly, and in recommending this little Motor House we have the fullest confidence it will give many years' wear and prove quite reliable. It is built just as good as any of the others, but timber is of lighter weight. If you have a fairly sheltered place then you can buy with confidence knowing that no firm can beat it at the price.

**SUTCLIFFES' GUARANTEE SATISFACTION.** Although low in price, this cheap Motor House is sold on Sutcliffes' money back guarantee, it is stronger and better built, and will give more years' service than hundreds of houses turned out by other firms, and is exceptional value, but we tell you quite frankly it is not as heavily made as the other designs in the booklet.

**THE ROOF IS FELTED AND BATTENED.** The roof boards are  $\frac{1}{2}$ in. planed, tongued and grooved, and then covered with real good "Reinprufe" special brand felt, then batted down with narrow battens. You get a bone-dry roof in all weathers. The smaller sized houses will do for motor cycle only, the medium sizes for motor cycle and side car.

### DESIGN MB.

**For PRICES  
SEE LIST  
ENCLOSED.**

**THE FLOOR IS STRONG.** The floor is built on  $\frac{1}{2}$ in. prepared boards, and 3ins. by 2in. joists, or something equally as good. It will prove quite satisfactory, and is offered at a low price to ensure a big demand.

**WINDOWS AND DOORS.** The double doors are fixed in the end as shown, complete with strong T hinges, good lock and key. The window is mortised and tenoned, and all glass is provided free. The entire building is made in sections to bolt together quite easily with unskilled labour, and all bolts are supplied free.

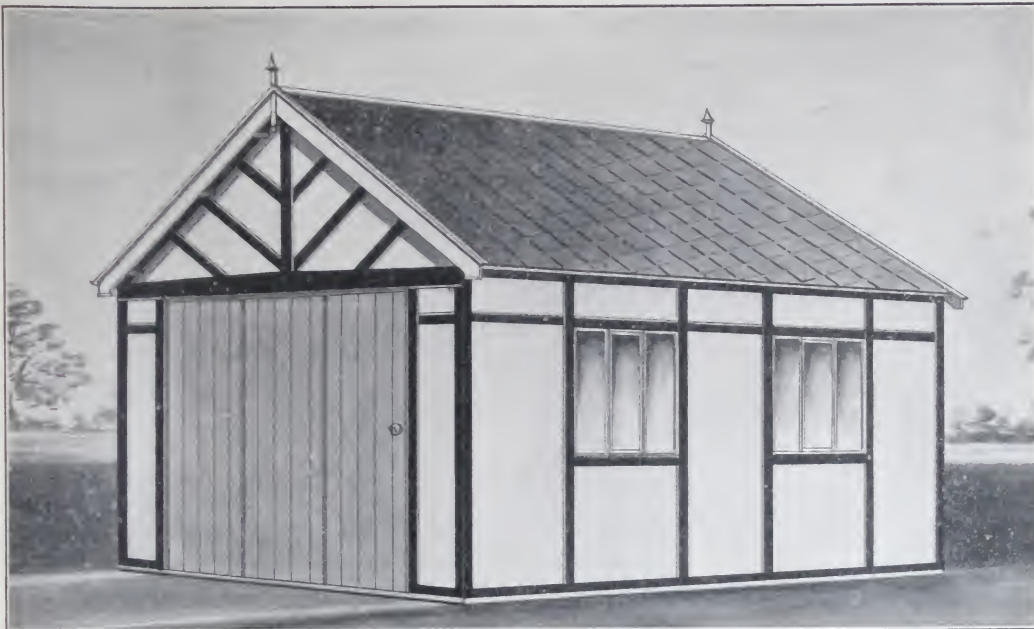

**SIZE OF WINDOWS.** In the larger sizes shown in this booklet the window is made with the top half to fall inwards; size of the window 40ins. by 38ins., and in the smaller sizes, which are 5ft. eaves, the window will be approximately 40ins. by 17ins. deep.

**WIDTH OF DOORS.** In all cases the height of doors cannot be more than within 4 ins. of the height shown at eaves; for example, a motor house, 6ft. eaves, can have doors about 5ft. 8ins. high, and in fixing the width we are always compelled to allow 6ins. at each side on which to hang the hinges. Clients should bear these points in mind when making a selection.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**IT IS JUST AS GOOD AS WE SAY IT IS.** Every part of this house is reliable, every section is carefully examined, and considering the low carriage paid prices, you will be astonished at the value. Remember Sutcliffes' are famed far and wide for real good-class portable buildings, and this house, although built on different lines is going to still further enhance their reputation.

## Sutcliffes' Red-tiled Roof, Fireproof, Asbestos Garage

With Patent Sliding Doors. Heavy Construction. Reasonable Cost.

	Length	Width	Height Eaves	Height Ridge	Floor Extra
No. 1 ...	12ft.	8ft.	7ft.	9ft.	
No. 2 ...	16ft.	10ft.	8ft.	11ft.	
No. 3 ...	20ft.	10ft.	8ft.	11ft.	
No. 4 ...	20ft.	12ft.	8ft.	11ft.	

Carriage Paid to nearest Station England and Wales.

**A VERY HANDSOME FIREPROOF GARAGE.** In some towns it is difficult to obtain the necessary sanction to erect a timber-built motor house. Sutcliffes' have now designed a motor house of very solid construction, handsome design, well lighted, lofty, and convenient to use in winter or summer, the outside walls are covered with asbestos and then neatly stripped with narrow wood strips giving a delightful panel effect. This garage is differently built from many asbestos garages offered to-day: first we cover the solid wood frame with  $\frac{1}{2}$ in. planed, tongued and grooved boards, then over the boards we fix the asbestos. Suppose we sent out merely the wood frame and the asbestos sheets in a loose state, the garage would be difficult to construct, and even when finished, would not be reliable because asbestos, unless it has a timber back to support it, is easily broken. Sutcliffes' asbestos garage is really a wood garage covered on the outside with asbestos this accounts for the extra cost.

**THE DELIGHTFUL RED-TILED ROOF.** Is a thing of beauty, and more solidly built than nine out of ten you have seen. Sutcliffes' entirely board over the roof with tongued and grooved boards, then fix narrow battens, and then the client has only to fix on the tiles after arrival. If you simply have a rafter roof and add the tiles it will not be rainproof and will cause endless trouble.

**EAVES TROUGHS AND RAINWATER PIPES.** With this high grade garage we supply free a full set of eaves troughs and rainwater pipes, also brackets for fixing.

### DESIGN CM.

For PRICES  
SEE LIST  
ENCLOSED.

**ERECTION INSTRUCTIONS.** We do all panelling for gable ends and at front of garage before despatch, but the large panels of asbestos are sent properly packed just ready for fixing on arrival. This work is quite simple, can be done by unskilled labour, and we supply all wood overlays to cover up the joints, cut to proper size.

**WONDERFUL SLIDING DOORS WITHOUT EXTRA COST.** This design is fitted with Henderson's "TANGENT" Sliding Door Gear, the best in the country, most efficient, very ingenious, and enables even a child to slide the doors "at a touch," and allows individual entrance without revolving the whole door, or when entirely closed. Henderson's "TANGENT" Sliding Door Gear is British made and will add many pounds to the value of the garage.

**TWO CASEMENT WINDOWS UP EACH SIDE.** We include two properly morticed and tenoned casement windows up each side, complete with glass cut to size and all opening gear. These windows give ample light.

**ORNAMENTAL TIMBERS, BARGE BOARDS AND FINIALS.** Sutcliffes' build this garage in perfect-fitting sections, everything is provided, and if necessary will send a man to erect, and charge a most reasonable figure. The ornamental timbers give a smart appearance and, judged from any standpoint, this is a building suitable for the most expensive cars.

**CARRIAGE PAID.—DOUBLE-STRENGTH FLOOR ADDITIONAL CHARGE.** We deliver carriage paid to your nearest station, and if you have a double-strength floor the price is shown on list.

No. 4 ... ..	20ft.	16ft.	8ft.	13ft.	

Carriage Paid to nearest Station England and Wales

**READ THIS WONDERFUL SPECIFICATION.** The sides and ends are first entirely covered with  $\frac{1}{2}$ in. planed, tongued and grooved boards on extra heavy frame, then asbestos sheets are cut to size, and all ornamental timbers for overalls are cut to size ready for fixing on arrival. It is not a difficult matter to fix the sheets, and there is a risk of them being broken in transit if fixed before despatch.

**THE RED-TILED ROOF.** First we cover the entire roof sections with  $\frac{1}{2}$ in. planed, tongued and grooved boards, then supply all necessary wood stripping laths and the red asbestos tiles and ridge pieces for fixing on arrival. You get a perfectly dry roof, that should give almost a life time's wear without further attention.

**BARGE BOARDS AND FINIALS.** These are both included for the roof and ensure an artistic finish. The ornamental gable ends are beautifully finished off and look well from any angle. You cannot imagine a more attractive garage, no matter what price you pay.

**EAVES TROUGHS AND RAINWATER PIPES.** With this high grade garage we supply a full set free, also brackets for fixing.

**CASEMENT WINDOWS EACH SIDE.** These really well-finished mortised and tenoned casement windows, two up each side with one pane to open, give ample light, and are complete with opening and closing gear.

**THE DOUBLE STRENGTH FLOOR.** This is built on  $\frac{1}{2}$ in. planed, tongued and grooved boards of superb quality. The floor joists are very thick, put near together to prevent any sagging no matter how large the car.

### DESIGN AT.

For PRICES  
SEE LIST  
ENCLOSED.

**INTERIOR LINING.** If this is desired we can line the sides to eaves and the ends to ridge, the extra cost see list.

**WONDERFUL SLIDING DOORS WITHOUT EXTRA COST.** This garage is fitted with very superior sliding doors complete with glass at the top as illustrated. The doors are equipped with Henderson's "TANGENT" Sliding Door Gear, the best in the country, most efficient, very ingenious, and enables even a child to slide the doors "at a touch," and also allows individual entrance without revolving the whole door or when entirely closed. Henderson's "TANGENT" Sliding Door Gear is British-made and adds pounds to the utility of the garage.

**SECTIONALLY BUILT AND CARRIAGE PAID.** We build this handsome structure in complete easy-fitting sections, all bolts, etc., are provided, and everything possible is done before despatch to facilitate erection, and we pay the carriage to your nearest station.

**THE PLANS WILL PASS ALL LOCAL AUTHORITIES.** Being an absolutely fireproof garage of first-class design, the plans for the building will pass safely before all local authorities in town or country.

**THE BEST IN THE BOOK.** This is easily the best motor house in the catalogue. It is really wonderful value, and must strongly appeal to all who are in a position to pay the price naturally demanded for production of outstanding merit and elaborate construction.

**A FINAL WORD.** You can study all the designs from a dozen different catalogues, and compare specification and prices, but in the end, on merit alone, we think you will be compelled to hand us your order. The reputation of our firm is staked on this special production and all who purchase are guaranteed the fullest satisfaction.

## Sutcliffes' Red-tiled Roof Sports Pavilion,

Summer or Garden House with Verandah. For Plan see Page 3 of Cover.

No.	Length	Width	Height Eaves	Height Ridge	The sizes given include Verandah.
1—	14ft.	10ft.	8ft.	13ft.	
2—	16ft.	16ft.	8ft.	15ft.	
3—	20ft.	18ft.	8ft.	16ft.	

Carriage Paid to nearest Station England and Wales.

**THE SIDES AND ENDS** are built on lin. ornamental, tongued and grooved rustic jointed weather boards, easily the finest boards ever turned out by any timber firm for producing high grade work. The framing is of great strength and varies according to size of house ordered.

**THE DOUBLE STRENGTH FLOOR** is built on lin. planed, tongued and grooved boards on extra heavy framing, usually 4in. by 2in. thick; the floor joists are fixed near together in order to prevent any sagging, no matter how much weight is on the floor.

**A BEAUTIFUL ROOF.** The great height of this building gives the artistic touch so greatly admired; first, the roof is entirely boarded with lin. planed, tongued and grooved boards on heavy framing, then the proper stripping and red diagonal pattern asbestos tiles and ridge pieces are supplied ready for fixing after erection. This ensures a first class bone dry roof.

**THE GABLE ENDS ARE DELIGHTFUL.** We lay either asbestos or a special coloured felt over the boards and then on top we fix ornamental timbers, which when painted produce the half-timbered effect shown in the illustration.

**THE VERANDAH.** This is of convenient width, at least four feet. The verandah floor is latted to allow rain to drip through and easily kept clean. The verandah rails are nicely finished off and the general design is most attractive.

### DESIGN ON.

For PRICES  
SEE LIST  
ENCLOSED.

**THE DOOR AND WINDOWS.** The door has the top half complete with glass and is of nicely panelled design; the windows are of the latest casement design, made to open, and complete with all closing gear. To give ample light we include a window in the back of this building, it is a well finished bold window, and allows for ventilation.

**BUILT IN SECTIONS.** All these pavilions are sectionally built, ready for easy erection on clients' level bed; all glass is provided, also all necessary bolts, but we are prepared at an extra cost to quote a price for say two of our men to erect the building and complete the tiling of the roof.

**INSIDE LINING.** If you want the inside walls lining with lin. planed, tongued and grooved boards, see list, but in most cases unless a very high class job is desired lining is not essential.

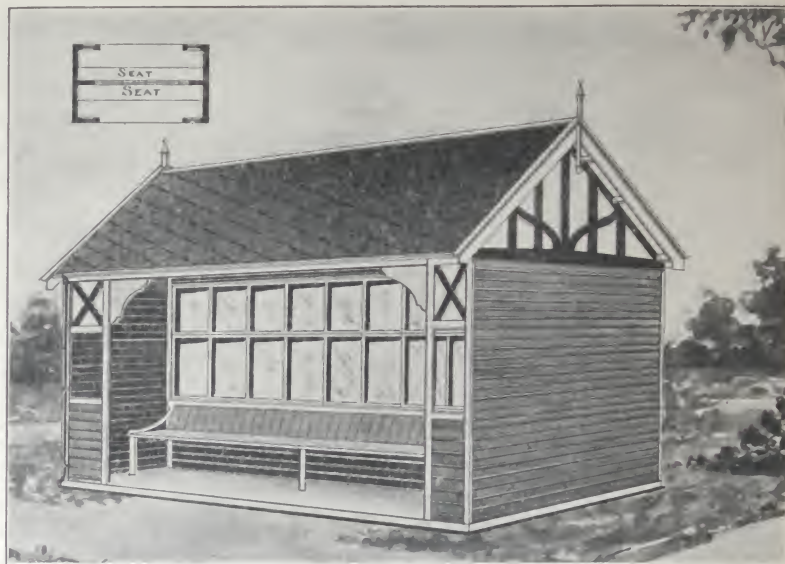

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

**BEFORE YOU DECIDE.** We want you to bear in mind this is a pavilion de-luxe, one that is so strongly made and so attractive in design that you will have to go a very long way to find its equal. We have not attempted to offer anything but the very best and most carefully selected materials in this pavilion, and we are quite sure all purchasers will consider it remarkable value. It is delivered carriage-paid to your nearest station, and every nook and corner will stand the most careful scrutiny.

# Sutcliffes' Ornamental Shelters

for Public and  
Private Grounds,  
Parks and  
Promenades.

## DESIGN MX.

We have designed these Ornamental Shelters to prove extremely serviceable during the summer months for providing shelter from both rain, wind and sun.

BEAUTIFY YOUR GARDEN. It is possible, at very little expense, to greatly improve the appearance of your garden. Sections of trellis work such as these give a decorative screen which, compared with trees, can be moved. The vegetable portion can be easily gained to, and without loss of space, without any trouble.

FOLDING TRELLIS WORK. 12 inch wide sections are made to fold up. They fold up easily and can be used in many places, and are only one in price. We put sections on all sides of the garden, and for the same reason, which makes them the best of any other work. Make sure of having a number of sections this year.

## Sutcliffes' Summer Houses, Revolving Gear if desired.

	Length	Width	Height Eaves	Height Ridge
1 —	6ft.	6ft.	8ft.	8ft.
2 —	7ft.	7ft.	8ft.	9ft.
3 —	8ft.	8ft.	8ft.	9ft.
4 —	9ft.	9ft.	7ft.	10ft.

Carriage Paid to nearest Station England and Wales.

**CONSTRUCTION—SIDES AND ENDS.** Sutcliffes' summer houses are built on  $\frac{1}{2}$  in. planed, tongued and grooved matchboards of the best quality, and the framing is most substantial: in fact, all these summer houses are very strongly built and will look well in any garden, while their usefulness is un doubted. The larger the summer house ordered the stronger the framework used.

**ROOF FELTED AND BATTENED.** The roof is also built on  $\frac{1}{2}$  in. planed, tongued and grooved boards, and very best Ruberoid or similar felt; in addition, this is stripped with nice battens and gives a pleasing appearance in addition to keeping the interior bone-dry.

**SIZE OF WINDOWS.**—On each side of this summer house we include one good morticed and tenoned window, size about 3ft. square. The glass is included cut to size ready for fixing on arrival.

**ORNAMENTAL TIMBER WORK.** The roof has barge boards and finials back and front. It will be seen by the photographic illustration that the front of this summer house is extra smart. The insertion of ornamental timbers in both gables gives a pleasing effect, the entire frontage is most ornamental, yet the cost of the building, considering the robust construction, is very low indeed. We guarantee the fullest satisfaction to all buyers, and send out on a money-back guarantee with all risk of disappointment eliminated.

**REVOLVING GEAR 28 EXTRA.** This summer house can be supplied with revolving gear so that it can be turned round quite easily to catch all the sun and out of the way of the wind. The extra cost for making the special floor and including all revolving gear is only  $\frac{1}{6}$  for all sizes.

### DESIGN G.

For PRICES  
SEE LIST  
ENCLOSED.

**DOUBLE-STRENGTH FLOOR.** The floor to all summer houses is built on double-strength lines, extra heavy battens, then  $\frac{1}{2}$  in. floorboards. Properly fixed, a floor of this nature will always be perfectly dry, never the slightest sign of sagging, will carry any weight, and is most useful. Please do not have a floor unless built on double-strength lines or you will be disappointed.

**FRAMEWORK.** Planed on all sides to greatly improve inside appearance.

**INTERIOR LINING.** The interior of this summer house can be lined with  $\frac{1}{2}$  in. tongued and grooved boards where desired. Extra cost as per price list.

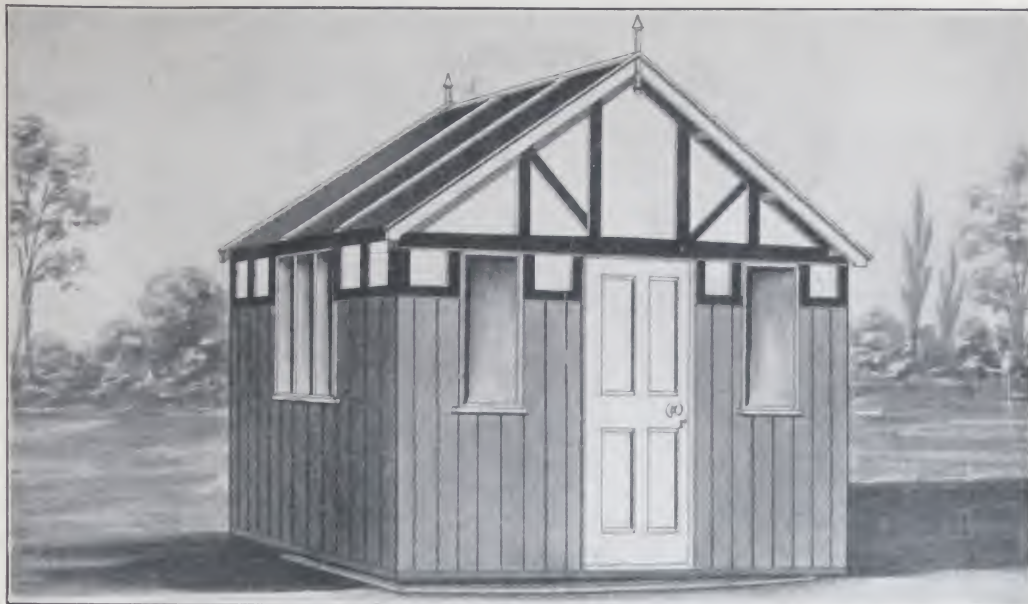

**HEAVY CONSTRUCTION 15 PER CENT. EXTRA.** We recommend clients to have this summer house with the walls built from  $\frac{1}{2}$  in. moulded weather boarding. You obtain substantial build, better appearance, and the additional cost is only 15 per cent.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $7\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**MADE IN SECTIONS.** Sutcliffes' summer houses are all made in sections, you will have no trouble to erect, and all bolts, glass, etc., are provided free.

**CARRIAGE PAID TO NEAREST STATION.** We pay carriage right to your station; this is very important indeed, as carriage charges are now heavy, so be certain you get a carriage paid quotation before you pass any orders, or you will be surprised at the extra amount you have to pay.

## Sutcliffes' Summer House, with Revolving Gear.

	Length.	Width.	Height Eaves.	Height Ridge.
1—	6ft.	6ft.	7ft.	9ft.
2—	7ft.	7ft.	7ft.	9ft.
3—	8ft.	8ft.	7ft.	9ft.

Carriage Paid to nearest Station England and Wales.

**NOTE GENEROUS SPECIFICATION.** Sutcliffes' construct these beautiful summer houses on  $\frac{1}{2}$  in. planed, tongued and grooved boards for the sides and ends, all high-grade quality timber and very massive framing.

**A BEAUTIFUL ROOF—PERFECTLY RAINPROOF.** The roof is built on  $\frac{1}{2}$  in. planed, tongued and grooved boards, over these we fix Ruberoid or other high-grade felt, then nice battens. It is a bone-dry roof you will be proud of. Attractive ridge boards are included, also barge boards and finials, while in addition, we fix ornamental timbers in both gable ends, even with all these advantages the price has been kept most reasonable.

**OPENING CASEMENT WINDOWS—PANEL DOOR.** On each side of the summer house Sutcliffes' fix finest quality casement windows, made to open, and there is also one window on each side of the door. The four-panel door is very smart and complete with lock and key and all necessary furniture. Ornamental timbers have also been inserted to give a very pleasing effect on sides and ends.

**SIZE OF THE WINDOWS.** The high grade casement windows are 44ins. by 39ins. and 39ins. by 30ins. for the two-pane pattern. In each case one pane is made to open and all opening gear is provided. All windows are morticed and tenoned together. The four-panel door is 6 $\frac{1}{2}$ ft. by 2 $\frac{1}{2}$ ft. wide. There is one fixed window on each side of the door.

**ONE INCH WEATHER BOARDS 15 PER CENT EXTRA.** For clients who require extra heavy construction in very exposed parts we recommend the four sides to be built from our lin. ornamental moulded weather boards, which also gives a marked improvement in the appearance, and the additional cost is only 15 per cent.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

### DESIGN AC.

For PRICES  
SEE LIST  
ENCLOSED.

**INTERIOR LINING.** The interior of this summer house can be lined with  $\frac{1}{2}$  in. tongued and grooved boards where desired, the extra cost as per price list.

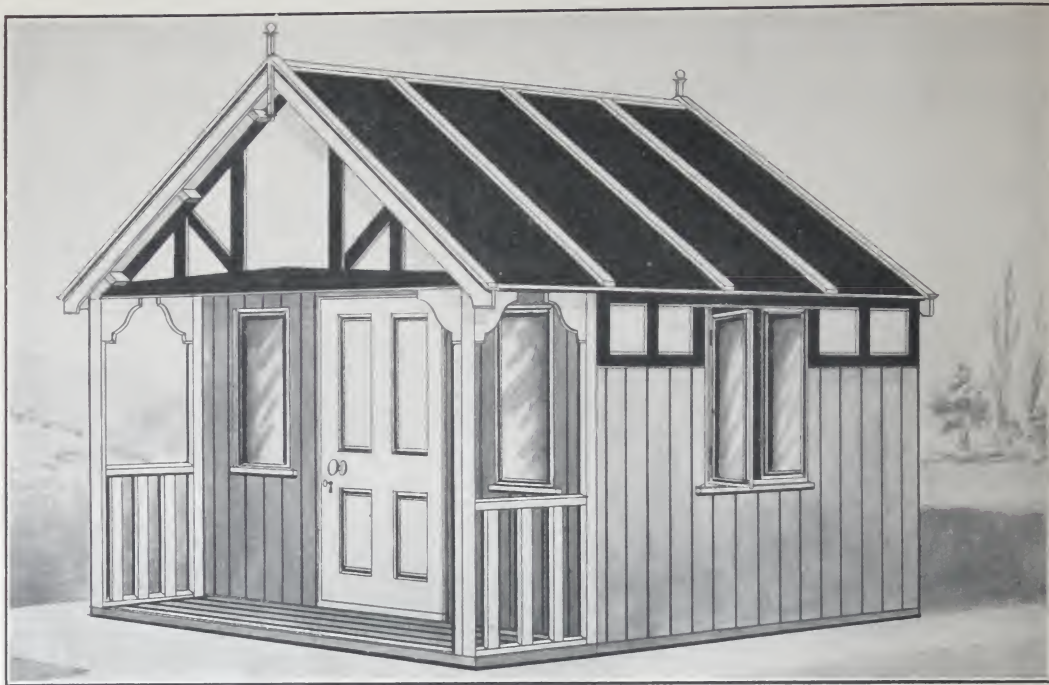

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7 $\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**REVOLVING GEAR, WITH BALL-BEARING WHEELS, ETC.** The patent revolving gear is a very great advantage, the summer house can be turned round in any position quite easily. This very strong gear is mounted on a creosoted base, and is a pronounced success, a reduction of £5 per house can be made if we do not supply this revolving gear.

**ALL FLOORS ARE DOUBLE STRENGTH.** These are sent out with all summer houses, and are built on lin. tongued and grooved boards, with extra heavy framework; they carry any weight and are always bone dry.

**BUILT IN HANDY SECTIONS.** Sutcliffes' summer houses are built in perfect fitting sections, easily erected without skilled labour; all bolts, glass, etc., provided free. This particular summer house is a real beauty, and all who purchase will be delighted.

**FEATURES OF REVOLVING GEAR.** A summer house with patent revolving gear offers many advantages over the fixed kind, a child can turn it round either way, even if two persons are inside. It does not matter which way the wind blows you can get out of the cold, while in summer you can turn it to catch the sun all day long. It is a delightful summer outdoor home, and when nicely painted, will add to the charm of any garden.

## Sutcliffes' Garden House or Afternoon Tea Room.

	Length	Width	Height Eaves	Height Ridge
1—	9ft.	6ft.	7ft.	9ft.
2—	10ft.	7ft.	7ft.	9ft.
3—	11ft.	8ft.	7ft.	9ft.
4—	11ft.	9ft.	7ft.	9ft.
6—	12ft.	9ft.	7ft.	10ft.

All sizes include Verandah.

**GARDEN HOUSES AND THEIR USES.** Sutcliffes' have designed a really beautiful garden house on this page, or it can be used as a sleeping room for those advised to sleep in the open during the summer months. It is a truly well made and very smart house, but the price has been kept within the most reasonable limits.

**THE FOUR WALLS ARE STRONG.** The outside walls are constructed on 2in. planed, tongued and grooved boards of extra quality, the framing is very strong, and when requested we gladly quote for lining the interior with matchboarding, either to eaves or throughout the house, this makes a tremendous difference, both to appearance and especially to the warmth of the shed if required for sleeping out in summer.

**THE ROOF IS ONE OF THE BEST.** Built on similar boards to the sides, then covered with Ruberoid or similar felt, then stripped with narrow battens; it is a roof that must always be bone-dry, very handsome, and nicely finished off.

**VERANDAH, DOOR, WINDOWS, AND ORNAMENTAL TIMBERS.** Special casement windows are provided, made to open, the verandah in front is both useful and very ornamental, the door is well finished and of the four-panel type, the roof is finished off with barge boards and finials, and in addition, on both sides and over both ends we fix handsome ornamental timbers.

**SIZE OF WINDOWS.** The three-pane casement windows are 4ftins. by 3ftins., and the two-pane casements 3ftins. by 3ftins.; both are made with one pane to open and give abundant light and ventilation. All windows are properly morticed and tenoned together. The door is of four-panel design and 6ft. 6ins. by 2ft. 6ins. wide.

**DOUBLE-STRENGTH FLOOR.** With Sutcliffes' garden houses double-strength floors are included, these are built on extra thick battens, then 1in. prepared floor boards; the entire garden house is raised 4in. from the ground level.

### DESIGN H.

**BUILT UP IN SECTIONS.** Sutcliffes' garden house is built in sections, all bolts, etc., provided, and each section will fit perfectly; they are put together at our works before despatch, and delivered carriage paid right to your station. If Sutcliffes' handle your order you get the result of many years' experience in the construction of portable buildings, and always first-class goods at keenest prices.

**INTERIOR LINING.** The interior of this summer house can be lined with 1/2in. tongued and grooved boards where desired. Extra cost as per price list.

**HEAVY CONSTRUCTION 15 PER CENT. EXTRA.** We recommend clients to have this summer house with the walls built from 1in. moulded weather boarding. You obtain substantial build, better appearance, and the additional cost is only 15 per cent.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

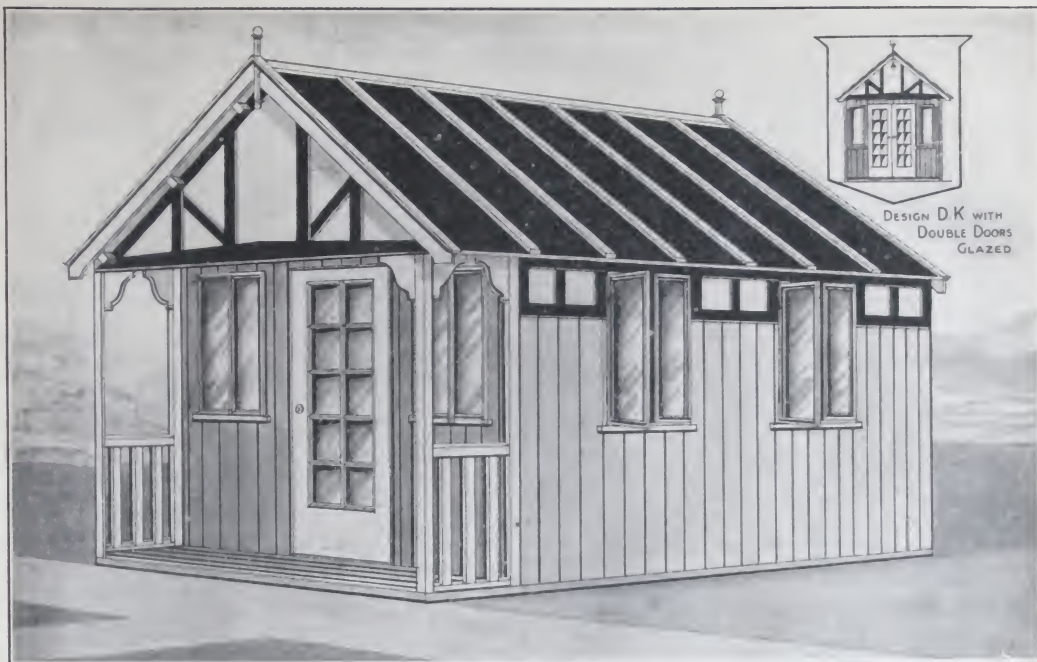

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7 1/2 per cent. only. Purchasers can then finish off in any desired colour after erection.

**AN IMPORTANT PARAGRAPH.** When you get a house for the garden you want it to be a good one, something that you will feel does justice to the surroundings; this is where Sutcliffes' step in, their garden houses are strong and handsome yet moderate in price.

**SPECIAL USES IN SUMMER.** Should you want tea in the garden, one of these houses is a dream of beauty; if a member of the family thinks a night out would be fine, just rig up a camp bed and you will have a sound night's rest with the benefit of the warm summer air.

**EASILY ERECTED BY ANY HANDY MAN.** Sutcliffes' garden houses are easily erected by any handy men; you need not have the slightest fear on this score, and in all cases for standard houses you get Sutcliffes' ironbound guarantee of satisfaction or money back.

## Sutcliffes' Lawn or Garden Pavilion, Refreshment Room, etc.

Including 3-ft. Verandah.

Built on 1-in. Boards.

No.	Length	Width	Height Eaves	Height Ridge	Floor extra
1—	18ft.	12ft.	7ft.	10ft.	
2—	20ft.	12ft.	7ft.	10ft.	
3—	20ft.	12ft.	8ft.	11ft.	
4—	30ft.	15ft.	8ft.	12ft.	

Carriage Paid to nearest Station England and Wales.

**THIS IS A BEAUTIFUL BUILDING.** It is impossible to describe on paper the remarkable qualities of this garden room. It has a most charming appearance from any angle, extra heavy built, rain and draught proof, cosy and comfortable in all weathers, and guaranteed to give at least 20 years service. This lovely garden house must be seen to fully appreciate its numerous exclusive features. There is no risk in dealing with Sutcliffes'; every building is just as good as we say it is and a little better than you would expect.

**MADE TO LAST OVER 20 YEARS.** There is not one single flimsy part, not a board that is not carefully selected, not a joint that does not fit perfectly, while the sides and ends are built on lin. planed, tongued and grooved boards, with extra heavy planed framing, the floor is also built on lin. boards and have extra thick joists underneath, raising the entire building several inches from the ground to ensure perfect dryness, freedom from rot and decay.

**WELL LIGHTED WITH CASEMENT WINDOWS.** This design is remarkably well lighted, one casement window on each side of the French glazed door. Two large casement windows up each side. The casements are finished off in superior style, look extremely well and are provided with opening gear. This large garden pavilion is of delightful design, and when required we can include double French doors, as design "D.K." Extra cost on application.

**SIZE OF WINDOWS.** The casement windows are of good size, properly morticed and tenoned together, complete with all necessary glass cut to size, also the necessary opening gear.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

### DESIGN RC.

For PRICES  
SEE LIST  
ENCLOSED.

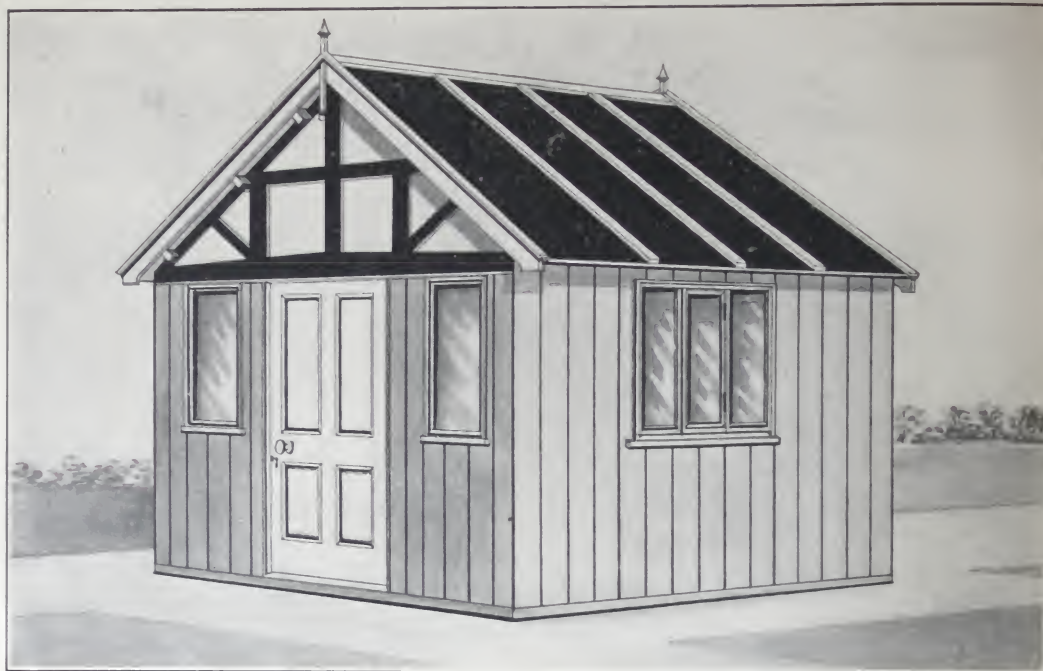

**ROOF AND VERANDAH.** The roof is extremely well finished off with real Ruberoid or similar high grade felt that does not require tarring. The roof will never let a drop of rain in, while along the front, three feet wide, is a delightful verandah. Over both gable ends and under the eaves, as shown in the illustration, we fix ornamental timbers; these add greatly to the general appearance and make these garden houses stand out above all others; in fact, there is not a single lawn or garden in this country on which one of these houses would not prove a delightful addition.

**ORNAMENTAL MOULDED WEATHER BOARDS.** We are prepared to make this pavilion on lin. thick ornamental weather boards at an extra cost of five per cent. only, and in all cases we advise clients to have these special boards. They are far superior to the ordinary tongued and grooved boards and no rain can ever penetrate through them.

**INTERIOR LINING.** The interior of this summer house can be lined with  $\frac{1}{2}$  in. tongued and grooved boards where desired. Extra cost as per price list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $7\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**CARRIAGE PAID AND BUILT IN SECTIONS.** Although the smallest house advertised weighs close on  $1\frac{1}{4}$  tons, we pay the carriage, you know exact cost, and each building comes to you in perfect-fitting sections that do not require skilled labour to erect. Sutcliffes' are one of the biggest firms in the country making delightful garden houses, but never any flimsy ones.

## Sutcliffes' Garden Retreat, Sleeping and Reading Room.

Length	Width	Height Eaves	Height Ridge
6ft.	6ft.	7ft.	8ft.
7ft.	7ft.	7ft.	9ft.
8ft.	8ft.	7ft.	9ft.
9ft.	9ft.	7ft.	9ft.

Carriage Paid to nearest Station England and Wales.

**DETAILS OF CONSTRUCTION.** Sutcliffes' build the four walls of this beautiful garden house on  $\frac{1}{2}$ in. prepared tongued and grooved boards, with extra heavy framing all finest quality foreign timber, no home grown, low-grade timber ever used.

**A PRETTY ROOF—PERFECTLY RAINPROOF.** Sutcliffes' make the roofs of these garden houses very good,  $\frac{1}{2}$ in. prepared boards are used, over extra sound planed framing of great strength, then on top of boards we fix Ruberoid or similar felt, and afterwards nice stripping battens. You will see by the illustration how very smart the roof is finished off with attractive barge boards and finials, with plenty overhang both back and front.

**ORNAMENTAL TIMBER WORK.** Sutcliffes' have aimed at producing a delightful garden retreat, that will be greatly admired and still be reasonable in cost; over both eaves we fix very nice ornamental timbers, these, when painted, say, in black and white, give a most imposing effect at little cost. Sutcliffes' know that you can easily pay double their prices for more ornament, but in these days of economy it is the best plan to select out something substantial, designed for long wear, but still it must be a garden house that does full justice to the immediate surroundings, we do not care in what position this house is placed it will prove of great beauty and utility.

**CASEMENT WINDOWS AND DOORS, ETC.** The four panelled door fixed in the front, complete with best hinges, lock and key, etc., is of sound construction and smart design, on each side we fix casement windows made to open, all opening gear provided while there is also one window on each side. You can imagine what a lovely little room it must be on a sunny afternoon, the sizes are convenient, you can serve tea, have a game of cards, spend a few hours reading, and at night, if inclined, on a good night's rest on a camp bed; it is a three fold building, never idle.

### DESIGN I.

For PRICES  
SEE LIST  
ENCLOSED.

**SIZE OF WINDOWS.** The smaller sizes have casement windows, two panes, one to open, size 30ins. by 30ins., and the largest size, three-pane casement windows, size 44ins. by 39ins. The front windows are fixtures and of similar height, but less in width.

**THE DOUBLE-STRENGTH FLOOR.** You must have a good floor. Many garden houses are spoiled with poor floors. Sutcliffes' give you the best built on  $\frac{1}{2}$ in. special floor boards and extra thick battens, you could not wish for a better bone-dry floor in all weathers.

**INTERIOR LINING.** The interior of this retreat can be lined with  $\frac{1}{2}$ in. tongued and grooved boards where desired. Extra cost as per price list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $7\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

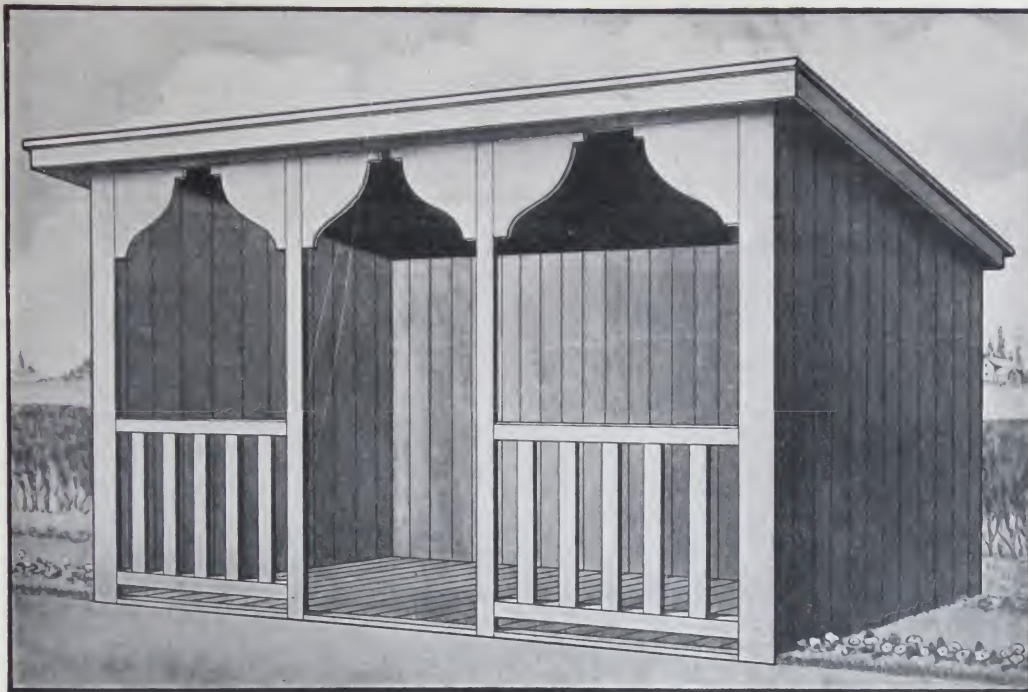

**A CHEAPER MODEL SUPPLIED.** This design is also made on  $\frac{1}{2}$ in. boards with a  $\frac{1}{2}$ in. floor. For prices, see list.

**MADE IN EASY-FITTING SECTIONS.** All Sutcliffes' garden houses are built in easy-fitting sections, all bolts and ironwork provided, also all glass for windows, there is nothing lacking.

**ORNAMENTAL MOULDED WEATHER BOARDS.** These exceptionally fine  $\frac{1}{2}$ in. thick boards can be supplied for sides and ends at an extra cost of 15 per cent. only.

**CARRIAGE PAID TO NEAREST STATION.** This is a big item, so be sure you get a carriage paid price or you will be astonished at the charges you have to meet.

## Sutcliffes' Cheap Garden Shelter.

	Length	Width	Height Front	Height Back
1—	5½ft.	4ft.	6ft.	5ft.
2—	6½ft.	4ft.	6ft.	5ft.
3—	7ft.	5ft.	6ft.	5ft.
4—	8½ft.	6ft.	6½ft.	5ft.
5—	12ft.	6ft.	7ft.	5½ft.

**CONSTRUCTION, SIDES AND BACK.** The two sides and back are built on ½ inch planed, tongued and grooved best quality boards with heavy inside framing, in all cases we build on most substantial lines, never anything inferior. Although this garden shelter is wonderfully low in price it is so well built it should keep in excellent condition for over ten years.

**LOOK AT THE ROOF.** The roof is also made on ¾ inch tongued and grooved boards like the other parts of the shelter and in addition is covered with Ruberoid or similar felt, then over the felt we fix narrow battens, you could not wish for a better roof, one that is bone dry in all weathers.

**HANDSOME FRONT DESIGN.** We have endeavoured to make this garden shelter of smart appearance but still have managed to leave out all features which add greatly to the cost. The open front gives plenty of light at all times and on warm summer days this shelter forms a most attractive reading or resting room, and the larger sizes can be used for serving afternoon tea, or for a children's playroom in wet weather, surely no person with a garden will be without a shelter when it can be purchased so very cheaply.

**ORNAMENTAL PILLAR FRONT.** The front portion of this garden shelter as shown in illustration is very smart, yet there is nothing costly in the ornamentation, in fact this garden shed is sold at a price you cannot buy materials for locally and in most cases labour charges would be prohibitive.

**A CHEAPER MODEL SUPPLIED.** This design is also made on ¼ in. boards with a ½ in. floor. For prices, see list.

### DESIGN CX.

For PRICES  
SEE LIST  
ENCLOSED.

**FLOOR INCLUDED.** You cannot think of a good garden house without a floor, and Sutcliffes fix a wonderful strong floor, the entire shed is raised several inches from the ground, the floor is built on 1 inch prepared boards and extra heavy joists.

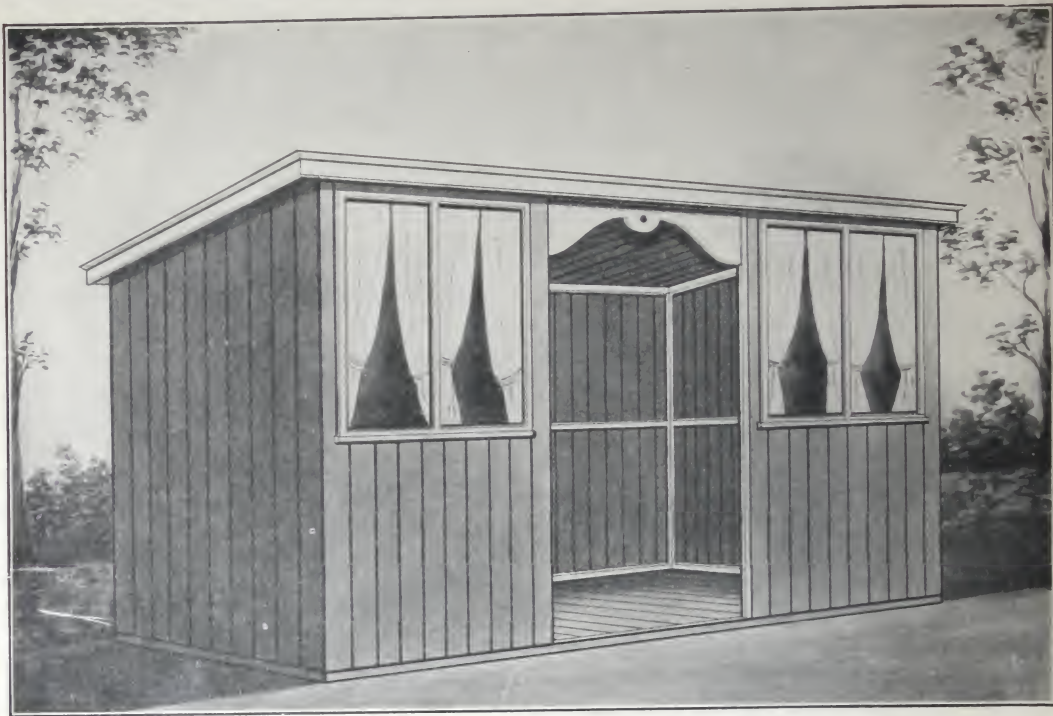

**SECTIONAL AND CARRIAGE PAID.** All Sutcliffes' garden houses are built in sections, easily erected and all bolts, etc. are provided, and most important carriage is paid right to your station.

**INCREASE IN SIZE.** If the sizes shown are too small, we are prepared at an extra cost to alter sizes to suit the wishes of our clients, but advise 1 in. tongued and grooved moulded weather boards for the sides and ends. If the size is increased above those shown, a price will be quoted on receipt of full particulars.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**A GARDEN HOUSE FOR EVERY HOME.** It does not matter how small your garden, one of these houses will prove a great boon. You will get hundreds of hours enjoyment at a limited cost.

**THIS GARDEN HOUSE IS A BARGAIN.** Although sold at such a remarkably low figure this garden house is a bargain, you will not regret the expense and it will give many years' excellent service. Of course we do not pretend this shelter to equal our more expensive designs but it is just the one for those of limited means.

## Sutcliffes' Garden Houses.

	Length	Width	Height Front	Height Back
1—	6½ft.	4ft.	6ft.	5ft.
2—	7ft.	5ft.	6ft.	5ft.
3—	8½ft.	6ft.	8½ft.	5ft.
4—	12ft.	8ft.	7ft.	5½ft.

Carriage Paid to nearest Station England and Wales.

**GENERAL CONSTRUCTION.** The four walls are built on the finest quality planed, tongued and grooved matchboards ¾ inch, while the framing is fixed inside and is always most substantial, there is nothing flimsy about these houses and they are fit to grace any garden where price has to be carefully studied.

**LOOK WHAT A PERFECT ROOF.** The roof, like the walls, is built on ¾ inch boards and over these we fix Ruberoid or similar high-grade felt, then nice battens so that the felt can never blow off, the garden house is always rainproof and very cosy.

**A VERY NICE APPEARANCE.** This garden house is sent out with a nice casement window on each side of the doorway, the smaller houses having one pane window and the larger houses two or three, this means you get plenty of light, the house is always warm.

**THEY ARE ALL BUILT IN SECTIONS.** A sectional garden house that can be fixed up in about one hour is ten times more useful than a permanent structure; Sutcliffes know this and construct these garden houses on approved lines so that erection can be performed very easily by anyone. All bolts, glass, etc. are provided free. Don't hesitate to order one of these really smart structures, you are guaranteed satisfaction or money back every time.

**A BONE DRY FLOOR.** Sutcliffes' provide a wonderful strong floor with all garden houses: 1-in. tongued and grooved boards and very heavy framing. The house stands on the floor and the actual floor is raised several inches from the ground, you get perfect dryness and no fear of decay. Ordinary floors are soon spoiled but Sutcliffes' double strength keep in good condition for twenty years.

### DESIGN TN.

For PRICES  
SEE LIST  
ENCLOSED.

**A DOOR CAN BE INCLUDED.** A batten door can be provided for the first three sizes of the design TN at an extra cost of 10/- made to open outwards and complete with lock and key, while in the largest size a four-panel door can be provided, complete with all necessary furniture, for the sum of twenty shillings extra.

**INCREASE IN SIZE.** If this garden house is too small we can easily quote for larger sizes, anything up to 20ft. in length and say 12ft. to 15ft. in width, with corresponding increase in height, but for these larger buildings we suggest the sides and ends should be made on 1-in. tongued and grooved specially moulded weather boards; these ensure a perfect building and are well worth the extra cost.

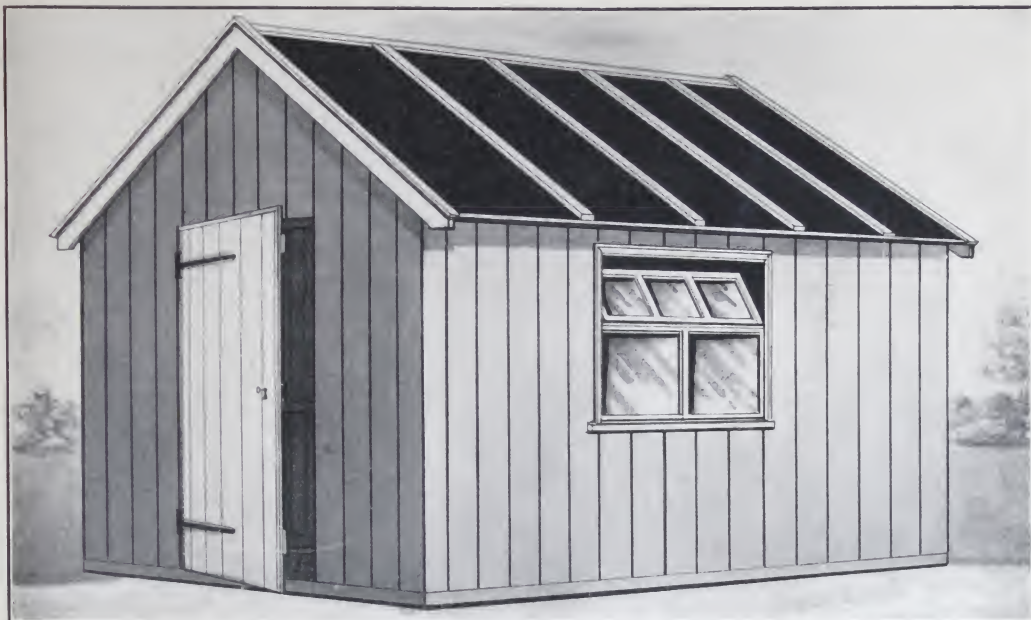

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**A CHEAPER MODEL SUPPLIED.** This design is also made on ½ in. boards with a ½ in. floor. For prices, see list.

**CARRIAGE PAID BY SUTCLIFFES'.** All these garden houses are sent carriage paid to nearest station, you know exact cost.

**DON'T BE WITHOUT A GARDEN HOUSE.** When you can obtain a beautiful garden house for such a small outlay we have confidence you will take full advantage of this low priced offer. Sutcliffes' build these houses on mass production lines and customers get the benefit, to-day we feel certain this garden house represents one of the finest bargains obtainable and we are certain of a great demand.

## Sutcliffes' Low Priced Garden Shed,

Store Room or Camping Hut.

	Length	Width	Height Eaves	Height Ridge	Floor Extra

3—	9ft.	8ft.	5ft.	7ft.	
4—	10ft.	7ft.	5ft.	8ft.	
5—	12ft.	8ft.	5ft.	8ft.	
6—	9ft.	8ft.	6ft.	7ft.	
7—	10ft.	7ft.	6ft.	8ft.	
8—	12ft.	8ft.	6ft.	8ft.	

Carriage Paid to nearest Station England and Wales.

**A SPECIAL APPEAL—WHERE PRICE IS IMPORTANT.** We believe there is a very large market for a low-priced garden shed or little store room, built on plain lines, nicely lighted, rainproof and fairly substantial, a building easy to erect, easily moved when necessary, and one that will safely store garden tools, unwanted household goods; in fact, everything that is just a little too valuable to leave in the open and too lumbersome to keep in the house. An expensive building is out of the reach in most cases, and an elaborate structure is not required. With these points in view, we have designed the building shown on this page.

**GENERAL SPECIFICATION AND OTHER DETAILS.** The sides, ends and roof are built on selected planed, tongued and grooved  $\frac{1}{2}$  in. boards, actual finish about  $\frac{1}{4}$  in. thick. Although not as strong as our usual make, they are quite all right for this purpose, and can be depended on. Sutcliffes' never use low-grade timber, though the country is flooded with it, and whenever you are able to beat Sutcliffes' prices, you will find the timber is greatly inferior, the workmanship not up to the mark, and the framing too weak to be of sound service. In this building the smaller sizes will have 2 in. by 1  $\frac{1}{2}$  in. frame, and the larger sizes 2 in. by 2 in. The roof is covered with good felt that does not require tarring, and stripped battens. All the sheds are made in sections to bolt together. All bolts, lock and key, glass for windows, supplied free, and all sections are made complete. You will be able to fix up any one of these sheds with unskilled labour in two hours.

### DESIGN TM.

For PRICES  
SEE LIST  
ENCLOSED.

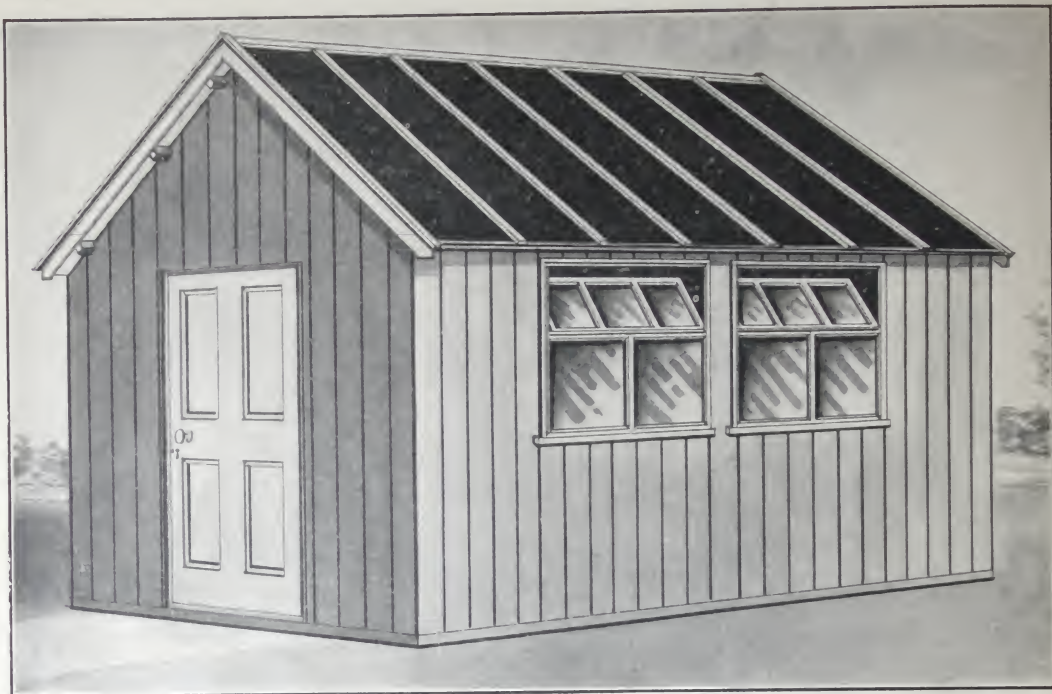

**THE DOOR AND WINDOW.** The door is strongly battened, fitted on good quality "T" hinges, and complete with press lock and key. The window is a five-pane one, nicely morticed and tenoned, and gives ample light.

**DOOR AND WINDOW** can be fixed in any position without extra charge.

**THE FLOOR IS STRONG AND WILL CARRY ANY WEIGHT SAFELY.** The floor is built on  $\frac{1}{2}$  in. planed, tongued, and grooved boards, with 2 in. by 2 in. joists. The house stands on top of the floor. Now this floor is quite reliable, but is not as heavily built as our double-strength floors, but is good for all ordinary purposes, and is a genuine bargain at the prices shown in list. In nine cases out of ten it is the best plan to order a floor with the shed, then everything can be kept clean and dry.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7  $\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**THE MONEY-BACK GUARANTEE OF SATISFACTION.** Do not think just because the price is low this building is not safe to purchase—it is just as good as we say it is in every nook and corner, and you can order with confidence. If for any reason you are not fully satisfied after a thorough examination in your own home, send it back carriage paid, and Sutcliffes' return your money in full—all risk is eliminated.

## Sutcliffes' Potting Shed, Garden Store Room, Small Workshop and General Purpose Room.

	Length	Width	Height Eaves	Height Ridge	Floor Extra
1—	8½ft.	5ft.	5ft.	6ft.	
2—	9½ft.	6ft.	5½ft.	7ft.	
3—	12ft.	8ft.	6ft.	8ft.	
4—	15ft.	9ft.	7ft.	9ft.	
5—	20ft.	10ft.	7ft.	9½ft.	

Carriage Paid to nearest Station England and Wales.

The first three sizes have battened doors, the two largest sizes four panelled doors.

**METHODS AND MATERIALS USED.** Sutcliffes' build these really useful general purpose sheds with the sides and ends on ½in. planed, tongued and grooved match boards, with very heavy inside framing. There is nothing to rot with exposure, and you are certain of a strong, durable, well lighted, useful building, that will keep in good condition for nearly twenty years. If you want greater strength, you can have 1in. boards for the sides and ends at an extra cost of only ten per cent. This is indeed a wonderful bargain, and anyone who understands building will tell you so.

**THE ROOF IS MADE WATER-TIGHT.** Unless you have a good roof no shed is satisfactory. Sutcliffes' construct the roof on the same high-grade boards as the sides, and, in addition, fix Ruberoid or similar felt on the top. The felt is the wonderful quality, not the common sanded kind, but something that will wear well for many years; over the felt, as shown in the illustration, we fix narrow battens to keep the felt in position, you thus get a roof that is absolutely bone-dry at all times, and one that you will be proud of.

**A CHEAPER MODEL SUPPLIED.** This design is also made on ½in. boards with a ½in. floor. For prices, see list.

**THE WINDOWS ARE IMPORTANT.** In the first two sizes we fix one window with the top half built to open inwards; it is a really well-built window, and all glass is provided. In the other sizes we fix two windows alongside each other, these give ample light, but in the largest size we could fix three windows if required. All the windows are of the same pattern, are exceptionally

### DESIGN CF.

For PRICES  
SEE LIST  
ENCLOSED.

strong, and will be much admired. It is a well-known fact that for many purposes plenty of light is essential, and this has been provided for. This shed is strong but plain, nothing ornamental about it, this means the price has been kept to the lowest limits.

**SIZE OF WINDOWS.** In the larger size houses the windows will be as illustrated; approximate size, 37ins. by 32ins., two windows up one side. In the smaller houses the windows are not so large, but in every case ample light is given and all window frames are morticed and tenoned together and beautifully finished off.

**SIZE OF DOORS.** The first three sizes have battened doors, as shown in design G.F., but the two largest sizes have four panel doors, as illustrated; these doors are about 6½ft. by 2½ft. wide, and complete with all necessary furniture.

**DOOR AND WINDOW** can be fixed in any position without extra charge.

**A VERY SOLID FLOOR.** If you want a wood floor let it be a good one. Sutcliffes' lay down very heavy joists, then nail 1in. tongued and grooved boards, the shed stands on top of the floor the actual floor is raised four inches from the ground and can never get damp.

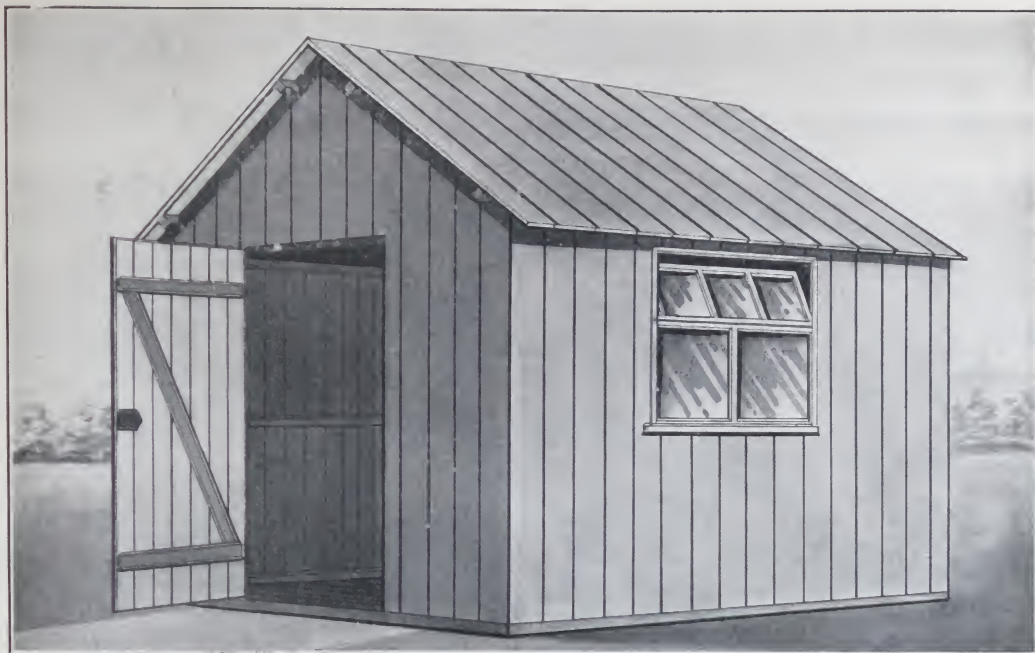

**ALL ARE BUILT IN SECTIONS.** We build these sheds in perfect-fitting sections, and there should be no trouble to fix up. All bolts, glass, etc., are provided, and we pay carriage to your nearest station.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

**OUTSIDE DECORATION** as Design GF, 7½ per cent. extra.

**ALWAYS IN DEMAND.** The demand for these sheds is constant. Quite apart from use in the garden, they can be turned to other things, and in every home a large, portable shed is always a great boon.

## Sutcliffes' Low Priced Portable Shed.

	Length.	Width.	Height Eaves.	Height Ridge.	Floor Extra
1—	6½ft.	5ft.	5ft.	6½ft.	
2—	8ft.	5ft.	5ft.	6ft.	
3—	9½ft.	6ft.	6ft.	7ft.	
4—	12ft.	8ft.	6ft.	8ft.	
5—	15ft.	9ft.	6ft.	8ft.	

Carriage Paid to nearest Station England and Wales.

**WELL BUILT BUT VERY CHEAP.** Sutcliffes' portable is built on ½in. planed, tongued and grooved boards, with heavy inside framing. There is nothing to rot with exposure, and the materials are of superb quality. Although low in price we have not spoiled the quality—no thin timber—everything of the best; the low price is accounted for by our great timber buying capacity, and the plain nature of the shed.

**THE ROOF IS WELL BUILT.** Sutcliffes' use ½in. planed, tongued and grooved boards for the roof and very substantial framing. We are certain you will find the roof a good one, and if you wish at some later stage to cover the roof with good felt, this is a nice job that can be done without trouble by any handy man. No need to pay anything for labour in felting the roof. Some firms use roof boards that are not tongued and grooved, these can never be a success, and unless you have a good roof the entire shed is a failure. If you buy one of Sutcliffes' portable sheds you are guaranteed satisfaction or money back every time, and we know you will be well pleased. Not one client in two hundred return their goods to Sutcliffes' and ask for their money back, though all of them have the option of doing so. Surely this proves the firm gives excellent value.

**A REMARKABLE DOUBLE-STRENGTH FLOOR.** The floors of all Sutcliffes' portable houses are of extra strength, and at all times perfectly dry. This is how we build them: Very heavy floor joists are laid down, then on the top we nail superb quality 1in. tongued and grooved boards; the shed stands on top of the floor, but the free current of air passing right under the floor entirely does away with the chance of dampness in any weather.

**A CHEAPER MODEL SUPPLIED.** This design is also made in ½in. boards and a ½in. floor. For prices, see list.

### DESIGN GF.

For **PRICES**  
SEE LIST  
ENCLOSED.

**WINDOWS AND DOORS.** The door is strong and well battened, fixed on heavy "T" hinges and complete with lock and key. We only fix the window up one side, but in the largest size sheds we should fix two windows, with the top half to open, and the windows could be fixed about four feet apart.

**SIZE OF WINDOWS.** In the three largest sizes the window frame is 37ins. by 32ins. and nicely morticed and tenoned; in the smaller houses the window is of less size, but in every case beautifully made, and the shed is always well lighted.

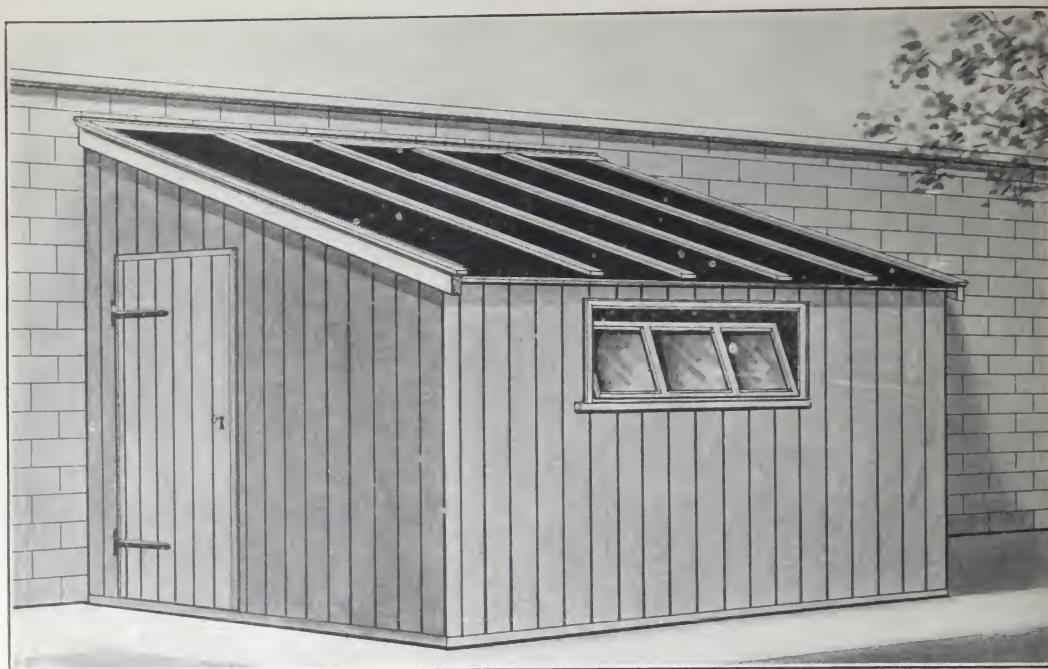

**DOOR AND WINDOW** can be fixed in any position without extra charge.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**ALL SHEDS ARE BUILT IN SECTIONS.** All Sutcliffes' portable sheds are built in easy-fitting sections. All bolts are provided, and in addition, we provide the glass for the windows. You will have no trouble to fix up, and we hope that you will not hesitate in passing your orders. We could have placed on the market a weaker built shed to compare in price with some other makers, but it would not prove a success, and we will not even when asked supply or quote for flimsy-built sheds that can never give good service.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

**A MOST USEFUL SHED IN EVERY YARD OR GARDEN.** Almost every home must feel the need of a plain shed. It will store so many articles not wanted indoors. It will do for the kiddies to play in. It is a nice store for vegetables, etc., and must be well worth the cost for all who can find the room for one.

## Sutcliffes' Lean-to Store Room, to fit against a Wall. (No Back Included)

	Length.	Width.	Height Front.	Height Back.	Floor Extra.
1—	6ft.	4ft.	5ft.	6ft.	
2—	7ft.	5ft.	6ft.	7ft.	
3—	8ft.	7ft.	6ft.	7ft.	
4—	12ft.	8ft.	6ft.	8ft.	
5—	16ft.	10ft.	7ft.	9ft.	

Carriage Paid to nearest Station England and Wales.

**SPECIAL CONSTRUCTION DETAILS.** Just read these construction details carefully. The front side, and both ends are built on  $\frac{1}{2}$  in. planed, tongued and grooved boards of first-class quality; in fact you cannot beat them; the framing is very heavy, almost as strong again as many firms use, yet the price has been fixed very low. No back is included, it is intended to fix this shed against a wall. Many of our patrons have certain places where no back will be required, and this is why we offer a special lean-to shed, but should you require the back section for any size we shall be happy to quote you the extra price.

**THE ROOF IS REALLY WATERTIGHT.** The roof is built from the same boards as the sides, but, in addition, we cover with best felt, then strip with battens as shown in the illustration. You get an absolutely bone-dry roof that will stand all weathers.

**DOOR AND WINDOWS AS ILLUSTRATED.** A firm, well-battened door is fixed on heavy 'T' hinges and complete with press lock and key, the window can be fixed as desired in any position, but is best as shown. In the larger sizes two windows can be included to give more light. Sutcliffes' have designed this shed to meet the special wants of clients in need of a strong, serviceable lean-to shed at a low price; but not flimsy built on thin timber, as so many are to-day. If you go for a weakly-built shed you will always regret the step. Pay a trifle more, get a good one, and, above all, remember Sutcliffes' ironbound guarantee of satisfaction or money back.

**DOOR AND WINDOW** can be fixed in any position without extra charge.

### DESIGN BA.

**For PRICES  
SEE LIST  
ENCLOSED.**

**THE FLOOR IS ONE OF THE BEST.** The floor is an extra charge, but may not always be required. Sutcliffes' floors have no equal: this is how they are built:—Extra strong battens are laid down, then over the battens we nail fine quality lin. tongued and grooved boards, the shed standing on top of the floor with the actual floor raised many inches from the ground. You could not wish for a stronger or better floor no matter what you pay, and the floor is the main part of the shed.

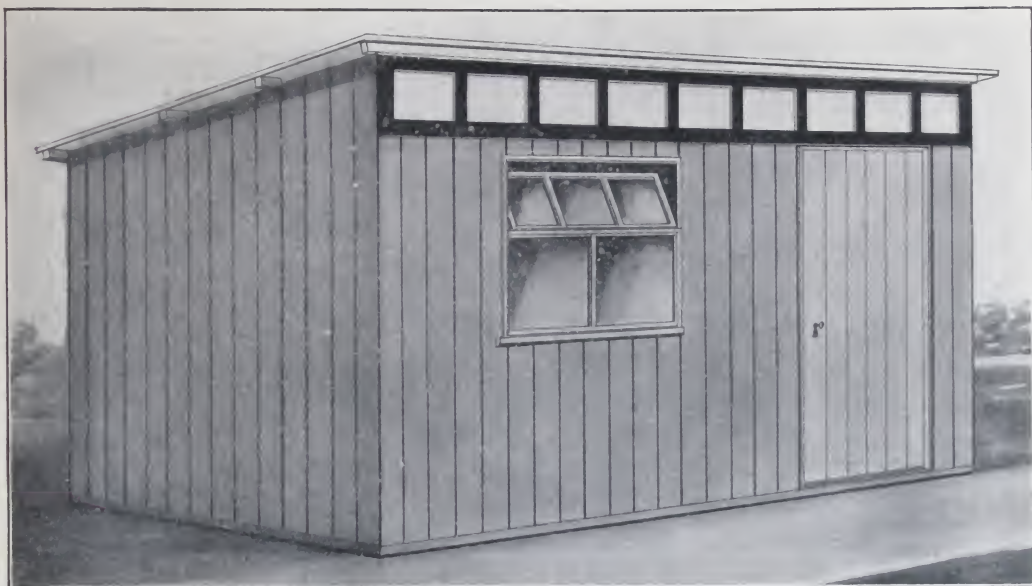

**A CHEAPER MODEL SUPPLIED.** This design can be built on  $\frac{1}{2}$  in. boards and the floor on  $\frac{1}{2}$  in. boards. For prices, see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7 $\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

**WHAT CAN YOU DO WITH IT.** Almost every home will have many uses for a building of this kind: the larger sizes will do well as a wash house, coal place or additional kitchen room. If you fix a gas or oil stove a first-class kitchen is waiting for you, while at all times you have handy a dry place for storing goods not often required. Just think what endless things you have in the house that would be better if moved to a place of safety until required. There is no doubt that all who invest a few pounds in one of these sheds will find the money spent to advantage. Perhaps the kiddies want to keep a few rabbits, or want a playroom for wet days—here you have a shed that need never be idle, and we anticipate a great demand.

## Sutcliffes' Cottage Lean-to Store Room, Garden Hut, Tool Shed, Wash House and Handy Out-door Spare Room.

	Length.	Width.	Height Front.	Height Back.	Floor Extra.
No. 1—	6½ ft.	4 ft.	8 ft.	5 ft.	
2—	7 ft.	5 ft.	8 ft.	5 ft.	
3—	8½ ft.	7 ft.	8 ft.	5 ft.	
4—	10 ft.	8 ft.	7 ft.	5 ft.	

Carriage Paid to nearest Station England and Wales.

**SPECIAL FEATURES OF CONSTRUCTION.** This lean-to store room is built on carefully selected  $\frac{1}{2}$  in. planed, tongued and grooved boards, free from sap, and with ordinary care will give 20 years' solid service in all weathers; the framing is more substantial than you would expect, and every nook and corner can be examined from any point, and all who see this building are sure to pronounce it remarkable value, it will be useful in every back yard or garden, while business men will find many excellent uses in their yards; the quality is good all through, and the price is lower than you can get a similar shed for locally.

**THE FRONT CONTAINS** one good sized window, properly mortised and tenoned, and finished in beautiful style; 21 oz. glass is cut to size and included ready for instant fixing on arrival; the door is very strong, fixed on good quality "T" hinges, complete with lock and key, and made to open inwards.

**SIZE OF THE WINDOW.** In the larger sizes the window is sent out as illustrated and the size 37ins. by 32ins., with the top half to fall inwards for ventilation, but in the smaller sizes the window is of reduced size. In all cases the window frames are properly mortised and tenoned together, extra well finished off.

**DOOR AND WINDOW** can be fixed in any position without extra charge.

**THE ROOF WILL STAND RAIN AND SNOW.** There will never a drop of rain enter the building. Over the  $\frac{1}{2}$  in. specially prepared boards we fix Ruberoid or similar felt, never any common low grade felt, and over the felt narrow battens. A roof treated in this way will always be a pleasure and require practically nothing in repairs.

### DESIGN MA.

For PRICES  
SEE LIST  
ENCLOSED.

**FRAMEWORK.**—Placed on all sides to greatly improve inside appearance.

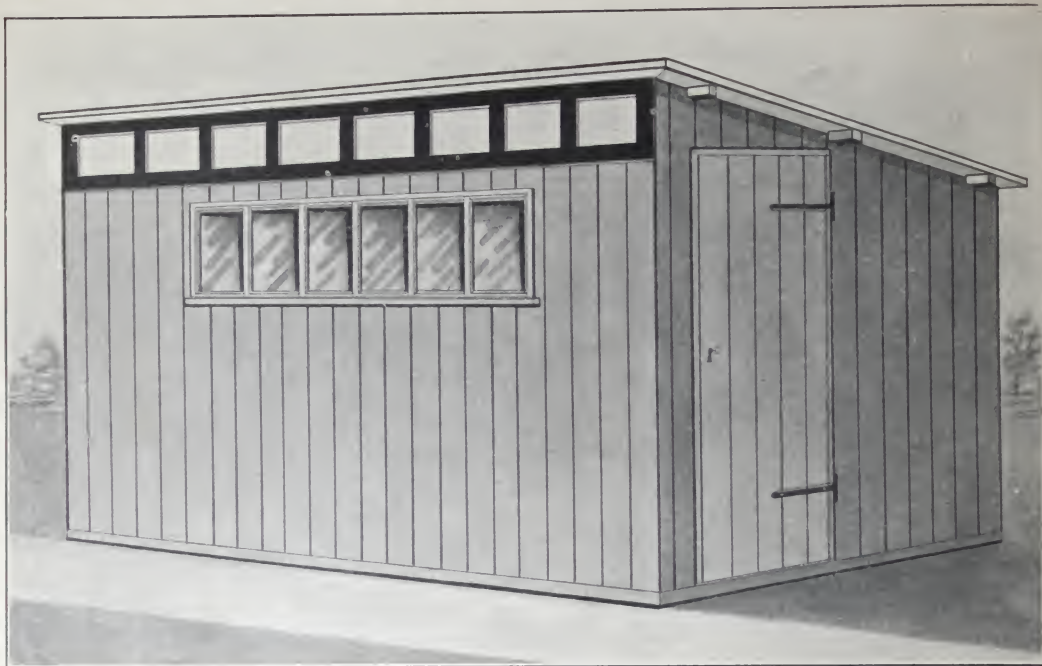

**BUILT IN SECTIONS.** All these store rooms are made in sections; each section will fit perfectly and you should erect any of the buildings without any skilled labour in two hours after arrival. Every part is standardised; you are certain of absolute success, and all bolts, etc., are provided free.

**THE DOUBLE STRENGTH FLOOR.** Few buildings, even the most expensive makes, contain floors equal to those supplied at an extra cost with this shed. First we lay down extra thick joists, then on top we securely nail in, tongued and grooved floor boards, the shed stands on top of the floor, and the actual floor is raised many inches from the ground; this ensures perfect dryness, long lasting qualities and freedom from rats. On no account try to do without this double strength floor, it is simply impossible to faithfully describe its many advantages; the actual strength and construction must be seen and tested to thoroughly appreciate its many qualities.

**A CHEAPER MODEL CAN BE SUPPLIED.** This design can be built on  $\frac{1}{2}$  in. boards with a  $\frac{1}{2}$  in. floor. For prices, see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**LARGER SIZES CAN BE QUOTED FOR.** This attractive shed would look extremely well and be most serviceable if made say, up to 20ft. in length and 10ft. to 12ft. in width, and perhaps 9ft. high at the front. We are prepared to quote for larger sizes, either in tongued and grooved boards or in thick ornamental weather boards, if clients will give particulars.

## Sutcliffes' Lean-to Backyard Store Shed, Garden House or Bicycle Shed. Useful for every Home and Allotment.

No.	Length	Width	Height Front	Height Back	Floor Extra
1—	6ft.	4ft.	6ft.	5ft.	
2—	8ft.	4ft.	7ft.	5ft.	
3—	9ft.	4ft.	7ft.	5ft.	
4—	10ft.	4ft.	7ft.	5ft.	
5—	12ft.	10ft.	7ft.	5ft.	

Carriage Paid to nearest Station England and Wales.

**YOU CANNOT BEAT THIS HANDSOME SHED.** It looks really well on any piece of spare ground or in the garden; it will be useful in every home for a dozen different things, and is just as good as we say it is. Every nook and corner is well lighted; there is not a single faulty joint or weak part, and with ordinary care will give 20 years' solid wear in all weathers and under all conditions. You can, perhaps, get a building at a trifle lower figure, but it will be flimsy, may blow down with the first heavy gale, and will never have the same substantial build found in this little store room. Just think how useful it would be in your back yard; think how many items you can safely store, and keep them in perfectly dry condition all the time. Then we are certain that on merit alone we shall get your order.

**DETAILS OF CONSTRUCTION.** The four sides are built on ½ in. planed, tongued and grooved boards of extra fine quality; never any second grade timber used by Sutcliffes'. The framework is most heavy and always of ample strength to suit the size of the Shed ordered; the door is well battened and hung on heavy "T" hinges, complete with lock and key; all parts are sectional, easily fixed up on arrival without skilled labour and all bolts and glass are provided.

**AMPLE LIGHT IN EVERY PART.** There is not a single dark corner; the window frame is exceptionally well made, and specially selected timber is carefully mortised and tenoned together to produce a finely balanced window of superior design and workmanship.

**DOOR AND WINDOW** can be fixed in any position without extra charge.

### DESIGN OA.

For PRICES  
SEE LIST  
ENCLOSED.

**THE ROOF IS GUARANTEED WATERTIGHT.** All roofs are covered with ½ in. planed, tongued and grooved boards, then covered with extra high grade non-tarring felt and stripped with narrow battens. A roof built by Sutcliffes' will turn out every drop of rain from one year end to another; there is not a better roof obtainable, and remember the roof is one of the main features.

**THE FLOOR WILL CARRY ANY WEIGHT.** It is built enormously strong, 1 in. planed, tongued and grooved boards nailed to extra thick joists; the entire shed is lifted several inches from the ground; never a sign of dampness or trace of decay. You cannot imagine how good these double strength floors are until you see them; they are worth much more than we ask and three times as good as ordinary floors.

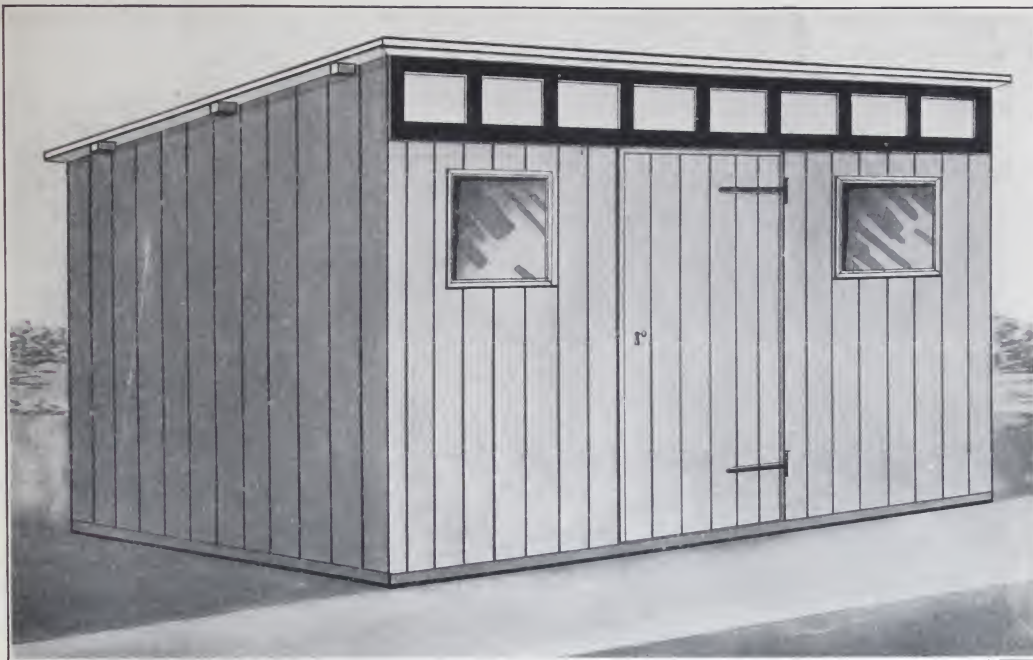

**FRAMEWORK.**—Planned on all sides to greatly improve inside appearance.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**A CHEAPER MODEL SUPPLIED.** This design is also made ½ in. boards with a ½ in. floor. For prices, see list.

**FULL SATISFACTION OR MONEY BACK.** These are the terms Sutcliffes' offer every time; no doubtful guarantees, everything perfectly plain and straightforward. You must feel that Sutcliffes' can be depended on to give you exceptional value for every pound spent.

## Sutcliffes' Lean-to Garden Allotment or Backyard Storehouse.

With extra Wide Door.

	Length.	Width.	Height Front.	Height Back.	Floor Extra.

2—	8ft.	5ft.	6ft.	5ft.	
3—	8ft.	6ft.	6ft.	5ft.	
4—	8ft.	7ft.	6ft.	5ft.	
5—	10ft.	8ft.	7ft.	5ft.	

Carriage Paid to nearest Station England and Wales.

**SOUNDLY BUILT THROUGHOUT.** This nicely-designed and most convenient store room is built on  $\frac{1}{2}$  in. planed, tongued and grooved boards of extra fine quality; boards that will give you fifteen years solid service and still keep good. The framing is most substantial and is always of ample strength to ensure robust construction. All outdoor buildings are subject to hard wear; they must be strong enough to stand both the hot days of summer, the cold and wet of winter; it is only really soundly-built structures that will do this, and Sutcliffes' never turn out flimsy buildings. Some other firms give you lower prices, but the construction will be so slender that after the first year you will be disappointed. It is much better and considerably cheaper in the end to get a Sutcliffe building—one made to last and to give almost a lifetime's wear—because the price will be little more than you are asked to pay for a greatly inferior structure.

**GENERAL DESIGN AND APPEARANCE.** The nicely-balanced design, with the one window on each side of the wide door, makes the shed most convenient to use and gives ample light; the door is fixed on best quality "T" hinges and is complete with lock and key; the window frames are extra well finished; all glass is provided, and every corner of this very handy house will bear the strictest investigation.

**DOOR AND WINDOW** can be fixed in any position without extra charge.

**IT IS BUILT IN EASY-FITTING SECTIONS.** You will have no trouble to erect this house. It is built in sections that fit together without difficulty; all bolts are provided, and after arrival it can be fixed up in a couple of hours by unskilled labour. Sutcliffes' unbeatable methods of construction eliminate all erection difficulties.

### DESIGN MP.

For PRICES  
SEE LIST  
ENCLOSED.

**THE ROOF IS COVERED WITH FELT.** This felt is the real expensive, long-lasting kind that does not require tarring. It will keep the shed bone-dry in all weathers, and over the felt Sutcliffes' fix narrow battens so that the felt is always kept in position. This method of felting is unbeatable and greatly in advance of other styles. You must really see it to appreciate the many advantages.

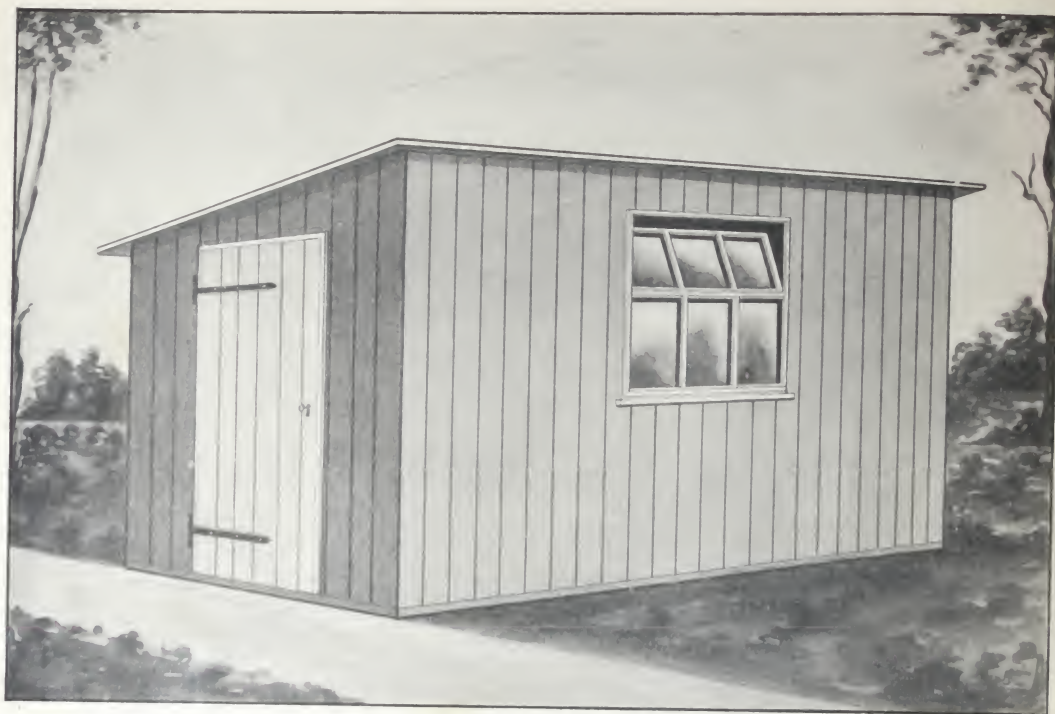

**FRAMEWORK.**—Planed on all sides to improve appearance.

**AN ABSOLUTELY BONE-DRY FLOOR.** Built on  $\frac{1}{2}$  in. tongued and grooved boards, nailed to extra thick floor joists, raising entire building several inches from the ground to ensure perfect dryness. You cannot imagine how very good these double-strength floors are until you actually give them a test. Without exaggeration, they are three times as profitable as those supplied by other makers.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $7\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**A CHEAPER MODEL SUPPLIED.** This design is also made on  $\frac{1}{4}$  in. boards with a  $\frac{1}{2}$  in. floor. For prices, see list.

**CARRIAGE-PAID AND MONEY-BACK GUARANTEE.** You will receive this house carriage paid, and if you are not entirely satisfied in every way after a complete examination in your own home, cash will be refunded. We could not give you a more straightforward offer, and we invite your orders knowing that better value cannot be obtained.

Carriage Paid to nearest Station England and Wales.

**CONSTRUCTION OF OUTER WALLS.**—Sutcliffe's build these portable sheds of finest quality  $\frac{1}{2}$  in. planed, tongued and grooved boards, actual finish about  $\frac{3}{16}$  in. thick, the interior framing is much heavier and better than those usually employed, which gives greatly increased life to all who purchase them. Sutcliffe's never use inferior low grade timber, so that if you come across a firm offering similar sheds at less money, be sure to look for weaker construction.

**MADE IN HANDY SECTIONS TO BOLT TOGETHER.**—All these sheds are made in sections, easily fixed together, all bolts, &c., glass, lock and key, everything provided. You can erect any of these sheds in about half-an-hour after arrival, and if you wish to remove at any time this is found to be very convenient.

**A DOOR IN THE LEFT END SECTION.**—In the left side we include a firmly braced door, complete with strong T hinges, lock and key, while in the front section one large window, in the larger sizes this is a three pane window to open inwards as required. Although low in price, these sheds are of smart appearance, and useful for various purposes in every home; in fact, there is no back-yard that would not be more convenient with the addition of one of these structures, while the price has been fixed so low that you cannot possibly obtain one locally at the figure.

**DOOR AND WINDOW** can be fixed in any position without extra charge.

**THE ROOF IS REALLY RAIN-PROOF.**—The roof is covered with  $\frac{1}{2}$  in. tongued and grooved boards, just like the sides, and on top of the boards we fix high-grade Ruberoid or similar felt. Sutcliffe's never use the cheap quality felt, and this is one reason why their buildings are so keenly appreciated.

### DESIGN FY.

For PRICES  
SEE LIST  
ENCLOSED.

**THE FLOOR IS REMARKABLY STRONG.**—The floor is an additional charge, but is made the strongest part of the shed. We lay down very heavy rafters, then nail very securely one inch tongued and grooved boards; the shed itself stands on top of the floor, and this means perfect dryness.

**A NICE SHED FOR STORING CYCLES.** Cycles in the house are a nuisance, and take up a lot of valuable space. Here is a fine rain-proof shed, and the 6ft. by 3ft. size will store one or two cycles comfortably, and is most inexpensive.

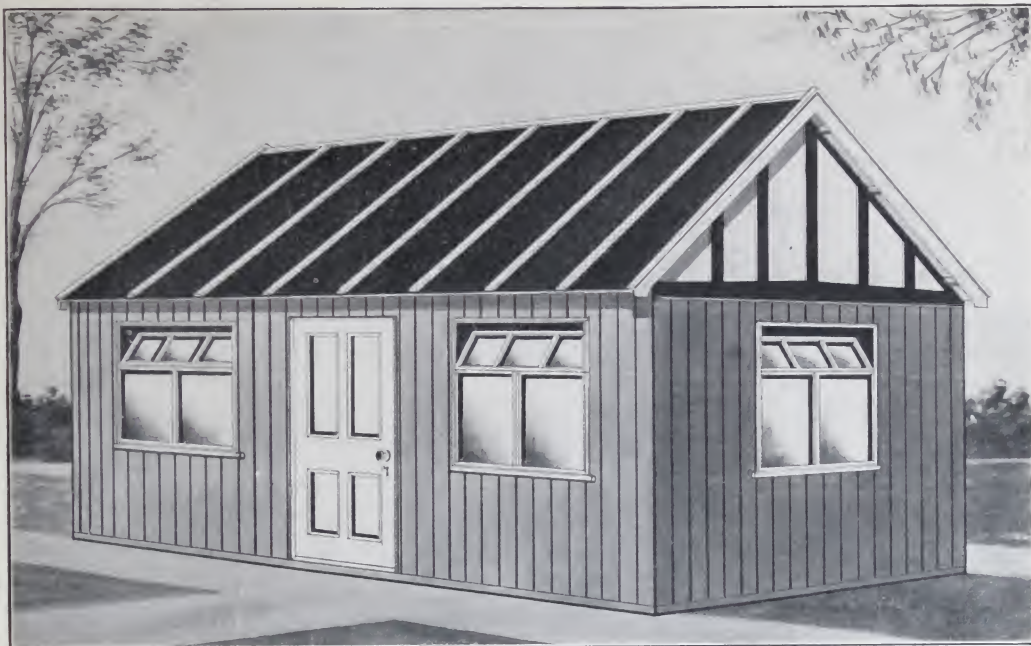

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7 $\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**A CHEAPER MODEL SUPPLIED.** This design can also be obtained built on  $\frac{1}{2}$  in. boards and a  $\frac{1}{2}$  in. floor. For prices, see list.

**WHAT WILL YOU DO WITH IT.**—Perhaps you wonder how such a shed can be useful to you. In the first place, if you want extra room for coals you could not wish for anything better; if you are short of washing room and find that doing washing in the house upsets everything, then simply fix a gas boiler in one corner and you are fit up with a fine wash house at little expense. Then when washing day is finished you have a room that comes in handy for doing a few repairs, a playground for the kiddies when raining, and a dozen other uses you could mention. Surely, then, at the low prices quoted one of these sheds will appeal to you. We sell them on the safest of all guarantees, and that is—satisfaction or money back.

## Sutcliffes' Out-door Sleeping Room for Summer.

	Length.	Width.	Height Eaves.	Height Ridge.
1—	7ft.	6ft.	7ft.	8ft.
2—	9ft.	6ft.	7ft.	8ft.
3—	10ft.	8ft.	7ft.	9ft.
4—	12ft.	10ft.	7ft.	9ft.
5—	15ft.	12ft.	8ft.	11ft.

The first three sizes have only one window in the front.

**FOUR STRONG WALLS.** The four walls of this fine sleeping hut are built on  $\frac{1}{2}$  in. planed, tongued and grooved boards of superior quality, the framework is most substantial and is nicely planed. On no account buy sleeping huts of weak construction, they are very costly in the end and risky to use; the best is the cheapest, especially when Sutcliffes' low prices are taken into consideration.

**A BONE-DRY ROOF.** You must have a good roof in any outdoor room if it has to be serviceable. Sutcliffes' construct the roof on  $\frac{1}{2}$  in. planed, tongued and grooved boards, just like the four walls, and on top of the boards fix best quality Ruberoid or similar felt, then over the felt a few rows of nice battens, these give the roof a smart appearance and prevent the felt from getting blown off at any time. The under-framing of the roof is very heavy, and all high-grade foreign timber employed.

**RED ASBESTOS TILES FOR ROOF.** We can supply these, also ridge pieces, complete with all necessary nails and stripping laths, prices see list.

**EAVES TROUGHS, IF DESIRED.** These can be supplied, for prices see list.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

**WINDOWS, DOOR, AND ORNAMENTAL TIMBERS.** The windows are of nice appearance and very strongly built, with the top half to open inwards. The door is of the four-panelled type, and fitted with lock and key; while, over both eaves, we fix handsome ornamental timbers and barge boards; the windows can be fixed in any position to suit our clients, also the door, as desired.

**SIZE OF WINDOWS.** Overall dimensions: Approximate length, 37ins., width 32ins. Size of glass provided: Top panes 12ins. by 9ins., bottom panes 18ins. by 14ins.

### DESIGN J.

For **PRICES**  
SEE LIST  
ENCLOSED.

**DOOR AND WINDOW** can be fixed in any position without extra charge.

**INSIDE LINING.** We are prepared to completely line both sides to eaves and both ends to ridge with  $\frac{1}{2}$  in. planed, tongued and grooved boards; the extra cost see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**A VERY GOOD FLOOR.** With all outdoor rooms the floor is a most important item. Sutcliffes' construct the floor on double strength lines, which means perfect dryness. First, we lay down joists, extra thick, and over these we nail in prepared special door boards; the entire is raised  $\frac{1}{2}$  in. from the ground, the floor is certain to be dry no matter what the outside conditions.

**MADE IN SECTIONS.** All these small portable buildings are made in sections, easily fixed up, and all bolts etc., are provided free of charge, while all the goods are delivered carriage paid right to your station, unless it be the far part of Scotland or Ireland.

**SPECIAL USES, IF NECESSARY.** If you do not wish to use this very fine room for sleeping purposes except in the height of summer, just look what a nice spare children's playroom, a grand store-room or afternoon tea room; in fact, it is a building that will give endless enjoyment to all members of the household, while in the winter months it can be safely used as a store place for all kinds of goods.

**SPECIAL REMARKS.** It is most important before you place an order that you know the firm you deal with. Sutcliffes' make portable buildings, nothing else but this class of goods, from January to December, their men are experts and you can rely on a straight deal.

## Sutcliffes' Out-door Sleeping Chalet.

	Length	Width	Height Eaves	Height Ridge
1—	10ft.	8ft.	7ft.	9ft.
2—	12ft.	10ft.	7ft.	9ft.
3—	15ft.	10ft.	7ft.	9ft.
4—	20ft.	10ft.	7ft.	9ft.
5—	20ft.	10ft.	8ft.	10ft.

Carriage Paid to nearest Station England and Wales.

**STUDY THE OUTSIDE WALLS.** Sutcliffes' build this wonderful structure on extra fine grade tongued and grooved weather boards, 1in. thick, these special boards are the most expensive kind and absolutely the best obtainable for all rooms where perfect dryness is essential. Before you place any orders make certain that you are getting similar quality goods, as very few firms offer this wonderful quality. Sutcliffes' offer you many cheaper buildings, but this Out-door Sleeping Chalet stands quite alone and, considering its remarkable wearing qualities, is wonderfully cheap; with ordinary care it will keep in fine condition for over twenty years.

**THE ROOF IS IMPORTANT.** You must have a first-class bone-dry roof, nothing else will suffice, and this is how Sutcliffes' construct the roof: Extra heavy framing, then over this we nail securely 1in. planed, tongued and grooved boards, and over the boards extra thick roofing felt stripped at frequent intervals with handsome timber battens, on the top we fix ridge boards and one handsome finial at each end. Both gable ends have ornamental timbers inserted, which give the entire structure a very smart appearance.

**RED ASBESTOS TILES FOR ROOF.** We can supply red diagonal asbestos tiles and red ridge pieces for the roof; the extra cost see list. If the red tiles are ordered same time as the house, we also include all necessary nails and the stripping laths. It is an acknowledged fact that a red tiled roof looks better than a felted one, and for the larger buildings is worth the extra cost.

**EAVES TROUGHS.** These can be supplied, for prices see list.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

### DESIGN AB.

For PRICES  
SEE LIST  
ENCLOSED.

**DOOR IN FRONT.** The door in front is of four panel type complete with lock and key and all necessary furniture. You could not wish for a building of more imposing design.

**WINDOW DETAILS.** The windows are very well built and of special design. The top portion opens inwards to give ample ventilation. Overall dimensions and approx. sizes: length 37 ins., width 32 ins., size of bottom pane 18 ins. by 14 ins., size of glass for top pane 9 ins. by 12 ins. We provide 21 oz. best quality glass free. Only one window can be supplied in front of No. 1 Chalet.

**DOOR AND WINDOW** can be fixed in any position without extra charge.

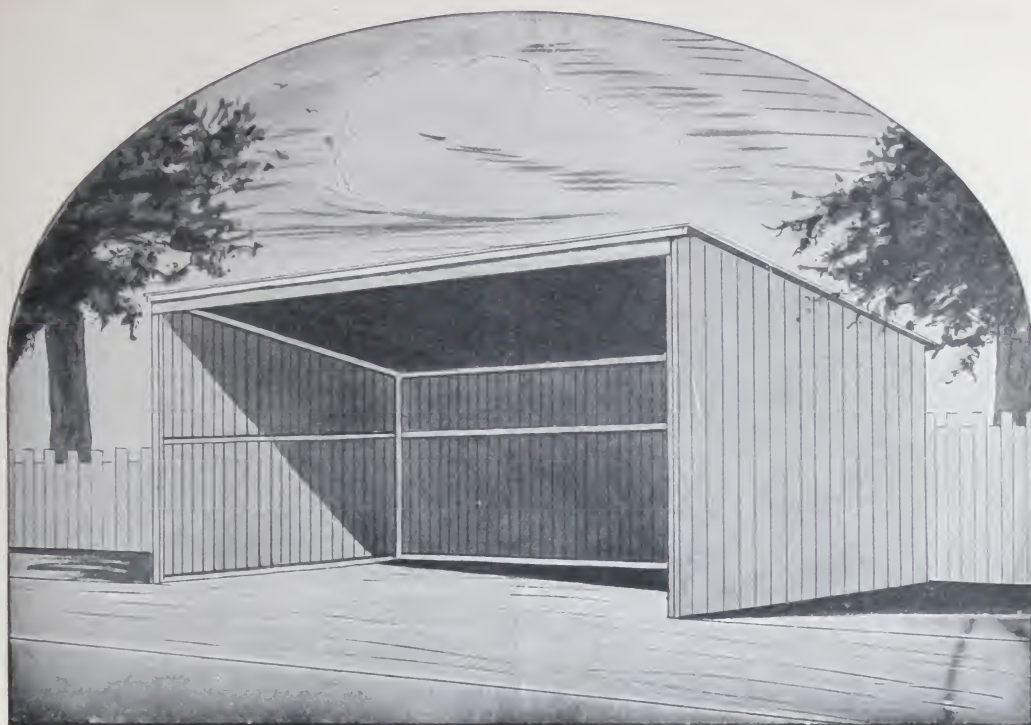

**INSIDE LINING IF REQUIRED.** We can line the sides to eaves and the ends to the ridge with 1in. planed, tongued and grooved boards; the extra cost see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**A MAGNIFICENT ROT-PROOF FLOOR.** The floor for this structure is built on generous lines, and is of enormous strength. We lay down extra heavy battens, then on the top lin. prepared floor boards, the sleeping room standing on top of the floor, and raised five inches from the ground.

**MADE IN SECTIONS.—EVERYTHING PROVIDED.** All buildings are made in sections, easily erected by unskilled labour, and delivered carriage paid to your nearest station; all bolts, etc., are provided, in addition, we supply the glass. When you deal with Sutcliffes' you are certain of satisfaction.

## Sutcliffes' Cattle Shelter, useful on any Farm.

	Length	Width	Height Front	Height Back
1—	15ft.	10ft.	8ft.	6ft.
2—	20ft.	10ft.	10ft.	8ft.
3—	25ft.	12ft.	10ft.	7ft.
4—	30ft.	15ft.	12ft.	8ft.

**DETAILS OF CONSTRUCTION.** Sutcliffes' make the walls and roof on  $\frac{3}{4}$ in. planed, tongued and grooved boards of superior quality, the framing is also super-grade and very strong, the roof is covered with Ruberoid or similar felt, on top of the boards, then on the top of the felt we fix narrow battens. All the shelters are of very substantial build and will give sound service for many years.

**NO FLOOR REQUIRED.** For sheltering cattle, sheep and lambs, etc., no floor is required; this enables us to give you a very large shelter at a remarkably low figure. Just think how useful such a shelter must be during the heavy rains we experience, also during thunderstorms, when it is most dangerous for live stock in the open. We feel certain that a shed of this kind will more than repay original cost in the first season.

**TREATED WITH PRESERVATIVE.** All Sutcliffes' cattle shelters are treated both inside and outside with special wood preservative. This greatly prolongs their wearing powers, destroys all insect pests, and improves appearance. Be sure you obtain a complete properly finished shelter, built by a firm who specialise in the work.

**ALL MADE IN SECTIONS.** All these shelters are tenant's fixtures, made in easy-fitting sections to bolt together, and all bolts are provided; you can easily remove to another field just as you desire. This is a great convenience, while at all times, if you have no use for this shelter in the open fields, it can be brought nearer home and used as a store place for all kinds of farm implements. Sutcliffes' do this complete shelter at a price no local firm can possibly touch, while in many cases the finished shed will be delivered at almost the price you can buy the timber at locally.

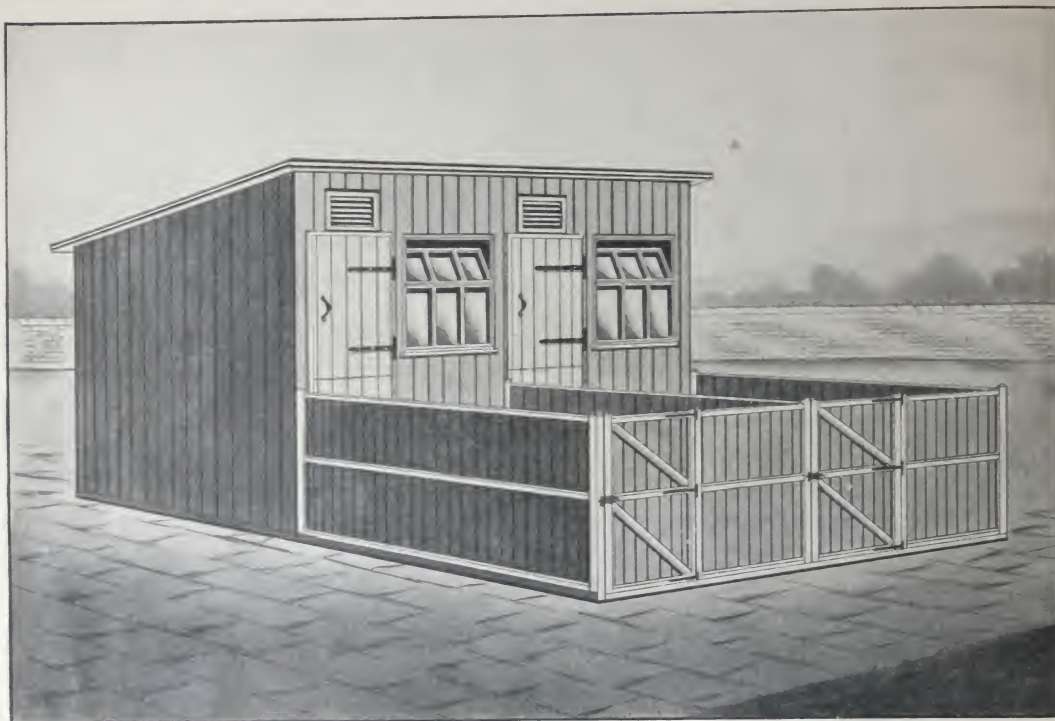

### DESIGN Y.

For PRICES  
SEE LIST  
ENCLOSED.

**SUTCLIFFES' PAY THE CARRIAGE.** It does not matter where you live, unless it be in the remote parts of Scotland and Ireland, we pay the carriage right to your station. This is very important and Sutcliffes' give you a hearty invitation to visit their factory. Probably never in all your life have you seen a factory where portable timber-built buildings are produced in such huge quantities from one year to another. Messrs. Sutcliffes' have written and designed this booklet personally, but no booklet can possibly give the results obtained by a personal visit.

**CATTLE SHELTERS ON 1in. BOARDS.** In the North, and for certain parts of the South, it may be cheaper to have cattle shelters built on 1in. boards throughout. This can be done for you at the small extra charge of 15 per cent. Just imagine what very great strength these sheds are then. When you have studied the low prices we feel sure that you will decide on having your cattle shelters built on 1in. boards. Personally we think it is the cheapest policy to do this.

**SPECIAL REMARKS—DON'T MISS THEM.** Suppose you purchase one of these cattle shelters, and find later that you do not wish to use same for this work, look how easy it will be to remove and make a nice little open-air repair workshop, think how much money will be saved in keeping your implements dry, look what a nice shelter it is for ploughs and tractors; there is no doubt if you are a large farmer you have a vacancy for such a shelter. Just tell your wants to Sutcliffes'.

## Sutcliffes' Double Pig Stye, with Yards complete.

For Plan see Page 120.

	Length	Width	Height Front	Height Back
1—One Stye	6ft.	6ft.	7ft.	6ft.
2—Two Stye	12ft.	6ft.	7ft.	6ft.
3—Three Stye	18ft.	6ft.	7ft.	6ft.

Size of each yard, 8ft. long by 6ft. wide by 3ft. high.

Carriage paid to nearest station England and Wales.

**CONSTRUCTION—SIDES, FRONT AND BACK.** Built on lin. tongued and grooved match boards, with most substantial framing, the roof is covered with lin. prepared boards and extra good felt, we do not care where you go, or what you pay, you cannot get a better timber-built pig-stye with yard complete.

**CONSTRUCTION OF YARDS.** These are just the same strength as the styes—lin. boards throughout—with framing on the outside, so that the pigs cannot scramble to the top; the yards are all 3ft. high; each yard is the same width as the stye. One door to each yard, complete with hinges and bolts.

**WINDOWS AND VENTILATORS.** The windows to each stye are of the best possible type, admit both light and fresh air, thus you get thorough ventilation, in addition to the window ventilators. We introduce Louvre ventilation over the doors.

**DOORS AND FITTINGS.** The doors to the stye are all made in two halves, on the half-hack system, so that in summer additional ventilation can be given; all doors are extra strongly built, and have most substantial hinges and handles.

**FLOORS, ETC.** It is generally the best policy to have either a sleeper, brick, concrete, or clinker-made floor, something that is easily cleaned out, so you will see we do not include timber floors with these sheds, the purchaser provides his own floors.

**PARTITION IN ALL DOUBLE STYES.** All double pig-styes have a partition in both centre of stye and yard dividing both places; this is a very great convenience and is sure to be appreciated.

### DESIGN AS.

For PRICES  
SEE LIST  
ENCLOSED.

PIG STYES WITHOUT YARDS. Prices see list.

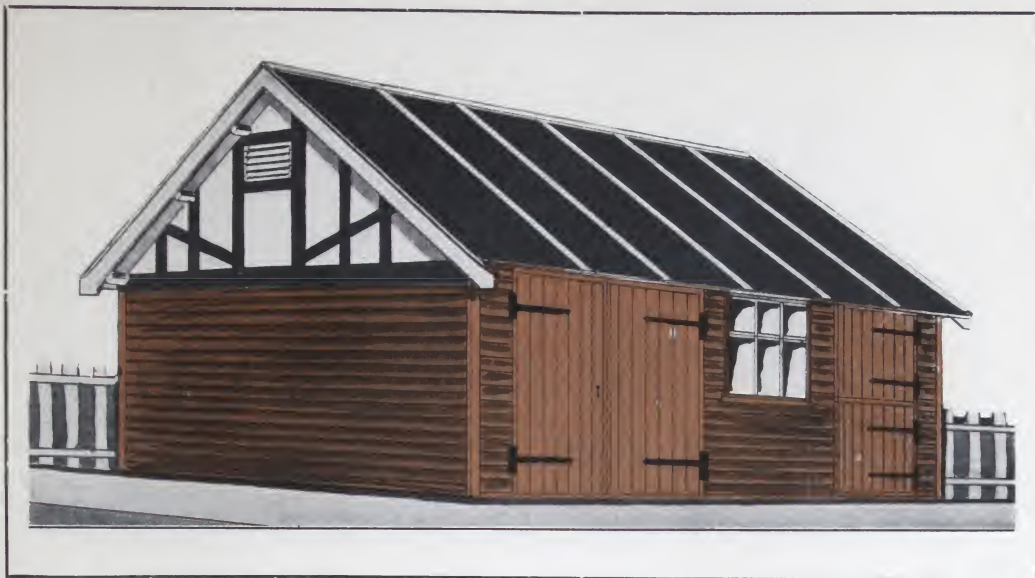

**SECTIONS AND BOLTS.** All styes are built in completed and easy-fitting sections, there will be no trouble to erect, and all bolts are sent free of charge. All goods are delivered carriage paid to your nearest station, unless it be very north in Scotland and Ireland, when we are compelled to make a slight additional charge.

**GENERAL REMARKS.** We have noticed a few firms, in order to give lower prices, offer pig-styes built on 1in. or 2in. boards. We cannot too strongly condemn these weakly built styes; they are practically worthless, and will very soon spell ruin to all who are inclined to buy them. Pigs must be enclosed in very strong places, both for safety and comfort.

**ALL STYES AND YARDS CREOSOTED.** We treat all pig styes and yards with special wood preservative, both inside and outside, without extra charge. This is a very great consideration, and means that these pig-styes will keep in good condition for many years. It is also important to remember that we deliver all sections properly finished—some firms send the boards loose for the roof and felt to fix on arrival. This means greatly increased labour costs and must be carefully guarded against.

**CARRIAGE PAID TO YOUR STATION.** This is an important point. Railway rates are now heavy and quite a lot of firms do not pay carriage. It is up to you to be certain the goods offered are carriage paid or you will be landed with very heavy carriage charges to meet.

## Sutcliffes' Stable and Coach House.

For Plan see Page 116.

	Length.	Width.	Height Eaves.	Height Ridge.
1—	14ft.	10ft.	8ft.	10ft.
2—	20ft.	10ft.	8ft.	10ft.
3—	25ft.	12ft.	8ft.	11ft.

Carriage Paid to nearest Station England and Wales.

**SIDES AND ENDS—CONSTRUCTION DETAILS.** Sutcliffes' make a strong point of showing clients exactly what they get for their money. Sutcliffes' stable and coach house is built with sides and ends on one lin. planed, tongued and grooved ornamental weather boarding. This is twice as good as the ordinary kind, and means great strength, perfect dryness, and warmth in winter. The price could be reduced heavily if we introduced thinner timber, but it would not be a wise policy. All framing is very thick and nicely planed.

**A FIRST-CLASS ROOF.** You must have a perfectly dry roof and Sutcliffes' see that you get it. The roof is built on extra heavy timber and 2in. planed, tongued and grooved boards, then on the top we fix Ruberoid or similar felt, and then strip with narrow battens. Just imagine what a very good roof this is; it must be seen and tried to be thoroughly appreciated.

**EAVES TROUGHS** can be supplied, prices see list.

**WINDOWS AND PARTITION.** The windows are remarkably strong and of neat appearance, you can have plenty of light and ventilation without difficulty. The inside partition is very strong and can be fixed as desired or left to our judgment; a small door will be included in partition to enable the attendant to enter either stable or coach house.

**SIZE OF WINDOWS.** These are approximately 40ins. by 38ins., very strong and well finished off; the top half to drop inwards for ventilation.

**MANGER AND HAYRACK** are not included, these are best purchased locally.

**CONCRETE OR BRICK FLOOR BEST.** The floor is certainly best made either of brick or concrete.

### DESIGN U.

For PRICES  
SEE LIST  
ENCLOSED.

**LOUVRE VENTILATION—ORNAMENTAL TIMBERS.** Sutcliffes' introduce the well-known Louvre system of ventilation over the eaves, and we do not know of a better one; in addition, ornamental timbers are fixed; these add greatly to the appearance of the stable and still do not add much to the cost.

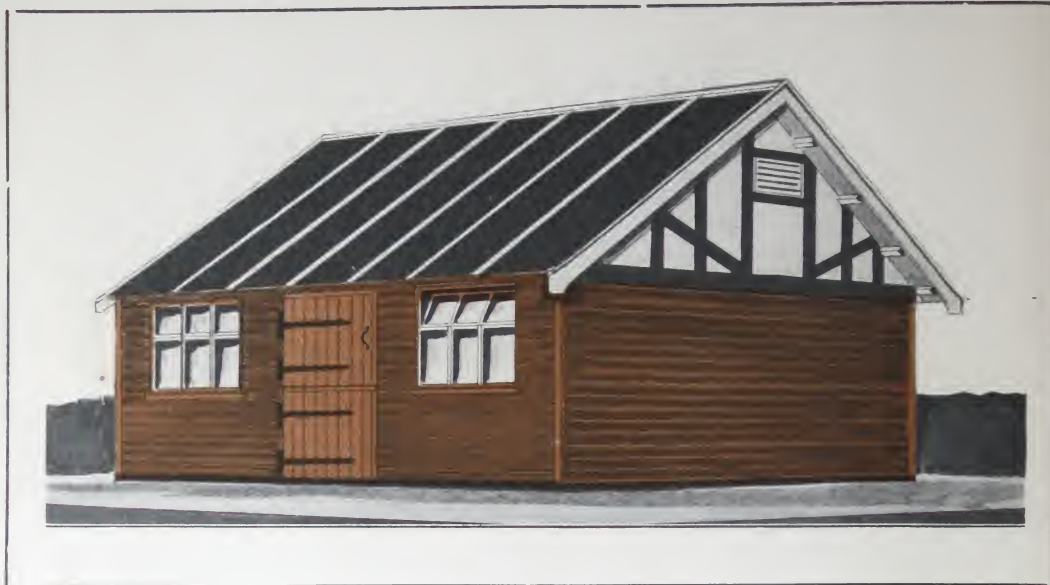

**DOORS AND FITTINGS VERY GOOD.** The doors to coach house are of double pattern, as illustrated, and very strongly braced; the hinges are of ample strength, and from beginning to end they are a smart pair of doors. The doors to stable are made on the half-heck system and just the kind most needed. The hinges are of strong design and, in addition, handles for opening are provided.

**ALL MADE IN HANDY SECTIONS.** Sutcliffes' stables, etc., are all made in complete, easy-fitting sections, that will not be difficult to fix up on arrival; in fact, a couple of handy men will soon do the job; no experienced labour is essential. All bolts are included.

**TREATED TO LAST TWENTY YEARS.** Sutcliffes' treat all their stables with special wood preservative both inside and outside; this gives them a smart finished appearance, greatly lengthens life, and keeps away all insect pests; there is no extra charge whatever for this special feature.

**CARRIAGE PAID TO YOUR STATION.** Sutcliffes' deliver carriage paid; this is a big item, do not forget it, and on no account pass an order to any firm until you know whether carriage paid or forward.

**SPECIAL FEATURE.** If you study quality we do not think any firm in the country can give you a more favourable price. When we tell you our works consume about 1,500 tons of best timber annually, all made into portable buildings, you know that we buy at the lowest figures and, selling direct, you get the benefit.

## Sutcliffes' Cow House or Stable.

	Length	Width	Height Ridge	Height Eaves	Accommodation	
1	18ft.	12ft.	11ft.	8ft.	4	3
2	24ft.	12ft.	11ft.	8ft.	6	4
3	30ft.	12ft.	11ft.	8ft.	8	5

**CONSTRUCTION ON DOUBLE STRENGTH LINES.** The sides and ends are built on lin. planed, tongued and grooved ornamental weather boards. These are the best class and the most expensive kind of timber, but it is worth twice as much as the ordinary kind. When you buy this cow house or stable from Sutcliffes' you will receive a building that will give over twenty years' wear and keep your stock in the pink of condition both autumn and winter.

**ROOF FELTED AND THEN BATTENED.** The roof is covered with lin. planed boards, tongued and grooved, then on the top with best quality, expensive Ruberoid or similar felt, while on the top of the felt we fix, at frequent intervals, battens for stripping; you thus get a perfect absolutely bone-dry roof.

**EAVES TROUGHS.** These can be supplied, all cut out of solid wood, prices see list.

**WINDOWS AND VENTILATORS.** In the illustration of Sutcliffes' cow house we show the top part of window hinged to open, this is a very great improvement, the old idea of having cow houses dark and badly ventilated has long since been exploded. In addition to window ventilation as required, we fix the well-known Louvre ventilators in both ends as in illustration. All glass is sent for the windows, and from start to finish Sutcliffes' cow houses are the best obtainable, while prices are much below other makers for similar quality goods. Don't be tempted to have weakly-built sheds.

**SIZE OF WINDOWS.** These are all morticed and tenoned together, size 40ins. by 38ins., with the top half to fall inwards.

**DOORS AND FITTINGS.** The doors are made on the half-hack principle, and are of tremendous strength, all hinges, bolts, etc., sent out, and from start to finish nothing is lacking.

**HAYRACKS, ETC.,** are not included, these are best purchased locally.

### DESIGN V.

For PRICES  
SEE LIST  
ENCLOSED.

**INTERIOR ARRANGEMENTS.** When required solely as a cow house the No. 1 size will accommodate 4 cows, No. 2 size 6 cows, and No. 3 size 8 cows. The partitions are built on tongued and grooved boards and are 7ft. long, 4ft. high. If used for horses the partitions are 8ft. long and 7ft. high.

**CARRIAGE PAID TO YOUR STATION.** Sutcliffes' cow houses are sent carriage paid right to your station. You know the exact cost. On no account buy one carriage forward, as railway charges are so heavy. In addition, be sure to see before you place the order that all roofs are properly constructed and also felted.

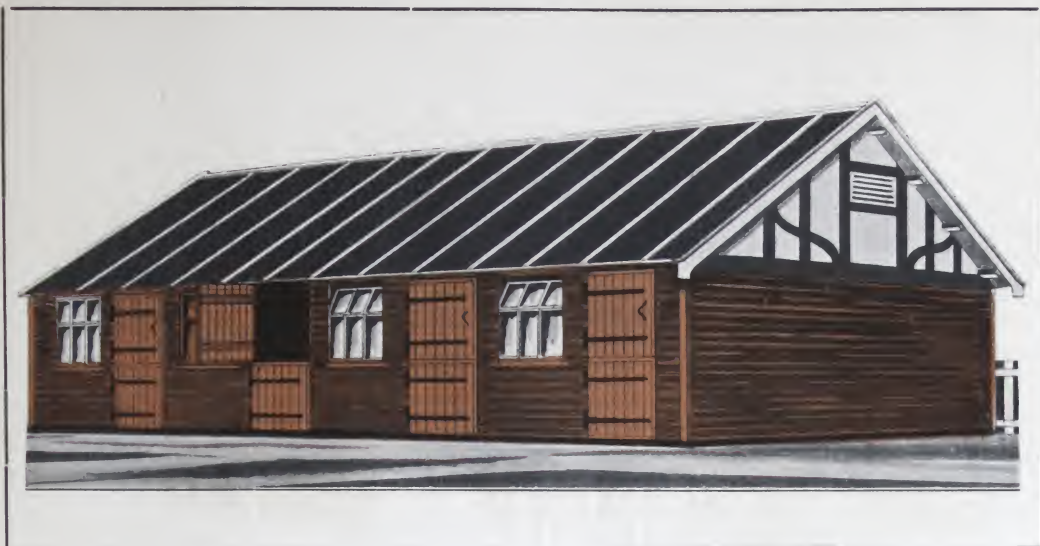

**NO FLOOR PROVIDED.** We do not send floors with cow houses, these are best made on the spot, and constructed of either brick or concrete.

**SECTIONS AND BOLTS.** All Sutcliffes' cow houses are made in sections, no trouble to fix up, and all bolts are provided. There is nothing missing, and you are guaranteed satisfaction or money back.

**TREATED WITH WOOD PRESERVATIVE.** Sutcliffes' treat all their cow houses both inside and outside with wood preservative and make no extra charge for this. Please be sure before you place an order that your goods are treated in this way, because it is most essential for farm buildings.

**IMPORTANT FEATURES.** Sutcliffes' cow houses differ from most advertised in quality and weight of timber employed, and with all of them you get Sutcliffes' ironbound guarantee of complete satisfaction or money back; while, should you desire some little alteration in design, we shall be happy to carry same out. Sutcliffes' bug factory is solely confined to the production of portable buildings of all kinds, and their master craftsmen are highly skilled in this particular work.

## Sutcliffes' Span Roof Loose Boxes.

For Plan see Page 116.

	Length	Width	Height Eaves	Height Ridge
1 box	10ft.	12ft.	8ft.	11ft.
2 boxes	21ft.	12ft.	8ft.	11ft.
3 boxes	32ft.	12ft.	8ft.	11ft.
4 boxes	42ft.	12ft.	8ft.	11ft.

	Length	Width	Height Eaves	Height Ridge
1 box	12ft.	12ft.	8ft.	11ft.
2 boxes	25ft.	12ft.	8ft.	11ft.
3 boxes	37ft.	12ft.	8ft.	11ft.
4 boxes	49ft.	12ft.	8ft.	11ft.

Carriage paid to nearest station, England and Wales.

**EXTRA ROBUST CONSTRUCTION.** The sides and ends are built on lin. planed, tongued and grooved ornamental weather boards as illustrated, forming the most up-to-date bone-dry lasting structure obtainable, the framing is very thick and nicely planed. Sutcliffes' loose boxes are worth twice as much as these built from thin poor quality timber, don't try to save a few pounds and risk the health of valuable stock.

**ROOF FELTED AND BATTENED.** The roof is covered with best quality high-class felt, then we strip the felt with special battens to prevent any possible damage in wintry weather. If you buy a loose box from Sutcliffes' you are certain to be well pleased.

**EAVES TROUGHS, IF REQUIRED.** We offer good, substantial wood eaves troughs, cut out of solid wood, at an extra cost, see list.

**WINDOWS AND VENTILATORS.** You will see in the range of four loose boxes illustrated that we provide the very best windows, made to open, these admit both light and air while, in addition, at each end we introduce the well-known Louvre system of ventilation. We do not care where you go, you cannot find better timber-built loose boxes, and they are so very substantial they will keep in good condition for many years.

**SIZE OF WINDOW FRAMES.** These are all exceptionally well-built, morticed and tenoned, and 40ins. by 39ins. All glass is provided, and the top portion drops inward to give ample ventilation at all times.

### DESIGN W.

For PRICES  
SEE LIST  
ENCLOSED.

**DOORS AND FITTINGS.** All loose boxes must have strong doors fitted on good hinges, complete with handles, etc., this is a special feature in all Sutcliffes' loose boxes, while another important point is the size of each box. On no account be tempted to buy small loose boxes just to save a few pounds, if you do, you are sure to regret the step.

**NO FLOOR PROVIDED.** No floors are sent with loose boxes, these are best constructed of brickwork or concrete. Our loose boxes will easily fix to any floor you may decide on.

**SECTIONS AND BOLTS.** These loose boxes are all built in sections, easily put together, all bolts being provided. The partitions are of exceptional strength, built on lin. boards, while all doors in front are in two halves. We are certain you cannot obtain better structures, and the prices are right.

**PARTITIONS TO EAVES PROVIDED.** The partitions are very strong and built on lin. tongued and grooved boards over heavy framing, and are 8ft. in height. This leaves ample room over the eaves for ventilation.

**TREATED WITH PRESERVATIVE.** All loose boxes are treated both inside and outside with our special wood preservative, this greatly prolongs their life, and is of special benefit from a sanitary standpoint. Sutcliffes' loose boxes are so very good that, with ordinary care, they will keep in good condition almost indefinitely.

**GENERAL REMARKS.** You do not buy loose boxes every day and you want something good; a building that is portable and one that will keep your live stock in the best of condition, and so designed as to be easy to work. This is just where Sutcliffes' loose boxes stand out above all others, and there is always the money back guarantee of satisfaction with them. On no account buy a loose box that is weakly built or one that is sent out half finished and probably carriage forward, Sutcliffes' pay all carriage.

## Sutcliffe's Span Roof Sports Pavilion with Verandah.

Suitable for Tennis, Football, Cricket, Hockey, etc.

Length	Width	Height Eaves	Height Ridge
1- 15ft.	12ft.	8ft. 1/2	11ft.
2- 20ft.	12ft.	8ft.	11ft.
3- 24ft.	12ft.	8ft. 1/2	11ft.
4- 30ft.	15ft.	8ft. 1/2	12ft.
5- 40ft.	20ft.	8ft. 1/2	14ft.

A Three-foot Wide Verandah included in the width.

Carriage Paid to nearest Station England and Wales.

**DETAILS OF CONSTRUCTION.** The sides and ends are built on lin. rebated weather boards; these are the finest boards in existence for making really high-class outdoor pavilions exposed to all weathers, and where perfect dryness is essential you must not have your proposed pavilion constructed on any other boards, and in addition, Sutcliffe's always give extra heavy framing—in fact, the pavilions are about twice as strong as many advertised. It is a well-known fact that the best pavilions are cheapest in the end.

**THE ROOF IS ONE OF THE BEST.** This pavilion roof is constructed on lin. planed, tongued and grooved boards of superb quality, the framing is of ample strength, over the boards we fix Ruberoid or other high-grade felt, then on the top, narrow stripping battens as illustrated—you get a perfect roof, properly built, and one that you would be proud of. If you want something extra smart, the only improvement we could suggest would be to have red asbestos tiles for the roof; but these would be an extra charge. Over both gable ends we fix ornamental timbers; there are barge boards and finials, so that from any point of view the roof is very attractive.

**RED ASBESTOS TILES FOR ROOF.** These are a first-class addition to any roof; the extra cost for supplying tiles, ridge pieces, also all nails and stripping laths, see list.

**DOOR, WINDOWS, AND VERANDAH.** The four panel door is fixed in the front as shown, with special design morticed and tensioned windows on each side of the door, also in the left end as illustrated. The top portion of the window is hinged to open outwards to give ample overhead ventilation. The overhanging roof forms part

### DESIGN BN.

For PRICES  
SEE LIST  
ENCLOSED.

of the verandah, while the ornamental timbers used in forming the verandah give a very dignified appearance. The verandah is three feet wide and extends the full length of the building. The verandah floor is latted to prevent rain collecting.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

**INTERIOR LINING.** The interior of this pavilion can be lined with lin. tongued and grooved boards where desired. Extra cost as per price list.

**OUTSIDE DECORATION.** We recommend this design to be painted on coat grey priming paint before despatch at an extra cost of 7 1/2 per cent. only. Purchasers can then finish off in any desired colour after erection.

**DOUBLE-STRENGTH FLOOR.** With all these sports pavilions we can send out high-class, double-strength floors that will carry any weight, strongly built on lin. tongued and grooved boards, with very heavy joists below, the pavilion standing on top of the floor, thus ensuring perfect dryness in all weathers. Prices as per list.

**BUILT IN SECTIONS AND CARRIAGE PAID.** All these sports pavilions are built in sections and delivered carriage paid to any station in England and Wales. All bolts, glass—in fact, everything—is provided, and no really skilled labour is necessary for erection. If you have one of these pavilions you are certain to be delighted: it is fit to grace any field, and will be much admired.

**STUDY THIS PARAGRAPH.** It would have been easy for Sutcliffe's to have built a much cheaper pavilion, but members of nearly all sports' clubs like to see something substantial and really attractive on their playing fields; here is a building that will give at least twenty years' first-class service, and one that you will always be proud of.

## Sutcliffes' Cricket or Tennis Pavilion.

	Length.	Width.	Height Front.	Height Back.
1—	12ft.	7ft.	8ft.	6ft.
2—	14ft.	10ft.	9ft.	7ft.
3—	20ft.	10ft.	9ft.	7ft.

**SIDES AND ENDS.** These are built on  $\frac{1}{2}$ in. planed, tongued and grooved boards of superb quality. The framing is chiefly 3in. by 2in. thick, planed on all sides, and best quality Swedish deal.

**ONE INCH ORNAMENTAL WEATHER BOARDS.** The four walls can be constructed on  $\frac{1}{2}$ in. planed, tongued and grooved ornamental weather boards. These are a very big improvement on the standard specification, and are strongly recommended where long service is required. The extra cost is only 15 per cent. Just send for a sample of this boarding. You will be astonished at the quality and finish.

**ORNAMENTAL FRONTAGE.** The front of this pavilion is artistically finished. Though plain in design it looks well, and is very inexpensive. It is a pavilion that would appeal to small clubs, where every penny spent has to be carefully studied.

**ROOF COVERED WITH BEST FELT.** The roof of the tennis pavilion is covered with  $\frac{1}{2}$ in. prepared boards, and on top of the boards we fix the finest quality heavy felt—not the ordinary kind; the felt is fastened down with battens and cannot blow off.

**FLOOR OF TENNIS PAVILION.** The floor is the most important feature of any shed, this is why we send out such very good ones, built on  $\frac{1}{2}$ in. prepared boards of finest quality, raised on heavy floor rafters extra thick. You often see floors advertised built on  $\frac{1}{2}$ in. or even  $\frac{1}{4}$ in. boards; these are worthless. On no account be tempted to buy just because of lower price. A bone-dry double-strength floor is essential.

**PANELLED DOOR WITH LOCK AND KEY.** With all pavilions we send out, fixed in the centre of front, a first-class panelled door; this gives the front a very smart appearance, while each door is provided with a suitable lock and key, door-knob, etc.

**SECTIONS, TENANT'S FIXTURES.** All tennis pavilions are tenant's fixtures, made in complete easy-fitting sections, and all bolts, glass, etc., provided, so that you get a thorough complete shed at a price no firm can possibly beat.

### DESIGN K.

For PRICES  
SEE LIST  
ENCLOSED.

**WINDOWS MADE TO OPEN.** There is one window in the end as illustrated, but a window can be fitted in the opposite end if desired without extra cost. All window frames are mortised and tenoned, extra well finished and ventilated. All glass is provided ready cut to size for fixing on arrival.

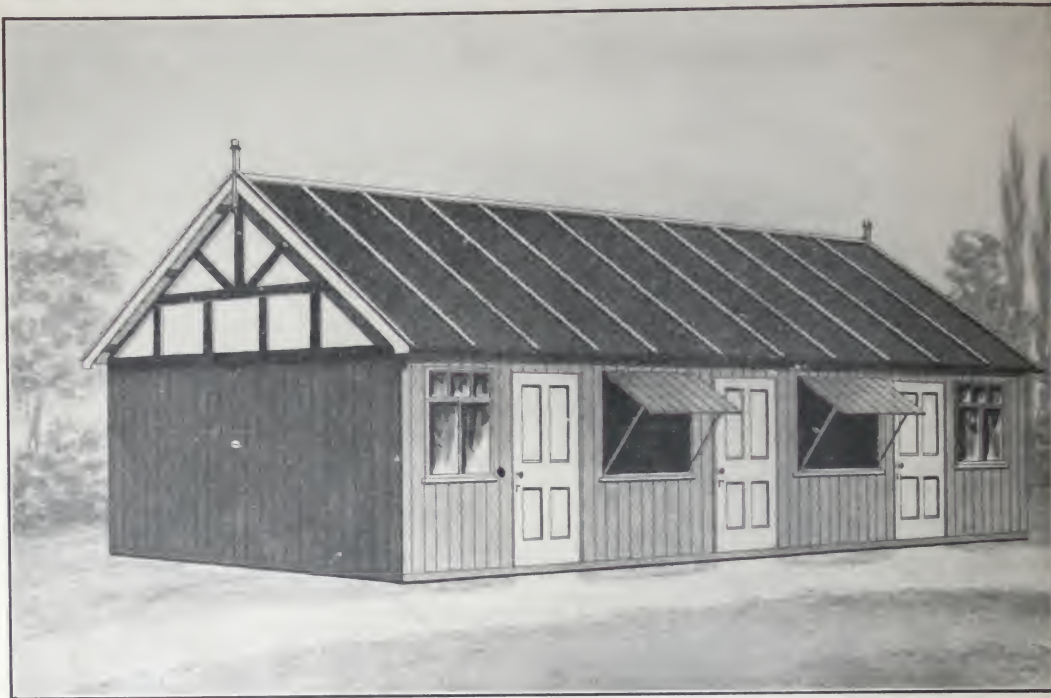

**SHUTTERS FOR CLOSING.** The shutters, as illustrated, are made to open out and to close without difficulty, and are a great convenience; in fact, the front has a smart appearance, while the entire structure is so well built it should keep in good condition for many years.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $7\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**CARRIAGE PAID.** These sheds are sent carriage paid; this is a very great consideration, especially in these days when railway rates are so heavy.

**GENERAL REMARKS OF GREAT INTEREST.** We send out all our tennis pavilions in properly built sections. Some firms send the floor boards and joists all loose; the same remarks apply to the roof, this means, instead of receiving a shed finished, you get one about half-built, and it will cost you many pounds in very expensive labour to complete. This is where you should be most careful in passing your order. If you get a lower quotation than Sutcliffes' you may depend the quality and finish is far from the mark.

Sutcliffes' guarantee all purchasers complete satisfaction in all dealings, and desire, whenever possible, prospective clients to visit their works which adjoin Hebden Bridge station and are one of the biggest in the North, confined solely to the production of portable buildings of all kinds.

## Sutcliffes' Football, Golf, Cricket or Tennis Pavilion, With Two Dressing Rooms.

For Plan see Page 3 of Cover.

	Length.	Width.	Height Eaves.	Height Ridge.	Floor Extra.
1—	26ft.	10ft.	8ft.	10ft.	
2—	30ft.	10ft.	8ft.	10ft.	
3—	34ft.	10ft.	8ft.	10ft.	

Carriage Paid to nearest Station England and Wales.

**CONSTRUCTION OF OUTER WALLS.** These are built on finest quality planed, tongued and grooved 1in. boards, with very heavy framing, there is never any inferior wood used in Sutcliffes' pavilions and you can depend on the best quality goods at all times; Sutcliffes' guarantee satisfaction or money back.

**ONE INCH MOULDED WEATHER BOARDS.** We strongly advise clients to have these large pavilions with the sides and ends made on 1in. tongued and grooved ornamental weather boards. See illustration, page 4. The extra cost is only 15 per cent.

**CONSTRUCTION OF ROOF.** The roof is built on the same high-grade boards as the sides, and over the boards we fix wonderful quality Ruberoid or similar felt, then over this we fix narrow battens to keep the felt in position at all times, you thus get a perfect rain-proof roof—out that cannot be surpassed in any way, and a roof you will always be proud of.

**RED ASBESTOS TILES FOR THE ROOF.** These can be supplied along with the ridge pieces, also nails and stripping laths. The extra cost see list.

**EAVES THROUGH3.** These can be provided, prices see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**A WONDERFUL DOUBLE STRENGTH FLOOR.** All Sutcliffes' pavilion floors are built on extra heavy rafters, raising the entire pavilion many inches from the ground, while on top of the rafters we fix securely 1in. tongued and grooved boards, you could not wish for a better floor and it will carry any weight without sagging.

### DESIGN HJ.

**SEE LIST**  
**ENCLOSED.**

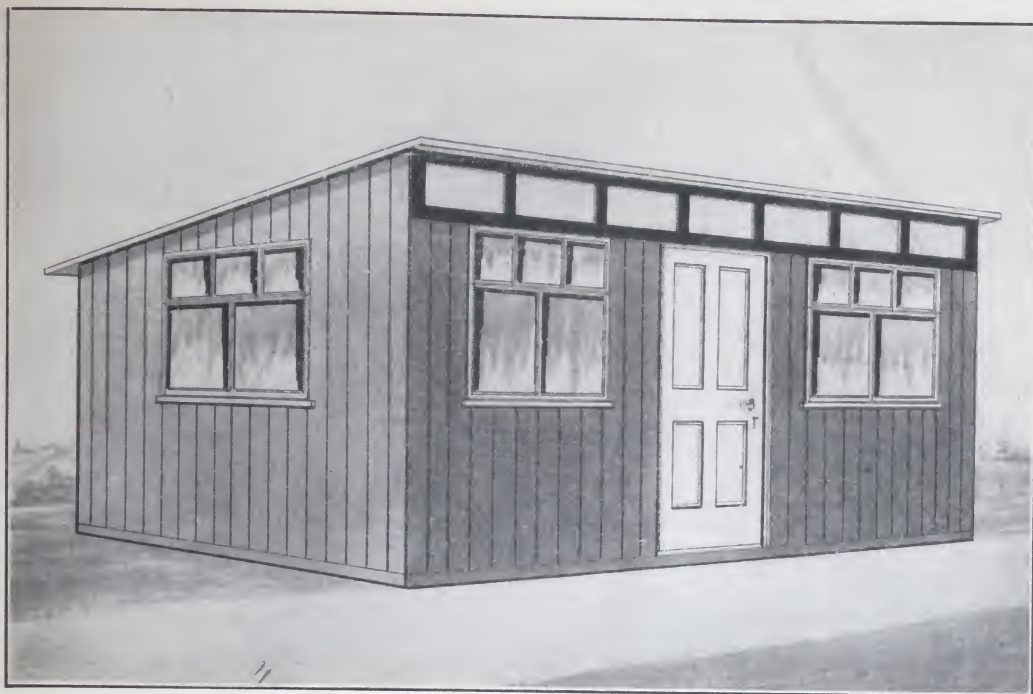

**THE HANDSOME FRONT DESIGN.** The front of this Pavilion cannot fail to be appreciated. At each end we include a dressing room 10 feet wide by 7 feet long, this provides ample room for both home and visiting teams for dressing purposes. Each compartment is provided with a four panelled door complete with rim lock and key, and one large window with the top portion to open inwards giving plenty of light and ventilation at all times. Size of window frames overall dimensions 37 ins. by 32 ins. Best quality 21 oz. glass provided, cut to size ready for fixing; size of bottom panes 18 ins. by 14 ins., top panes 9 ins. by 12 ins. Both gable ends have ornamental timbers tastefully inserted to give a pleasing effect. Barge boards and finials are also included as illustration.

**INTERIOR LINING.** See Price List.

**MADE IN SECTIONS.—CARRIAGE PAID.** All pavilions are made in sections, easily erected. Tenant's fixtures and all bolts, glass, locks, hinges, etc., are supplied free; you also know the exact cost—Sutcliffes' pay carriage paid to your station, and in these days this is an important item to consider.

**DON'T FORGET TO READ SPECIFICATION.** We have tried to give an excellent idea of the superb construction of this pavilion and we are certain that no firm in this country can give better value for money. Please do not purchase any pavilion until you are certain of getting the same excellent value combined with great strength and good workmanship. Sutcliffes' turn out so many portable buildings they are in a position to offer them at pounds below local cost. We want all prospective buyers to pay a visit to our works and see buildings of all kinds in course of construction—it will be more beneficial than reading through the booklet.

## Sutcliffes' Lean-to Sports Pavilion.

Built on 1-in. Boards.

	Length	Width	Height Front	Height Back
1—	12ft.	7ft.	8ft.	6ft.
2—	12ft.	9ft.	8ft.	6ft.
3—	14ft.	10ft.	9ft.	7ft.
4—	18ft.	10ft.	9ft.	7ft.
5—	20ft.	12ft.	9ft.	7ft.

Carriage Paid to nearest Station England and Wales.

**THIS PAVILION IS ONE OF THE BEST.** All outdoor buildings subject to heavy wear should be exceptionally strongly built; it is foolish to try and save a few pounds at the start only to regret the step after the first season's wear. The tremendous amount of extra heavy high grade quality timber employed in this building ensures all purchasers upwards of twenty years sound service in all weathers and in exposed positions; the workmanship can be depended on, the design is unbeatable, and the comfort of the members has been carefully studied. Here you get a pavilion that looks well, wears well, and after 10 years' service will still be in excellent condition. You can easily obtain a lower priced building, but not one that will stand up against all weathers, winter and summer. When buying a pavilion you must choose carefully; it is easy to make nice pictures, but it is the amount of specially selected and extra heavy timber that counts. If you get a Sutcliffes' pavilion you will be proud of it, not just the first two or three years, but long afterwards, and all the time there will be very little to spend in upkeep.

**A COMPLETE SPECIFICATION.** The sides and ends are built on lin. planed, tongued and grooved boards: the floor is also built on the same extra heavy boards, while in every case the framing is most substantial; the roof is built on lin. planed, tongued and grooved boards, then covered with Ruberoid or similar high grade felt, and afterwards stripped with narrow battens. The roof will turn out all wet and will only require tarring say, once in five years. Ordinary common felt does not last long, frequently requires tarring, and is only used because it is cheap. Sutcliffes' won't touch it.

### DESIGN OF.

For PRICES  
SEE LIST  
ENCLOSED.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

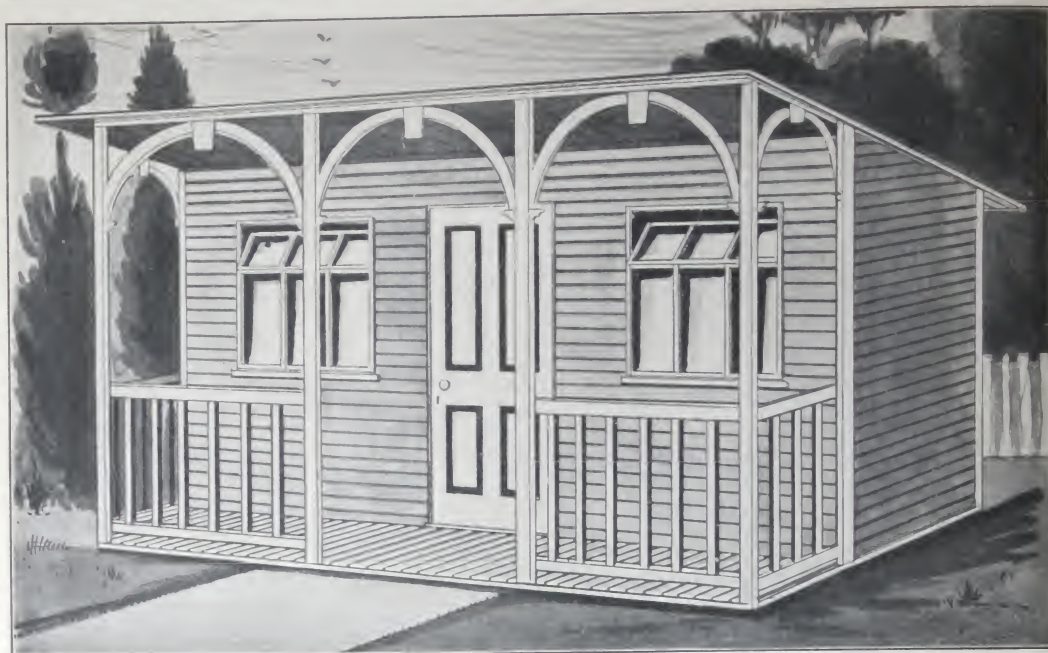

**DOOR AND OTHER FITTINGS.** The front is of beautiful and really ornamental design considering the low price; the door of the best four-panel type, properly hung on butt hinges and complete with lock and key, etc. Very heavy joists are fixed under the floor, and the entire pavilion is raised several inches from the ground, ensuring perfect dryness, preventing any sign of rot, and no fear of sagging. The floor will carry a ton weight with ease.

**WINDOW DETAILS.** The windows are very well built and of special design. The top portion opens inwards to give ample ventilation. Overall dimensions and approx sizes: length 37 ins., width 32 ins., size of bottom pane 18 ins. by 14 ins., size of glass for top pane 9 ins. by 12 ins. We provide 21 oz. best quality glass free. We are quite certain those who purchase this pavilion will be extremely well pleased with the style and finish of the windows.

**EAVES TROUGHS.** These can be included for the back of pavilion at an extra cost, see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**IN SECTIONS AND CARRIAGE PAID.** All buildings are made in sections and delivered carriage paid, complete with glass ready for fixing on arrival with unskilled labour.

## Sutcliffes' Sports Pavilion, for Tennis, Cricket, Lawn or Garden.

With Four Feet Wide Verandah.

	Length.	Width.	Front. Height Eaves.	Back. Height Ridge.
No. 1 ...	16ft.	12ft.	8ft.	6ft.
No. 2 ...	18ft.	15ft.	9ft.	6ft.
No. 3 ...	20ft.	14ft.	10ft.	6ft.

Carriage Paid to nearest Station England and Wales.

This design forms a really beautiful garden house, pavilion or small club house, for tennis, etc. It will look well anywhere, and is built to last; there is not a single nook or corner that will not bear the closest investigation. If a glass panel door is required, this can be supplied at 10/- extra. We wish to impress on all those seeking a first-class ornamental outside building of lean-to design to carefully study the exclusive features in this particular style.

**STRENGTH AND BEAUTY COMBINED.** This pavilion is one of the strongest structures in the booklet, and is most ornamental in design. The outer walls are built on lin. planed, tongued and grooved ornamental weather boards, on extra thick planed framing. Not a single drop of rain can ever penetrate, and you can depend on over twenty years solid wear.

**THE ROOF AND FLOOR.** These are both important sections. The roof is built on 2in. planed, tongued and grooved boards, then covered with high-grade non-tarring felt, and stripped with narrow battens. The floor is built on lin. planed, tongued and grooved boards on extra heavy floor joists. The floor will carry any weight, will not sag, and is raised several inches from the ground, always bone dry.

**DOOR AND WINDOWS.** The four-panel door in centre of front is of superb construction. The windows on each side of the door are large and ventilated from the top and give ample light. In the larger sizes additional windows can be included without extra cost if full particulars are given at the time of ordering.

### DESIGN AP.

For PRICES  
SEE LIST  
ENCLOSED.

**A DELIGHTFUL VERANDAH.** The width of the building in every case includes the verandah. For instance, the 12ft. width building is 8ft. wide inside. The verandah rails are nicely finished, and the semi-circle ornamental timbers under the roof give a really artistic effect. This sports pavilion is certainly one of the most useful designs any club could purchase. The verandah floor is latted so that it will not hold water.

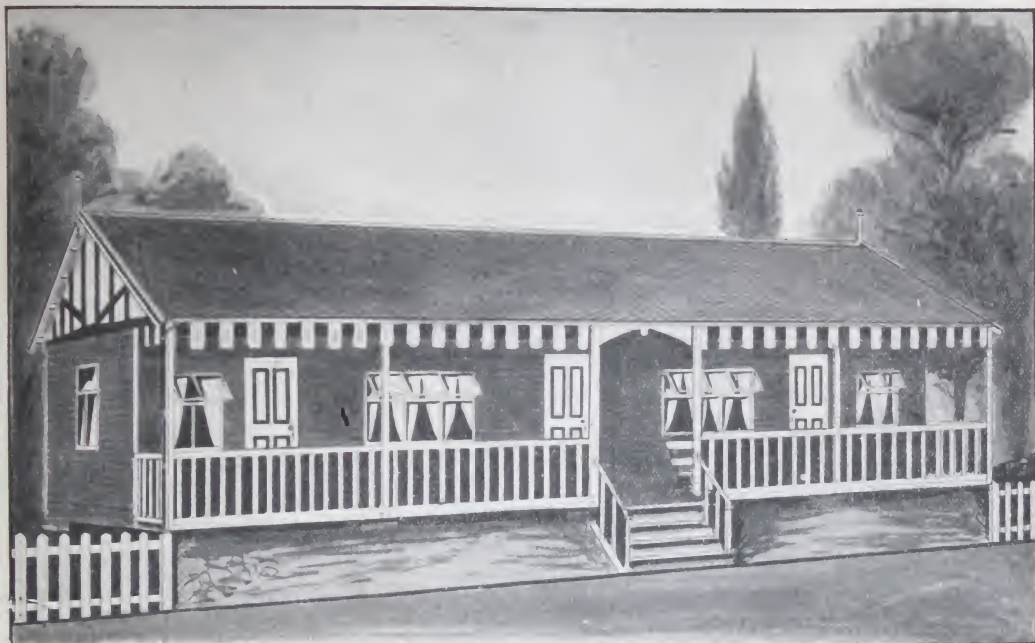

**INTERIOR LINING.** The interior of this pavilion can be lined with 2in. tongued and grooved boards where desired. Extra cost as per price list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**SECTIONAL AND CARRIAGE PAID.** This building is made in sections. All fittings are included—glass, bolts, door, furniture, etc.—and carriage paid to your nearest Station.

**SATISFACTION GUARANTEED.** We are convinced this design will prove of inestimable value to all purchasers. It is the very best production in the lean-to pattern, and is of tremendous strength and wearing capacity. We are certain that at the reasonable price at which we offer it there will be a ready sale; and all who have tried Sutcliffe's productions know how very good they are. May we have the pleasure of your early commands?

## Sutcliffes' Football, Golf or Tennis Pavilion, with Verandah 6ft. wide.

With Two Dressing Rooms and One Large Centre Room.

See Colour Illustration Page 1.

For Plan see Page 3 of Cover.

No.	Length	Width	Height Eaves	Height Ridge	Floor Extra	Verandah is included in width shown.
1—	35ft.	18ft.	8ft.	14ft.		
2—	40ft.	20ft.	8ft.	14ft.		
3—	50ft.	20ft.	8ft.	14ft.		

Carriage Paid to nearest Station England and Wales.

**CONSTRUCTION OF OUTER WALLS.** These are built on lin. planed, tongued and grooved ornamental rustic-jointed weather boards; the best boards in existence for high grade buildings; absolutely rain and draught-proof winter and summer.

**THE RED TILED ROOF.** This pavilion has the roof covered with ½ in. planed, tongued and grooved boards on extra heavy framing, then narrow strips provided on which to fix the red asbestos tiles. Our men are prepared to come and erect the building, also fix the tiles at a price to be agreed on, but no profit on fixing is expected, just the bare cost price only. It is acknowledged that a red tiled roof gives the necessary finishing touch to any good building.

**EAVES TROUGHS AND METAL FALL PIPES.** Wood eaves troughs and metal fall pipes are supplied free.

**A BEAUTIFUL FRONTAGE.** Look at the handsome windows, three beautiful four-panel doors, a delightful verandah 6ft. wide; handsome ornamental wood palings.

**A DOUBLE STRENGTH FLOOR AND SLEEPERS.** The double strength floor is built on 1½ in. tongued and grooved boards and 4 in. by 2 in. floor joists; it is a bone dry floor that will carry any weight; extra thick floor sleepers are also included with this pavilion.

**SECTIONALLY BUILT.** This pavilion is sectionally built and is not difficult to erect, but usually it will be cheaper for our men to erect unless the distance is too far from home.

**INTERIOR ROOMS.** The building is divided off into three rooms and the partitions are made on ½ in. planed, tongued and grooved boards fixed to solid framing. The position of the divisions which extend from floor to ridge can be altered to suit our clients.

### DESIGN FT.

For PRICES  
SEE LIST  
ENCLOSED.

The steps shown in illustration are not supplied, as the size of the steps vary according to size of building. If steps are required, we will quote an extra price on application.

**AN EXTRA NICE DESIGN.** The illustration shown is of a pavilion we erected for the Congleton Cricket Club, Congleton, Cheshire, and looks extremely well. It is one that will be useful for almost any kind of sport, and is so soundly built you can depend on thirty years' wear in all sorts of weather.

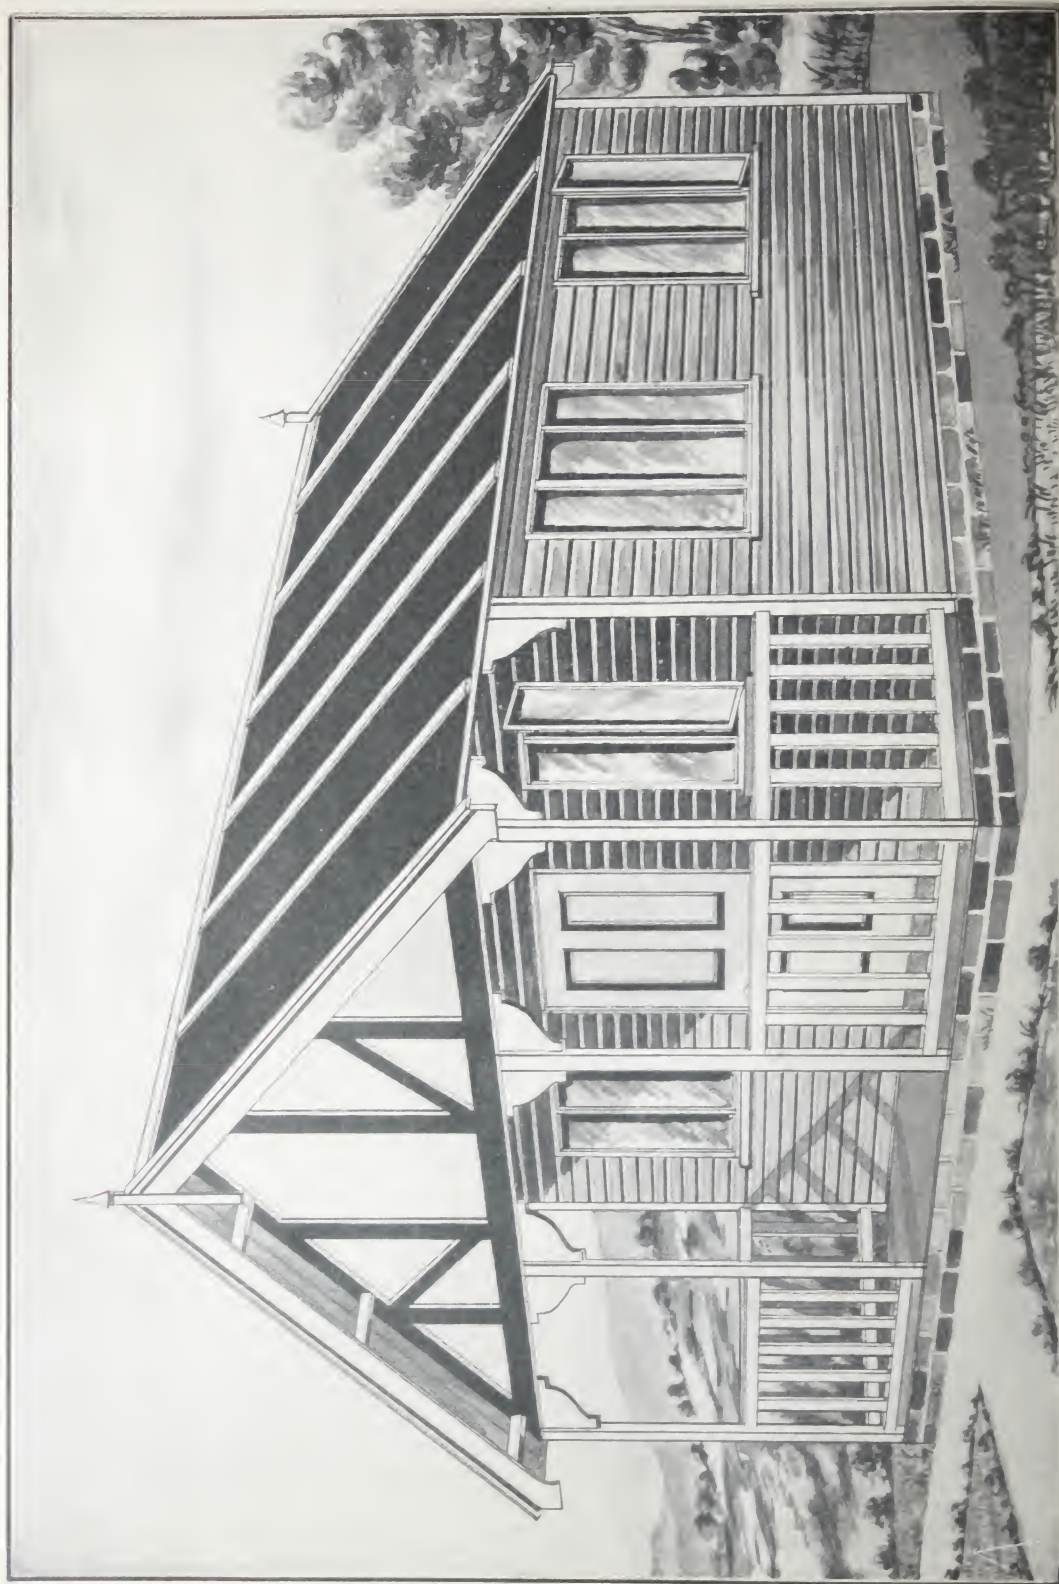

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**IT'S A QUALITY BUILDING.** Every nook and corner is well lighted, the rooms are spacious and conveniently arranged; the verandah is of exceptional width to give a good view to a large assembly; the gable ends with their handsome ornamental timbering give a delightful effect, while the entire front could not be more attractive.

**A BRICK PILLAR FOUNDATION.** Is easily built at low cost by local labour, and this lifts the building well off the ground and is strongly recommended.

**INTERIOR LINING WITH 5/8 in. BOARDS.** This can be specially quoted for where clients feel they can afford the expense.

**BEFORE YOU DECIDE.** Sutcliffes' know you can easily get a lower priced pavilion, but no firm can supply a building made exactly like this, from similar high grade materials, combined with good workmanship, at a lower figure; every ounce of value has been put into it, and all who purchase will find it just as good as we say it is; a pavilion that will be a credit to any club and the firm who built it.

No. 7	40ft.	15ft.	8ft.	12ft.	

5ft. Verandah included in length.

Carriage Paid to nearest Station England and Wales.

**FULL PARTICULARS OF CONSTRUCTION.** The four walls are built on superb quality lin. tongued and grooved ornamental weather boards, nailed to planed framework of ample dimensions according to size of building ordered. This is absolutely the best class of construction obtainable, and ensures a perfect building of great durability and artistic design.

**THE ROOF IS VERY FINE INDEED.**—The roof is built on lin. planed, tongued and grooved boards, nailed to open framing, and with extra strong principals supplied. On top of the boards we fix "Ruberoid" or similar high-grade roofing, then strip with narrow battens; and we also include barge boards and finials as illustrated.

**ORNAMENTAL TIMBERS, WINDOWS, DOOR AND VERANDAH.**—Everything is of the best. The casement windows are fixed up each side, and on either side of the four-panelled door, one pane in each window is made to open and provided with casement stays and fasteners. All glass is supplied free and cut to size ready for fixing on arrival. The door is supplied with lock and key and all furniture. The 5ft. wide verandah gives ample room to sit out, while the verandah rails and ornamental timbers give a pleasing effect. In both gables we include the timber work as illustrated, and a delightful building is assured.

**RED ASBESTOS TILES FOR ROOF.**—These can be supplied for the roof at an extra cost, see list. A red tiled roof always looks better than felt, but naturally costs more money.

**EAVES, GUTTERS AND FALL PIPES.**—These can be supplied, if required, prices see list.

## DESIGN FK.

For PRICES  
SEE LIST  
ENCLOSED.

**THE DOUBLE STRENGTH FLOOR.**—The floor is built on lin. planed, tongued and grooved boards, nailed to extra thick floor joists, and is exceptionally strong.

**INTERIOR LINING AND CEILINGS.**—In some cases it may be necessary to use this building as a bungalow, and interior lining, either with asbestos, beaver board or tongued and grooved boards will be required. Prices see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**SECTIONALLY BUILT AND CARRIAGE PAID.**—This building is constructed at our works in perfect fitting sections. Everything possible is done before despatch, and all bolts, glass and other fittings are included, and in addition we pay carriage to your nearest station. It is always advisable to get to know exactly what you are buying before you place a definite order. Sutcliffes' build up all sections complete before despatch.

**THIS IS A QUALITY PAVILION.**—We have not attempted in this design to cater for those requiring a low priced building. With the generous specification enumerated on this page, low prices are impossible, but when all the exclusive features are carefully studied, the design, workmanship, materials and finish thoroughly examined, then, on sheer merit, this pavilion must strongly appeal to all who are able to afford a structure of outstanding quality, built by expert craftsmen, and designed to give maximum service.

**JUST A FEW WORDS ABOUT THE PRICE.**—Sutcliffes' have already said this pavilion is one of their "De-luxe" models, but there is no sign of extravagance in the prices. All the resources of our big factory, surrounded by expert woodworkers and high grade machinery, are employed in skilful combination. The ultimate result is a pavilion of luxury design, but still exceptionally reasonable in cost, and one that will bear the strictest examination from any angle.

## A Bungalow fixed ready for inspection.

At our Works at Hebden Bridge we have the Design M Four-Roomed Bungalow with red tiled roof and three different kinds of interior linings and ceilings fixed up ready for inspection by anyone interested. The building has been greatly admired, and we shall be pleased to show you over same.

# Sutcliffes' Bungalows, Design H.Y.

Complete with Interior Lining for all Walls and Partitions.

	Length	Width	Height Eaves	Height Ridge
No. 1	23ft.	16ft.	8ft.	13ft.
No. 2	23ft.	20ft.	8ft.	14ft.
No. 3	26ft.	23ft.	8ft.	15ft.
No. 4	26ft.	23ft.	8ft.	15ft.
No. 5	39ft.	23ft.	8ft.	15ft.

All bungalows sent carriage paid to any station in England and Wales. Other districts additional charges on application.

**FIVE DIFFERENT SIZES CAN BE SUPPLIED IN THIS DESIGN.** In this design five sizes are incorporated, all rooms are of convenient size, extremely well lighted and ventilated, draught proof, wood skirting and picture rails supplied free.

**DETAILS OF CONSTRUCTION.** The outer walls are built on our special 1in. ornamental planed, tongued and grooved moulded weather boarding, this is the finest class of timber for bungalow construction. All the outer wall sections built complete at our works before despatch; bolt holes made, and bolts provided and all sections marked for easy erection.

**ASBESTOS SHEETS FOR OUTER WALLS.** Where local authorities compel clients to have asbestos on the outer walls, we can supply these sheets instead of the boarding, and include all necessary wood over lays to cover up the joints without extra cost.

**A FEW REMARKS ABOUT THE WINDOWS.** The windows are as illustrated, they are our own new design, give ample ventilation at the top. All window frames are fixed in position at our works before despatch, and 21 oz. glass is provided cut to size ready for fixing on arrival.

**THE DOORS ARE ALL EXTRA GOOD.** All doors are of the four panel variety, 1 1/2 in. thick for interior rooms and 2 in. thick for the front door, the doors are complete with all necessary door furniture.

**THE ROOF CONSTRUCTION.—FULL DETAILS.** It is never wise to buy a bungalow unless you can obtain a full and concise specification before you pass the order. We send out all the necessary 1/2 in. planed, tongued and grooved boards cut to size ready for fixing to the purlins provided. The roof principals are built up complete at our works; you should make a careful note of this as it is so important. We also supply red asbestos tiles and red asbestos ridge pieces along with all the special nails and washers required for fixing, also a chart showing how the tiles should be fixed.

**ORNAMENTAL GABLE IN THE ROOF AND VERANDAH ENTRANCE.** We feel sure that all our friends will agree the design of these bungalows with the verandah porch entrance is very pleasing and gives that touch of smartness and dignity not often associated with bungalows at these low prices.

**DETAILS REGARDING THE FLOORS.** We supply best quality planed, tongued and grooved boards along with very substantial floor joists, both the joists and the floor boards are cut to size ready for nailing together on arrival.

**FULL DETAILS OF PARTITIONS.** These are built up at our works before despatch, and lined both sides either with best quality 1/2 in. planed, tongued and grooved boards, or asbestos sheets are sent along, also the necessary wood overlays for covering the joints. It is optional whether you have asbestos or boarding for the interior lining, and there is no additional charge.

**CEILINGS PROVIDED WITHOUT ANY EXTRA COST.** We include ceilings for all rooms, if the buyers prefers a tongued and grooved boarded ceiling, we make this at our works before despatch, but if asbestos ceiling is desired, we send the asbestos sheets carriage paid, also the necessary wood overlays ready for fixing on arrival.

**PLANS FOR LOCAL AUTHORITIES.** It is necessary before you can erect a bungalow to obtain permission from the local authorities, they will require proper architect's plans, these we provide for the sum of 12/6, post free.

**SIZES OF THE ROOMS.** We attach ground plans of all these bungalows on this page and show sizes of the rooms, the sizes given are approximate.

**SUTCLIFFE'S GUARANTEE.** We send out these bungalows exactly as described and all materials are of fine quality combined with first class workmanship, and we hereby guarantee all clients shall receive everything described in the specification.

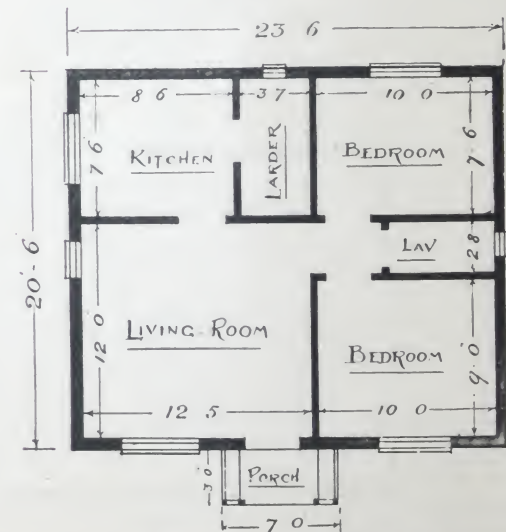

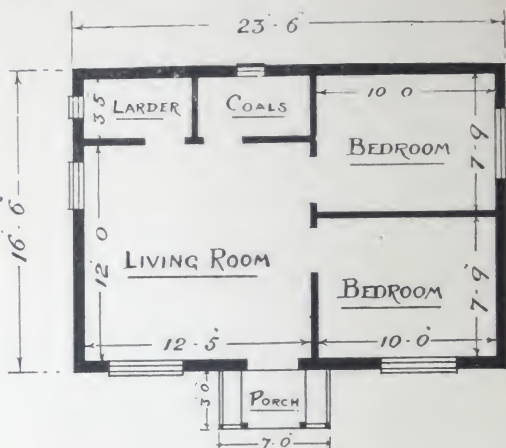

**A CHART FOR EASY ERECTION.** To all buyers we will send out a special erection chart showing exactly how to start with the erection work after arrival.

## DESIGN HY.

**A REALLY HIGH-GRADE BUNGALOW.** This is a bungalow fit for any position, exposed or otherwise, and it is built as strong as any firm could possibly turn out and is also most reasonable in price.

**THE OUTER WALLS** are first covered with  $\frac{1}{2}$  in. planed tongued and grooved boards over extra heavy framework. Then asbestos sheets are provided, all cut to size, for fixing on top of these boards. We want all our clients to remember that this method of construction, although more costly, is absolutely reliable. The majority of firms in offering asbestos bungalows merely give a timber framework and simply make provision for nailing the asbestos sheets to the framework. Asbestos sheets, as everyone knows, are easily broken, and unless they have a strong timber backing they will not be a success for a permanent structure. But when you have a proper timber backing, as we include in this bungalow, then you get the very best method of construction, and you are certain to get a building that will give practically a lifetime's wear.

**A REALLY HANDSOME ROOF.** The roof of this bungalow is first covered with  $\frac{1}{2}$  in. planed, tongued and grooved boards, then all necessary stripping laths are provided, and afterwards the tiles are added. Everything is supplied ready for fixing the tiles, that is, all necessary nails are included; and when the tiles are fixed this roof looks extremely well from any angle, is absolutely rainproof, and will give the greatest satisfaction to all clients. The necessary asbestos ridge pieces are also provided, and we include gutters and fall pipes.

**LOOK WHAT NICE ROOMS.** In this particular design you will see that we include three really good size bedrooms. All these are of excellent design, cosy and comfortable, and very well lighted. There is also a really nice bathroom, the hall is of handsome design, and the porch entrance gives a decidedly attractive appearance to this bungalow. In addition to the bedrooms there is a well lighted and fairly large kitchen, sufficiently large for most families, and one that is quite easy to work. The sitting room is very large indeed, and we also provide a small larder and coalplace for outside conveniences. We believe that when the ground plan of this bungalow is carefully studied, that all interested clients will admit it is one of the very best designs that any architect could possibly plan for a convenient house offered at a reasonable figure.

**THIS BUNGALOW IS PROVIDED WITH CASEMENT WINDOWS.** All the windows are of casement design with opening panels. The windows are of sufficient size to meet the requirements of all the rooms, and in every case we guarantee really good lighting; in fact, the design of these casement windows could not possibly be surpassed. All the windows are properly morticed and tenoned, and made from high-grade materials, and are absolutely reliable.

**THE GENERAL APPEARANCE OF THIS BUNGALOW.** We have endeavoured to design this bungalow so that the outside appearance would be of a most striking design and one that will be very pleasing to the eye, artistic, durable, and thoroughly reliable. You will notice there are two big gables facing the front and a very large porch entrance, and the general outside appearance of this bungalow is one that will bear the strictest investigation, and is bound to appeal to the most critical eye. All the gables have ornamental timber work included over asbestos, and the half timbered effect of the entire building is most beautiful.

**FOUNDATION AND CHIMNEYS.** The client has to prepare his own brick wall foundation and to erect the chimneys. A brick wall foundation is undoubtedly the best. Our men, at a price to be arranged, are prepared to come to erect this bungalow, but the fixing of baths and decorating, etc., must be done by the client. We do not undertake the interior fixing of any fittings.

**MOULDINGS, PICTURE RAILS, GUTTERS AND FALL PIPES ARE INCLUDED.** All these items are included in the price of this bungalow, so that clients know exactly what they are to receive, and we have endeavoured to give in each case the best possible value for money, and we know that clients will be thoroughly satisfied.

## DESIGN PB.

For PRICES  
SEE LIST  
ENCLOSED.

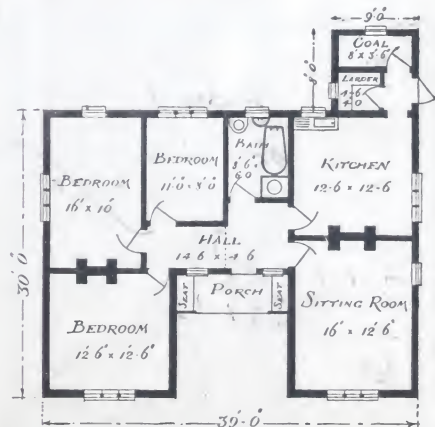

**INTERIOR LINING AND CEILINGS.** We give all our clients the option of three distinct kinds of lining. We can supply  $\frac{1}{2}$  in. tongued and grooved matchboards to make linings and ceilings, and in this case the lining can be fixed before despatch. We can also supply beaver board with all necessary stripping laths, or asbestos sheets just as clients prefer. Some of our friends prefer asbestos lining because this is absolutely fireproof, but to obtain a really artistic finish either tongued and grooved boards or beaver board is to be preferred. This is the decision we have come to after an extended trial and great experience in the erection of bungalows in all parts of the country.

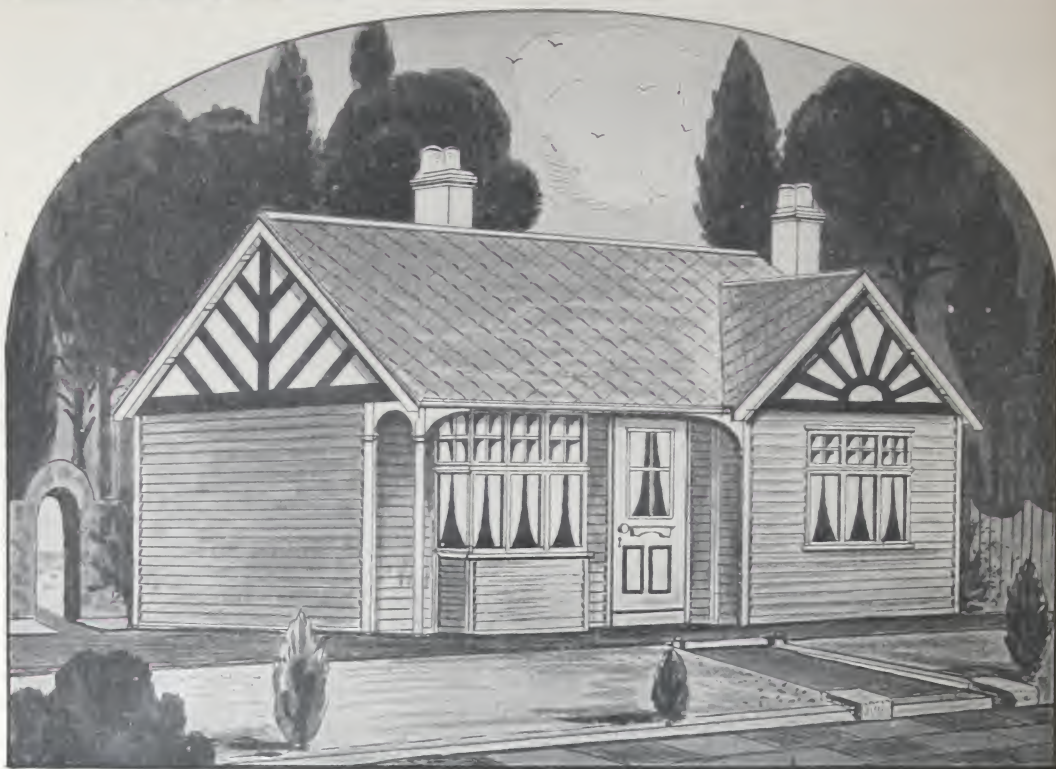

**AN OUTSIDE COALPLACE AND LARDER.** These are both included in this bungalow with access from the inside, and we think this little outside convenience will be greatly appreciated because it gives more room in the kitchen, and does not affect the distribution of the rooms inside. We have particularly arranged for this outside convenience for the special purpose of giving more room inside, and the roof of the coalplace and larder will have red tiles supplied exactly as the roof of the larger structure.

**THE ERECTION COSTS OF THIS BUNGALOW.** It is somewhat difficult to fix the erection costs of any bungalow because this varies according to the locality, according to the time of the year, as in winter time a certain amount of time is lost owing to bad weather and also to the distance from Hebden Bridge, but if our men are engaged we do not expect to make a single penny profit on the cost of erection; and as an approximate idea, if board and lodgings are provided for our men by the client, we are prepared to erect this bungalow on the client's foundation for an approximate price of about £70.

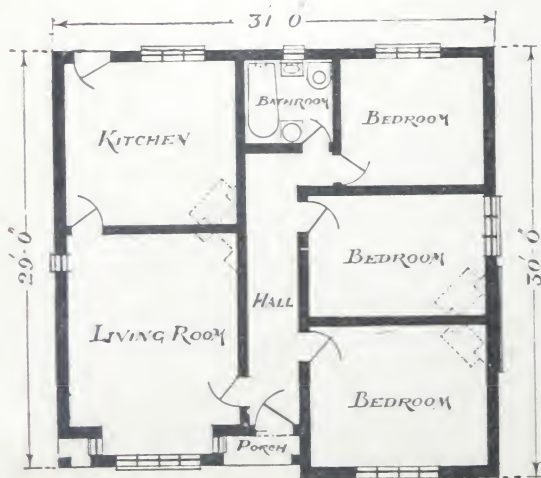

**THE DESIGN OF THE DOORS.** All the interior doors are really high-grade four-panelled doors, beautifully finished, and will give the fullest satisfaction to all purchasers, while the front door is half glass, and will be of attractive design. All doors are supplied with necessary furniture and will be quite complete.

**UNDERSIDE OF FLOOR CREOSOTED.**—The underside of the floor is treated with special wood preservative at our works before despatch.

# Specification and Full Particulars of Red Tiled Six-Roomed Bungalows,

## DESIGNS JM and SE.

**A WELL-PLANNED COUNTRY HOUSE.** This really high-class Bungalow is of outstanding appearance and remarkable strength. It is solidly built in every nook and corner, all the rooms are well lighted, convenient in design, cosy and comfortable in all seasons, and the bay windows give that touch of high-class finish so greatly admired, but only found in buildings of the highest class.

**THE ROOF LOOKS WELL FROM ANY ANGLE.** North, South, East, or West, no matter from where you stand to view this Bungalow, it looks well. It will suit your friends. The roof has a bold and decidedly artistic appearance, and it will be bone-dry in all weathers. Sutcliffe's never do any jerry work. The roof is first entirely boarded before a single tile is fixed; this is the only way to produce a perfectly dry roof, but few firms do it. Don't be tempted to save a few pounds, and be pushed off with a rafter roof without boards, but just covered with red tiles, and remember red tiles are better and more expensive than grey ones.

**THE OUTSIDE WALLS ARE VERY THICK.** Sutcliffe's use lin. rebated and moulded weather boards; these are ten times better than ordinary weather boards, and far superior to tongued and grooved boards. No matter how hot the summer or how cold the winter, it will make no difference to these walls. The floor is of remarkable strength, lin. planed, tongued and grooved special floor boards are nailed to extra thick joists, spaced quite near to each other in order to form a floor that will stand any weight in any position, and never the slightest sign of sagging. That is what you want in your future home, but you only get it in Bungalows of the Sutcliffe standard.

**THE FINISH OF INTERIOR WALLS.** The interior lining is secured to 4ins. by 2ins. framing. The 4ins. cavity means absolute dryness, freedom from draughts, warm in winter, and cool in summer. For the benefit of our prospective clients we have no hesitation in saying that by far the best material for lining is the 4in. planed, tongued and grooved boards. We shall, however, be pleased to supply either beaver or similar boarding, or asbestos cement sheets, together with all materials for fixing, including nicely planed stripings for the joints. In every case we supply skirting boards, picture moulds, door and window architraves, etc.

**MOULDINGS AND PICTURE RAIL.** All these are provided free, and fixed by our men when they erect.

**SMART DOORS, HIGH-GRADE WINDOWS.** The doors and windows of any house are important. It takes an expert to know which are the best, and Sutcliffe's are quite willing to have their doors and windows most critically examined by anyone. The casement windows supplied are strong and easily opened, smart in design, admit plenty of light and fresh air when required; the doors, except the front, are of the four-panel type, will decorate finely, and give perfect satisfaction.

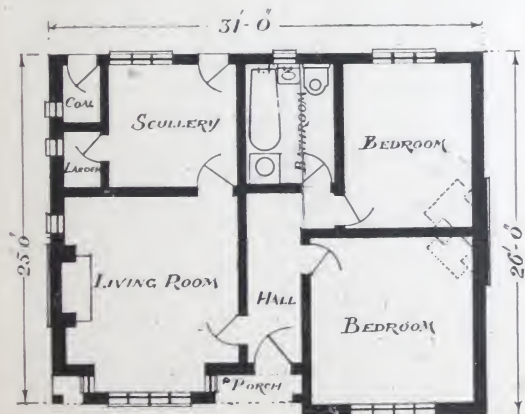

**FOUNDATIONS AND CHIMNEYS.** The purchaser prepares his own foundation, because it is cheapest done on the spot. Either low brick pillars or continuous brick walls are best, and will not be expensive. Now that really good portable independent cooking ranges can be obtained so cheaply, it is not essential to have a brick chimney, as usually a chimney will cost about £15 to construct. The price shewn in this Catalogue does not include any chimneys.

**PLANS FOR THIS BUNGALOW.** We are prepared to supply one proper architect's plan for this Bungalow for 12/6. This is less than half the usual cost.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**TERMS OF SALE.** We are open to any fair system of business trading. Clients can pay 50 per cent. deposit and the balance on delivery, subject to Bankers' or other satisfactory references. Before clients send us any money, we ask them through their Bankers to make an enquiry regarding our firm. Our Bankers are Martins Bank, Ltd., Hebden Bridge.

**CARRIAGE PAID ENGLAND AND WALES.** This Bungalow, Design JM, is delivered to your nearest station carriage paid England and Wales. Above this distance the carriage can be easily adjusted.

### DESIGN SE.

For PRICES  
SEE LIST  
ENCLOSED.

**THE DESIGN "S.E." BUNGALOW.** This is built on similar lines to the "J.M.," but is not quite so large. Still it has just the same attractive appearance and as will be seen by the plan is of convenient size, with very nice accommodation. The prices are lower than design "J.M." and will be found on list enclosed. We can very strongly recommend this Bungalow to all who find the "J.M." just a little too large and expensive.

**VERY SOUND CONSTRUCTION.** This charming little two-roomed cottage is very strongly built, and worthy of your best consideration. The four walls and floor are built on extra strong framing, and lin. planed, tongued and grooved boards. The roof is built on sound rafters, lin. planed, tongued and grooved boards, covered with high-grade felt, well battened down.

**INTERIOR LINED WITH BOARDS.** In addition to the remarkable strength of the outer walls, we can line the interior with high-grade lin. planed, tongued and grooved boards; sides and ends to eaves height; the partition on both sides of framework and both rooms are ceiled over with similar high-grade boards. Skirting boards, moulded picture rails, also moulded door and window architraves, makes this a perfect building, rain and draught proof in all weathers, and a building that can be easily decorated at a nominal cost. Sutcliffes' turn out a really wonderful two-room cottage at a very handy price, and one that after twenty years' wear will still be good.

**TWO NICE ROOMS.** This cottage is built in two sizes, with a partition forming two rooms. In the smallest size you get the living room, 12ft. by 10ft., and the bedroom 10ft. by 9ft.; in the large size, 14ft. by 12ft., and 12ft. by 10ft.

**CASEMENT WINDOWS, DOORS, ETC.** This little bungalow is provided with the very latest pattern casement windows, made to open; the door is of handsome four-panel type, complete with lock and key; the roof is covered with Ruberoid or similar felt, and finished off with stripping battens, barge boards, and finials, while over both eaves striking ornamental timbers are included.

**RED ASBESTOS TILES FOR ROOF.** We offer red asbestos tiles, also ridge pieces and all necessary nails and stripping laths for covering the roof. The extra cost see list.

### DESIGN L.

For PRICES  
SEE LIST  
ENCLOSED.

**EAVES TROUGHS AND FALL PIPES.** Wood eaves troughs and metal fall pipes are provided free of cost with all orders for this two-room cottage.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

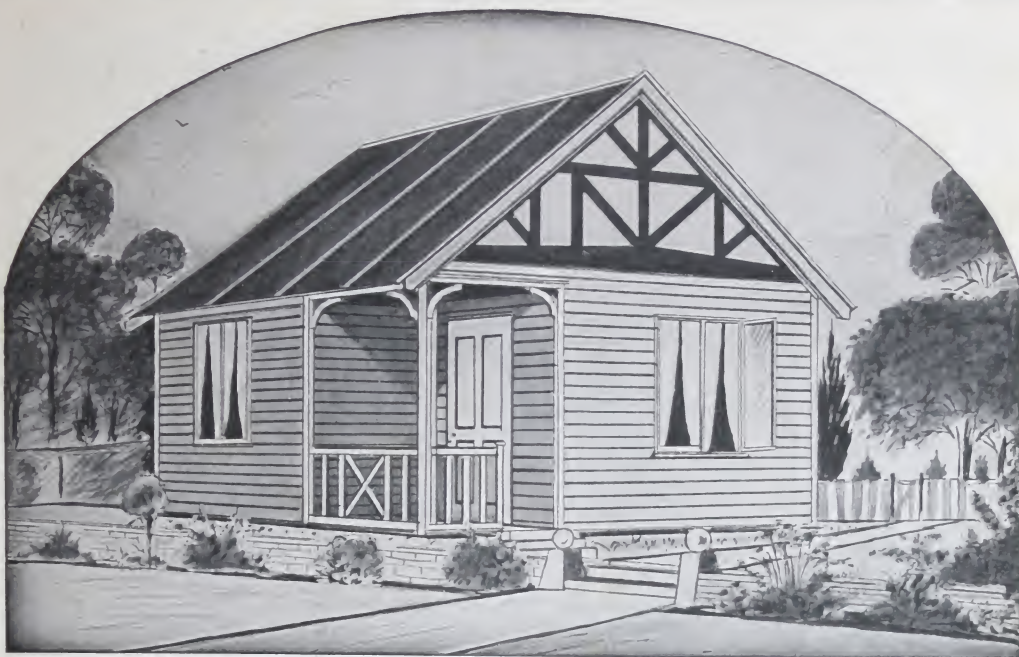

**DOUBLE-STRENGTH FLOOR.** The floor for this little cottage is of enormous strength, this is how we make it: lin. best selected floor boards are nailed on to battens, extra thick, this is a perfect floor that cannot sag and must give satisfaction.

**HANDSOME AND STRONG—MODERATE COST.** It has been our aim to build a small portable two-roomed cottage of smart appearance but not elaborate, if we had selected a design with great ornamentation the price would have been out of the reach of most potential buyers; by keeping the design as above we have also kept the cost remarkably low, and we are hoping for a heavy demand for this useful building.

**LOOK AT THE DESIGN.** You get two well-lighted rooms there is a window in the opposite end not shown in the illustration, the casement windows are of beautiful design and lend themselves to artistic curtain treatment, it does not matter from what angle you look on this cottage when it has been nicely painted, it has a most handsome appearance and, in these days of enormous cost of brick buildings, you could not do better than have one of these cottages.

**AT THE SEASIDE OR IN THE COUNTRY.** You can generally rent a piece of suitable land, either at the seaside or in the country, just as your fancy appeals, erect one of these little bungalows and when not in use it could be let to dozens of anxious clients not prepared to pay heavy hotel charges, but still eager to have a few weeks' rest at a reasonable cost.

## Sutcliffes' Three-Roomed Bungalow with Verandah

For Alternative Plans see Page 115.

Length 21ft.	Width 20ft.	Height Eaves 8½ft.	Height Ridge 13½ft.	Interior Lining Extra
-----------------	----------------	--------------------------	---------------------------	--------------------------

**EXTRA HEAVY BUILT.** This ideal three-roomed bungalow is remarkably strongly built and well worth your earnest consideration. The four walls are built on lin. tongued and grooved weather boards, which mean perfect dryness at all times, no matter how severe the weather conditions. The framing is most substantial, and the enormous amount of time we put into these buildings makes them stand out in a class to themselves.

**DOORS, WINDOWS, ETC.** The doors are of three or four-panel type and very finely finished, complete with lock and key and all necessary furniture. The windows are of the latest casement pattern, made to open and smart in appearance. If you buy a bungalow from Sutcliffes' you will be proud of it and it will keep in good condition for over twenty years.

**ROOF AND FLOOR.** The floor is built on lin. tongued and grooved boards, with joists of exceptional weight. The roof is constructed on heavy framing, and lin. tongued and grooved boards, then covered with heavy quality Ruberoid or similar felt. You get perfect dryness in all these bungalows, and if the price is more than some firms it is only because the bungalows are so much more substantial.

**A RED TILED ROOF IF DESIRED.** The best class Bungalows are always fitted with red asbestos diagonal roof tiles and ridge pieces. For the extra cost see list, and it is more than worth it. Some firms do not cover the roof with boards when they use red tiles, but this is not the safest and driest roof; but if it is all that our clients want we are prepared to supply the red tiles and necessary roof-laths for fixing without extra cost. When red tiled roofs are ordered, the tiles are sent separately, complete with all fixing materials, and the cost of fixing is paid by client on arrival. A bungalow with a red tiled roof is of pleasing appearance, attractive from any angle, cool in summer, warm in winter, and always bone dry.

### DESIGN KA.

For PRICES  
SEE LIST  
ENCLOSED.

**EAVES TROUGHS.** Wood eaves troughs and metal fall pipes are included free of charge with this bungalow.

**DESIGN OF ROOMS AND VERANDAH.** You will notice we offer a nice bedroom, a good-sized living room, and a decent kitchen, while, if necessary, you could use them as two bedrooms and have meals in the small kitchen. The Verandah is of ample size but, though wonderfully smart in appearance is not costly, and is of great use in summer.

**INTERIOR LINING EXTRA CHARGE.** All partitions, etc., are included free, but if we line the interior with matchboards, then we charge a little extra, but this lining includes all the four walls to eaves, a ceiling for all rooms and, in addition, we line all partitions.

**ORNAMENTAL TIMBERS, ETC.** Sutcliffes' complete this three-roomed bungalow so nicely that all your friends will be attracted with it. The nicely finished barge boards together with our special tongued, grooved and moulded weather boards give you a bungalow that will be always bone dry and of great weather resisting power. The artistic finish of each gable end will readily be appreciated, but this is not overdue to incur unnecessary expense. When you are comparing prices you will find that not one firm in twenty offer you lin. thick moulded weather boards; but we tell you from experience they are easily the best and on no account should you be tempted to purchase a bungalow that is not so constructed.

**SUTCLIFFES' PAY THE CARRIAGE.** You know the exact cost of this bungalow because we deliver it carriage paid to your nearest station, and are prepared when requested to send one of our men to assist in erection at a small extra charge. If you have a deal with Sutcliffes' it will be on absolutely straight lines, and please don't forget our final warning to fight shy of the low-priced, shoddy-built bungalows flooding the market to-day.

# Sutcliffes' Four-Roomed Bungalow with Verandah.

1 —	33ft.	16ft.	8ft.	12ft.
	Carriage Paid to nearest Station England and Wales			

**CONSTRUCTION VERY SOLID.** Quite a lot of timber-built bungalows are now offered that are so weakly built they cannot possibly be considered substantially made, but Sutcliffes' will not be a party to the construction of these slender built bungalows just to catch unwary buyers. If you decide on a bungalow you want something that will be a credit to all concerned and you cannot get it unless you are prepared to pay a fair price.

**READ THESE DETAILS.** The four walls, roof and floor, are built on superior quality lin, planed, rebated and moulded weather boards, with extra heavy framing. On no account be tempted to buy a bungalow unless it is similar made. The roof is also covered with Ruberoid or similar felt, then stripped with nice battens, while the floor stands on extra heavy joists.

**DOORS AND WINDOWS, BARGE BOARDS, ETC.** The door, fixed in front as illustrated, is of the four-panel type, handsome and strong, fitted with lock and key and good furniture; the windows are of casement design, made to open, all opening gear provided. Both the ends of the bungalow have ornamental timbers inserted, also barge boards and finials. You get smart appearance without expensive decorations, this is just what many clients want to-day.

**A BEAUTIFUL VERANDAH.** The verandah is both useful and distinctly ornamental, in addition, it is of good size—23ft. long and 3ft. wide, thus forming a most attractive entrance to this delightful home.

**LARGE CONVENIENT ROOMS.** Many bungalows are badly designed, but look at this one: you get a decent kitchen, a fair-sized living room, and two charming bedrooms. You could not wish for anything that will give greater comfort or be more easy to work. Design is everything, and Sutcliffes' have excelled themselves.

**For PRICES  
SEE LIST  
ENCLOSED.**

## DESIGN M.

**SOMETHING ABOUT THE PRICE.** It would have been easy for us to give you a cheaper bungalow but we could not put a cheaper one that would be both substantial and of nice appearance, well worth all we ask for it and a sound investment. Probably only once in your lifetime will you purchase a bungalow, so let it be a good one and, above all, let it be produced by the right firm.

**INTERIOR LINING RECOMMENDED.** It does not matter how good the outside walls, it is advisable to have the interior lined, and for the benefit of our clients we might say that by far the best material for this purpose is the planed, tongued and grooved lin. boards. You can decorate safely, the inside appearance is much smarter and the lining gives the much desired finished appearance so essential.

**UNDERSIDE OF FLOOR CREOSOTED.**—The underside of the floor is treated with special wood preservative at our works before despatch.

**SUTCLIFFES' PAY CARRIAGE.** This is a very big item to consider. It does not matter where you reside Sutcliffes' pay the carriage, and then you know the exact cost.

**SUTCLIFFES' CAN SEND MEN TO ERECT.** Although there is nothing difficult about the erection of this bungalow, there is no doubt that one of Sutcliffes' experienced men would be of great assistance, and it is for this reason we offer to send one man to help in the erection and keep expenses as low as possible, just wages and ordinary expenses.

## YOU CAN PURCHASE ON DEFERRED TERMS ALL THE GOODS SHOWN IN THIS CATALOGUE.

## Sutcliffes' Photographic Studio, with Red-tiled Roof.

	Length	Width	Height Eaves	Height Ridge	Floor Extra
No. 1 ...	15ft.	9ft.	7ft.	9ft.	
No. 2 ...	16ft.	10ft.	8ft.	11ft.	
No. 3 ...	20ft.	12ft.	8ft.	12ft.	
No. 4 ...	24ft.	16ft.	8ft.	14ft.	

Carriage Paid to nearest Station England and Wales.

**CONSTRUCTION OF WALLS.** These are built on the finest boards obtainable for making perfectly dry, ornamental structures, 1in. planed tongued and grooved weather boards over extra thick framing.

**THE RED-TILED ROOF.** First we cover the roof entirely with 1in. planed, tongued and grooved boards, then supply all stripping laths, also the full complement of red asbestos roof tiles and ridge pieces ready for fixing on arrival. Unless the roof is made in this fashion, it is not as good as it should be. On no account be put off with a rafter roof covered with tiles.

**WOOD EAVES TROUGHS FREE.** We include free of charge wood eaves troughs for this fine studio.

**THE LIGHTING ARRANGEMENTS.** It will be seen in illustration that we provide a number of roof lights, also lights in the sides; all clear 21oz. glass is provided free and cut to size ready for fixing on arrival.

**THE DOOR IN FRONT.** It a really high grade four-panel design, mortised and tenoned, complete with lock and key and all necessary furniture, it puts the finishing touch on this handsome building.

**ORNAMENTAL GABLE ENDS.** The gables are covered with ornamental timbers, and when nicely painted the outside appearance is most attractive, while the roof is finished off with barge boards and finials.

**THE DOUBLE STRENGTH FLOOR.** This is built on 1in. planed, tongued and grooved boards on extra thick floor joists—a floor always bone-dry, absolutely firm, and will carry any weight.

### DESIGN RO.

For PRICES  
SEE LIST  
ENCLOSED.

**INSIDE LINING IF REQUIRED.** We can line the sides to eaves and ends to ridge with best quality 1in. planed, tongued and grooved boards. The extra cost see list.

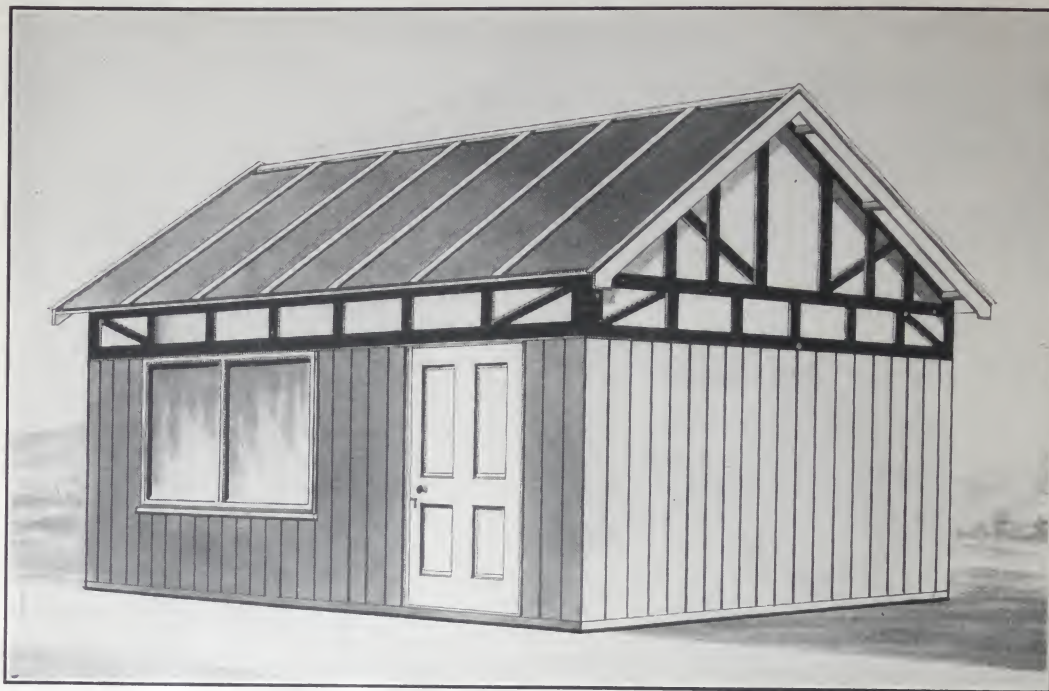

**A DARK ROOM CAN BE PROVIDED.** We can fix a dark room in one corner up to eaves' height at a small extra cost, according to size required.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**SECTIONAL AND CARRIAGE PAID.** We make these studios perfect-fitting sections; but if our men are required to erect same, we carry out this work as reasonable as possible, and expect no profit on erection costs.

**A REDUCTION IN PRICE.** Perhaps this super grade studio is too elaborate and expensive for some clients. In order to please all our friends, we are prepared to build in sections as follows:—the outer walls on 1in. boards, the roof similar boards, and really good felt; and this method of construction will reduce the price of the studio twenty per cent. off the list price; but there is no reduction in the cost of the floor; this must be the best obtainable to be a success and give thirty years' wear.

**THE GUARANTEE OF SATISFACTION.** You might easily beat Sutcliffe's prices; but if you do the quality will be greatly inferior, and when buying a studio, something that has probably to give very many years' wear, the first cost is not the prime consideration. Get a Sutcliffe studio and you will be delighted for all time.

## Sutcliffes' Portable Shop.

	Length.	Width.	Height Eaves.	Height Ridge.
1—	10ft.	8ft.	7½ft.	9½ft.
2—	12ft.	8ft.	7½ft.	9½ft.

4—	15ft.	10ft.	8ft.	10½ft.
5—	15ft.	12ft.	8ft.	11ft.
6—	20ft.	12ft.	8ft.	11ft.

Carriage Paid to nearest Station England and Wales.

**CONSTRUCTION—SIDES AND ENDS.** The sides and ends are constructed of 1½ in. planed, tongued and grooved, boards of superior quality; not the common sort frequently used. The framing is of best Swedish or similar high-class foreign production; altogether better than any home grown stuff. You must have the right materials and, if you deal with Sutcliffes', you are sure to get them.

**ONE ONCH MOULDED WEATHER BOARDS.** We strongly advise our friends, instead of having the ordinary specifications, to have the sides and ends built on 1 in. moulded weather boards, as illustrated on page 4. These will never allow a single drop of rain to enter; they are the finest boards in existence for this class of work, and the extra price is only 15 per cent.

**LOOK AT THE ROOF.** A building of this kind must have a bone-dry roof, if not it will prove troublesome. This is how Sutcliffes' make their roofs—1½ in. planed, tongued and grooved boards are fixed to wonderfully heavy battens, on the top of the boards we fix best quality felt, either Ruberoid or something similar, there is nothing better; but even on top of the felt we fix row after row of narrow battens, which keep the felt in position.

**RED ASBESTOS TILES FOR THE ROOF.** These look far better than felt and we offer to supply red tiles and ridge pieces, also all nails and stripping laths, see list.

**EAVES TROUGHS CAN BE SUPPLIED.** Prices see list.

**COMPLETE DOOR AND WINDOW SPECIFICATION.** We include a very fine panelled door as illustrated, fitted with stout rim lock and the necessary fittings. The window frame is morticed and tenoned together, of superior finish and first class design. 21 oz. glass is supplied cut to the required size, namely, 36 ins. deep by 18 ins. wide each pane. Clients who prefer window frames to take larger size glass will have their requirements considered if they provide the glass.

### DESIGN N.

For PRICES  
SEE LIST  
ENCLOSED.

**A SOUND FLOOR.** With all sheds the floor is the vital part; yet many do not appreciate this; you must have a sound floor. Sutcliffes' floors have never been surpassed, and this is how we make them:—Heavy battens, extra thick, are laid down, on top of these we nail cross-wise 1 in. floor boards; the building stands on top of the floor and the floor boards, being raised 4 in., are always perfectly dry. Don't have a poor floor at any price, and be sure you get 1 in. boards and heavy battens.

**INSIDE CAN BE LINED.** We can line the sides to eaves and ends to ridge with 1 in. planed, tongued and grooved boards; the extra cost see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

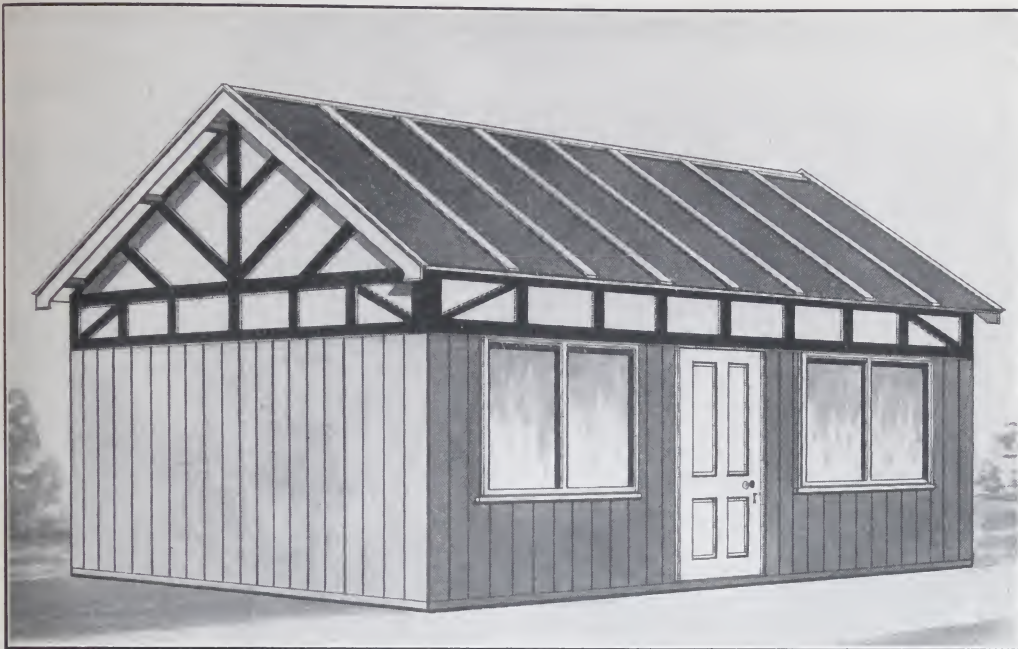

**EASY-FITTING SECTIONS.** All our portable buildings are made in sections and can be easily erected by any handy men; no skilled labour is essential, and all bolts, etc., are provided. They are tenant's fixtures, and can be quickly moved should occasion demand. All bolts, locks, hinges, etc., are provided free.

**BARGE BOARDS AND ORNAMENTAL WORK.** Just note these in the illustration and they certainly give a most pleasing effect. We could easily give more fancy work, but this only increases the cost; this is one reason why we limit ornamental work to small dimensions.

**WHO PAYS THE CARRIAGE.** Sutcliffes' pay all carriage to your nearest station in England and Wales.

**IMPORTANT FEATURES.** Sutcliffes' thoroughly guarantee all the goods they sell. Complete satisfaction or money back, that is their motto. When you put a job into Sutcliffes' hands you can feel safe, and the quality of their lock-up shops cannot be surpassed at anything like the price.

### DESIGN O.

For PRICES  
SEE LIST  
ENCLOSED.

**CONSTRUCTION OF OUTER WALLS.** The two sides and ends are built on best quality 1in. planed, tongued and grooved match-boards. The framing is of great strength; the bigger the room the greater the strength of framework employed. You will never find interior timber in any of Sutcliffes' buildings, and the low prices are solely due to good organisation and heavy output. We can have a shed built while the ordinary joiner is sorting out suitable timber.

**YOU MUST HAVE A GOOD ROOF.** If you want a room for a shop or anything of this kind, then a perfect dry roof is necessary. Sutcliffes' build their roofs on 1in. planed tongued and grooved boards, with heavy rafters below; on the top of the boards we fix excellent roofing felt, then strip with battens. You cannot wish for a more suitable rainproof roof.

**RED ASBESTOS TILES FOR ROOF.** These can be supplied at an extra cost; see list.

**ONE INCH MOULDED WEATHER BOARDS.** We can build the sides and ends on 1in. tongued and grooved, ornamental, weather boards. These are far superior, and the extra cost is only 15 per cent. If you can possibly see your way, be sure to have the shop built in this manner.

**DOOR AND WINDOW DETAILS.** The panelled door included with this design is of superior finish, complete with rim lock and the necessary fittings. The windows are extra well made, nice design and convenient size. 21 oz. glass is provided free. Size of glass, 3'ins. deep by 18ins. wide. Window frames to take larger glass would be considered if clients provide their own glass.

**A WONDERFUL FLOOR.** Sutcliffes' send out floors of tremendous strength, something that will carry any weight. Built on 1in. prepared boards, with rafters extra thick, a floor of this kind will carry any weight and never any sagging. This is what you want. In addition, the floor will be raised 4 in. from the ground, which means there is nothing to rot with exposure.

**ORNAMENTAL TIMBERS AND BARGE BOARDS.** These are plainly shown in the illustration, they give a most pleasing effect to all portable buildings and are undoubtedly a great attraction. Despite these improvements our prices are still kept remarkably low.

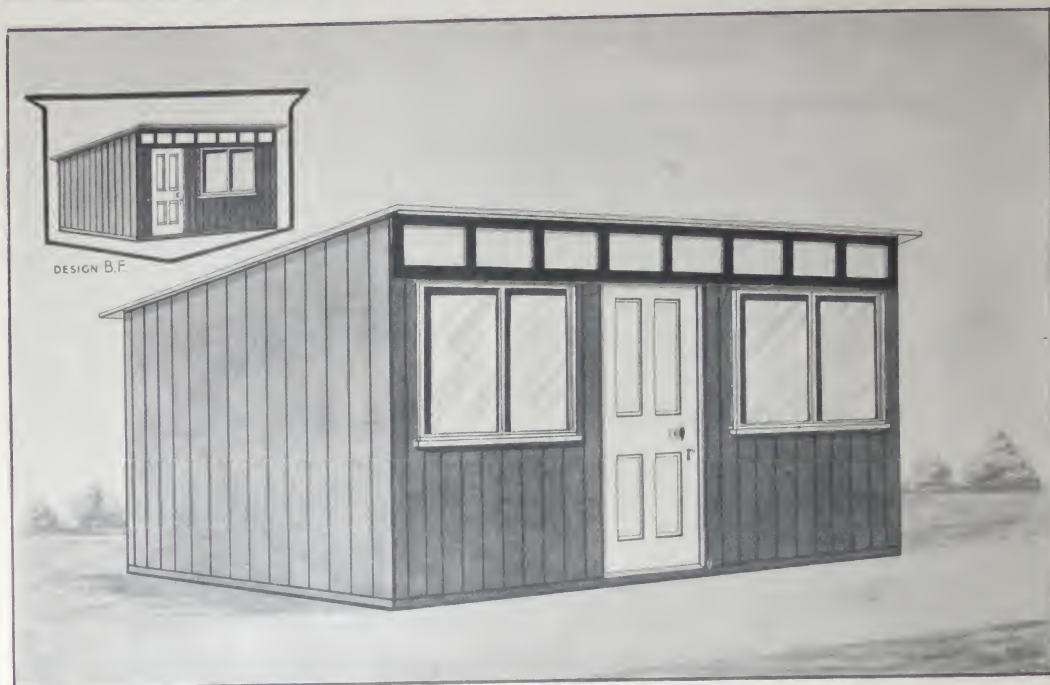

**MADE IN SECTIONS.** All these buildings are made in sections. There will be no trouble for any handy men to erect on purchaser's level site. We do not treat these buildings with preservative believing clients will prefer to paint them to individual taste on arrival; but we supply all bolts, etc., lock and key; in fact, the sheds are sent quite complete, and you know exact cost.

**INSIDE LINING, IF REQUIRED.** This can be done. Full particulars see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**YES, WE PAY ALL CARRIAGE.** These sheds are sent carriage paid to any station in England and Wales.

**A LONG SERVICE GUARANTEE.** When you invest in a portable shop for your personal benefit, you must have a building that not only looks well when you get it, but one that will stand all weathers, all conditions, good and bad, after ten years' wear be almost as good as the day it came, and with a few general repairs be ready for another ten years' lease. Consider whether it will pay you to erect a low-priced building costing very nearly as much as a Sutcliffes' building, but lacking in weight of timber, in general construction, appearance, and all-round solidity. Sutcliffes' ask you to compare any of their buildings with those of other makers; study materials, design, weight, appearance, and length of service.

## Sutcliffes' Lean-to Shop, Suitable for Butcher, Confectioner, Grocer, Hairdresser, Boot Shop, etc.

	Length.	Width.	Height Front.	Height Back.
1—	12ft.	10ft.	8ft.	6ft.
2—	15ft.	12ft.	9ft.	7ft.
3—	18ft.	12ft.	9ft.	7ft.
4—	20ft.	12ft.	9ft.	7ft.

All sent Carriage Paid England and Wales.

**CONSTRUCTION DETAILS—DON'T MISS THEM.** Sutcliffes' lean-to pattern portable shop is built on  $\frac{1}{2}$ in. planed, tongued and grooved boards for sides and ends—nothing but brand new selected timber is used; the framing is of great strength, and in every detail this shop is one you would be proud of.

**ONE INCH ORNAMENTAL BOARDS.** We offer to use these special boards as illustrated on page 4. These are a great improvement on the  $\frac{1}{2}$ in. tongued and grooved boards, and the extra cost for making the shop with sides and ends on these boards is only 15 per cent.

**THE ROOF IS MADE WATERTIGHT.** You could not wish for a better roof:  $\frac{1}{2}$ in. planed, tongued and grooved boards are nailed to very heavy rafters, then over these we fix Ruberoid or similar high-grade felt, then on the top narrow battens to keep the felt in position. In all weathers such a bone-dry roof is a great boon, and means very much to purchasers.

**RED ASBESTOS TILES FOR THE ROOF.**—If you want an extra smart roof, one that is fireproof, we can supply red asbestos tiles for same, and the extra cost see list.

**EAVES TROUGHS, IF REQUIRED.** We can supply really good eaves troughs, cut out of solid wood; the extra cost see list.

**WINDOW DETAILS.** The windows are of a useful size, each window taking two pieces of glass measuring 36in. by 18in. Larger windows would be considered if clients provide own glass.

**THE FRONT APPEARANCE HANDSOME.** With all shops appearance goes a long way towards increasing business, and Sutcliffes' have not lost sight of this. The four-panel door in centre of front is complete with good lock and all necessary furniture, the special windows are beautifully made, while over the door and windows we fix attractive ornamental timbers, which, when painted, look very smart indeed.

### DESIGN EB.

SEE LIST  
ENCLOSED.

**THE OUTSIDE DECORATION.** See Design N. Shop, page 60.

**INTERIOR LINING WITH BOARDS.** We are able to line the interior with  $\frac{1}{2}$ in. planed, tongued and grooved boards; that is, both sides and ends; the extra cost see list.

**THE FLOOR MUST BE GOOD.** No shop is complete without a good floor. We build all floors on lin. prepared boards, and nail very heavy rafters to these boards. The floor is raised about 6in. from the ground, and is always bone-dry, no matter how much you pay you will never get a better floor.

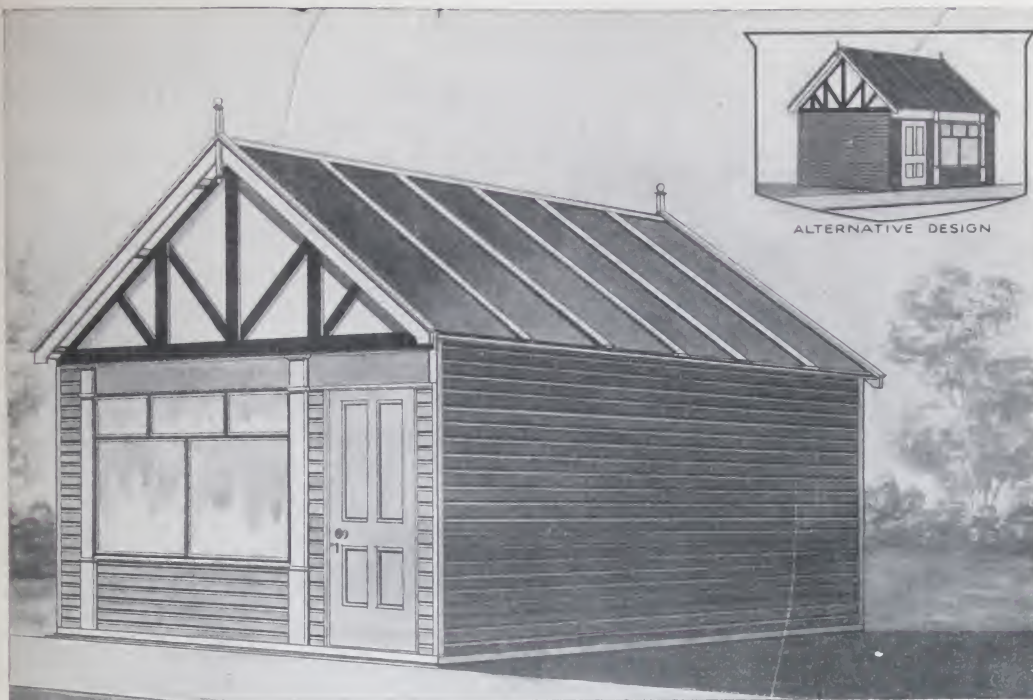

**ALL MADE IN SECTIONS.** All these lean-to shops are built in sections, easily fixed up without skilled labour, and all fittings and glass, etc., are provided. When you deal with Sutcliffes' you get the goods carriage paid and know exact cost.

**LOCK-UP SHOPS VERY USEFUL.** If you want a lock-up shop you must get a good one. It is by far the cheapest in the end. Just think how many people are making good incomes from lock-up shops in various parts of the country. If you look on the outskirts of all large towns, you will find butchers, fish and chip shops, confectioners, boot shops, all doing really good business from these premises. The main feature is that when you own a lock-up shop you have no rent to pay, the only charges will be a small ground rent. If you are thinking of starting in business, and have a little capital, then you could not do better than purchase one of these shops.

**ALTERNATIVE DESIGN.** When only the one window is required we offer the design "B.F." as shown by inset above. This has the standard window but could be fitted with larger frame if client provides glass.

**STATE CLEARLY WHICH DESIGN IS REQUIRED WHEN PASSING ORDER.**

## Sutcliffes' Span Roof Lock-up Shop.

	Length.	Width.	Height Eaves.	Height Ridge.
1—	15ft.	9ft.	8ft.	10½ft.
2—	18ft.	10ft.	8ft.	10½ft.
3—	20ft.	12ft.	8ft.	11ft.

Carriage Paid to nearest Station England and Wales.

**EXTRA HEAVY CONSTRUCTION.** The sides and ends of this well-built lock-up shop are constructed on in. tongued and grooved moulded weather boards, these are absolutely the finest boards obtainable for any timber-built structure and give excellent service for upwards of twenty years. The framing is most massive, fixed inside, with nothing to rot with exposure. There could not be a better shop, no matter what you pay.

**THE ROOF IS WEATHER PROOF.** The roof is a most important part of any building, and this is how Sutcliffes' build the roofs. ½ in. planed, tongued and grooved boards are nailed to very heavy rafters, always of ample strength, then over the boards we fix Ruberoid or other high-grade felt, this is afterwards stripped with narrow battens, as illustrated; barge boards are included, also ornamental timbers over the gable ends in both the back and front sections. It is a very smart rainproof roof, and one that looks well at all times.

**RED ASBESTOS TILES FOR THE ROOF.** We can supply these along with red ridging pieces, also all nails; the extra cost see list.

**EAVES GUTTERS.** Prices see list.

**HANDSOME FRONT DESIGN, DOOR, AND WINDOW.** It is generally a safe and profitable policy to have an attractive front for any shop, it induces business and gives an air of distinction not reached by other methods. With this in view we have introduced a shop front that is most exclusive in design but not really expensive, and we think our efforts will be appreciated. We send out this design as near as possible to the illustration and provide everything except the glass, this must be purchased by the client locally. The four-panel door is strongly made, complete with lock and key and all necessary furniture.

### DESIGN HC.

For PRICES  
SEE LIST  
ENCLOSED.

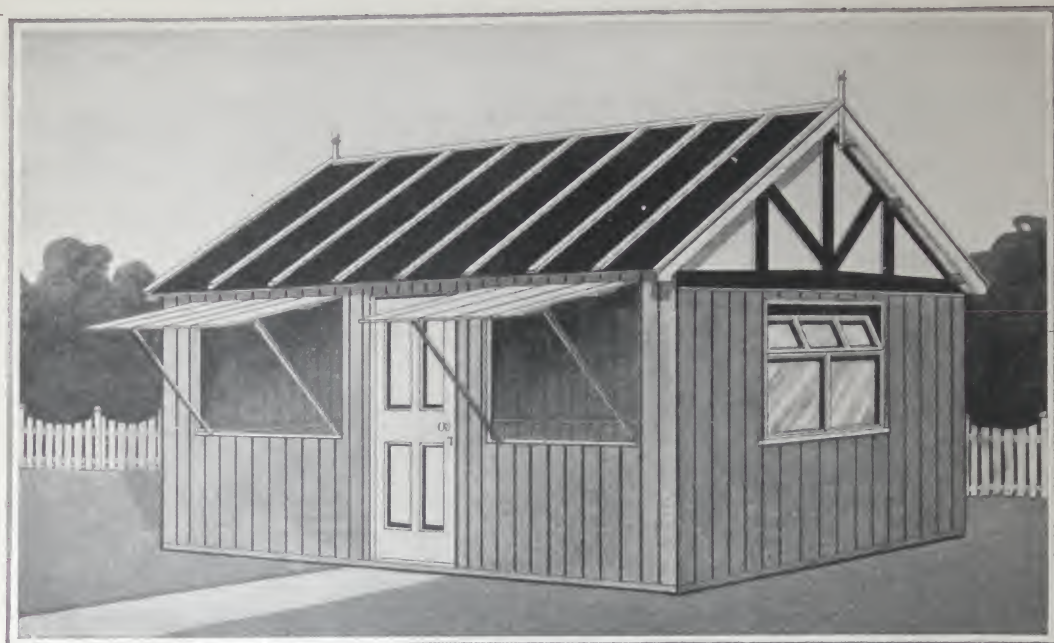

**INSIDE LINING.** We can line the inside, that is, both ends lined to ridge and both sides to eaves, with ½ in. planed, tongued and grooved boards, at an extra cost see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**SUTCLIFFES' SHOPS ARE BUILT IN SECTIONS.** It is a great convenience to be able to buy lock-up shops in sections and erect as required on any level site. Sutcliffes' supply all bolts, etc., and the shop can be erected by a couple of men, say, in two days, easily.

**DOUBLE STRENGTH FLOORS.** All shops must have a perfectly dry floor, and this is why we lay down very heavy rafters, then nail to these in. tongued and grooved floor boards. You could not wish for a better or stronger floor. It will carry any weight, never sag in the middle, and is always in dry condition.

**IMPORTANCE OF LOCK-UP SHOPS.** There are all kinds of buildings used as shops in various parts of the country, but if you wish for plenty of good business it is generally an excellent plan to go in for something smart, a building that has a fine and bold appearance. It will attract more customers and a better class of patrons. Never study first cost too keenly when buying a shop, and if you must have a really sound one you cannot do better than try this span roof portable shop illustrated on this page and sold on Sutcliffes' well-known guarantee of satisfaction or money back.

## Sutcliffes' Pavilion, Refreshment Room,

Sweet Shop, etc.

	Length.	Width.	Height Ridge.	Height Eaves.	Floor.
1—	10ft.	8ft.	9ft.	7ft.	
2—	12ft.	8ft.	9ft.	7ft.	
3—	13ft.	9ft.	9ft.	7ft.	
4—	15ft.	9ft.	9ft.	7ft.	
5—	20ft.	10ft.	10ft.	8ft.	

**SEE WHAT YOU GET.** The four outer walls are constructed on  $\frac{3}{4}$  in. planed, tongued and grooved boards, best Swedish deal, and the framing is most substantial.

**ORNAMENTAL WEATHER BOARDS.** We can include  $\frac{1}{2}$  in. thick, ornamental, weather boarding, as illustrated on page 4, for sides and ends at an extra cost of 15 per cent. only; this is a very great improvement, and is most strongly recommended. These boards are our own special production.

**AN EXCEPTIONAL ROOF.** The roof is the strong point in all sheds, and Sutcliffes' give you one of the best; built on  $\frac{3}{4}$  in. planed, tongued and grooved boards, no common low-priced weather boarding used; over the boards we fix Ruberoid or similar felt, and then nice battens, as illustration. You will never get a better or drier roof. Be ready to pay a fair price and have something that will give you years of satisfaction.

**RED ASBESTOS TILES FOR THE ROOF.** These can be supplied at an extra cost see list.

**WINDOWS, DOORS, FINIALS, ETC.** The windows, one in each end are of fine design and made to give plenty of light and adequate ventilation; all glass is provided, while, above the eaves, we introduce ornamental timbers, as illustrated; these, along with barge boards and finials give a most pleasing effect at a distinctly moderate figure. The four-panelled door in front, complete with lock and key, while, on each side of the door, we fit hinged wool shutters that can be raised so that games, etc., can be viewed in comfort. There is nothing lacking in this really smart pavilion, and, if required, slight alterations can be made to meet the wishes of our clients, our aim always—satisfaction or money back.

### DESIGN P.

For PRICES  
SEE LIST  
ENCLOSED.

**A REMARKABLE FLOOR.** Sutcliffes' double strength floors are built on extra thick battens and best  $\frac{1}{2}$  in. planed tongued and grooved floor boards, the floor is thus raised many inches from the ground, and can never rot with exposure; it is in fact one of the best.

**INSIDE LINING.** If this is desired we are prepared to line both sides to eaves and both ends to ridge with  $\frac{3}{4}$  in. planed, tongued and grooved boards, the extra cost see list.

**EAVES TROUGHS.** These can be supplied, cut out of solid wood, at an extra cost see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**MADE IN SECTIONS.** Sutcliffes' build all their pavilions in sections, easily fixed up on arrival, and all bolts, etc., are provided. You get a properly finished building, carriage paid to your station, at a price no local joiner can possibly touch.

**CARRIAGE PAID TO STATION.** We pay carriage right to your station, and this is a big item in these days, so please remember this when comparing quotations.

**A FINAL NOTE—DON'T MISS IT.** Sutcliffes' believe in sending out a strongly made pavilion that will give years upon years of sound service, you may easily get a lower price, but you will get very much lower quality. A cricket pavilion, a small sweet shop for which this building is designed, is not something you buy every day, it is not something you can get in any street. If you want a good one you must pay a fair price and you must go to the firms who specialise in them. Sutcliffes' workmen are all experts in this line they do nothing else but construct portable buildings hence sound work and low prices.

ALTERNATIVE DESIGN

## Sutcliffes' Fireproof Lock-up Shop.

	Length	Width	Height Eaves	Height Ridge	Floor extra
1—	16ft.	9ft.	8ft.	11ft.	
2—	20ft.	12ft.	8ft.	13ft.	
3—	24ft.	16ft.	8ft.	14ft.	

Carriage Paid to nearest Station England and Wales.

**A REALLY BEAUTIFUL SHOP.** The walls are first covered with  $\frac{3}{4}$ in. planed, tongued and grooved boards over extra heavy best quality planed deal framing, then first quality asbestos sheets are all cut to size ready for nailing on arrival. We cannot do the work at this end because the sheets may get broken in transit, but everything is simplified so that the erector will have no trouble in easily fixing up the garage just as illustrated. The ornamental stripping is all cut to size and everything is done that possibly can be before despatch.

**THE GABLE ENDS.** These are finished at our works before despatch and panelled off with asbestos sheets as shown in the illustration.

**THE ROOF.** We first cover the roof entirely with  $\frac{3}{4}$ in. planed, tongued and grooved boards, then provide all necessary stripping laths and the red asbestos tiles and ridge pieces, ready for fixing on arrival. You cannot imagine a better roof, no matter what price you pay. It will be bone dry in all weathers, and will last a lifetime without attention.

**WOOD EAVES TROUGHS.** These are included without extra cost.

**THE DOOR AND WINDOWS.** The door is of four panel design and is extra well built; the window frames are all properly mortised and tenoned together and fixed in position. For these large windows and for a first class building we advise clients to purchase plate glass. We do not provide glass for these large windows.

**BARGE BOARDS AND FINIALS.** These are both provided to make the roof most attractive and to give that artistic touch so essential in better class portable buildings.

### DESIGN BV.

For PRICES  
SEE LIST  
ENCLOSED.

**THE FLOOR.** This is built on lin. planed, tongued and grooved boards on extra heavy floor joists; a floor that will carry any weight and never sag. You could not get a better floor at any price.

**SECTIONALLY BUILT.** These asbestos lock-up shops are all sectionally built and must not be confused with the cheaper class of asbestos structures, where there is no wood lining to support the asbestos. Think how remarkably good this shop is when the walls are first entirely boarded and the roof boarded before the asbestos is added.

**HOW TO ERECT THIS SHOP.** The building can be erected either on a brick pillar or low brick wall foundation, or even on wood sleepers. It is a simple matter for the client to provide a level foundation, and we send free of charge floor plans after receipt of order. Unless the distance is very great it will be the most economical policy to have two of our men to erect this building on your foundation, and erection costs will be kept as low as ever possible.

**INTERIOR LINING.** We are prepared to supply asbestos sheets to line the sides to eaves and ends to ridge. The extra cost see list.

**BEFORE YOU DECIDE.** Study the specification of this shop in detail. Remember it is entirely boarded before any asbestos is added and this makes a tremendous difference to the quality and wearing powers, and naturally accounts for the increased prices over many other designs, but when every point is studied then no firm can beat the price, and you have always Sutcliffes' absolute guarantee of satisfaction to rely on.

## Sutcliffes' Span Roof, Fireproof Lock-up Shop.

	Length	Width	Height Eaves	Height Ridge	Floor extra
1—	16ft.	12ft.	8ft.	12ft.	
2—	18ft.	12ft.	8ft.	12ft.	
3—	18ft.	16ft.	8ft.	13ft.	
4—	20ft.	16ft.	8ft.	13ft.	
5—	24ft.	16ft.	8ft.	13ft.	

**ACTUAL PHOTOGRAPH.** The above is an actual photograph of special lock-up shop supplied to the order of Mr. A. McDonald Akston, Chemist, High Street, Bordon, Hants., and can be inspected at this address. The sizes are: length 21ft., width 14ft., height to eaves 8ft., height to ridge 15ft., and we shall be pleased to quote for any sizes on receipt of particulars.

**CONSTRUCTION OF SIDES AND ENDS.** The framing is of a sound quality deal, nicely planed, and of ample strength. The sides and ends are covered with  $\frac{1}{2}$ " planed, tongued and grooved boards before the asbestos sheets are fitted, and then neatly panelled with the planed overlays which are provided.

**A PERFECTLY RELIABLE ROOF.** The roof is built up on strong and well designed principal rafters and purlins, covered with  $\frac{1}{2}$ " planed, tongued and grooved boards. The roof sections are sent out already battened at suitable centres for receiving the asbestos tiles and ridges, which are supplied complete with materials and instructions for fixing. Eaves Gutters and Rainwater Pipes are supplied free.

**ATTRACTIVE WINDOWS.** The windows are of a type found only in really high grade shops, these give the building a distinctive and attractive appearance, also they provide more window space than usual. We supply the frame properly morticed and tenoned, and in sections, but we do not provide the glass.

### DESIGN LU.

For PRICES  
SEE LIST  
ENCLOSED.

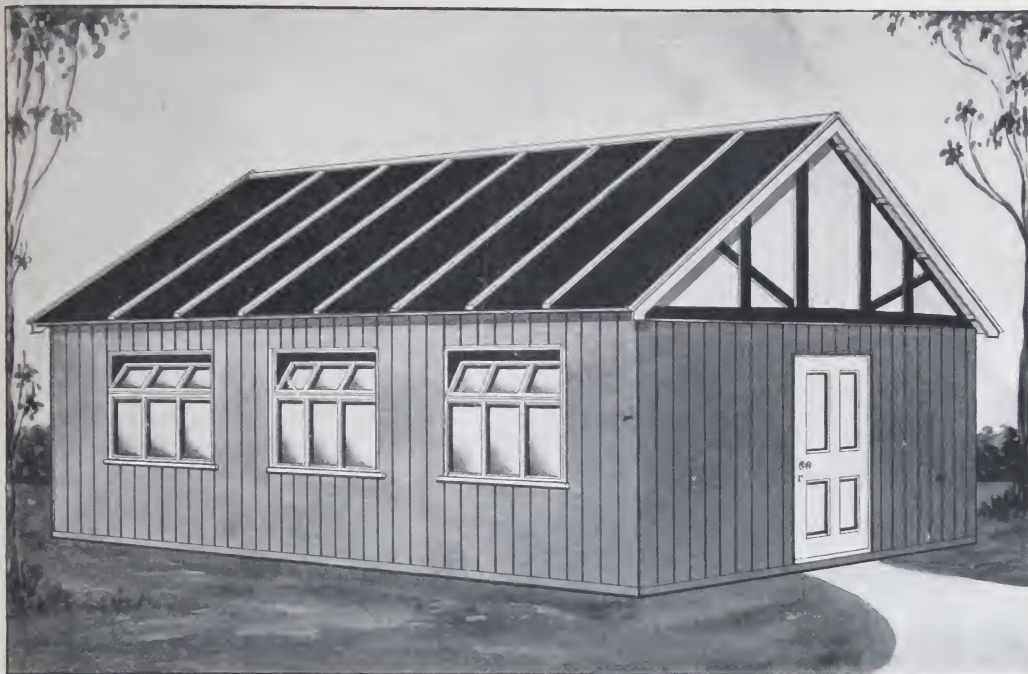

**GLASS PANELLED DOOR.** The door is of the panelled type and including the glazed panels, we also provide the necessary lock and high grade fittings, so that these high grade doors are sure to give every satisfaction.

**A PERFECTLY SOLID FLOOR.** The floor would be quite reliable in every respect, and is built up on extra heavy joists covered with one-inch planed, tongued and grooved boards. A floor of this specification will carry almost any weight without the slightest sign of sagging.

**THE FIRST COST.** It is easy to buy a lock-up shop many pounds below our prices, but it will not be anywhere near the same quality. On this page we show you a building that should give a lifetime's wear with very little to spend in repairs; one that will induce the maximum amount of business and look well from any angle. We are quite sure all who purchase will be delighted and, being fireproof, there should be no trouble in getting plans passed by all local authorities.

**BEFORE YOU DECIDE.** When you invest in a portable shop for your personal benefit, you must have a building that not only looks well on arrival, but one that will withstand all weather conditions for upwards of twenty years, and then be as good as the day it came, and with nothing further than periodical attention, we claim this for the above design shop, so that if you are requiring a really well built and distinctive Lock-up Shop, then do not hesitate to favour us with your enquiry, giving all particulars as to sizes required.

## Sutcliffes' Portable Room, Small Workshop

Store Room, etc.

	Length.	Width.	Height Eaves.	Height Ridge.	Floor.
1—	13ft.	9ft.	7ft.	9ft.	
2—	15ft.	9ft.	7ft.	9ft.	
3—	20ft.	10ft.	8ft.	10ft.	
4—	24ft.	12ft.	8ft.	11ft.	
5—	30ft.	15ft.	8ft.	11ft.	
6—	40ft.	15ft.	8ft.	11ft.	
7—	40ft.	20ft.	10ft.	15ft.	

**HOW THEY ARE BUILT.** The four walls are built on the finest grade  $\frac{1}{2}$ in. paneled, tongued and grooved boards, well cramped up, and the framework is always most substantial, in the smaller sheds 3in. by 2in., and in the larger rooms 4in. by 2in., is freely used. When you buy a shed from Sutcliffes' there will be nothing of a jerry-built character about it.

**PERFECTLY RAINPROOF ROOF.** You must have a bone-dry roof, and Sutcliffes' never forget this essential feature: the roofs are built on  $\frac{1}{2}$ in. prepared boards, just like the walls, but on top of the boards we fix best quality felt, either Ruberoid or something similar, while over the felt we nail narrow battens to keep the felt in position at all times. You could not wish for a better roof.

**RED ASBESTOS TILES FOR THE ROOF.** We can supply these along with all stripping laths and nails, prices see list.

**WOOD EAVES TROUGHS.** These can be supplied, cut out of solid wood, prices see list.

**WINDOWS, DOORS AND ORNAMENTAL TIMBERS.**—As seen in the illustration, the windows are of handsome pattern, the top half made to open inwards; and all glass is provided. Windows are fixed up both sides, and we always include sufficient windows to give ample light. The four-panel door is complete with all necessary door furniture, while over both gables, back and front, we fix the ornamental timber seen in the illustration. These add a tone of finish to the building, and there is no extra cost for this ornamentation.

**SIZE OF WINDOWS.** The windows are all morticed and tenoned together; size about 40ins. by 38ins.

### DESIGN Q.

For PRICES  
SEE LIST  
ENCLOSED.

**INSIDE LINING IF REQUIRED.** We can line the sides to eaves and ends to ridge with  $\frac{1}{2}$ in. planed, tongued and grooved boards the extra cost see list.

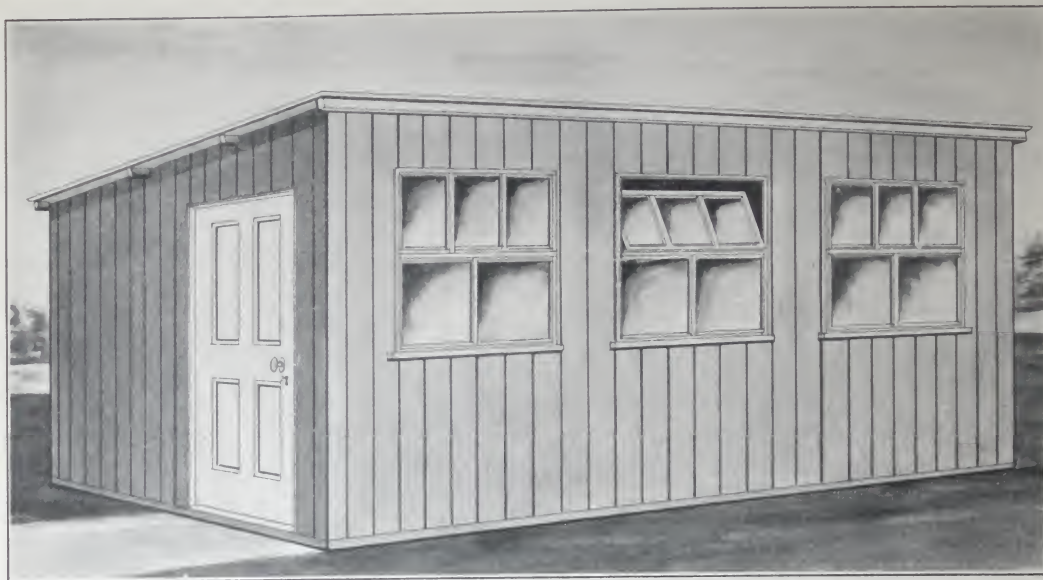

**THE BEST FLOOR EVER SEEN.** If you desire a floor to this portable room we can supply one that will astonish you. Just read how we make them:—extra thick battens are laid down, on these we nail lin, special grade floor boards, no low-grade timber is ever used by Sutcliffes'. A floor of this nature will carry any weight, is always dry and is most strongly recommended.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**ALL MADE IN COMPLETE SECTIONS.** Sutcliffes' sheds are all made in sections, easily fixed up on arrival, and all bolts, etc., are provided; in fact, you will not have any trouble, while in many cases portable sheds are sold with roof and the floor sent in loose boards, which means a great deal of expensive labour on arrival and must be guarded against.

**YOU KNOW THE EXACT COST.** Sutcliffes' portable sheds are all tenant's fixtures and are sent carriage paid right to your station, this is a big item, as the carriage is very heavy, so be sure you place the order with Sutcliffes' and get free delivery to your station.

**YOU MUST NOT MISS THIS.** This portable room can be used for many purposes, it is a tenant's fixture, so can be moved at any time, if you are short of storing room or want a place for doing odd jobs, you could not do better than try one of these sheds. They are very well made, and look well no matter where placed.

## Sutcliffes' Lean-to Store Room and Workshop.

A very useful Building.

	Length.	Width.	Height Front.	Height Back.	Floor Extra.
1—	12ft.	8ft.	8ft.	6½ft.	
2—	14ft.	10ft.	8ft.	6ft.	
3—	16ft.	10ft.	9ft.	6½ft.	
4—	20ft.	10ft.	9ft.	6½ft.	

Carriage Paid to nearest Station England and Wales.

**DETAILS OF CONSTRUCTION.** Sutcliffes' believe in building very sound portable buildings and this special lean-to is no exception. The sides and ends are built on  $\frac{3}{4}$ in. planed, tongued and grooved boards over extra heavy weight framing. Real high-grade timber is used throughout and you get a perfectly built structure at a most reasonable cost.

**THE ROOF IS ONE OF THE BEST.** Unless you have a really good roof it is no use trying to keep goods dry. This is how Sutcliffes' build the roofs of this portable workshop—High-grade  $\frac{3}{4}$ in. planed, tongued and grooved boards are nailed to heavy rafters, then on the top we securely fix Kuberoid or other first-class roofing felt, then over this narrow battens to keep the felt in position. You could not wish for a better roof, and it will keep all your goods in the best of condition for many years. If you are thinking of getting a store room of any kind, make sure you have a good one

**WOOD EAVES TROUGHS.** These can be supplied, cut out of solid wood, prices see list.

**A FLOOR OF GREAT STRENGTH.** The floor (an extra charge) supplied with this building, is a very good one, built to carry great weight and never sag. This is how Sutcliffes' build the floors—Extra heavy rafters are laid down, then on the top we nail  $\frac{1}{2}$ in. tongued and grooved boards. You get a floor always bone-dry in all weathers, and one that should keep in good condition for twenty years.

**INSIDE LINING.** We can line both ends, also front and back with  $\frac{3}{4}$ in. planed, tongued and grooved boards, the extra cost see list.

### DESIGN HA.

**For PRICES  
SEE LIST  
ENCLOSED.**

**WINDOWS AND DOOR—LATEST PATTERN.** In the first three sizes we fix two lots of windows in the front, and in the largest size, three windows as illustrated. The shed is well lighted, and the four-paned door opens outwards and is very handy. The door can be fixed in either end to suit the convenience of clients.

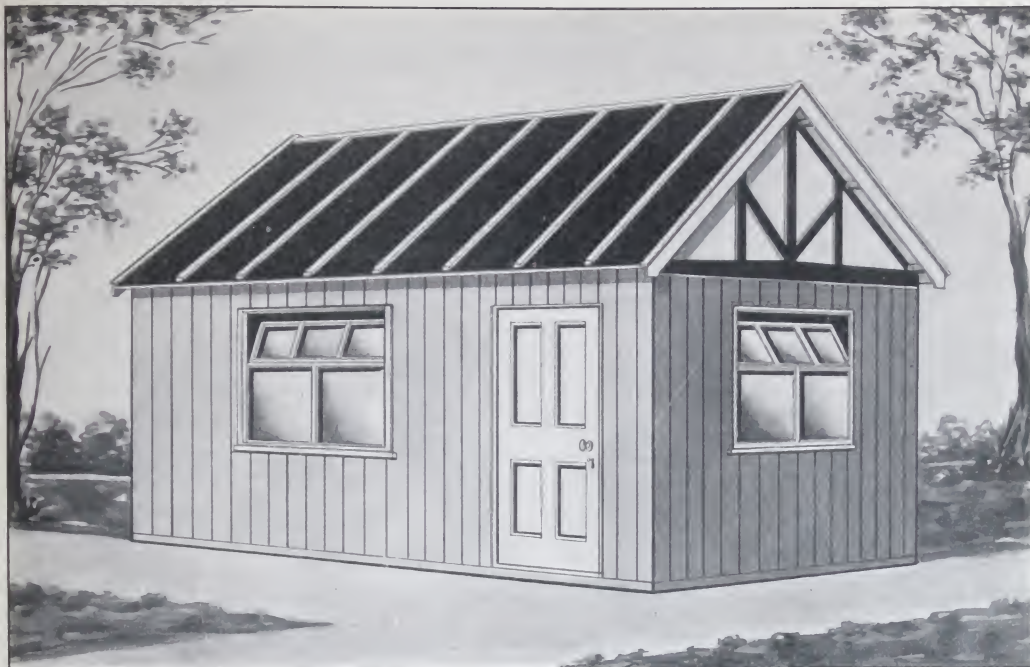

**WINDOW DETAILS.** The windows are very well built and of special design. The top portion opens inwards to give ample ventilation. Overall dimensions and approximate sizes: Length 37ins., width 32ins., size of bottom pane 18ins. by 14ins., size of glass for top pane 9ins. by 12ins. We provide 21 oz. best quality glass free.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**ALL ARE BUILT IN SECTIONS—EASILY ERECTED.** All Sutcliffes' portable sheds are built in sections, are tenant's fixtures, and are easily erected; all bolts and glass are provided, and we deliver carriage paid to your nearest station. You thus know the exact cost. It is important to watch this, as many firms now only place their goods on rail, and this means the purchaser has to pay the carriage.

**A MOST CONVENIENT WORKSHOP.** Just think what a really good workshop this room makes and how reasonable in price. If you are in need of anything in this line just get into touch with Sutcliffes', you are sure to get satisfaction and save money. It will be easy for you to get a lower quotation, but it ought to be quality first when you instal a workshop or large store room. If you can pay a visit to Sutcliffes' factory you will never place your orders elsewhere.

## Sutcliffes' General Purpose Room, Suitable for Incubators, Store Room, Workshop, or Children's Playhouse.

	Length.	Width.	Height Eaves.	Height Ridge.	Floor.
1—	7ft.	6ft.	7ft.	8ft.	
2—	9ft.	6ft.	7ft.	8ft.	
3—	10ft.	8ft.	7ft.	9ft.	
4—	12ft.	10ft.	7ft.	9ft.	
5—	15ft.	12ft.	8ft.	11ft.	
6—	20ft.	12ft.	8ft.	11ft.	

**MATERIALS USED IN THE MAKING.** Sutcliffe's use the best timber, low-priced common homegrown timber is not found in any of our buildings. This general purpose room is constructed of  $\frac{3}{4}$ in. planed, tongued and grooved boards, with inside framework of very great strength.

**A CHEAPER MODEL SUPPLIED.** This design can also be had built on  $\frac{1}{2}$ in. boards and a  $\frac{1}{2}$ in. floor. For prices see list.

**LOOK WHAT A FINE ROOF.** The roof is made from the same quality boards as the sides, and then on the top we fix a really good quality Ruberoid or similar felt, over the felt we also fix some narrow battens; the illustration shows you how very good the roof is, while in all weathers it is perfectly rain and draught proof.

**RED ASBESTOS TILES FOR THE ROOF.** These can be supplied along with red ridge pieces, also nails and striping laths, the extra cost see list.

**WOOD EAVES TROUGHS.** These can be had cut out of solid wood, the extra cost see list.

**DOOR, WINDOWS AND ORNAMENTAL TIMBERS.** Excellent strongly made windows are included and all glass provided, the top half of the window is made to open inwards to give ventilation, the door is of the four-panel type, very smart, and complete with best hinges, lock, etc., while over both eaves we fix very handsome ornamental timbers.

**SIZE OF WINDOWS.** Overall dimensions: Approximate length, 37ins., width 32ins. Size of glass provided: Top panes 12ins. by 9ins., bottom panes 18ins. by 14ins.

**INSIDE LINING.** We can line the sides to eaves and ends to ridge with  $\frac{3}{4}$ in. planed, tongued and grooved boards, the extra cost see list.

### DESIGN R.

For PRICES  
SEE LIST  
ENCLOSED.

**A FLOOR-DE LUXE.** Most purchasers of these rooms will require a floor. It is in this most important feature where Sutcliffe's stand out ahead of all other firms. The double-strength floor of this room is built on extra thick battens, then  $\frac{1}{2}$ in. floor boards nailed on top; you get a bone-dry floor that raises all the room 4in. off the ground.

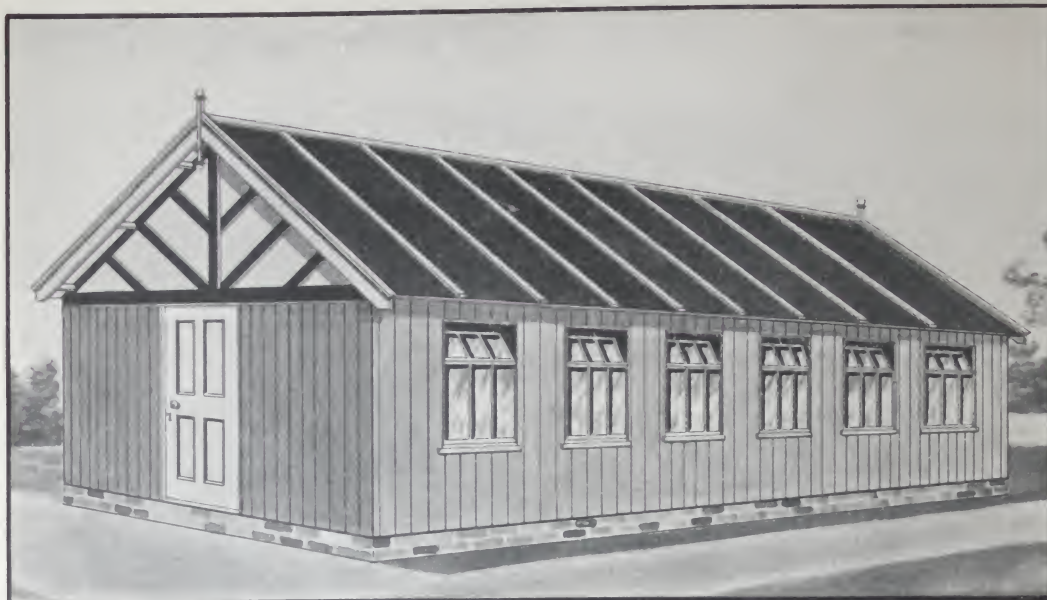

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $7\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**ALWAYS BUILT IN SECTIONS.** The general purpose rooms are all built in easy-fitting sections, you can move them or fix them up without any trouble, and, being tenant's fixtures, they are of double value in the event of a change of plans. Sutcliffe's supply all bolts, etc., and any handy men can erect in a few hours, unless the room is a big one then of course it takes longer.

**CARRIAGE PAID TO NEAREST STATION.** In these days of very high rails costs you must not buy your goods carriage forward. Deal with Sutcliffe's and then you know the exact cost.

**THE MONEY BACK GUARANTEE.** It does not matter which of the buildings shown in this booklet you decide on if it is a standard size it is sold to you on our ironbound guarantee of satisfaction or money back. Sutcliffe's are Yorkshiremen and believe above all in a perfectly straight deal. If you beat our prices then you can depend on lower quality.

**WHAT ARE THEY GOOD FOR.** In the summer you could enjoy afternoon tea, perhaps a male member of the family would like to camp out for a few nights, and at other times it is a most handy storing place for prams, or cycles, golf clubs or garden tools; in fact, anything which is not daily required. During wet weather the kiddies love such a room, they can romp and do no damage.

## Sutcliffes' Entertainment Room, Institute, Billiard Room, etc.

	Length.	Width.	Height Eaves.	Height Ridge.	Floor Extra.
1—	30ft.	15ft.	8ft.	11ft.	
2—	35ft.	20ft.	9ft.	14ft.	
3—	40ft.	20ft.	10ft.	15ft.	
4—	60ft.	20ft.	10ft.	15ft.	

**SPECIFICATION—SIDES AND ENDS.** These are built in sections on  $\frac{1}{2}$  in. selected planed, tongued and grooved boards, with very heavy framing; nothing but selected foreign timber used, so that when you deal with Sutcliffes' you are certain of a sound building always, at lowest prices.

For large buildings we strongly recommend the outer walls to be built on  $\frac{1}{2}$  in. ornamental moulded weather boarding. You get far greater strength and more substantial construction. The extra cost will be given on application.

**ROOF FELTED AND BATTENED DOWN.** The roof is all-important, and Sutcliffes' give you one of the best, built on  $\frac{1}{2}$  in. prepared boards, same as the sides, but covered on top with Ruleroid or similar felt, then strapped with narrow battens. You could not wish for a more attractive bone-dry roof.

**RED ASBESTOS TILES FOR ROOF.** These can be supplied, along with all necessary nails and stripping laths, the extra cost see list.

**WOOD EAVES TROUGHS.** We offer these, cut out of solid wood, prices see list.

**ORNAMENTAL TIMBER WORK.** Over both eaves Sutcliffes' fix ornamental timber work, this greatly improves the appearance, but is not costly; the four-panelled door in the end gives this portion a very smart appearance and will be greatly appreciated.

**A DOUBLE-STRENGTH FLOOR.** All large rooms must have a sound floor, but it is to be regretted that many firms, in order to capture orders, cut the price but introduce flimsy-built floors that spell disappointment and ruin from the day they are put in. Sutcliffes' floors are always bone-dry, and of enormous strength, built on extra heavy battens, then fixed on top are the finest  $\frac{1}{2}$  in. floor boards—a floor like this is something to be proud of.

### DESIGN S.

For PRICES  
SEE LIST  
ENCLOSED.

**DO YOU WANT INSIDE LINING?** We can line the sides to eaves and ends to ridge, with  $\frac{1}{2}$  in. planed, tongued and grooved boards, the extra cost see list.

**BEAUTIFULLY LIGHTED ROOM.** Sutcliffes' fix a long row of the latest pattern windows up each side, these are made so that the top half drop inwards for ventilation; it does not matter for what purpose you use this room, whether for concerts, or a workshop, you must have plenty of light, and this is just what Sutcliffes' have catered for. The number of windows depends on size of building ordered, generally one in each 10 ft. section.

**SIZE OF WINDOWS.** The usual size for this building is 40ins. by 38ins., but for the larger buildings we can increase the size to 54ins. by about 38ins. wide, without extra cost.

**TENANT'S FIXTURE—SECTIONAL.** Sutcliffe's timber-built buildings are tenant's fixture and can be removed as desired, it is also important to know that each shed is sectional, easily put up or pulled down and all bolts and glass etc. are provided.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $7\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

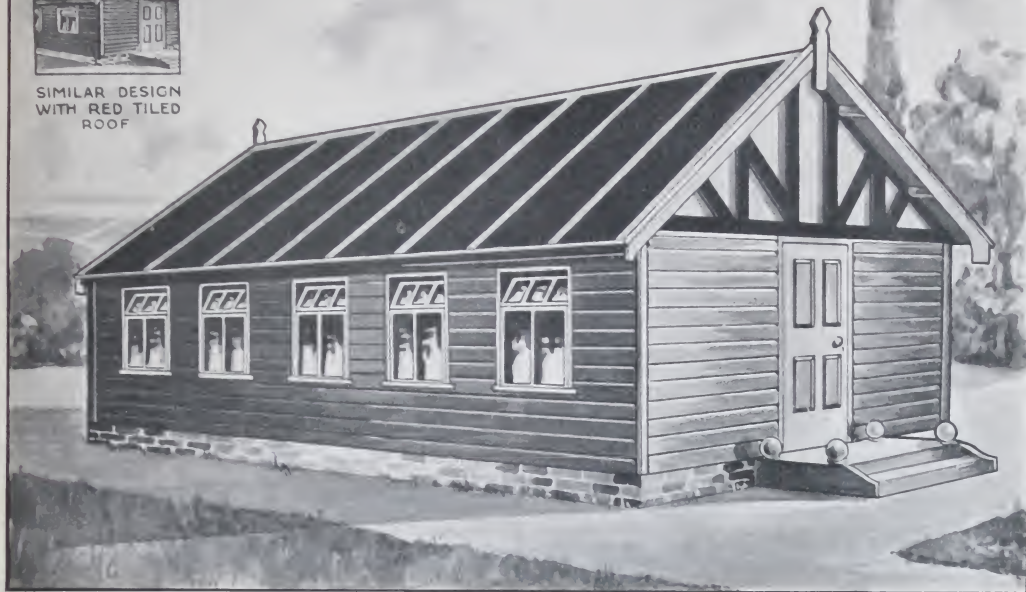

**SUTCLIFFES' PAY CARRIAGE.** Sutcliffe's send their buildings carriage paid, and this is something you must not forget; if you buy carriage forward, the railway charges will astonish you. Deal with Sutcliffe's, the old firm with a sound reputation for straight methods, and you will be safe.

**OTHER USES FOR THIS ROOM.** We can hardly estimate the number of uses a building like this can be put to, in every town and village it would prove a boon, either for young men or girls' clubs, dancing hall, anything from a billiard room to a standard workshop: the prices are low, and other sizes gladly quoted on request.

10—	80ft.	30ft.	8ft.	15ft.	

Carriage Paid to nearest Station England and Wales.

**SMART APPEARANCE AND LONG WEAR GUARANTEED.** If you decide to erect a mission hall, there are two things which stand out above all others, you want something of handsome design and a building that will give many years excellent service, and Sutcliffes' have introduced this mission hall to fulfil every want. It is a building that with reasonable care will keep in first-class condition for over twenty years, and the first cost is little more than one of the second-rate structures now largely boomed.

**CONSTRUCTION DETAILS, TIMBER, Etc.** The sides and ends are built on lin. rebated and moulded planed weather boards; there is no better method of timber construction, and before you place an order with any firm be sure you are promised boards of this special class. Sutcliffes' always use very heavy framing. It would have been easy to give you a much cheaper building, but it would not have had the same lasting powers. A building constructed as above described will be bone-dry in all weathers, and can be absolutely depended on.

**THE ROOF IS ONE OF THE FINEST OBTAINABLE.** This is how Sutcliffes' build the roof: lin. planed, tongued and grooved boards are nailed to massive framing timbers, then over the boards we fix Ruberoid or similar high-grade felt, then strip down with narrow battens, one that will not let a drop of rain enter and one that you will be proud of. You often see cheap felt and thin, unprepared boards used on many roofs, these are worthless where dryness is required and if you take Sutcliffes' advice you will embark on a really high-grade structure and you will never regret the step. Over both gable ends we fix ornamental timber and attractive barge boards.

**RED ASBESTOS TILES FOR ROOF.** See list.

### DESIGN GB.

SEE LIST  
ENCLOSED.

**WOOD EAVES TROUGHS.** See particulars on list.

**DOORS AND WINDOWS—EVERYTHING OF THE BEST.** The style and quality of windows supplied makes a huge difference to any building, and the latest pattern windows sent with this mission hall cannot be surpassed, the number of windows depends on size of hall ordered, but we fix a full row up each side as shown in the illustration; of course, the back row cannot be seen in the picture. All the windows are made to open, and all glass, etc., is provided free. The door is of the four-panel type, and extra smart.

**SIZE OF WINDOWS.** The windows are approximately 44ins. by 39ins.

**INSIDE LINING.** See list.

**THE FLOOR IS DOUBLE STRENGTH.** All floors are an extra charge, but are built enormously strong on lin. tongued and grooved boards and very heavy battens—it is a floor that will carry any weight and is one that will give good service. On no account be tempted to have a poor floor just because it is a trifle cheaper.

**MADE IN SECTIONS AND CARRIAGE PAID.** All these halls are made in sections and delivered carriage paid to any station in England and Wales, while to certain parts of Scotland we also give free delivery. We are prepared to send one of our expert fixers and merely charge the lowest erection expenses.

**OUTSIDE DECORATION.** See details on design S.

**SOMETHING SPECIAL.** Never lose sight of the fact that a flimsy building made from low-grade timber cannot prove profitable, does not look well, and is more expensive in upkeep; you cannot get lower prices than Sutcliffes' unless you are prepared to put up with a third-rate shed of very doubtful construction. Every building that leaves Sutcliffes' gigantic works is carefully scrutinised: it must be more than good value, it must stand out as a perfectly genuine bargain.

## Sutcliffes' Village Institute, Recreation Room, etc. With a Red-Tiled Roof.

	Length	Width	Height Eaves	Height Ridge	Floor Extra
1	24ft.	16ft.	9ft.	14ft.	
2	32ft.	16ft.	9ft.	14ft.	
3	40ft.	20ft.	9ft.	15ft.	
4	56ft.	20ft.	9ft.	15ft.	
5	64ft.	20ft.	9ft.	15ft.	
6	64ft.	24ft.	9ft.	16ft.	
7	80ft.	23ft.	9ft.	17ft.	

The porch entrance is 5ft. by 4ft. and is not included in the lengths given above.

**THE OUTER WALLS.** The bottom portion is built as illustrated on lin. planed, tongued and grooved moulded weather boarding, quite superior to the ordinary kind. Above this we use 4in. planed, tongued and grooved boards, then cover these with asbestos sheets to form attractive panels. The greatly admired half-timbered effect is then produced as shown in the illustration.

**THE ROOF WITH RED TILES.** The roof is first entirely boarded with 2in. planed, tongued and grooved boards, then sufficient stripping and red asbestos tiles and ridge pieces are sent to cover same, diagonal pattern as shown; there is also a finial at each end to improve the general appearance, in conjunction with wide barge boards. The roof could not be beaten and is bone dry in all weathers.

**RAINWATER GOODS.** We provide, without extra charge, suitable eaves gutters and rainpipes complete.

**DOORS AND WINDOWS.** The windows are about 4ft. square and the top half drips inwards to give ample ventilation. All windows properly mortised and 21oz. glass is provided cut to size for easy fixing on arrival. A beautiful four-panel door is included in the front and one can be fixed at the back if desired without extra cost.

**THE PORCH ENTRANCE.** This is of handsome design 5ft. by 4ft., and of convenient height, with ornamental verandah rails and finial.

**THE DOUBLE STRENGTH FLOOR.** Is built on lin. planed, tongued and grooved boards on 4in. by 2in. joists fixed quite near together to carry any weight without sagging.

### DESIGN XY.

For **PRICES**  
**SEE LIST**  
**ENCLOSED.**

**FOUNDATIONS.** The client prepares foundations; these can be either brick pillars or low brick wall with single brick dividing walls, and we provide free of cost suitable sleepers to fix on top of client's foundations. We also provide free a rough ground plan so that it is easy for clients to build their own foundation.

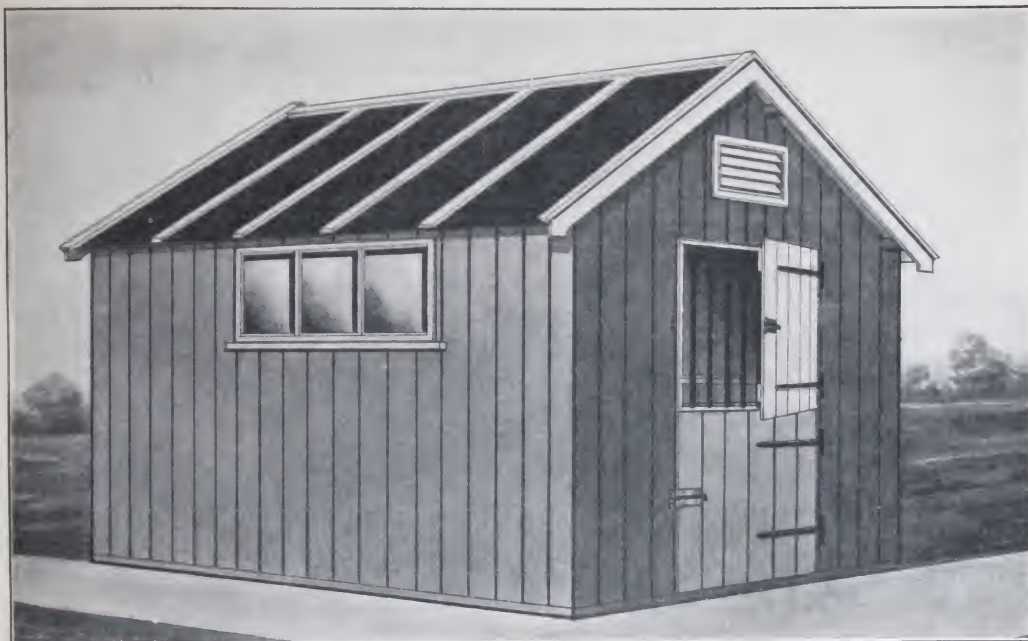

**SECTIONALLY BUILT AND CARRIAGE PAID.** We build the institute in sections and deliver carriage paid to any station in England and Wales.

**INTERIOR LINING.** If an extra high grade building is required we can line the interior sides to eaves and ends to ridge with 4in. planed, tongued and grooved boards; the additional cost see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7s per cent. only. Purchasers can then finish off in any desired colour after erection.

**A FINAL WORD.** This village institute is just about as good as any building can be made at a moderate price. With ordinary care it should give thirty years' solid wear; it will always look well; it is cosy and comfortable inside and nicely lighted; it has been designed to give the greatest possible service and is one that wherever laid down is sure to command general admiration. Now, just a word regarding the price; suppose we had introduced cheaper materials the price could have been reduced twenty-five per cent., but is it worth it? Surely when buying a large building for a special purpose it is the soundest policy and the cheapest to get one that will always be dependable. For a similar specification we do not think any firm can come down to our prices.

## Sutcliffes' Kennel for Large Breeds.

	Length	Width	Height Eaves	Height Ridge	Price
No. 1 ...	6½ ft.	4 ft.	5 ft.	6½ ft.	£7 7 0
No. 2 ...	6½ ft.	6 ft.	6 ft.	7½ ft.	£10 10 0

Carriage Paid to nearest Station England and Wales.

**A COMMODIOUS KENNEL FOR LARGE BREEDS.**—The design O.E. is a kennel that has been carefully designed for the satisfactory housing of all large breeds—Alsations, Retrievers, Great Danes—in fact, any variety where roomy quarters mean greater comfort and an improved degree of health.

**CONSTRUCTION DETAILS.**—The sides and ends are built on ½ in. planed, tongued and grooved boards of good quality; the framing is fixed inside, nothing to decay with exposure, and is all nicely planed; while in every case the framing, which is always an important feature of any kennel, is of ample strength.

**TWO DOORS AND A SPECIAL GRATING PROVIDED.**—It has been proved that in order to keep big breeds in a perfectly healthy condition, it is necessary to be able to throw one door open and at the back have a special grating. In the design O.E. although not illustrated in the picture, we provide a special grating, giving ample light and ventilation at the back of the small top door. During the day the top door can be thrown open and still the dog is confined.

### DESIGN O.E.

**SOLD on our  
Well-Known  
GUARANTEE.**

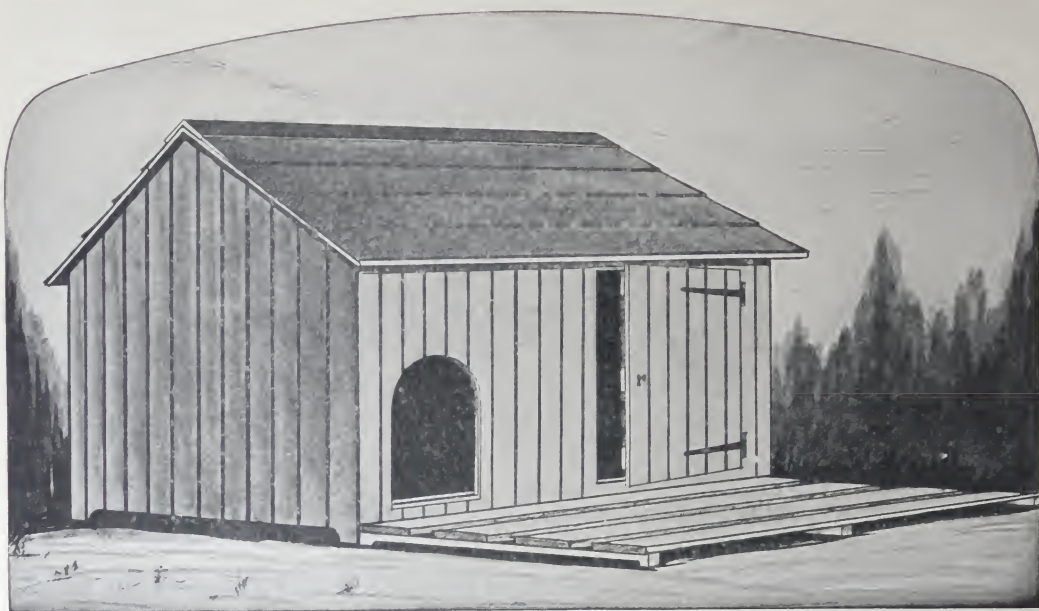

**BOTH DOORS PROVIDED WITH LOCK AND KEY.**—It is essential to be able to lock up the kennel, and this is arranged for.

**RIDGE VENTILATION AND FELTED ROOF.**—We arrange for ridge ventilation with this kennel, and cover the roof with really high-grade felt or "Ruberoïd" on top of the boards then strip with narrow battens to give a smart appearance.

**ALL FLOORS BUILT ON ONE INCH BOARDS.**—If you have a floor built in this manner on extra thick floor joists, you are sure of a bone-dry floor, because a free current of air passes under the kennel between the floor joists and the boards.

**SECTIONALLY BUILT AND CARRIAGE PAID.**—All these kennels are built in sections, quite easy to fix up by unskilled labour, and all bolts, glass and fittings are provided free, while the entire kennel is sent carriage paid to your nearest station.

**OUTSIDE DECORATION.**—We paint the outer walls a nice brown colour with special wood preservative. This increases the life of the timber, and the work is done without any additional charge.

## Sutcliffes' Dog Kennel with Day Platform.

	Length	Width	Height Eaves	Height Ridge	Prices
Terrier Size	2½ft.	2ft.	1ft. 10ins.	2½ft.	1 15 0
Collie & Retriever Size	3½ft.	3ft.	2½ft.	3½ft.	3 0 0
St. Bernard Size	4½ft.	3ft.	3½ft.	4½ft.	4 0 0

Carriage Paid to nearest Station, England and Wales.

**CONSTRUCTION DETAILS.** Sutcliffes' dog kennels are very well built on  $\frac{1}{2}$ in. planed, tongued and grooved boards of high quality. The framing is fixed inside and is far stronger than usually employed. We could easily build a cheaper kennel, but we have aimed at producing a sound structure, one that will give many years' excellent service and always keep the dogs in sound health. It is not the cheapest policy to go in for low-priced kennels which invite disease.

**A PERFECTLY DRY ROOF.** The roof of all kennels are made absolutely rain and draught proof. We use either related weather boards or planed, tongued and grooved boards - if the latter, we cover, in addition, with high-grade felt; if you have a kennel from Sutcliffes' you can depend on a bone-dry roof always.

**THE FLOOR IS RAISED FROM THE GROUND.** All good kennels have the floor raised from the ground. It is just as essential to have a bone-dry floor as it is to have a first-class roof, and Sutcliffes' have not lost sight of this important feature—with all kennels an excellent floor is provided.

**THE DOG ENTRANCE AND DOOR.** As shown in the illustration, the dog entrance is placed in front with an hinged door on the right side; this door is complete with lock and key. It should be an easy matter to get at the interior for cleaning out, and we feel sure that in every detail this kennel will meet the wishes of dog fanciers who desire a sound kennel at a reasonable figure.

**LATTED PLATFORM IN FRONT.** All Sutcliffes' kennels are provided with a latted platform in front. This is a comfortable resting place for the dog during the day, and is easily kept clean. We do not care where you keep the kennel it will be found most useful, and the design is very pretty without being expensive.

### DESIGN CB.

**SOLD on our  
Well-Known -  
GUARANTEE.**

**PAINTED BROWN WITH PRESERVATIVE.** All dog kennels painted brown on sides, ends and roof with special wood preservative; this greatly improves appearance and makes these dog kennels really exceptional value. There is no extra cost whatever for this important feature.

**INVEST IN A GOOD KENNEL.** We do not wish dog fanciers to spend a lot of money on elaborate kennels, but we do wish all of them in their own interests to get first-class kennels that will keep their pets in the best of health in all weathers. Very few people care to keep dogs in the house. An outside kennel is required and, with great changes in temperature, it is essential to have a kennel you can depend on. This is just where Sutcliffes' are able to beat most of their rivals. If you deal with them you will get a sound job at a right price.

### DESIGN C.B. No. 2 SPECIFICATION.

Length.	Width.	Height Eaves.	Height Ridge.	Price.
2½ft.	2ft.	1ft. 10ins.	2½ft.	£1 7 6
3½ft.	3ft.	2½ft.	3½ft.	£2 11 6
4½ft.	3ft.	3½ft.	4½ft.	£3 5 0

All sent carriage paid, England and Wales, nearest station.

**THERE ARE THOUSANDS OF DOG LOVERS** who do not strive to keep pedigree stock, and who must have kennels that are reliable but not expensive. It is for this reason we have decided to include a reduced specification of the C.B. design to make it possible for clients with limited means to be able to purchase satisfactory. In the No. 2 specification, the walls are built on  $\frac{1}{2}$ in. planed, tongued and grooved boards, the roof on  $\frac{1}{2}$ in. feathered boards, and the floor on  $\frac{1}{2}$ in. boards. The kennels are crosscut a nice brown colour, and are extremely good value at the low prices shown here.

## Sutcliffes' 'Derby' Kennel, Suitable for Exhibition Dogs, and Larger Sizes as Breeding Kennel.

	Length	Width	Height Front	Height Back	Prices £ s. d.
No. 1 ...	8ft.	4ft.	4ft.	3ft.	6 0 0
No. 2 ...	8ft.	4ft.	5ft.	4ft.	8 0 0
No. 3 ...	10ft.	5ft.	6ft.	5ft.	12 5 0

Carriage Paid to nearest Station England and Wales.

**VERY SUBSTANTIAL BUILD.** Here is shown a most useful, moderate priced design of fine quality. The outer walls are built of  $\frac{1}{2}$ in. planed, tongued and grooved boards, carefully selected; every board is really well seasoned. The framing is nicely planed and extra thick. The roof is also covered with  $\frac{1}{2}$ in. planed, tongued and grooved boards and then covered with a special superior non-tarring felt, and afterwards stripped with narrow battens, forming a bone-dry roof in all weathers. The floor is built of similar boards and heavy floor joists, and is raised several inches from the ground, forming a perfectly dry structure in the worst weather. The short legs are very stout, the kennel is easily cleaned, and is remarkable value.

**A NICE FRONT APPEARANCE.** Note the solid ventilating wind screen, most useful at all times. Both doors are fixed on fine quality "T" hinges, complete with lock and key. The bars are strong and fixed about  $2\frac{1}{2}$ ins. apart. You could not desire a more cosy and comfortable kennel, no matter how valuable your dog.

**THE INSIDE PARTITION.** Extends from floor to roof, built of same boards as the sides and complete with special dog entrance. This has a closing wood shutter which can be regulated from the outside.

**OUTSIDE PAINTED BROWN.** The outside of this fine kennel is painted a nice brown with special wood preservative. This gives a far smarter appearance than the common brown.

### Design 'Derby'

SOLD on our  
Well-Known -  
GUARANTEE.

**SECTIONALLY BUILT AND CARRIAGE PAID.** All these kennels are built in easy perfect fitting sections, no trouble to erect, all bolts are provided free.

**THE MONEY BACK GUARANTEE.** You are guaranteed satisfaction by Sutcliffes', no beating about the bush. If the kennel does not suit you from any fault, just return carriage paid and we return your money in full. Not more than one kennel in a hundred is returned, so great is the satisfaction given. Still, it is the guarantee that is valuable; you feel safe when you place the order.

**A LUXURY MODEL.** Frequently we come across dog lovers who want something out of the ordinary and we have introduced the "Derby" Luxury Model. The two ends and the back are built of  $\frac{1}{2}$ in. ornamental weather boards, the floor of special lin. boards, and the roof of similar boards, then covered with a fine quality red felt and stripped with narrow battens. The outside is painted two coats of special brown preservative, and the inside white with sanitary paint. The extra cost of these Luxury Models is 25 per cent. on list prices.

**A RAISED SLEEPING PLATFORM** is included free of charge in all sizes of the "Derby" Kennel. Make sure your kennel is fully equipped before you place an order.

## Sutcliffes' 'Pansy' Dog Kennel, Convenient Design, Moderate Price.

		Length	Width	Height		Prices	
				Back	Front	£	s. d.
No. 1		5ft.	3ft.	3ft.	4ft.	3	15 0
No. 2		5ft.	4ft.	3ft.	4ft.	4	15 0
No. 3		5ft.	4ft.	4ft.	5ft.	5	9 0
No. 4		6ft.	4ft.	4ft.	5ft.	6	0 0

Carriage Paid to nearest Station England and Wales.

**IT IS GOOD THROUGHOUT.** You can examine every nook and corner of this nicely designed kennel and you will not find a single fault. The inside is equal to the outside, no dark corners, no draughty places, plenty of ventilation, abundant light; strong iron bars and convenient height. You might perhaps come across a lower priced kennel, but it will be of inferior quality and will not stand bravely against the weather like Sutcliffes' "Pansy."

**THIS IS HOW WE BUILD IT.** The sides and ends are built of  $\frac{1}{2}$ in. planed, tongued and grooved boards, all well seasoned and very free from knots. The roof is built of similar boards, then covered with high grade non-tarring roofing felt and afterwards stripped with narrow battens, forming a roof perfectly dry in the worst weather. The floor is also built of  $\frac{1}{2}$ in. planed, tongued and grooved boards, with heavy joists, and the floor being lifted several inches from the ground is sure to be dry and warm.

**SLIDING SHUTTERS, VENTILATION WITHOUT DRAUGHTS.**—The "Pansy" kennel is of superior design. On the right, facing the front, we fix a sliding wood shutter. The ventilation can be regulated as desired by chains, and hooks are provided. The iron bars are very strong, the correct distance apart, while the door in centre is hung on heavy "T" hinges, complete with press lock and key. On the left side of the front the bars run from top to bottom, giving abundant ventilation and light; but in addition we provide a moveable sliding wood shutter for night use to cover up the lower portion of the kennel front.

**A RAISED SLEEPING PLATFORM.**—The "Pansy" is provided up the right hand end, running from front to back. This platform is moveable for cleaning purposes, and is of great benefit.

**BUILT IN SECTIONS.** The "Pansy" is sectionally built, easily erected by unskilled labour, all bolt holes are made and bolts provided free. You can erect the "Pansy" in one hour without difficulty.

**PAINTED A NICE BROWN COLOUR.** Sutcliffes' paint the "Pansy" Kennel a most attractive brown colour with special preservative. This is a costly preparation but is wonderfully effective and preserves the timber finely.

**EVERY DEAL MEANS SATISFACTION.** The "Pansy" Kennel carries our iron-bound guarantee of complete satisfaction or money back. Very few kennel makers offer this guarantee, but it is simply invaluable to all purchasers and should always be borne in mind.

**A LUXURY MODEL.** Where quality is the main consideration we offer the Luxury Model "Pansy" Kennel. This is built with sides and ends of  $\frac{1}{2}$ in. tongued and grooved ornamental weather boards, the roof of  $\frac{1}{2}$ in. tongued and grooved boards, then covered with best red felt and stripped with narrow battens. The floor is also  $\frac{1}{2}$ in. tongued and grooved boards, while the outer walls are painted two coats brown wood preservative, and the inside white with sanitary paint. The extra cost of the Luxury Model is 25 per cent. on list prices and it is worth it.

### THE "PANSY" KENNELS. No. 2 SPECIFICATION

	Length.	Width.	Height.		Price.
			Front.	Back.	
No. 1	5ft.	3ft.	4ft.	3ft.	£2 19 0
No. 2	5ft.	4ft.	4ft.	3ft.	£3 10 0
No. 3	5ft.	4ft.	5ft.	4ft.	£4 5 0

All carriage paid, England and Wales, nearest station.

For those who fancy the "Pansy" design kennel, but cannot afford the price of the Standard model, we are now making at a reduced price to the following specification. The four walls, the roof and the floor are built on best quality  $\frac{1}{2}$ in. planed, tongued and grooved boards, and the entire kennel creosoted on the outside free. Although not as strong as our more expensive models, it is quite reliable, and is sure to make a strong appeal. The roof is also covered with good felt.

## Sutcliffes' 'Calder' Dog Kennel, a Covered House and Run.

	Length of House of Run		Width	Height		Overall	Prices		
	Front	Back		Front	Back		£	s.	d.
No. 1 ...	3ft.	3ft.	3ft.	4ft.	3ft.	6ft.	6	0	0

No. 3 ...	4ft.	4ft.	4ft.	5ft.	4ft.	8ft.	8	10	0
No. 4 ...	3ft.	5ft.	5ft.	5ft.	4ft.	8ft.	10	0	0
No. 5 ...	4ft.	6ft.	6ft.	6ft.	5ft.	10ft.	14	6	0

Carriage Paid to nearest Station England and Wales.

**HOW IT IS BUILT.** This is a real good kennel, suitable for all breeds and made accordingly. The four walls and roof are built of  $\frac{1}{2}$ in. planed, tongued and grooved boards of high quality, the inside framing is extra thick, well planed and properly fixed. In addition to the boards on the roof we fix a special grade non-tarring roofing felt and strip with narrow battens. You get a bone dry roof in the worst weather and one that is always reliable. The floor is built of  $\frac{1}{2}$ in. tongued and grooved boards, with strong floor joists, and will be perfectly dry.

**AN EXCLUSIVE DESIGN.** The design has been most carefully thought out and provides a cosy, comfortable home for dogs. The front has one large ventilating wind screen, one hinged shutter, also one removable wood shutter, as illustrated. The sleeping compartment is properly partitioned off and has one special movable sleeping board provided. The doors in front are on the half back system, that is two distinct doors; the top door has a fixed window, and at the left end there is a strong door for entrance to run. Both house and run have boarded floors and all doors complete with lock and key. All the bars in front are properly fixed, about 2 $\frac{1}{2}$ ins. apart and very strong.

**SECTIONALLY BUILT AND CARRIAGE PAID.** The "Calder" Kennel is built in perfect fitting sections, easy to erect without skilled labour, and all bolts, etc., are provided free, and the kennel is delivered

### Design 'Calder'

SOLD on our  
Well-Known  
GUARANTEE.

carriage paid to your nearest station, so you know the exact cost before you buy. No big carriage charges to meet.

**THE OUTSIDE APPEARANCE.** Is most pleasing. We treat the walls with a very nice brown wood preservative. This greatly lengthens the life of the timber and makes the general appearance quite attractive. The "Calder" is a kennel you will be proud of, one that will give twenty years' wear and always be reliable.

**THE MONEY BACK OFFER IS IMPORTANT.** Before you decide make sure you are safeguarded; you are at liberty to test it, get the opinion of your friends, and if it is not all we claim for it just return carriage paid and we send back every penny paid. You are certain of a good kennel and complete satisfaction if you deal with Sutcliffes'.

**A LUXURY MODEL OF THE "CALDER."** If your dogs are very valuable perhaps you will prefer a luxury model, with the sides and ends built of  $\frac{1}{2}$ in. planed, tongued and grooved ornamental weather boards, as shown at the beginning of this booklet. These are the finest boards in existence for the making of super grade kennels. The floor of these special models is built of  $\frac{1}{2}$ in. tongued and grooved boards, the roof of  $\frac{1}{2}$ in. boards, then covered with red felt, the outside of kennel treated two coats of brown wood preservative and the inside white with sanitary paint. For these wonderful improvements we are naturally compelled to charge extra. The cost of Luxury Model is 25 per cent. on list prices, carriage paid.

From 55/-

## Sutcliffes' 'Hebden,' a Low Priced Sectional Kennel.

	Length	Width	Height Front	Height Back	Prices (s. d.)
No. 1	5ft.	3ft.	4ft.	3ft.	3 4 0
No. 2	5ft.	4ft.	4ft.	3ft.	3 18 0
No. 3	5ft.	4ft.	5ft.	4ft.	4 10 0
No. 4	6ft.	4ft.	5ft.	4ft.	5 0 0

Carriage Paid to nearest Station England and Wales.

**GENERAL SPECIFICATION.** The "Hebden" Kennel should give the fullest satisfaction to all buyers. The four walls and the roof are built of  $\frac{1}{2}$ in. planed, tongued and grooved boards of first rate quality, fixed on framing of ample strength. The roof is also covered with a good class roofing felt and then stripped with narrow battens. The floor is built of  $\frac{1}{2}$ in. tongued and grooved boards and is very strong.

**ALL SECTIONALLY BUILT.** The "Hebden" is built in perfect fitting sections, easy to assemble by unskilled labour, all bolts, etc., are provided. The floor is raised a few inches from the ground and will be absolutely dry at all times.

**THE FRONT DESIGN.** Look at the ventilating wind screen, this is of great utility in bad weather. The strong iron bars run from top to bottom, as illustrated, in addition for night use we include a movable wood shutter, this prevents draughts and is a great convenience. The door on the right is hung on good quality "T" hinges complete with press lock and key.

**TREATED A NICE BROWN SHADE.** Despite the low price we finish off this kennel most attractively; the outer walls are painted brown with special preservative and the general appearance is equal to most high grade kennels. We are quite sure all who purchase will consider it extra fine value.

### Design 'Hebden'

SOLD on our  
Well-Known -  
GUARANTEE.

**THE MONEY BACK GUARANTEE.** The fullest possible money back guarantee goes out with every kennel: you need not hesitate a single moment in sending your order for the "Hebden." You will find it quite as good as we say it is, exceptionally well designed and superior to many kennels costing more money.

#### No. 2 SPECIFICATION FOR THE "HEBDEN" KENNELS.

	Length.	Width.	Height, Front.	Height, Back.	Prices.
No. 1	5ft.	3ft.	4ft.	3ft.	£2 15 0
No. 2	5ft.	4ft.	4ft.	3ft.	£3 8 0
No. 3	5ft.	4ft.	5ft.	4ft.	£4 2 0
No. 4	6ft.	4ft.	5ft.	4ft.	£4 10 0

All carriage paid, England and Wales, nearest station.

In response to urgent demands we have decided to offer the "Hebden" kennel, not just as strongly built as the Standard model, but sufficiently strong to suit all sheltered places and guaranteed reliable, whilst the price for cash with order has been cut to the lowest limits.

The four walls and roof are built on  $\frac{1}{2}$ in. planed, tongued and grooved boards, with substantial inside framework; the roof on  $\frac{1}{2}$ in. planed, tongued and grooved boards, and covered with good quality felt and stripped with narrow battens; the floor on  $\frac{1}{2}$ in. planed, tongued and grooved boards.

## Sutcliffes' 'Clinkor' Kennel and Run.

	Length	Width	Height Eaves	Height Ridge	Prices £ s. d.
No. 1 ...	9ft.	4ft.	5ft.	7ft.	15 5 0
No. 2 ...	10ft.	5ft.	5ft.	7ft.	15 0 0
No. 3 ...	11ft.	5ft.	5ft.	7ft.	18 0 0

Carriage Paid to nearest Station England and Wales.

**A COMPLETE SPECIFICATION.** The four walls are built of  $\frac{1}{2}$  in. planed, tongued and grooved boards nailed to extra thick planed inside framing; the floor is built of similar boards and heavy floor joists. The floor is raised a few inches from the ground and will always be perfectly dry. The roof is built of  $\frac{1}{2}$  in. planed, tongued and grooved boards with substantial framework. On top of the boards we fix real high grade felt and strip with narrow battens. Barge boards and finials are provided, forming a roof of delightful design and bone dry construction.

**A BEAUTIFUL DESIGN.** Look at the illustration and you get some idea of the extra fine design of this superb kennel. On both ends are fixed ornamental boards, forming half timbered work; the iron bars are spaced about  $2\frac{1}{2}$  ins. apart and very strong. Two doors in front as shown in sketch. This kennel is of most up-to-date design and can be strongly recommended for nearly all breeds.

**PARTITION, SLEEPING PLATFORM, ETC.** In the interior we fix one boarded partition right from floor to ridge. There is a dog entrance with closing shutter; this shutter can be regulated from the outside by means of a cord. Inside the sleeping compartment we provide one raised sleeping platform. Every possible essential feature has been included in the "Clinkor" design and no firm can beat it.

**SECTIONALLY BUILT AND CARRIAGE PAID.** The "Clinkor" is built in sections, easy to erect, all kennels fixed at our works before despatch, bored, etc., and all bolts provided free, while each kennel is sent carriage paid to your nearest station.

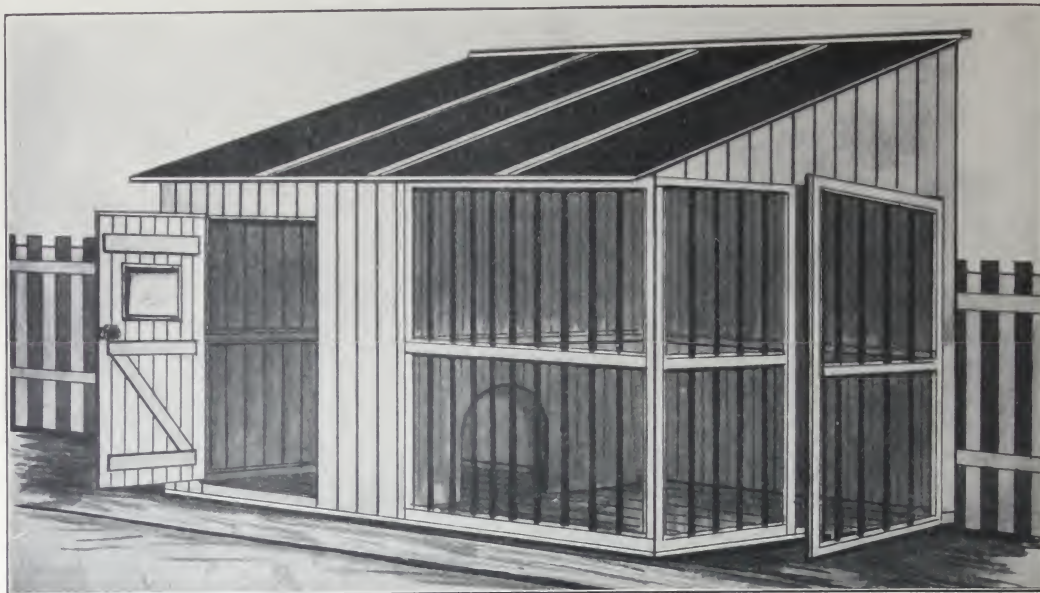

### Design 'Clinkor'

**SOLD on our  
Well-Known  
GUARANTEE.**

**PAINTED BROWN AND WHITE.** This kennel is treated on the outside with a special brown wood preservative and the ornamental portions white oil paint, to give a delightful effect. You can hardly imagine how very fine this kennel is.

**REMEMBER THE GUARANTEE.** When buying a kennel you expect to get a good one, but you are absolutely safeguarded when you deal with Sutcliffes'. Either you are completely satisfied or Sutcliffes' accept the kennel back and return cash. There is no doubt about the guarantee; we lose carriage one way if there is the slightest fault and you do not feel pleased. Remember not more than one kennel in a hundred is sent back, so great is the satisfaction given.

**A LUXURY MODEL 25 PER CENT. EXTRA.** For those who want something as good as anything that can be built we offer the "Clinkor" Luxury Model. The back side and end are built of  $\frac{1}{2}$  in. tongued and grooved ornamental weather boards, the front and front end of  $\frac{1}{2}$  in. timber, the roof of  $\frac{1}{2}$  in. tongued and grooved boards, then covered with red felt and stripped with narrow battens, the floor is also built of  $\frac{1}{2}$  in. planed, tongued and grooved boards, also the inside partition, and sleeping platform. The kennel is painted two coats brown and white and two coats white distemper inside. We cannot convey on paper how very good the Luxury Model is, but we are quite certain it is the finest kennel ever offered by any firm in the country, and very cheap at the price asked, namely, 25 per cent. on list prices, carriage paid.

## Sutcliffes' 'Eclipse' Kennel, with Separate Sleeping Compartment.

		Length	Width	Height Back	Height Front	Prices	
						£	s. d.
No. 1	...	6ft.	8½ft.	5ft.	4ft.	7	0 0
No. 2	...	8ft.	8½ft.	5ft.	4ft.	8	0 0
No. 3	...	10ft.	8ft.	5ft.	5ft.	12	0 0

Carriage Paid to nearest Station England and Wales.

**JUST HOW IT IS BUILT.** The four walls, roof and floor are built of 1½ in. planed, tongued and grooved boards of high grade quality and nicely seasoned. There is never any inferior timber used in the construction of these kennels. The framing is planed on all sides, and is most substantial; all framing is fixed inside and there is nothing to rot with exposure. In addition to the boards on the roof we cover with extra quality non-tarring roofing felt and afterwards strip with narrow battens.

**PARTITION AND SLEEPING QUARTERS.** The partition extends from floor to roof, forming two entirely distinct compartments, one for sleeping and the other as an exercising covered runs. In the sleeping portion a special sleeping platform is included, and a dog entrance is fixed in partition, complete with sliding shutter. The shutter can be opened or closed by means of a cord fixed on the outside. This is a most convenient arrangement greatly appreciated.

**SOMETHING ABOUT DESIGN.** Good dogs deserve good homes. The "Eclipse" is one of the finest homes for dogs anybody could possibly design; the run is fitted with strong iron railings fixed about 2½ ins. apart, the door to run is fixed on strong hinges, complete with lock and key, the door to the sleeping compartment is also fixed on strong hinges, complete with lock and key, and a small window in the top half; the sleeping chamber is nicely ventilated.

**BUILT IN SECTIONS AND CARRIAGE PAID.** The "Eclipse" Kennel is built in perfect fitting sections erected at our works and bored before despatch; all bolts, etc., are provided free. Any handy man can erect this kennel in two hours. The special advantages of kennels in sections are so numerous we feel sure they will be greatly admired by all dog lovers.

### Design 'Eclipse'

**SOLD on our  
Well-Known -  
GUARANTEE.**

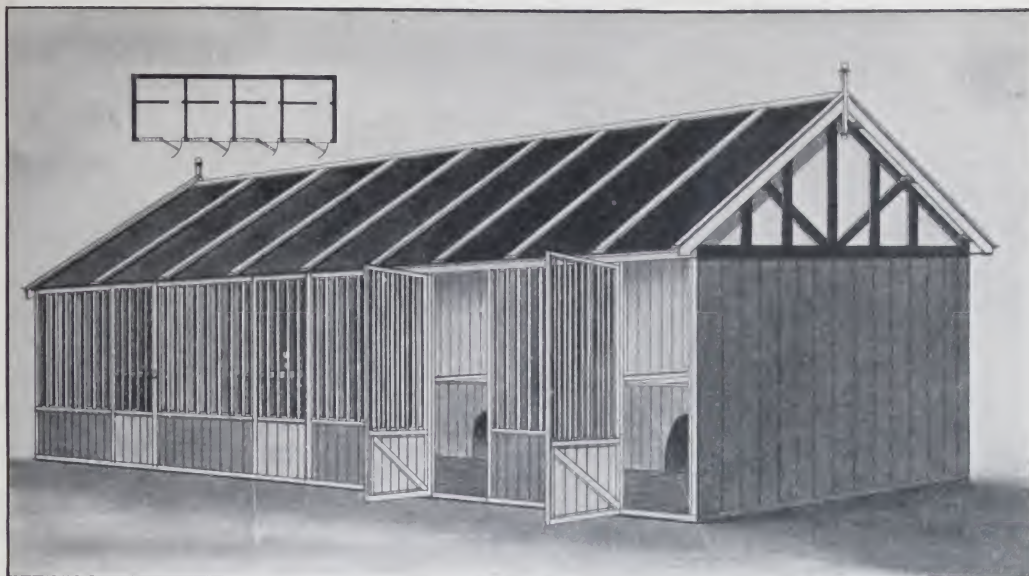

**A SMART FINISH.** The outside of Sutcliffes' "Eclipse" Kennel is painted with a special brown wood preservative.

**HESITATE BEFORE YOU PURCHASE.** It is easy to show a nice picture, but it is the timber, style, workmanship and design that really count. You are at liberty to study every kennel catalogue in the country, but you will not find a kennel offering the same specification as shown in the "Eclipse" containing all the exclusive features, combined with high grade finish, and at a price that compares with Sutcliffes' model.

**THE MONEY BACK OFFER.** Unless you can thoroughly inspect any kennel before the purchase is complete you are not buying in the right market. Sutcliffes' deal straight every time, you run no risk, you can erect the "Eclipse" Kennel, study it carefully, get the opinion of your friends, and if you find a fault, if there is anything that does not suit you, if you think you can get better value, just return it carriage paid and Sutcliffes' return your money in full without quibble or argument. That's the only safe way to buy a kennel.

**THE "ECLIPSE" LUXURY MODEL.** The outer walls are built of 1½ in. planed, tongued and grooved ornamental weather boards, the roof of 1½ in. thick tongued and grooved boards, then covered with special quality red felt, and stripped with narrow battens. The floor is also built of 1½ in. tongued and grooved boards and thick floor joists, forming a kennel of double strength, one that will give thirty years wear and always be thoroughly reliable. The outside of the Luxury Model "Eclipse" is treated two coats of best brown wood preservative and the inside white with sanitary distemper. For all these special features naturally the price is considerably more. Our lowest price for the Luxury Model is 25 per cent. on list figures, carriage paid.

## Sutcliffes' 'Trevor' Range of Kennels.

Suitable for all Breeds.

	Length	Width	Height Eaves	Height Ridge	Prices £ s. d.
1 Kennel ...	5ft.	6ft.	5ft.	7ft.	9 10 0
2 Kennels ...	10ft.	6ft.	5ft.	7ft.	17 0 0
3 Kennels ...	15ft.	6ft.	5ft.	7ft.	25 5 0
4 Kennels ...	20ft.	6ft.	5ft.	7ft.	33 0 0

Carriage Paid to nearest Station England and Wales.

**HOW WE BUILD THEM.** The four walls are built of  $\frac{1}{2}$  in. planed, tongued and grooved boards, every one selected and well seasoned; the roof of  $\frac{1}{2}$  in. similar boards, then covered with high quality non-tarring roofing felt, and afterwards stripped with narrow battens. This will form a kennel absolutely bone dry in the worst possible weather. The roof is also finished off with attractive barge boards and finials.

**THE FLOOR IS EXTRA GOOD.** The floor is built of  $\frac{1}{2}$  in. planed, tongued and grooved boards and heavy floor joists. The floor is raised a little from the ground and will always be dry and easily cleaned.

**PARTITIONS AND SLEEPING QUARTERS.** All partitions extend right from the floor to ridge and are built of  $\frac{1}{2}$  in. tongued and grooved boards. The sleeping quarters are commodious, airy, and of ample size, and are made movable so that the sleeping room can be cleaned without any trouble.

**THE FRONT DESIGN IS EXTRA NICE.** At each end we fix ornamental timbers as shown in illustration. In the front a portion is boarded and in the top half substantial railings fixed about 2 ft. apart. The door is of large size on heavy "T" hinges and complete with lock and key. The bars in the door are exactly similar to the others and very thick.

**SECTIONALLY BUILT AND CARRIAGE PAID.** All Sutcliffes' "Trevor" Kennels are built in easy fitting sections, erected at our works before despatch, properly bolted, and all bolts provided free.

**ATTRACTIVE FINISH.** The outside appearance is important. We treat the outer walls with special brown wood preservative. This preserves the timber well and gives a most artistic finished appearance.

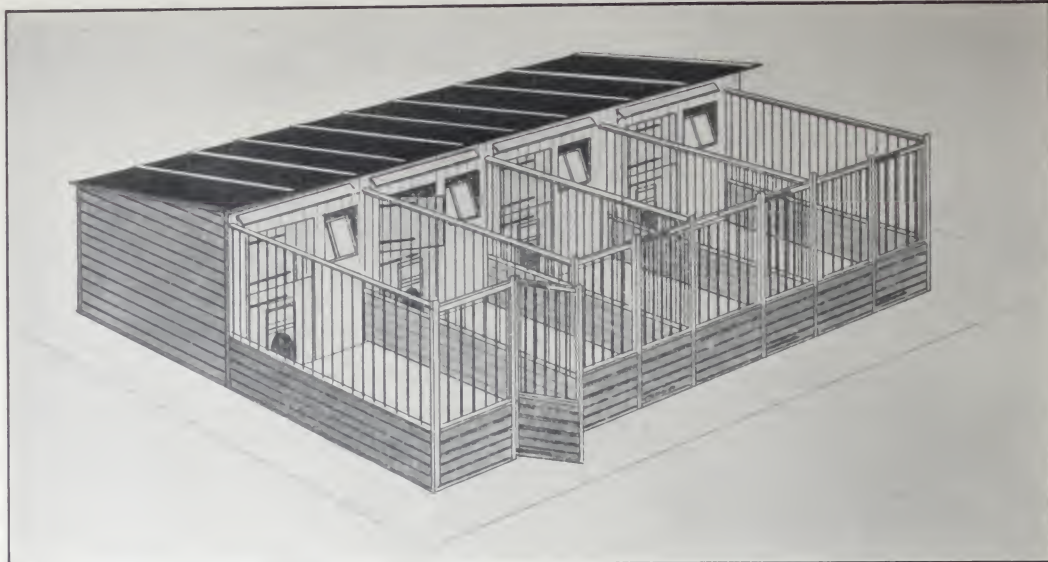

Design 'Trevor'

SOLD on our  
Well-Known -  
GUARANTEE.

**BEFORE YOU DECIDE.** There are so many points to consider before you place an order,—the timber, workmanship, design, general usefulness and solidity. Very few kennel makers give the full details of construction, and unless you have the fullest particulars you are simply buying a pig in a poke. Sutcliffes' invite you to compare their specification with that of any other firm; do not miss one single feature, then on merit alone we shall get your order.

**THE MONEY BACK OFFER.** It does not matter how good the specification, something may go wrong, but when you deal with Sutcliffes' all risk, all doubts, are entirely removed. You must be absolutely satisfied before the sale is considered complete. Our money back offer is always for your protection, and can be taken advantage of in every case.

**THE "TREVOR" LUXURY MODEL.** To meet the wishes of certain of our clients who are prepared to have the very best, irrespective of price, we have introduced a Luxury Model. The outer walls are built of  $\frac{1}{2}$  in. tongued and grooved ornamental weather boards, see illustration in this list, the roof of  $\frac{1}{2}$  in. tongued and grooved boards, then covered with red felt and stripped with narrow battens; the floor of  $\frac{1}{2}$  in. tongued and grooved boards, the inside partitions also of these boards, and in addition the sleeping quarters are built of  $\frac{1}{2}$  in. tongued and grooved boards. The outside is painted two coats of special brown wood preservative and the inside two coats of white distemper. For all these big improvements and the greatly increased strength we charge 25 per cent. extra on list prices, carriage paid, but every Luxury Model is well worth it. It is simply impossible to describe on paper how really good they are. They must be actually seen to be properly appreciated.

## Sutcliffes' 'Grange' Range of Kennels

with Runs at an extra charge.

Smart in appearance.

Faultless in Construction.

	Length	Width	Height	Height	Price
1 Kennel ...	4ft.	5ft.	7ft.	Back	£ s. d.
2 " ...	8ft.	5ft.	7ft.	6ft.	7 15 0
3 " ...	12ft.	5ft.	7ft.	6ft.	13 13 0
4 " ...	16ft.	5ft.	7ft.	6ft.	19 10 0
					26 0 0

Up to 100 feet. Further Prices on application.

**HOW WE BUILD THEM.** This is an exceptionally well built kennel, suitable for all the larger breeds and built and designed accordingly. The four walls of the house and the boarded base of the runs are covered with our high grade quality rustic jointed lin. weather boards planed on all four sides framework. The roof is built of 1/2 in. planed, tongued and grooved boards of special quality, then covered with a superior quality non-tarring felt and afterwards stripped with narrow battens, forming a roof of absolutely bone dry construction.

**A BEAUTIFUL DESIGN.** The front has one large ventilating full length window screen, the doors in front are of half back pattern, so that one or both can be opened or closed as desired; each kennel has a mortised and tenoned window to drop inwards for giving light and abundant overhead ventilation; the dog entrance in door has a sliding wood shutter. The kennels are of great height to prevent head bumping, the partitions are built of 1/2 in. planed, tongued and grooved boards, and each kennel is just as cosy as it is possible to build them. All breeds of dogs are sure to thrive and keep in the finest condition when presented with such an ideal home.

**FLOOR PARTITIONS AND SLEEPING PLATFORM.** The floor of this kennel is built of 1 in. planed, tongued and grooved boards to give very great strength, and is raised a few inches from the ground on thick floor joists. The sleeping platform included in each compartment is built on 1/2 in. planed, tongued and grooved boards, while the partition extending from floor to roof is built of similar boards. Just imagine how very good this kennel is and then note the moderate prices.

**NOTE THE HEIGHT OF THE EXERCISING RUNS.** The runs are built far stronger than usually supplied, the bars are spaced about 2 1/2 ins. apart and the doors to the runs are fixed on heavy hinges; all doors complete with lock and key.

	Height	Length	Width	Partitions	Price
1 Run ...	of Run	of Run	of Run		£ s. d.

### Design 'Grange'

**SOLD on our  
Well-Known -  
GUARANTEE.**

**SECTIONALLY BUILT AND CARRIAGE PAID.** The "Grange" range of kennels is built in perfect fitting sections erected at our works before despatch; all bolts, etc., are provided, and each kennel is delivered carriage paid to your nearest goods station.

**AN OUTSIDE VIEW.** The outside of a kennel is nearly as important as the inside. You naturally want your kennels to be of pleasing design and you will have to travel a long way to come across a kennel range equal to Sutcliffes' "Grange" design. The outer walls are painted brown with special wood preservative; this preserves the timber and looks almost as well as paint; the runs are also treated in exactly the same way. Everything possible has been done to make the "Grange" range of kennels absolutely the best of their kind.

**BEFORE YOU COME TO ANY DECISION,** you are invited to look round and see if you can find a range of kennels containing all the special features embodied in this design, equal specification and finished in the manner so clearly described at anything like the price. The reasons why Sutcliffes' are able to give better value than other firms are given in detail at the beginning of this booklet; if you study these particulars on merit alone you will be compelled to give your order to Sutcliffes'.

**THE MONEY BACK OFFER.** A sound article is always sold on a money back guarantee. Unless you can get this guarantee you are running risks that are entirely unnecessary and should not be accepted, so before you decide remember Sutcliffes' ironbound guarantee of complete satisfaction or money back.

## Sutcliffes' 'Fairview' Range of Kennels

for all Breeds.

"Unit" Construction.

	Width	Depth	Height		Price	Additional Units forming complete Kennels
			Front	Back		
No. 1—2½ft.	3ft.	2½ft.	2½ft.	2½ft.	£2 5 0	£1 17 6
No. 2—3ft.	4ft.	3ft.	3ft.	3ft.	£3 5 0	£2 15 0
No. 3—3ft.	5ft.	4ft.	4ft.	3ft.	£3 15 0	£3 3 0
No. 4—4ft.	6ft.	5ft.	5ft.	4ft.	£6 15 0	£5 5 0

Carriage Paid to nearest Station England and Wales.

**DETAILED SPECIFICATION.** The four walls are built of lin. planed, tongued and grooved boards of selected quality, clamped together; the framing is extra thick to give the utmost solidity; the roof is built of exactly similar boards to the walls and is afterwards covered with high grade non-tarring roofing felt, then stripped with narrow battens, forming a bone dry roof in all weathers. The floor is raised several inches from the ground and built of lin. boards with substantial floor joists.

**INTERIOR PARTITIONS.** These are built of lin. planed, tongued and grooved boards, and extend from floor to roof.

**NOTE EXCLUSIVE FRONT DESIGN.** The doors are strongly made, properly framed up, and hung with good quality 'I' hinges, and complete with lock and key. The stout iron rails extend to the bottom frame of doors, this being an important feature, and found only in the best makes of kennels. The shutters are made in two portions and slide in grooves, thus part of, or the entire front can be thrown open as desired. This system has many advantages, and is thoroughly appreciated by our clients.

**"UNIT" CONSTRUCTION.** We have made a careful survey of the actual requirements of most dog fanciers, and we think this design can be selected with perfect safety for all the popular breeds. "Unit" construction enables fanciers requiring more than one kennel to purchase a range either of two, three, four or more kennels in the different sizes shown, and at the same time there is a nice saving from buying separate kennels. We firmly believe this new innovation will prove extremely popular, and we anticipate a ready demand.

### Design 'Fairview'

SOLD on our  
Well-Known -  
GUARANTEE.

**ATTRACTIVE FINISH.** Each kennel is painted with a special brown wood preservative. When you buy from Sutcliffes' you get a kennel that will give twenty years' service and one you will always be proud of.

**THE MONEY BACK GUARANTEE.** All standard kennels shown in this booklet are sent out on an iron-bound guarantee of satisfaction or money back. You are at liberty to fully test this kennel and if for any reason you are not perfectly satisfied, just return carriage paid and you get your money back in full. Don't buy a kennel unless you are thoroughly safeguarded before you make the purchase.

**SECTIONALLY BUILT, CARRIAGE PAID.** We pay carriage to your nearest station, and each kennel is sectionally built; the sections fit perfectly and are quickly erected by unskilled labour.

**A LUXURY MODEL.** Good as the standard kennels are, we are able to offer a Luxury Model for dog fanciers who are only satisfied with the finest quality money can buy. This Luxury Model is built as illustrated so far as general design, but the walls are constructed of lin. planed, tongued and grooved ornamental weather boards, and the floor of lin. thick planed, tongued and grooved boards.

**THE ROOF OF THE LUXURY MODEL** is covered with lin. tongued and grooved boards, then on top we fix red roofing felt and strip with narrow battens. The inside of the kennel is treated with a special white sanitary distemper and the outside two coats of brown wood preservative. Naturally, for all these special features we are compelled to greatly increase the price, but this has been kept most reasonable considering the quality. The price of all Luxury Model Kennels is 25 per cent. advance on list shown, carriage paid.

## Sutcliffes' Delightful House Kennel.

Price 40/-, Carriage Paid.

Carriage Paid to nearest Station England and Wales.

Design 'House'

**SOLD on our  
Well-Known -  
GUARANTEE.**

**STRONG CONSTRUCTION YET LOW PRICE.** The four walls are built on best quality 3-plywood; the roof and floor on  $\frac{1}{2}$ in. planed, tongued and grooved boards; this ensures a strong but lightweight kennel, easily moved, and one that is not any drawback in the house. We are quite sure that all our friends will find this house kennel wonderful value, and it has already proved most popular with clients in all parts of the country.

**THE INSIDE FITTINGS DESCRIBED.** In addition to the wood floor, we supply movable wood gratings. These allow all the moisture to fall into two metal trays, provided free, and easily taken out for cleaning. When you consider this finely equipped kennel costs only 40/-, you will not be surprised at its wonderful popularity.

**THE FRONT DESIGN OF THE HOUSE KENNEL.** Is just as shown in the picture. Two properly morticed and tenoned doors, complete with strong iron bars fixed on good hinges, with hasps, etc., are provided, and the front design of the kennel is one that is bound to make a very strong appeal.

**AN INTERIOR PARTITION CAN BE PROVIDED.**—When it is required to use this kennel for sleeping two dogs at night, we can include an interior partition forming two distinct compartments. The extra cost is only 5/-.

**LEGS ARE PROVIDED.**—This house kennel is provided with short legs to raise entire kennel a few inches from the floor level.

**NICELY PAINTED AND CARRIAGE PAID.**—The kennel is sent out treated with a nice brown wood preservative. It is sent completely erected, and carriage paid to any station in England and Wales at the prices shown, and is sold on Sutcliffe's well-known guarantee of complete satisfaction or money back.

Design 'Progress'

SOLD on our  
Well-Known  
GUARANTEE.

**SOMETHING GOOD IN MATERIALS.** In the "Progress" Kennel Sutcliffes' have studied materials with great care; the sides, ends and floor are built of 1½ in. planed, tongued and grooved boards, the inside framing is nicely planed and looks strong enough for a kennel twice the size, the roof is built of 1½ in. planed, tongued and grooved ornamental weather boards, forming a bone dry roof either in winter or summer.

**WE HAVE TOLD YOU ABOUT MATERIALS.** Now let us say something about workmanship and general finish. Sutcliffes' men are all experts in wood; each man is individually trained to produce the best article in the shortest possible time by the aid of high grade machinery. Our huge timber buying capacity means right prices, and Sutcliffes' can sell cheaper than most firms because they specialise solely in portable buildings of every description, from a chicken coop to a chapel, and selling direct to the consumer saves intermediate profits.

**PAINTED BROWN.** The "Progress" Kennel is painted brown with a special wood preservative, and this gives an extra smart appearance, besides preserving the woodwork. There is no extra charge for this.

**A LUXURY MODEL.** Some of our dog friends require kennels of super quality, and this is why we offer the "Progress" Luxury Model. The four walls are built of 1½ in. planed, tongued and grooved ornamental weather boards, the roof of similar materials, and the floor of 1½ in. tongued and grooved boards; the outside is painted two coats of brown wood preservative and the inside white with sanitary paint. The extra cost for these Luxury Models is 25 per cent. on list.

**ALL MODELS EASILY CLEANED.** Both the Standard and Luxury Model are made with the back of the kennel hinged so as to lift up for easy cleaning; this is a convenience greatly appreciated.

## "PROGRESS" KENNEL. No. 2 SPECIFICATION.

No.		Length	Width	Height		Prices		
				Eaves	Ridge	£	s.	d.
No. 1	...	3ft.	2ft.	2ft.	3ft.	1	10	0
No. 2	...	3½ft.	2½ft.	2½ft.	3½ft.	2	0	0

Carriage Paid to nearest Station England and Wales.

To oblige clients who want reliable small dog kennels at a very low price, we can now supply the "Progress" kennel. With the four walls and the floor built on 1½ in. planed, tongued and grooved boards, the roof on 1½ in. sawn, feather-edge boards, this is a satisfactory specification, especially if you have a sheltered place for the kennel; and the low prices will appeal to those who must study every penny spent and cannot afford the better class models. All kennels in this specification are creosoted on the outside free.

## Dog Kennels on Deferred Payments.

All the Buildings in this Catalogue, including Dog Kennels, can be had on Deferred Payment Terms.

You select the goods required and simply add 5 per cent. to the Catalogue prices for 6 monthly payments, and 10 per cent. for 12 monthly payments. Always making the first deposit as large as possible.

Design 'Daisy'

SOLD on our  
Well-Known -  
GUARANTEE.

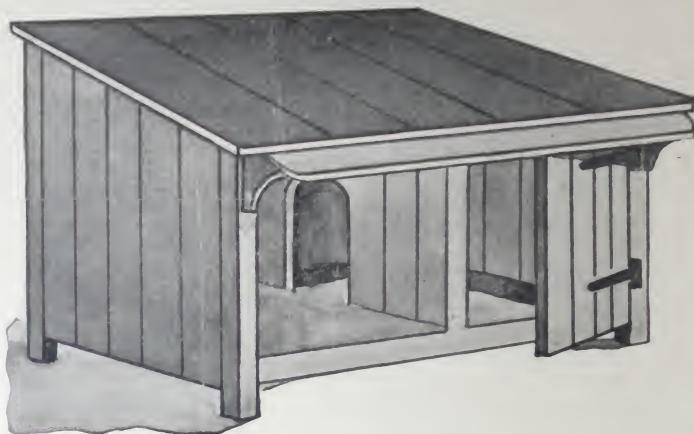

**EXTRA HEAVY BUILD.** This kennel is full of quality. Every nook and corner is nicely finished off and the materials are all selected. The four walls are built of ½in. planed, tongued and grooved boards, the roof is also built of ½in. planed, tongued and grooved boards, and then covered with really good felt and stripped with narrow battens. The floor is also built of ½in. planed, tongued and grooved boards with floor joists of ample thickness.

**A VERY NICE DESIGN.** The roof slopes from back to front, and it will be seen in the illustration there is a special drip board which frequently comes in most useful, especially in bad weather. The floor is raised several inches from the ground on stout legs and is always bone dry. You could not wish for more compact or better designed small kennel and shelter than the "Daisy." The inside contains one boarded partition, as illustration, complete with proper dog exit, while the door is fixed on good quality "T" hinges and is complete with lock and key.

**SECTIONALLY BUILT AND CARRIAGE PAID.** The "Daisy" Kennel is made in perfect fitting sections, all bolts, etc., provided free, and is delivered carriage paid to your nearest station at list prices.

**OUTSIDE PAINTED BROWN.** In order to improve appearance we treat the outside with a special brown wood preservative. This is most attractive and preserves the timber; there is no extra charge for this.

**A LUXURY MODEL.** If you want a kennel as good as any that can be produced, irrespective of price, then Sutcliffes' offer the "Daisy" Luxury Model. The sides and ends are built of 1in. planed, tongued and grooved ornamental weather boarding, the roof of 1in. tongued and grooved boards, then red felt fixed and stripped. The floor is built of 1in. tongued and grooved boards to give great strength and perfect dryness, while the outer walls are covered two coats of beautiful brown wood preservative, and the inside of the kennel is painted white with sanitary paint. For these special improvements the extra cost is 25 per cent. on list prices, carriage paid.

All carriage paid, England and Wales, nearest station.

In order to assist those who must have a nice kennel at a very low price, we have decided to make the "Daisy" kennel to the following specification. It is not as strong as the Standard model, but is quite reliable, and will carry our money-back guarantee. The four walls, the roof and the floor are built on best quality ½in. planed, tongued and grooved boards, with substantial planed framing. The kennel is creosoted on the outside free at the above low prices.

## "Kiddies" Play Pen.

Price 18/6

Absolutely essential in every home where there are Young Children.

**SOUNDLY CONSTRUCTED. WILL GIVE YEARS OF SERVICE.** This play-pen is built on extra high-grade materials, framework 2in. by 1in., with ½in. round beech bars, and a boarded floor. All the timber is extra well planed and perfectly smooth; it is guaranteed to give good service for a long period.

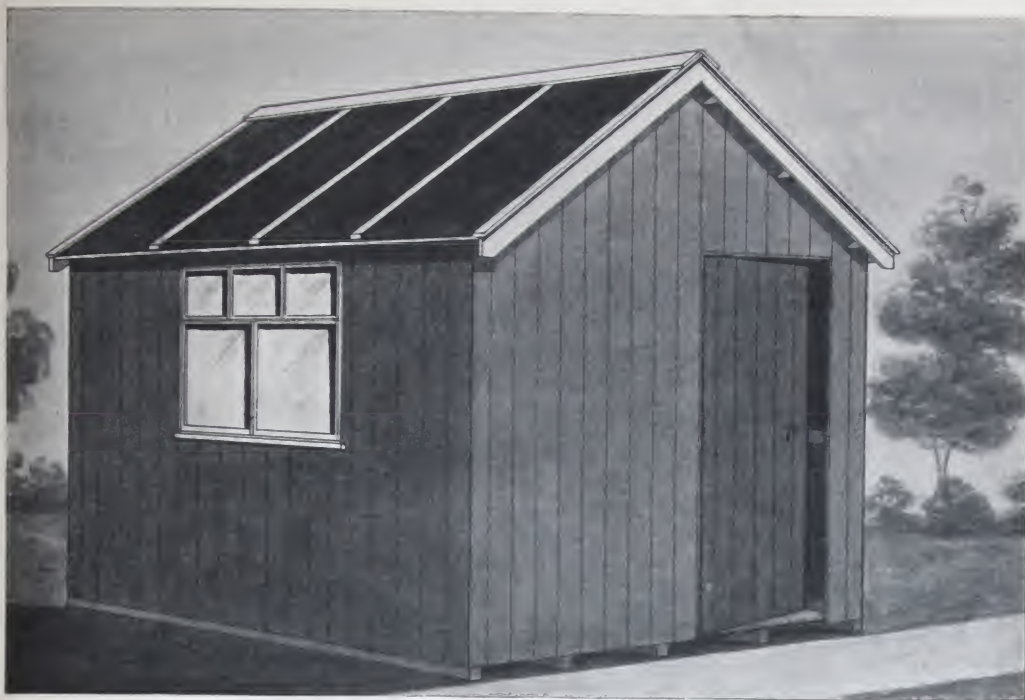

**COLLAPSIBLE AND STORED IN LITTLE SPACE.** When not in use this play-pen can be stored in a space only 5½ins. deep, and is erected in two minutes. For the safety of the "little one" you must have one of these play-pens, and if you are not perfectly satisfied cash will be returned.

**YOUR KIDDIE WILL BE SAFE.** When very young children reach the crawling stage that is the dangerous time; they are all over the place in a few seconds you cannot always have your eye on them. So for their safety and your own peace of mind, do not risk further dangers. Once you have the Sutcliffe play-pen you will know the "kiddie" is absolutely safe and perfectly comfortable.

	Length	Width	Height Eaves	Height Ridge	Floor Extra
1—	8ft.	6ft.	6ft.	8ft.	
2—	7ft.	7ft.	6ft.	8ft.	
3—	8ft.	8ft.	6ft.	8ft.	

Carriage Paid to nearest Station England and Wales.

**SUBSTANTIALLY BUILT BUT LOW IN PRICE.** Sutcliffes' have now introduced, by special request, a strongly-built office. The sides and ends are built on  $\frac{1}{2}$  in. planed, tongued and grooved boards, over extra stout inside framing; the quality of the timber employed will bear careful inspection, and the entire shed is one that will stand hard wear in all weathers and give many years excellent service.

**THE ROOF IS GUARANTEED RAINPROOF.** The roof is built on the same high-grade boards as the sides and ends. You will never find anything flimsy about Sutcliffes' sheds, no matter how low in cost. On top of the boards we fix high-grade felt, then strip with narrow battens, just as shown in the illustration, this gives a finished appearance and makes the shed able to withstand all weathers. Over both gable ends attractive ornamental timbers are inserted. There is nothing left for the purchaser to do on arrival except fix up the shed, and this should not occupy more than a couple of hours for any handy man to make perfect. All the sheds are quite easy to erect and everything is provided.

**DOOR AND WINDOW DETAILS.** A strongly battened door complete with lock and key to open inwards is included. The window is properly morticed and tenoned together, supplied with 21 oz. glass cut to size, and the top portion of the window frame opens inwards for ventilation. Size of window frame: length 37 ins., width 32 ins., overall dimensions. Size of glass bottom pane, 18 ins. by 14 ins.; top pane, 9 ins. by 12 ins. This office is a very fine structure indeed, plain but good throughout.

**THE DOUBLE-STRENGTH FLOOR IS VERY GOOD.** The double-strength floor is sold as an extra, because certain clients may

### DESIGN JB.

For PRICES  
SEE LIST  
ENCLOSED.

prefer to have concrete floors. You could not wish for a more substantial wooden floor than Sutcliffes' send with this house; this is how it is made:—Very heavy battens are laid down, then lin. specially-prepared floor boards are nailed to the battens, the office standing on top of the floor. There can be no doubt regarding the extra benefits of such a floor, it ensures perfect dryness in all weathers, and is very cheap at the price listed.

**ONE INCH WEATHER BOARDS 15 PER CENT. EXTRA.** If great strength is essential, we offer to build sides and ends on lin. ornamental weather boards for 15 per cent. extra. The extra cost for inside lining will be given on receipt of particulars.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**ALL BUILT IN EASY-FITTING SECTIONS.** When you get one of Sutcliffes' portable buildings you will find that all the sections fit together quite easily, there is no trouble to erect, and no skilled labour is required. All bolts, glass, etc., are provided free, and you will find it a real pleasure to construct one of these small buildings.

**IT IS VERY CHEAP INDEED AND MOST USEFUL.** A building of this kind will be greatly appreciated by a huge number of readers, quite apart from an office standpoint. It would be fine for the allotment or vegetable garden; look what tools and other lines you can store away. It would do for storing household goods not often required, or it can be employed as a playroom for the children in bad weather. You will always find many uses for such a building.

## Sutcliffes' Moveable Contractor's Store Hut, on 1-in Boards and massive 18-in. Iron Wheels.

No. 2...	8ft.	7ft.	6½ft.	8½ft.
No. 3...	8ft.	8ft.	6½ft.	8½ft.
		Floor included.		

Carriage Paid to nearest Station England and Wales.

**CONSTRUCTION OF THE FOUR WALLS.**—These are all built on 1in. planed, tongued and grooved boards, securely fixed to heavy inside framing, all nicely planed. It would have been cheaper to build the walls on ¾in. boards, but for a contractor's store-room that has to be frequently moved, increased strength is desirable, hence this very robust construction.

**THE ROOF IS BOARDED AND FELTED.**—The roof is built on ¾in. boards. All selected quality planed, tongued and grooved, then covered with "Ruberoid" or similar felt, and afterwards stripped with narrow battens just as illustrated. This is an ideal form of construction, and ensures a perfectly dry building.

**DOOR AND WINDOW.**—The door is fixed on the right hand of the window in the front end as illustrated, and is complete with lock and key. The window frame is morticed and tenoned together; the glass is cut to size ready for insertion on arrival. In addition we include a special moveable closing shutter which can be easily adjusted.

### DESIGN OS.

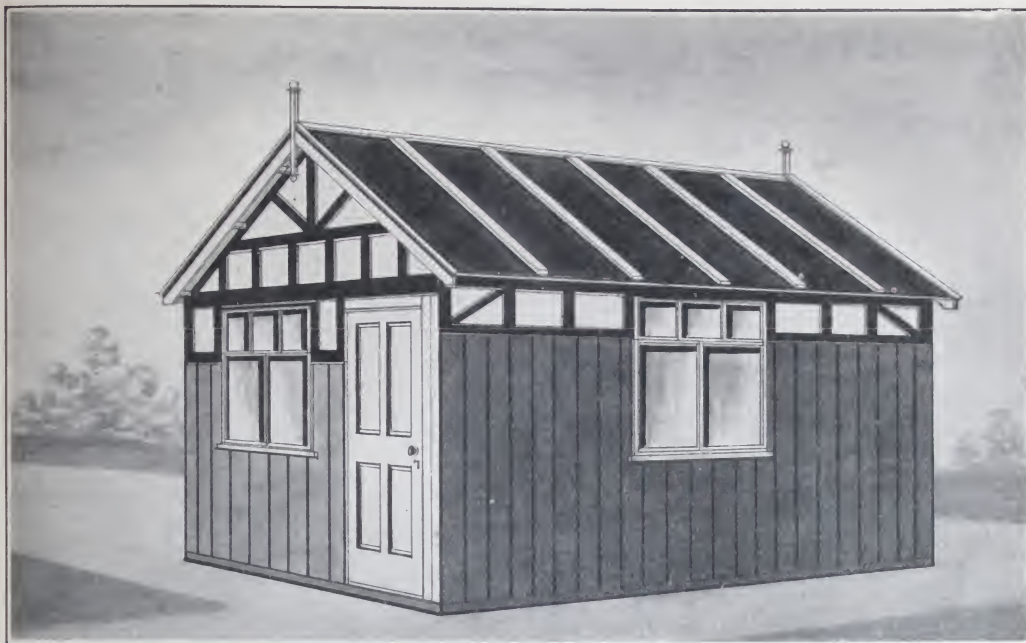

For PRICES  
SEE LIST  
ENCLOSED.

**THE FLOOR AND WHEELS.**—The floor is built on 1in. planed, tongued and grooved boards, nailed to heavy floor joists, while the 18in. cast-iron wheels are bolted to heavy axes, making the hut easy to move about bodily.

**SECTIONALLY BUILT AND CARRIAGE PAID.**—This hut is sectionally built. All sections are built complete at the works before despatch and marked for easy erection. All bolts, etc., are provided free, and we pay carriage to any station in England and Wales.

**IT IS EXTRA HEAVILY BUILT, BUT REASONABLE IN PRICE.**—Yes, you can quite easily obtain a lower priced building. But will it give the same long wear and satisfactory service? Will it carry heavy weight? No! Unless you pay a fair price you cannot get a good hut; and in this design Sutcliffe's have given to all buyers the last ounce in real solid value. No ornamentation, but everything plain, yet remarkably strong and durable. Don't run the slightest risk, deal with a firm with a country-wide reputation, then you are perfectly safe.

## Sutcliffes' Estate Office, Contractor's or Coal Office.

	Length.	Width.	Height Eaves.	Height Ridge.

2—	10ft.	9ft.	7ft.	9ft.
3—	12ft.	10ft.	8ft.	10ft.
4—	15ft.	12ft.	8ft.	11ft.
5—	20ft.	10ft.	8ft.	10ft.

Carriage Paid to nearest Station England and Wales.

**FOUR STRONG SIDES.** The four walls of Sutcliffes' estate office are built on  $\frac{3}{4}$ in. planed, tongued and grooved boards of very fine quality, the framing is fixed inside so that there is nothing to rot with exposure, while the thickness of framing is 2in. by 2in. and 3in. by 2in., according to size of office.

**A VERY NICE ROOF.** It is essential to have a perfectly dry roof in any building used as an office, and Sutcliffes' have watched this point most carefully; the roof is constructed on  $\frac{3}{4}$ in. planed boards, all tongued and grooved, and over the boards we fix the very best Ruberoid or similar felt, then on top nice battens at frequent intervals; you could not wish for a better roof.

**RED ASBESTOS TILES FOR THE ROOF.** These can be supplied, prices see list.

**WOOD EAVES TROUGHS.** Can be supplied at sixpence per lineal foot, carriage paid.

**WINDOWS, DOORS, AND ORNAMENTAL TIMBERS.** The illustration shows how very smart the four-panelled door and windows look on this portable room; the windows open at the top for giving light and ventilation, the door is hung on best hinges complete with lock and key, etc., and the ornamental timbers over the front and along the sides give a most pleasing effect at a very moderate cost.

**SIZES OF WINDOW FRAMES.** Length, 37in., width, 32ins., overall dimensions. Sizes of glass, bottom panes, 18ins. by 14ins.; top panes, 12ins. by 12ins.

### DESIGN T.

For PRICES  
SEE LIST  
ENCLOSED.

**INSIDE LINING.** We can line the sides to caves and ends to ridge with  $\frac{3}{4}$ in. planed, tongued and grooved boards the extra cost see list.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $7\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**A WONDERFUL FLOOR.** If you have an office planted out in the open subject to all weather conditions then you must have a good floor constructed on extra heavy battens with  $\frac{3}{4}$ in. tongued and grooved one and the floor plays an important part. Sutcliffes' office has the boards nailed on the top, this raises the office 4in. from the ground, ensuring perfect dryness. It is worth twice as much as the ordinary type of floor.

**MADE IN EASY-FITTING SECTIONS.** All Sutcliffes' offices are built in sections and are tenant's fixtures, easily erected and taken down as required, all bolts, etc., are provided. The floors and roofs, etc., are all properly built up, no loose boards, as sent by some firms, which means the sections have to be constructed on arrival at very great additional cost in labour. Two handy men will erect one of these offices in four hours after arrival.

**SOMETHING SPECIAL HERE.** This design of office has been given to give clients a fair idea of what is generally required; but we are always prepared to make alterations to suit the wishes of our clients. Let Sutcliffes' know your wants and send a rough sketch and we will give you every assistance in providing what you require.

## Sutcliffes' Allotment Hut, Earth Closet, or Tool House.

	Length	Width	Height Front	Height Back	Floor Extra
1—	3ft.	4½ft.	7ft.	6ft.	
2—	5ft.	4½ft.	7ft.	6ft.	
3—	6ft.	5ft.	7ft.	6ft.	
4—	7ft.	6ft.	7ft.	6ft.	
5—	9ft.	7ft.	7ft.	6ft.	

Carriage Paid to nearest Station England and Wales.

**CONSTRUCTION OF OUTSIDE WALLS.**—These are all built of the finest quality tongued and grooved ½in. matchboards, actual finish ¾in., this means great strength, while in all cases the framing is most substantial, far heavier than nine out of ten firms send out. You cannot beat Sutcliffes' goods, and if you buy a cheap flimsy built shed you will always regret the step. The roof is built of the same high-grade boards as the outer walls, and is also covered with felt, not common low-priced felt, but real Ruberoid or something similar—this means perfect dryness in all weathers.

**ALWAYS BUILT IN SECTIONS EASILY ERECTED.**—Sutcliffes' build all their sheds in handy sections, easily erected by unskilled labour, all glass and bolts provided; this means if ever you wish to move or sell these huts, they are worth far more money than huts that are simply nailed together.

**THE FRONT HAS A DOOR.**—This is strongly made, firmly braced at the back, and is fixed on heavy T hinges, complete with press lock and key; a space is left at the top just a few inches, to give a little ventilation in hot weather. We have purposely kept the design very simple, in order to offer a strongly-made hut at a price in many cases far below local cost.

**THE RIGHT END SECTION** has a nice window; in the larger sizes a set of three windows is provided. Although low in price, this hut is of handsome design, and is always most useful for gardeners,

### DESIGN BO.

For PRICES  
SEE LIST  
ENCLOSED.

contractors, etc., and is also a really fine room for storage purposes, especially in these days of limited housing accommodation, and being tenant's fixtures can be moved without the slightest difficulty.

**THE FLOOR AN EXTRA CHARGE.**—Most clients will prefer to have a really sound wood floor, but in case clients do not wish this, we have fixed the floor as an extra charge. Just study how this floor is made, and you will see how good it is: first we lay down extra heavy rafters, then nail one inch prepared floor boards, and the hut stands on top, the floor is always bone dry, and is very cheap at the price quoted.

**FRAMEWORK.**—Planed on all sides to greatly improve inside appearance.

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of 7½ per cent. only. Purchasers can then finish off in any desired colour after erection.

**A CHEAPER MODEL SUPPLIED.** This design is also made on ½in. boards with a ½in. floor. For prices, see list.

**MASS PRODUCTION MEANS LESS PRICES.**—All these huts are built on mass production lines, and you are certain of a high-class job at a price so low you will wonder how it is done; and most important, Sutcliffes' pay carriage right to your station.

# Sutcliffes' Ornamental Dove or Pigeon Cote

## ON POLE.

**Strong, Beautiful Design, Striking Appearance in any position.**

Sutcliffes' illustrate a very finely-built and strikingly handsome Dove Cote or Pigeon Cote, it will give the fullest satisfaction, and cannot be surpassed in value.

**YOUR GROUNDS WILL BE IMPROVED.** If you have a nice garden, or a small lawn near the house, you could not introduce anything that will give a more artistic finish to the immediate surroundings than one of Sutcliffes' Dove Cotes. To see the pigeons making their home, nesting and bringing up their young in the full view of the house, will give delight to all members of the family. We give you an opportunity of improving your grounds at little expense.

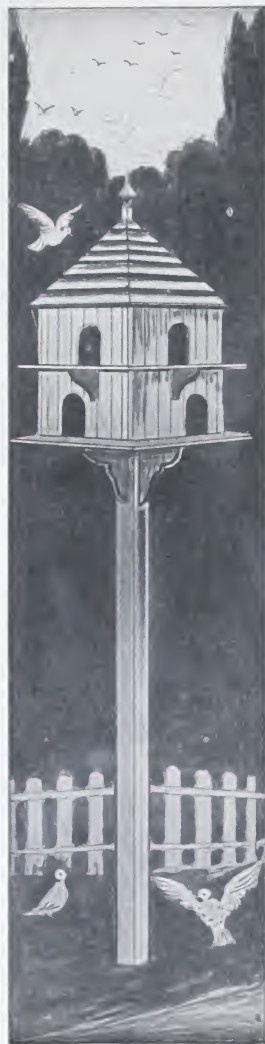

**GENERAL SPECIFICATION.** This Dove Cote is built on really fine quality planed, tongued and grooved boards, with framing fixed inside and of ample strength, and finished with nicely-shaped finials at the top. The Design BK has accommodation for six pairs of birds. Proper nesting room is provided, and the necessary alighting boards. There is not a single weak part, every corner will bear the most careful investigation, and all who have seen them pronounce them most excellent value.

**EASY CLEANING ARRANGEMENTS.** The entire front can be removed by simply turning two buttons. This enables the interior to be easily cleaned as occasion demands.

**THE POLE IS 11 FEET LONG.** This enables the pole to be sunk well into the ground and still leave ample height. The pole is movable and can be easily fitted or removed from the actual dove cote.

**NICELY PAINTED AND CARRIAGE PAID.** All these Dove Cotes are nicely painted, and the pole is creosoted to prevent rot. With ordinary care these Dove Cotes will keep in good condition for many years, and are sold on Sutcliffes' well-known money back guarantee.

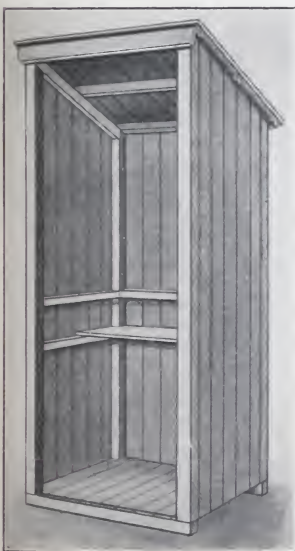

PRICE—DESIGN BK—For Six Pair (including 11ft. Pole)... .. £3 15 0  
Carriage Paid to nearest Station England and Wales.

**Design BK.**

# Sutcliffes' Watchman's Hut

## Strongly Built and Low Price.

**Design BG.**

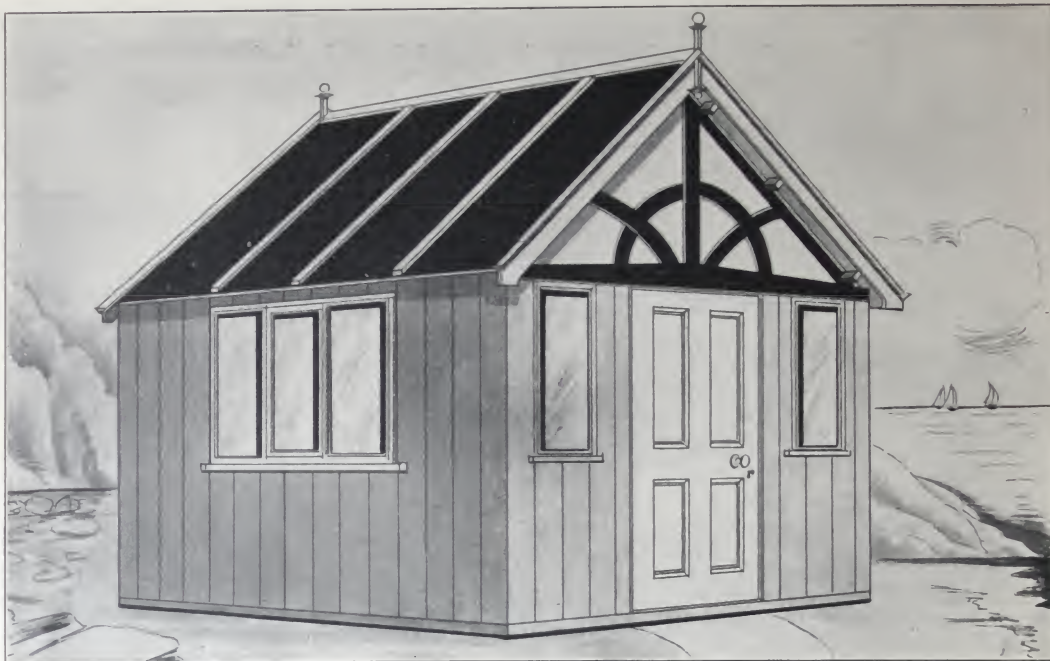

**GENERAL SPECIFICATION.** The outer walls are built on selected 7in. planed, tongued and grooved boards, nailed to substantial planed framework; the roof is built on 7in. boards, then covered with high-grade roofing felt, and stripped with narrow battens; the floor is built on 1in. planed, tongued and grooved floor boards and strong floor joists, at a convenient height inside we include a seat approximately 12in. wide. This robust specification ensures a really high-grade hut that will give sound service over a long period.

**CONVERTABLE INTO EARTH CLOSET, 25/- EXTRA.** With this design we can provide a door with lock and key, also shaped seat and pail forming an outside earth closet, which will be very suitable for contractors, etc. The extra cost is only 25/-.

**WE DELIVER CARRIAGE PAID TO YOUR STATION.** All Sutcliffes' Watchman's Huts are sent out in complete easy-fitting sections, provided with all bolts, and fittings ready for erection in less than one hour. We are convinced all who purchase these huts will be astonished at the value given.

4—	9ft.	9ft.	7ft.	9ft.

Carriage Paid to nearest Station England and Wales.

**SPECIAL CONSTRUCTION DETAILS.** Sutcliffe's beach huts have been designed to look well and wear well. They are built very strong, the sides and ends on  $\frac{1}{2}$  in. tongued and grooved boarding over heavy inside planed framework. All the timber is carefully selected and the workmanship of a high standard.

**PRETTY ROOF PERFECTLY RAINPROOF.** Sutcliffe's make the roofs of these beach huts on very substantial lines.  $\frac{1}{2}$  in. planed tongued and grooved boards are nailed to sound planed framing of great strength. On top of the boards we fix Kuberod or similar quality felt and afterwards stripped with narrow battens. You will see from the illustration the roof is finished off with barge boards and finials and both gable ends stand out to improve appearance.

**ORNAMENTAL TIMBER WORK.** Both gable ends are finished with ornamental timbers, and when this beach hut is painted in suitable colours the building looks very pretty indeed.

**A DOUBLE STRENGTH FLOOR.** These beach huts are all provided with extra strong floors, built on  $\frac{1}{2}$  in. tongued and grooved boards and substantial floor joists. The floor will be absolutely bone dry in all weathers and is very strongly built throughout.

**MADE IN EASY-FITTING SECTIONS.** All Sutcliffe's beach huts are built in easy-fitting sections. All necessary bolts and ironwork are provided, and you will have no trouble whatever to erect with unskilled labour.

### DESIGN NW.

**For PRICES  
SEE LIST  
ENCLOSED.**

**FOUR-PANELLED DOOR AND CASEMENT WINDOWS.** This beach hut is extremely well lighted. We include one large opening casement window up each side and there is also a fixed window on each side of the door. These windows are provided with 21oz. glass cut to size ready for fixing on arrival. The four-panelled door is complete with lock and key and all necessary furniture.

**ORNAMENTAL MOULDED WEATHER BOARDS.** Where exceptional strength is required we can build the walls on  $\frac{1}{2}$  in. ornamental moulded weather boarding. This is a very great improvement and the additional cost is only 15 per cent.

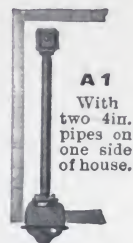

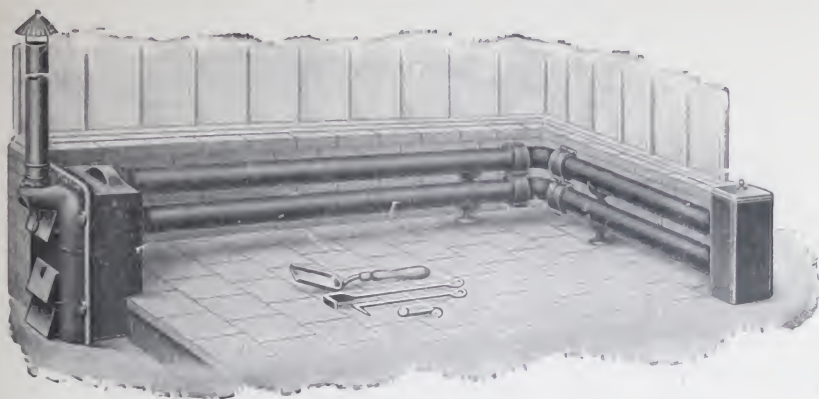

**OUTSIDE DECORATION.** We recommend this design to be painted one coat grey priming paint before despatch at an extra cost of  $7\frac{1}{2}$  per cent. only. Purchasers can then finish off in any desired colour after erection.

**INTERIOR LINING.** The interior of this building can be lined with  $\frac{1}{2}$  in. tongued and grooved boards where desired. Extra cost as per list enclosed.

**CARRIAGE PAID TO NEAREST GOODS STATION.** We pay carriage on this beach hut right to your nearest goods station in England or Wales, so that you know the exact cost.

**SPECIAL REMARKS.** It has become increasingly popular to have movable beach huts at various seaside resorts. They can be put to so many uses that we are quite certain that all who take a few weeks' holiday at a quiet resort will find one of these beach huts of inestimable value.

**GOOD HEATING APPARATUS IS ESSENTIAL.** The "Compleet" is an ideal apparatus for heating the greenhouse, the boiler being inserted in the wall of the structure, thus allowing the heating surface to be utilised within the house, the smoke pipe and stoking doors project on the outside, thus avoiding all risk of fire or fumes inside the house. You must have one of Sutcliffes' "Compleet" heating apparatus installed if you want real good reliable heating arrangement, one that will give you no further trouble and so simple to operate that a child can manage them. You will be surprised at the results, you will be able to grow almost anything all the year round and leave for a day with every confidence; a Sutcliffes' boiler will never let you down.

**THERE ARE MANY ADVANTAGES IN THE CONSTRUCTION.** The arched top ensures the crown being covered with water at all times; there is ample fuel space, allowing fire to be banked up for eight to twelve hours, according to size of boiler; the fire pot is designed for economical and slow combustion. All boilers are supplied with 1/2 in. hole for periodical flushing of pipes; can be fixed by any amateur and are tenant's fixtures.

**ALL BOILERS ARE THOROUGHLY TESTED.** Before leaving the works all boilers undergo a very severe test under hydraulic pressure and are offered with every confidence for the purpose specified.

**A FEW OF THE SPECIAL FEATURES.** The "Compleet" surpasses in efficiency and strength anything previously offered; it is scientifically designed, smart in appearance, economical in fuel consumption, and can be relied upon for thoroughly efficient working at all times.

**A VERY GENEROUS SPECIFICATION.** The "Compleet" apparatus consists of "Compleet" boiler, smoke nozzle and damper 4in. pipes, elbows, joints, stands, expansion box or supply cistern, brass emptying tap, steel shovel, rake, teaser and spanner for fixing. With the numbers 1 and 2 boilers we supply three yards of smoke pipe 4 1/4 in. diameter, complete with cap and stay, with numbers 3 and 4 we supply 5in. smoke pipe complete with cap and stay; these sets are estimated to include pipes of sufficient lengths for standard houses of the outside measurements given, but detailed quotations can be given on receipt of rough sketch and exact inside measurements.

## Sutcliffe's Span Roof Greenhouse to fit on Low Brick Wall.

**A VERY BEAUTIFUL GREENHOUSE.** For those who want something extra good and are prepared to go to the necessary expense. Sutcliffe's offer this house with confidence. The client prepares the brick walls for siles and ends, and Sutcliffe's supply the greenhouse to fit on top. It is, without doubt, the best way of building these structures, but is not always possible for all garden lovers. This design has been constructed of extra heavy materials, along with the best framing, and the bars and sashes are all of great strength, and consequently give many years' service. It is quite possible to get a lower-priced greenhouse, but only by sacrificing quality. You will be on safe lines if you buy from Sutcliffe's, they know the huge number of disappointed buyers who have tried the low-priced goods, but when you deal with Sutcliffe's the money-back guarantee takes away all the risk.

**21oz. GLASS CUT TO REQUIRED SIZE.** A well-built greenhouse must be provided with suitable glass, and though you may not know it, there are many kinds of greenhouse glass. 16oz. is commonly used, but never by Sutcliffe's. You must have the glass at least 21oz. if you wish the house to be a success. The glass will be cut to sizes ready for fixing, with unskilled labour, on arrival.

**PLENTY OF VENTILATION—EASILY REGULATED.** You want your plants to prosper, grow better, and prove more profitable

### DESIGN RS.

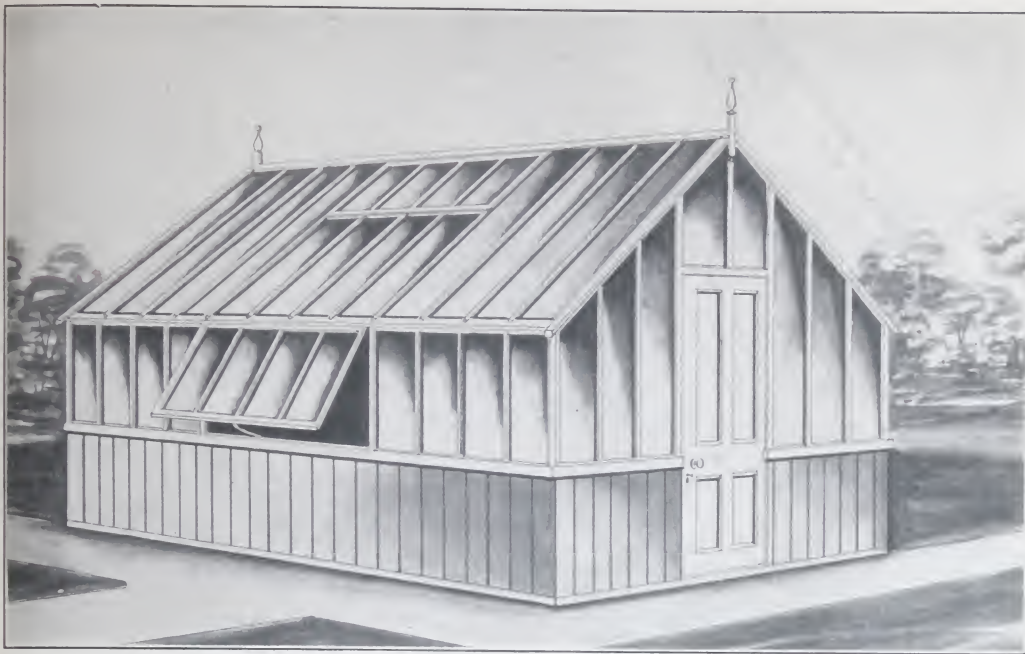

**SOLD on our  
Well-Known -  
GUARANTEE.**

than any have done before. One of Sutcliffe's greenhouses will do this for you—not just one season, but every season. They are good greenhouses, every part will bear examination, and the ventilating arrangements are the finest obtainable. All plants must have a certain amount of pure fresh air to thrive and reach perfection in the shortest time, and a Sutcliffe greenhouse will not fail you. Don't go in for a low-priced article. You cannot get a strong building unless you pay a fair price, and don't forget the money back guarantee.

**BUILT IN SECTIONS.—STAGING UP EACH SIDE.** Sutcliffe's build all their greenhouses in sections, easily fitted together by unskilled labour. You will be astonished when the parts arrive, all of them just perfectly true in design. Now soon you have fixed up this fine structure, and when the work is done, you will wonder how such a building, so strong and durable, full of quality all through, can be sold at Sutcliffe's prices. Lattice staging, strong and nicely finished, is supplied to fit down both sides, and proves a very great convenience. All greenhouses are painted one coat, and add charm to any garden.

**DELIVERED CARRIAGE PAID.** These greenhouses are delivered carriage paid to your nearest station. Everything is provided ready for you to fix up quickly, and to your entire satisfaction. It does not matter which greenhouse you buy, whether it be large or small, it comes to you on a full guarantee of complete satisfaction or money back. No deal is considered complete until the customer is satisfied. You will see many greenhouses advertised, but not with a guarantee like this. It is in your interest to select the right firm.

## Sutcliffes' Span Roof Greenhouse Tenant's Fixture.

**DETAILS OF CONSTRUCTION.—EVERYTHING SOLID.** Sutcliffes' have here produced a beautiful greenhouse of the finest materials, built to give fifteen or more years' excellent service, and offered at a price no firm can beat. All Sutcliffes' greenhouses are built of simple design, but every convenience has been studied. You get a strong building at a very moderate price. The framing used is of high-grade quality and very substantial, the boards are lin. planed, tongued and grooved, the door is of the four-panel type with the top half in glass, and all the bars are of heavy construction.

**21oz. GLASS SUPPLIED CUT TO SIZE.** Sutcliffes' always use 21oz. glass, and you are guaranteed satisfaction.

**VENTILATION IN ONE SIDE AND ROOF.** All greenhouses must be properly ventilated in order that the plants and flowers can thrive satisfactorily one lifting roof light, also one opening side light is provided, and the larger sizes will have more ventilation given them. All the opening lights are provided with the necessary gear for opening and closing, the door fixed in front end is fixed on strong hinges complete with lock and key, and all necessary furniture.

**MADE IN EASY-FITTING SECTIONS.** Sutcliffes' make these greenhouses in easy-fitting sections. Clients will have no trouble to erect, all bolts, etc., are provided, and the entire greenhouse is painted one coat, just ready for fixing in the glass which is cut to the required size. We feel sure when you have studied our low prices that all garden lovers, if they do not possess a greenhouse, will be tempted to purchase, and always we guarantee satisfaction or money back, so you run no risk. It will pay you to deal with a firm of repute.

### DESIGN SB.

**SOLD on our  
Well-Known -  
GUARANTEE.**

**STAGING TO RUN ALONG BOTH SIDES SUPPLIED.** Sutcliffes' supply lattice staging to run along both sides of the greenhouse, this means the building is absolutely complete, and when you have fixed the glass, you are ready for installing the plants.

**SUTCLIFFES' PAY THE CARRIAGE.** Quite a large number of firms only put their goods on rail, the customer has to pay the carriage. Now carriage is a very heavy item, do not be landed with these heavy charges, make sure your goods are carriage paid to nearest station, then you know exact cost.

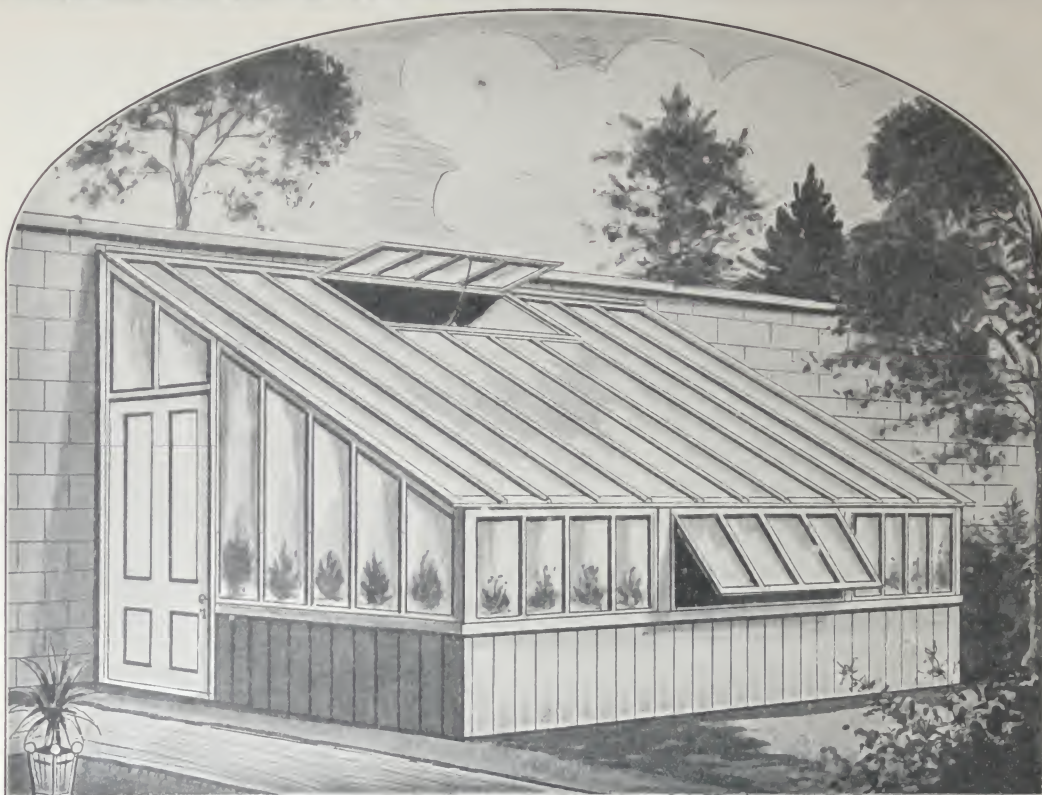

**SATISFACTION OR MONEY BACK.** Sutcliffes' sell on these lines. How many firms will do this for you? Is there another firm who can beat this guarantee, and, what is most important to you, it will be faithfully carried out.

### DESIGN S.B. GREENHOUSE. No. 2 SPECIFICATION.

	Length	Width	Height Eaves	Height Ridge	
No. 1	7ft.	5ft.	4ft.	7ft.	£8 15 0
No. 2	8ft.	5ft.	4ft.	7ft.	£10 0 0
No. 3	9ft.	6ft.	4ft.	7ft.	£11 5 0
No. 4	10ft.	7ft.	4ft.	7ft.	£14 7 6
No. 5	12ft.	8ft.	4ft.	8ft.	£17 10 0

Carriage Paid to nearest Station England and Wales.

Although our better class greenhouses ought certainly to be purchased wherever possible, we are now offering the design S.B.; not just as strongly built as the standard specification; this enables us to give all clients the benefit of very low prices.

## Sutcliffes' Lean-to Greenhouse to fit against a Brick Wall.

	Length.	Width.	Height Front.	Ventilators		Prices.
				Height Back.	Height in Side and Roof.	
1—	9ft.	6ft.	4ft.	2	7ft.	£14 0 0
2—	10ft.	7ft.	4ft.	2	7ft.	16 0 0
3—	12ft.	8ft.	4ft.	2	7ft.	19 0 0
4—	15ft.	9ft.	5ft.	8ft.	4	25 0 0
5—	20ft.	10ft.	5ft.	9ft.	4	34 0 0

Carriage Paid to nearest Station England and Wales.

**A VERY GENEROUS SPECIFICATION.** Many garden lovers are unable to fix span-roof greenhouses owing to shortage of room and must confine themselves to a lean-to erection fixed against an existing wall. Sutcliffes' lean-to greenhouse is heavy built; nothing flimsy, the framework is of massive lines, and always sufficient strength for the size of the house chosen; the bars are beautifully made and much heavier in construction than many sold to-day at more money. The bottom part, which is boarded, is covered with lin. planed, tongued and grooved boards on heavy inside framing. From top to bottom you are guaranteed a real quality greenhouse.

**DON'T RISK 15oz. GLASS IN YOUR GREENHOUSE.** 21oz glass is used in all our greenhouses, and is sent out in boxes properly packed, cut to sizes, and ready for fixing in with putty when you get the greenhouse erected.

**THE METHODS OF GIVING VENTILATION.** If you want your plants and flowers to thrive and give excellent results, the greenhouse must be nicely ventilated. In this lean-to building Sutcliffes' have arranged for one opening window in the roof, also one in the side, just as illustrated; the larger sizes can have more ventilation. These windows are all provided with opening and closing gear, and are easy to operate. If you purchase a greenhouse from Sutcliffes' it will cost a fair price only, less than from other makers giving similar quality, and it will give years and years of satisfaction.

### DESIGN S.J.

**SOLD on our  
Well-Known -  
GUARANTEE.**

**MADE IN SECTIONS EASILY ERECTED.** Sutcliffes' greenhouses are built in sections easily erected, all bolts, etc., are included; the door is also fixed on heavy hinges, and has the top two panels of glass; staging is also included, so you are nothing short and, in addition, the entire greenhouse is painted one coat of best priming paint. You will only need to fix in the glass on arrival.

**CARRIAGE PAID TO YOUR STATION.** Bulky goods like greenhouses cost a lot of money in carriage, but Sutcliffes' pay this. You know the exact cost, and you can post your order with the utmost confidence. If you are in the least dissatisfied, Sutcliffes' will take the greenhouse back and return your money.

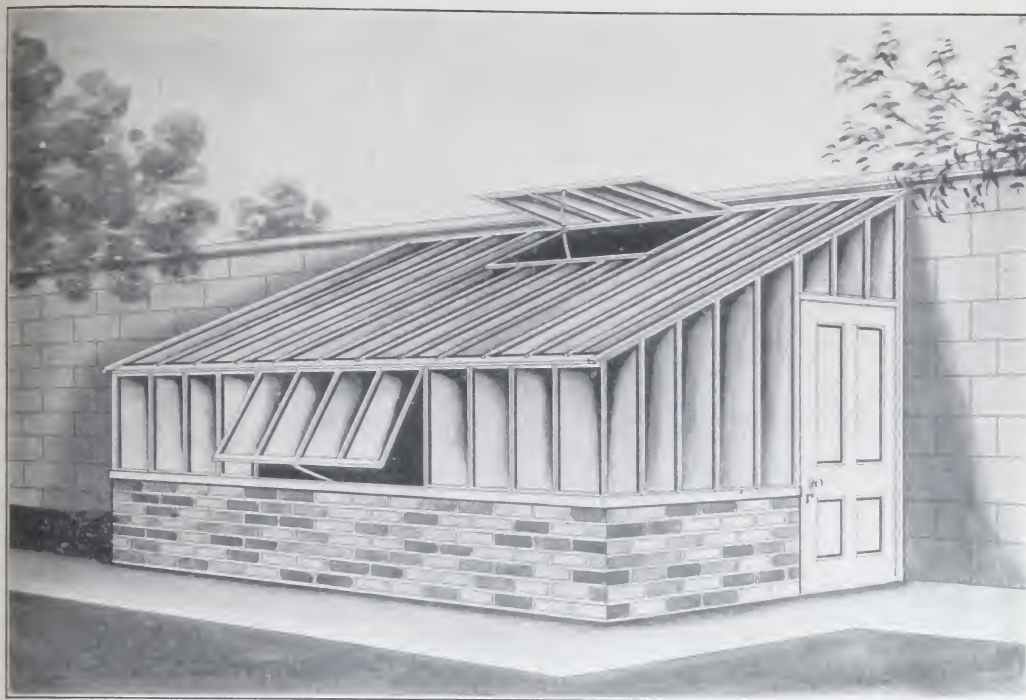

#### DESIGN S.J. No. 2 SPECIFICATION.

	Length	Width	Height		Prices
			Front	Back	
No. 1	7ft.	5ft.	4ft.	7ft.	£7 10 0
No. 2	8ft.	5ft.	4ft.	7ft.	8 15 0
No. 3	9ft.	6ft.	4ft.	7ft.	10 0 0
No. 4	10ft.	7ft.	4ft.	7ft.	13 5 0
No. 5	12ft.	8ft.	4ft.	8ft.	18 5 0

Carriage Paid to nearest Station England and Wales.

Our high grade standard quality greenhouses are wonderful value and we cannot reduce the prices; but we offer the design S.J. No. 2 specification, which is not just as strongly built but is still very reliable at a big saving in cost.

## Sutcliffes' Lean-to Greenhouse,

With a Brick Base.

	Length	Width	Height		Prices.	
			Front	Back	£	s. d.
No. 1 ... ..	9ft.	6ft.	4½ft.	7ft.	14	10 0
No. 2 ... ..	10ft.	7ft.	4½ft.	7ft.	16	16 0

No. 5 ... ..	20ft.	10ft.	5½ft.	8ft.	33	15 0

Carriage Paid to nearest Station England and Wales.

**IMPORTANT CONSTRUCTION DETAILS.** Many amateur garden lovers prefer to have their greenhouses fixed on a brick base; this can be either 2½ft. or 3ft. in height, and on receipt of an order for this particular design we are prepared to supply proper plans, so that clients can construct their brick base and have all ready for the arrival of the greenhouse in sections. All Sutcliffes' structures are strongly built, nothing flimsy or cheap, no elaborate ornamentations to greatly enhance the price, but just high grade materials, first class workmanship and useful designs that are sure to appeal strongly to those who want something out of the ordinary at a price they can afford to pay. The bars are made from selected timber, all nicely framed and properly machined to take the necessary 21oz. glass, all cut to size and sent carriage paid. The general framework is very thick and when bolted together the entire structure is a solid piece of work bound to be admired. All staging included free of charge.

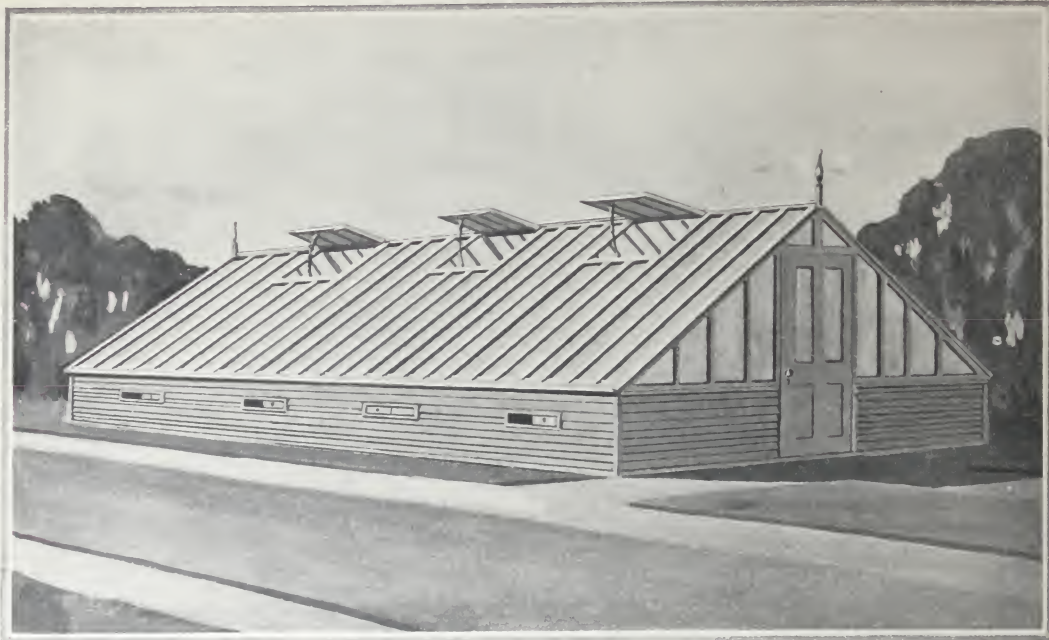

### DESIGN WF.

**SOLD on our  
Well-Known -  
GUARANTEE.**

**GOOD VENTILATION IS ESSENTIAL.** With all greenhouses a proper system of ventilation is essential for success. The roof and side lights are sent out complete with all opening and closing gear and everything possible is done to ensure the fullest satisfaction to all purchasers.

**MADE IN SECTIONS AND CARRIAGE PAID.** These greenhouses are all sectionally built, bored and erected at works before despatch. All bolts are supplied free and there is nothing to do on arrival but erect with unskilled labour and fix in the glass. We also pay carriage right to your nearest station, so that you know the exact cost; this is an item that must not be lost sight of when comparing prices.

**PAINTED ONE COAT.** This greenhouse is painted one coat of good paint before despatch and looks extremely well. So confident are we of giving the fullest satisfaction that all standard sizes are sent out on the fullest approval for cash with order. You are sure of a straight deal every time if you place your order with Sutcliffes'.

## Sutcliffes' Span Roof Forcing House.

A Remarkably Fine Moderate Priced House.

Supplied either for Brickwork or with a complete Timber Base.

These Prices are for Brickwork Base.

6 ...	100ft.	14ft.	136 0 0

Prices for Wood Base 20 per cent. extra on Brick Base prices.

**SPECIFICATION** 4in. by 2in. principal rafters, 4in. by 3in. wall plate if for brick base, 4in. by 3in. O.G. Moulded Gutter attached, 3in. by 1 1/2in. bars, 3in. by 3in. door posts, 3in. by 2in. raking rails with capping on.

**IT PAYS TO GET SOMETHING GOOD.** You can buy forcing houses at all prices, but you cannot buy a really good full value for money house at less than Sutcliffes' ask for this extra choice design. Every single part will stand the most careful scrutiny; the materials are selected with care, all timber is of super grade quality, thick and substantial, and each building will give you twenty years' wear in all weathers and under the worst climatic conditions.

**A GENERAL SPECIFICATION.** The timber portion at the base is built of lin. rebated and moulded weather boards, the framing is very strong throughout, the principal rafters are 4in. by 2in., the bars door-posts and raking rails are all of ample thickness to give strength where most needed. All the glass is clear 21oz. and cut to size and supplied free. Ventilators are included on both sides of the house, all complete with opening gear.

### DESIGN LA

**SOLD on our  
Well-Known -  
GUARANTEE.**

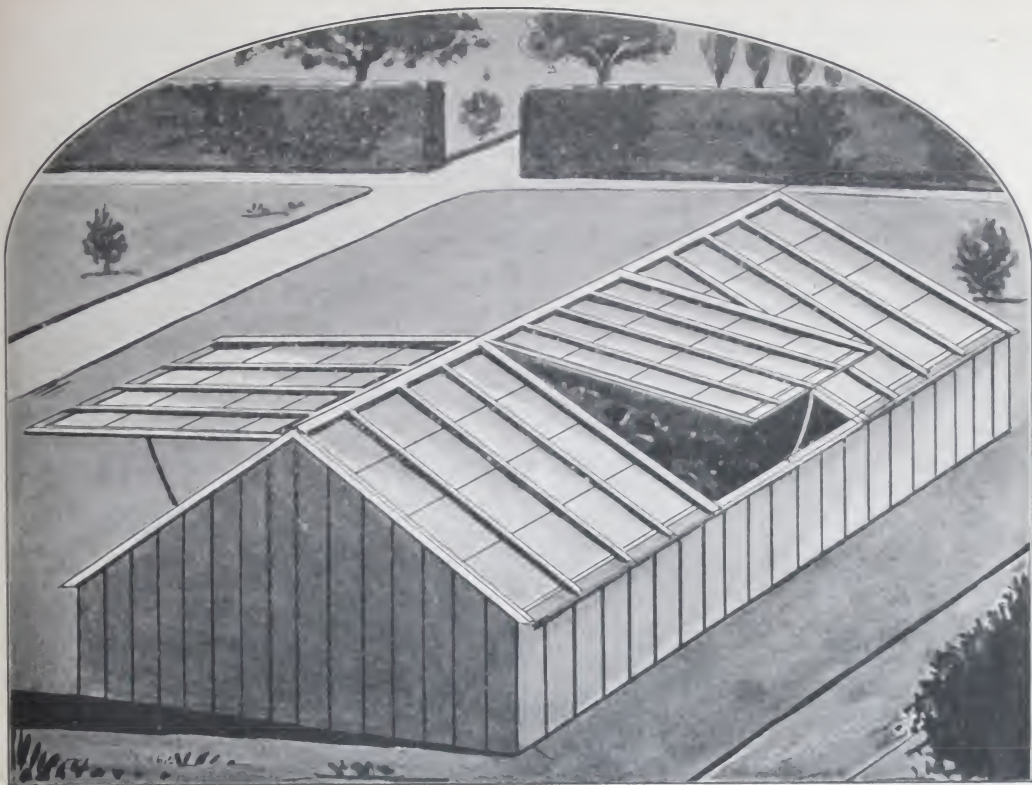

**PAINTED ONE COAT AND CARRIAGE PAID.** We paint this greenhouse one coat of best lead paint and deliver carriage paid to your nearest station. In all cases these forcing houses are properly fitted together before despatch to ensure a perfect fit, and the glass is cut to the necessary size. All that you will require is sufficient putty to fix in the glass on arrival.

**A BRICK BASE IF DESIRED.** Many clients desire to erect their forcing houses on a brick base, usually 2 1/2ft. high; when this is required we supply free a proper plan so that client can have the brickwork done locally and all in readiness for the arrival of the forcing house.

**A COMMERCIAL PROPOSITION.** Those who are in the market garden business are fully aware that unless their appliances are thoroughly up to date, of proper design and construction, no matter how much labour is put into the work they cannot hope for success, neither can they afford to pay a single penny more than is absolutely essential to obtain profitable houses. This is a frame that will produce successive crops both in and out of season, a building that should bring money back quickly to all who purchase. It is offered at a price market gardeners can afford to pay and know they will reap the fullest benefits from their investment.

**A GUARANTEE WORTH SOMETHING.** With all Sutcliffes' productions, from the smallest garden frame to a big conservatory, each client is guaranteed the fullest satisfaction; there is no beating about the bush. If for any reason you have a complaint to make Sutcliffes' will settle this claim in an honourable fashion; you will not go wrong if you place your orders with this well known Yorkshire firm.

## Sutcliffes' Span Roof Garden Frame and Plant Preserver.

No. of Lights	Length	Width	Height Eaves	Height Ridge	Price
2	8ft.	4ft.	1ft.	1ft. 10in.	£5 14 0

5	12ft.	6ft.	1ft.	1ft. 10in.	11 0 0

Carriage Paid to nearest Station England and Wales.

### DESIGN VB.

SOLD on our  
Well-Known -  
GUARANTEE.

**SOUNDLY BUILT RIGHT THROUGHOUT.** This garden frame is far more serviceable for cucumbers, melons, etc., than the lean-to pattern, it also makes an ideal home for protecting or rooting plants in autumn and winter, and is built on lines that have made Sutcliffes' goods famous throughout the length and breadth of the British Isles. The sides and ends are built on lin. planed, tongued and grooved boards of superior quality, the framing is fixed inside: nothing to rot away with exposure, and all the lights, no matter how large the size you order, are most easy to operate; the opening and closing gear is of the latest and most useful pattern. If you want a garden house of this design, one that will stand the closest investigation, inside and outside, then go to Sutcliffes'. There is no risk, because the conditions of sale remove all this. Until you are satisfied, until you admit you have got excellent value, the sale is not considered complete.

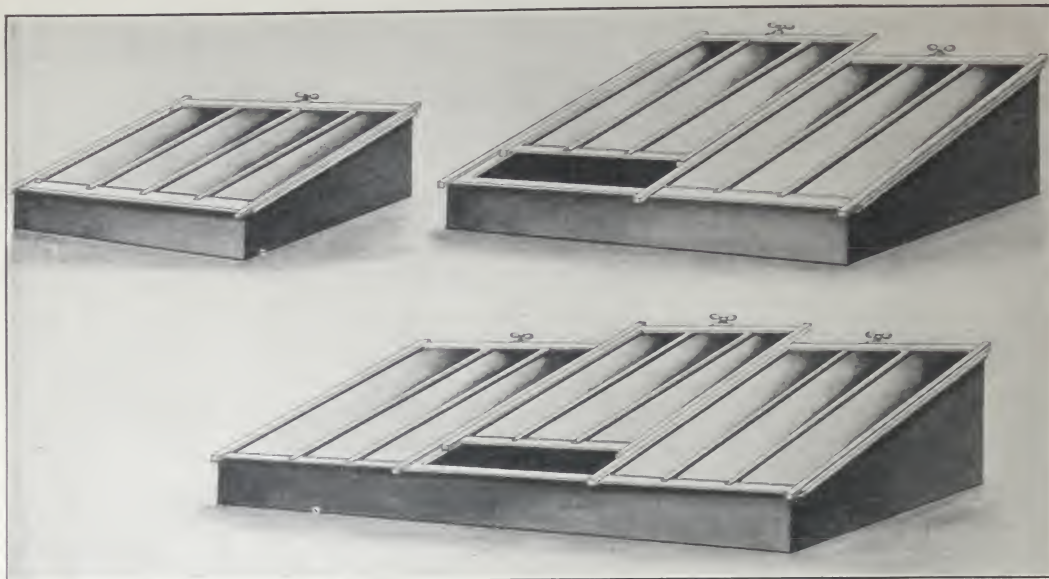

**GLASS IS NOT ALWAYS ALIKE.** As an amateur, you may not know that some makers use 15oz. glass in their frames. This is very thin, easily breaks, does not protect during frost, and is only used to save money. Sutcliffes' won't touch it. Every frame supplied by Sutcliffes' will have the finest quality 21oz. glass, all cut to sizes and carefully packed. There are many points to study in buying a garden frame besides the price.

**ABUNDANT VENTILATION AT ALL TIMES.** This plant preserver is designed to make all plants thrive from the moment they

are put in. There is no looking back, the lights are hinged and the opening and closing gear is easy to operate. In hot or cold weather it is an ideal, inexpensive, and most profitable appliance, worth considerably more than Sutcliffes' ask for it. You will get hundreds of hours keen enjoyment, and save many florists' bills if you get one of these plant preservers.

**LARGE SIZES BUILT IN SECTIONS.** Small sizes may be sent made up unless the carriage is too expensive. If you get one of these houses from Sutcliffes' all the parts will fit accurately, the latest machinery and skilled workers enables us to give perfect fitting, while mass production ensures low prices. If sent in sections, all bolts, etc., will be provided, and each frame will be liberally covered with two coats of best paint. You can easily find lower-priced goods, and many others costing fifty per cent. more, but you are guaranteed a strongly built, reliable, long-wearing frame, of good quality, and finish at a price no other firm can equal and give similar quality.

**CARRIAGE PAID TO YOUR STATION.** This is important. You know the exact cost, no heavy carriage bills to pay. Send along your order to Sutcliffes', it will be executed to your wishes and will bear the strictest examination on all points. You will not be afraid to show it to your friends. It will be an appliance you will be proud of. Write to Sutcliffes' to-day.

## Sutcliffes' Garden Frames.

**Strongly Built. Nicely Finished. All Lights made to Slide.**

Lights	Length	Width	Height Front	Height Back	Prices
1	8ft.	2ft.	15ins.	1ft. 6ins.	£1 2 6
1	6ft.	3ft.	11ins.	1ft. 6ins.	£1 15 0
2	8ft.	4ft.	11ins.	1ft. 6ins.	£3 0 0
3	12ft.	6ft.	11ins.	1ft. 6ins.	£6 5 0

Carriage Paid to nearest Station England and Wales.

**ESSENTIAL FOR EVERY GARDEN.** An extra heavily built, nicely finished garden or cucumber frame means increased production, more profit and far more satisfaction from your garden, but the frame must be really good in every nook and corner; it must be built to wear for years in all weathers: it must look well and be easy to operate, and the cost must be reasonable. You can get lower-priced frames than Sutcliffes', and you can easily pay considerably more for a frame not anywhere near as good, but for a really excellent, more than value for money frame, you will be compelled on merit alone to purchase from Sutcliffes'. Will you send along your order on satisfaction or money back terms?

**SPECIFICATION AND OTHER DETAILS.** Sutcliffes' garden frames are built on lin. planed, tongued and grooved boards of long wearing quality for both the sides and ends; not any thin low grade timber; always timber a little better than you would expect; the bars are extra strong, nicely finished off, and the glass is easily fitted. 21. oz. glass of the best make is always supplied and cut to size. The lights slide easily on specially built runners.

### DESIGN SO.

**SOLD on our  
Well-Known -  
GUARANTEE.**

**ONE, TWO OR THREE-LIGHT FRAMES.** It does not matter which you prefer you can depend on a quality article; the great weight of timber employed will surprise you. Each frame is made to fit solidly on the ground, and with ordinary care will rear young plants quite easily, and bring in the best results with the lowest labour costs.

**BUILT IN SECTIONS.** These frames are built in sections, complete with all bolts, etc., and any handy man can erect; no skilled labour is necessary. You will be able to pull down the frames and move them to a different part just as you wish, and what is important also, the frames are delivered carriage paid to your station. All essential work has been done before despatch to facilitate easy erection.

**A THING OF BEAUTY.** You ought to be proud of your garden, and if you introduce one of Sutcliffes' frames it will add an extra charm and give hundreds of hours real pleasure, with very little to spend in the way of repairs.

**BEFORE YOU PLACE AN ORDER.** Get to know all about the firm you are dealing with; make sure it is a firm of repute and one you can fully trust. Make sure that you will obtain the fullest satisfaction without paying a fancy price. When you have made enquiries we are confident on merit alone we shall get your orders.

# Sutcliffes' Unglazed Garden Lights.

Very Solid Construction.

Price 8/- each.

Length.	Width.	Each.	Six.	Doz.
5ft.	3ft.	£0 8 0	£2 5 0	£4 10 0
6ft.	4ft.	£0 9 0	£2 10 0	£5 0 0

Carriage paid, England and Wales, two lights and upwards.

**THESE GARDEN LIGHTS ARE MOST USEFUL.** All gardeners are keenly interested in appliances suitable for the garden, and are always on the look-out for something good and cheap. With this in view, we offer these garden lights ready for immediate glazing by amateurs, and made in handy sizes, at most reasonable prices. No glass provided.

**THE FRAMEWORK IS VERY THICK.** You will never find any flimsy goods turned out by Sutcliffes'—great strength is always an important feature. Unless you have garden lights built on substantial frames and selected timber, they will not give good service—you must have the finest materials, and the construction must be principally done by expert machinery and highly skilled labour. If you go to Sutcliffes' you are guaranteed satisfaction or money back every time.

**YOU CAN EXAMINE THESE LIGHTS** in your own home under any condition. Call in the opinion of your friends, and if you do not feel fully satisfied your money will come back in full when you return the lights to Hebden Bridge Station carriage paid. More than this no firm can offer.

**THESE LIGHTS ARE MADE IN TWO SIZES ONLY.** In order to cut the price to lowest limits we make these lights in big quantities and to standard sizes, so clients are asked whenever possible to keep to these sizes. We deliver two lights and upwards carriage paid. Extra carriage on one light, 1s. 6d.

**CLIENTS MUST ALWAYS STATE DESIGN WANTED WHEN SENDING ORDERS.**

DESIGN RK.

DESIGN BW.

## Sutcliffes' 'Beanco' Garden Rollers

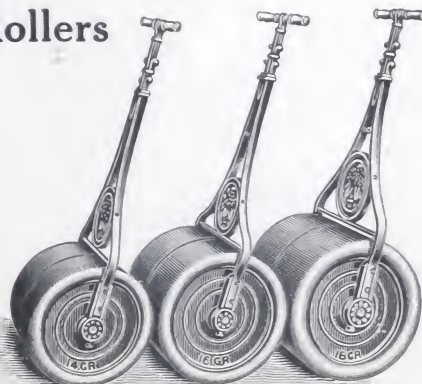

Extra well built, with rounded edges.

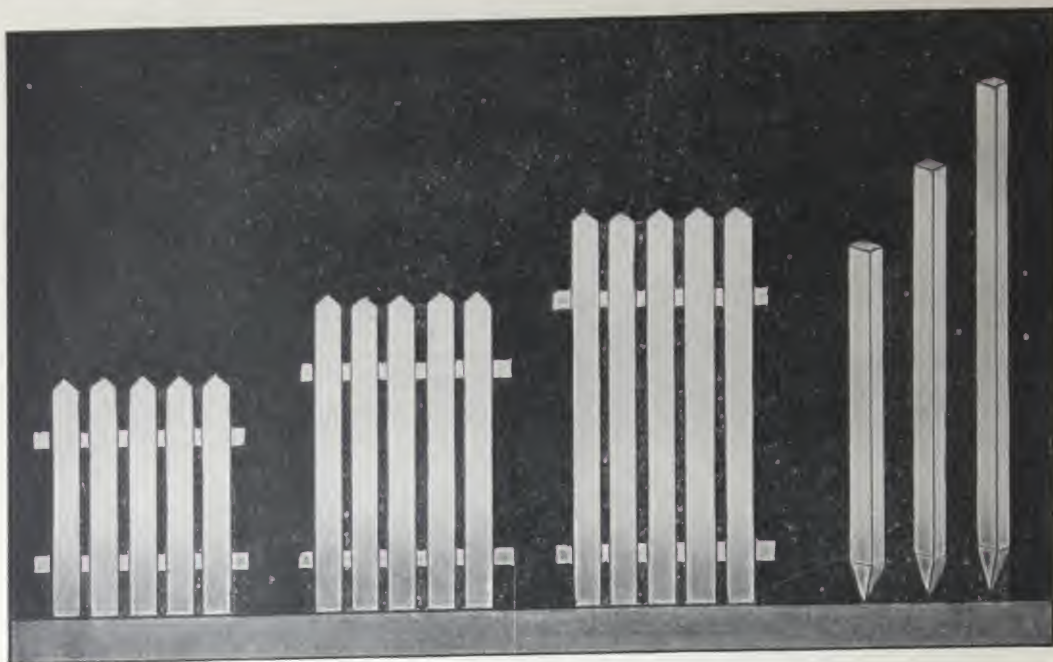

Sizes.	Approximate Weights.	Prices.
Width, dia.	cwts. qrs. lbs.	£ s. d.
16in. x 16in.	1 3 14	2 13 0
18in. x 18in.	2 1 0	3 4 0
20in. x 20in.	3 0 0	3 13 0
22in. x 22in.	3 2 0	4 5 0
24in. x 24in.	4 1 14	5 5 0

These rollers are built of cast-iron, nicely finished, and possess many advantages over other rollers costing more money. They are made in two parts, and are quite free in revolving on the axis, which affords greater facility for turning, and the outer edges are rounded off so that unsightly marks are avoided.

They are manufactured from the best of materials, bored true in the lathe, turned at inner edges, fitted on polished shafts, and are absolutely reliable in every detail, and sure to give great length of wear.

Delivered carriage paid to any Station in England and Wales, and sent out on a complete money back guarantee of satisfaction.

## Sutcliffes' Strong Fencing, in 9ft. lengths for Gardeners, Farmers, etc.

Prices from 10/- per length.

### PRICES OF FENCING IN 9-FT. LENGTHS.

Height	Per Section	Per Dozen Sections
3ft.	12 0	£7 0 0
4ft.	15 0	8 15 0
5ft.	17 6	10 0 0
6ft.	20 0	11 10 0

Carriage Paid on all orders for six sections upwards.

### PRICES OF FENCING STAKES, POINTED AND CRESCOTED AT BOTTOM.

Height	Per Dozen
4½ft.	11 6
5½ft.	14 6
6½ft.	17 6
7½ft.	20 0

Carriage Paid if ordered with other goods to £4 value.

**CONSTRUCTION DETAILS.** The horizontal framework for each section will be of ample strength, the vertical rails will be 4in. by 3in. boards, square-edged and pointed at the top, and spaced about 3in. apart. All the timber will be carefully selected and of really good quality—Sutcliffes' never use low-grade timber.

### DESIGN PG.

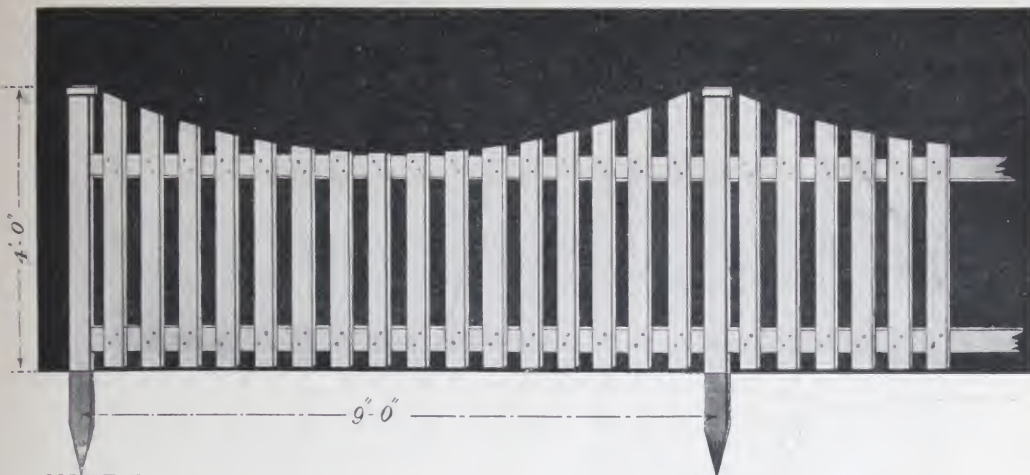

**THERE IS A GREAT NEED FOR GOOD FENCING.** Something strong, low-priced, easily erected, and if required, easily taken down. The illustration on this page gives you an excellent idea of how easy it is to fix up a fine, robust and attractive-looking fence at reasonable cost. Being made in sections, it is quite portable, and we also supply fencing stakes to drive down in the ground, say 18 inches, to form a solid base on which to nail the fencing sections.

**FENCING OF DIFFERENT HEIGHT.** It often happens that some clients want fencing of various heights, and in order to give a good selection, we build in 3ft., 4ft., 5ft., and 6ft. heights, but in all cases the fencing is in 9ft. lengths.

**FENCING STAKES CUT TO SIZE AND POINTED AT BOTTOM.** You will want some thick fencing stakes, nicely pointed to drive 18in. into the ground, on which to nail the lengths of fencing, these can be supplied in various lengths, but all from 4in. by 2in. unplanned timber, at very reasonable carriage-paid rates.

**SOLD on our Well-Known - GUARANTEE.**

## Sutcliffes' Strong and Ornamental Fencing

In 9ft. lengths, for Bungalows, Gardeners, Farmers, etc.

Prices of Fencing in 9ft. lengths.			Prices of Fencing Stakes.		
Height.	Per Section.	Per doz. Sections.	Height.	Thickness.	Per doz.
3ft.	12/-	7 0 0	4ft.	4in. x 2in.	11/6
4ft.	15/-	8 15 0	5ft.	4in. x 2in.	14/6
5ft.	17/6	10 0 0	6ft.	4in. x 2in.	17/6
6ft.	20/-	11 10 0	7ft.	4in. x 2in.	20/-

Carriage paid on all orders for six sections upwards.

Carriage paid with other goods to the value of £4.

If entirely treated with Brown Wood Preservative 10 per cent. extra.

**A RELIABLE AND ORNAMENTAL FENCE.** With the cost of brick walls so very high, and your bungalow or garden requiring a reliable and distinctive form of enclosing same, you could not do better than introduce the necessary number of lengths of the above type of fencing.

**OF A VERY SMART APPEARANCE.** It does not matter how many lengths you require, the effect is just the same—smart and pleasing to the eye—and is sure to be appreciated by all parties.

**OF STRONG CONSTRUCTION.** With each 9ft. section the 4in. "pales" are securely nailed to 4in. x 1in. framing, and all woodwork is of sound quality, and we offer this very high-grade and attractive fence at a very reasonable cost.

**FENCING STAKES CUT TO SIZE AND POINTED.** At an extra charge we offer very reliable stakes suitable for securing the fencing. These stakes are supplied at 4in. x 2in. thick, and well pointed for driving into the ground. These very reliable stakes are offered at distinctly reasonable carriage paid rates.

### DESIGN WA.

**SOLD on our Well-Known - GUARANTEE.**

**SUPPLIED IN SEVERAL HEIGHTS.** Although the 4ft. fence is the most popular size it sometimes happens that a fence not quite so high will do equally well, or, on the other hand, a much higher fence is required, and in endeavouring to meet the requirements of all parties we offer this distinctive fencing in 3ft., 4ft., 5ft. and 6ft. heights.

**A DELIGHTFUL STYLE OF FENCING.** Frequently fencing around gardens and houses is of commonplace design, and certainly not attractive. This new design, with the beautiful sweeping curve at the top, gives a distinctive finish without undue elaboration or heavy cost. It is a style of fencing that will stand rough wear, is easy to erect, and will give the fullest satisfaction to all purchasers. Sutcliffe's guarantee this fencing to be just as represented, and sell it on their well-known money back guarantee.

**VERY REASONABLE IN PRICE.** It is quite easy to obtain fencing considerably lower in price, but it is not of the same high-grade quality, will not look as well or wear anything like so long, and in the end will be really more expensive. If all the various points are taken into consideration, we are convinced you cannot obtain a really high-class fence below the price quoted on this page.

## Sutcliffes' Garden or General Purpose Barrows.

Design H236.

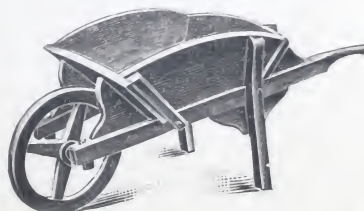

Price 38/6 carriage paid.

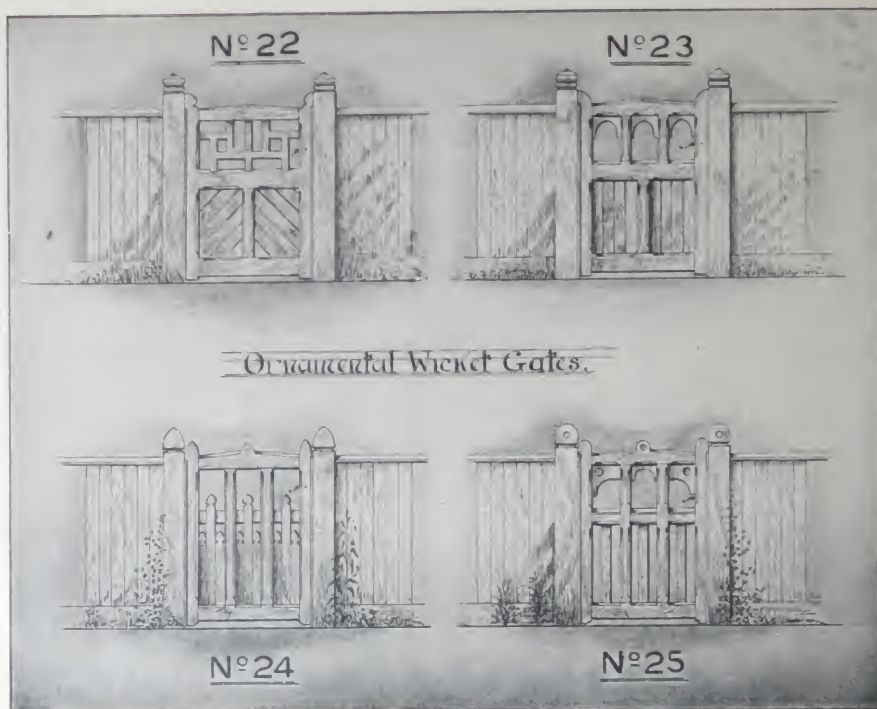

These barrows are really strong and substantially made from good hard wood, complete with wooden wheels with axle running in iron sockets.

All the barrows are of good size, nicely painted, and delivered carriage paid, and we are quite sure they will give the fullest satisfaction and prove exceptionally useful either for the farm, garden or allotment.

The price of these barrows, delivered to your nearest station, carriage paid, is 38/6 each.

All the barrows are sent out on the fullest approval for cash with order. You have first to be entirely satisfied before the deal is considered complete.

## Sutcliffes' Beautiful Ornamental Wicket Gates for Town and Country Residences,

## How to Order Wicket Gates.

It is essential to correctly define the swing of the gate when ordering. State clearly whether No. 1 or No. 2 illustration.

## Sutcliffes' Beautiful Entrance Gates, complete with all Fittings and Oak Posts.

There is scarcely a residence that cannot be improved with a pair of properly designed Entrance Gates. They give that touch of dignity and charm so often so entirely lacking, and where new residences are contemplated it will be difficult to improve on the design shown on this page. The Entrance Gates are of very solid construction and at reasonable price.

**SPECIFICATION DETAILS.** These Entrance Gates are 4 ft. 3 ins. high when hung, 10 feet opening and 3 inches thick. They are built from the finest selected English Oak or special quality Deal. The Oak\*Gates are varnished two coats and the Deal Gates painted three coats.

**ALL FITTINGS SUPPLIED.** We include two pairs of Double Strap Hinges of special design; Hooks, Malleable Latch, Fallbolt and Oak Stump.

**OAK POSTS FOR ABOVE GATES.** These are 9 feet long by 8 inches by 8 inches thick, nicely planed and prepared to illustration, and varnished two coats. Properly packed and Carriage Paid nearest station in England and Wales.

### PRICES OF DESIGN No. 46 ENTRANCE GATES AND POSTS.

In Oak, Varnished, £19/5/6. In Deal, painted 3 coats, £14/0/0.

Oak Posts for above, varnished, £6/0/0 per pair.

### PRICES OF No. 46A (NOT ILLUSTRATED).

These are exactly similar in design but for a 9 ft. 6 ins. opening and the Gates are 2½ ins thick, at the following reduced prices:—

In Oak, varnished, £16/2/6. In Deal, painted 3 coats, £12/8/6.

Oak Posts for above, 8½ ft. long by 7 ins by 7 ins., varnished, £4/18/6 per pair.

All sent Carriage Paid to nearest station in England and Wales.

## Sutcliffes' Low-Priced Entrance Gates, complete with Fittings and Posts.

### Design A.

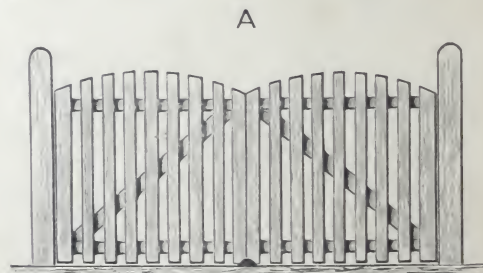

**DESIGN "A" ENTRANCE GATES.** These are made to suit both 7ft. and 8ft. wide, openings are 3ft. 6ins. high overall and 2ins. thick, nicely planed and sent out just ready for painting after arrival. They are made from selected English oak and best quality deal, and we guarantee the fullest satisfaction. These gates should prove a very great attraction as front entrances to garages, etc., and are extremely low in price.

**IRONWORK INCLUDED.** All gates are fitted with two pairs of 24in. perfect bands, cups, lift latch, fallbolt and oak stump at prices quoted.

**SOLID OAK POSTS FOR ABOVE ENTRANCE GATES.** These are 6ft. 6ins. long by 5ins. by 5ins. thick for the 7ft. wide gates, and 6ft. 6ins. long by 6ins. by 6ins. thick for the 8ft. wide gates, planed, topped, and carriage paid.

## WINTER SPORTS FOR THE KIDDIES.

## Sutcliffes' Strongly-Built Sledge, only 5/- Carriage Paid.

Length.	Width.	Height	Price.
21in.	12in.	from Ground. 4in.	£0 5 0

All sent carriage paid to nearest station.

**WHEN THE SNOW COMES.** You can give your kiddies a really good time at little expense with one of Sutcliffes' strongly built sledges, for tobogganning down fields and roads when the weather is suitable. They will obtain hours of delightful enjoyment at very little expense.

**SUITABLE FOR ALL BOYS AND GIRLS FROM 7 TO 16 YEARS OLD.** These sledges are so strongly built they should last over ten years, and are suitable for children of all ages and both sexes, and will give pleasure to adults also. At the low price offered, they are a remarkable bargain.

**SPECIFICATION IS VERY RELIABLE.** The sides are built on selected planed timbers, usually 3 x 1 1/4 in. thick, the seat on 1 in. planed, tongued and grooved boards; iron runners, rope handle for easy pulling up the hills.

# Sutcliffes' Earth Closet, complete with all Fittings.

Design OK.

Price £5.

Width.	Depth.	Height	Height
3ft.	4ft.	Back. 6ft.	Front 7ft.

Carriage Paid to nearest Station England and Wales.

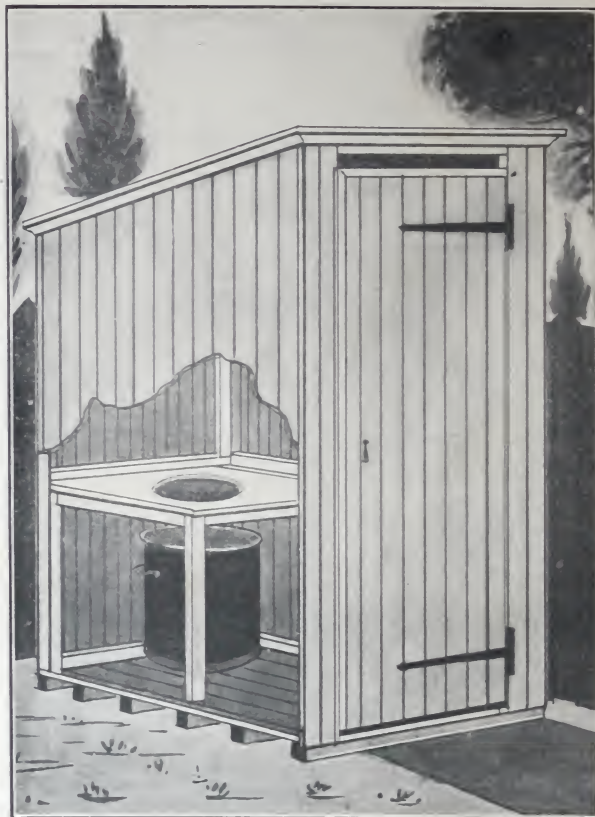

**STRONGLY BUILT, LOW PRICE.** This complete Earth Closet is something exceptionally useful in the country or for Sports Pavilions and Waterworks. It is quite complete, no extras are necessary, and is delivered in sections, carriage paid to any Station in England and Wales.

**COMPLETE SPECIFICATION.** The outer walls are built on 2in. planed, tongued and grooved boards of superior quality and well seasoned, the framing is nicely planed and of ample strength, the roof is built on similar boards, then covered with high grade felt and stripped with wide battens, the floor is built on 1in. planed, tongued and grooved boards, and extra thick floor joists. You will find each section will fit perfectly; it is a building that can be erected in one hour after receipt by unskilled labour. All bolts are supplied. If treated with wood preservative, 5 per cent. extra.

**ALL INTERIOR FITTINGS INCLUDED.** The interior has one well finished and nicely shaped seat, also a take-down shutter for the front, not shown in illustration. There is also a large capacity, heavily galvanised receptacle, easily moved and replaced. The entire structure is one that will be really difficult to beat and is offered at the most tempting figure.

**STRONG HINGES, LOCK AND KEY.** The door is fixed on strong hinges and is complete with lock and key. Where an outdoor convenience is required you could not do better than send to Sutcliffes' You are guaranteed the fullest satisfaction or money back, and if you will just study the size you will find it is of extra large dimensions to avoid the slightest sign of cramping so frequently noticed in buildings of this nature.

**EXCEPTIONAL VALUE.** We have endeavoured to give the fullest possible money value in this Earth Closet; value such as this is only possible because we buy timber in huge quantities, and have a factory equipped with all the latest labour saving machinery. We sell these goods direct from our factory to you and save intermediate profits. Remember Sutcliffes' money back guarantee safeguards you against loss and disappointment.

# The 'Elsan' Indoor Chemical Closet.

Price, £5/5/0.

Cash with Order.

Carriage Paid to nearest Station England and Wales

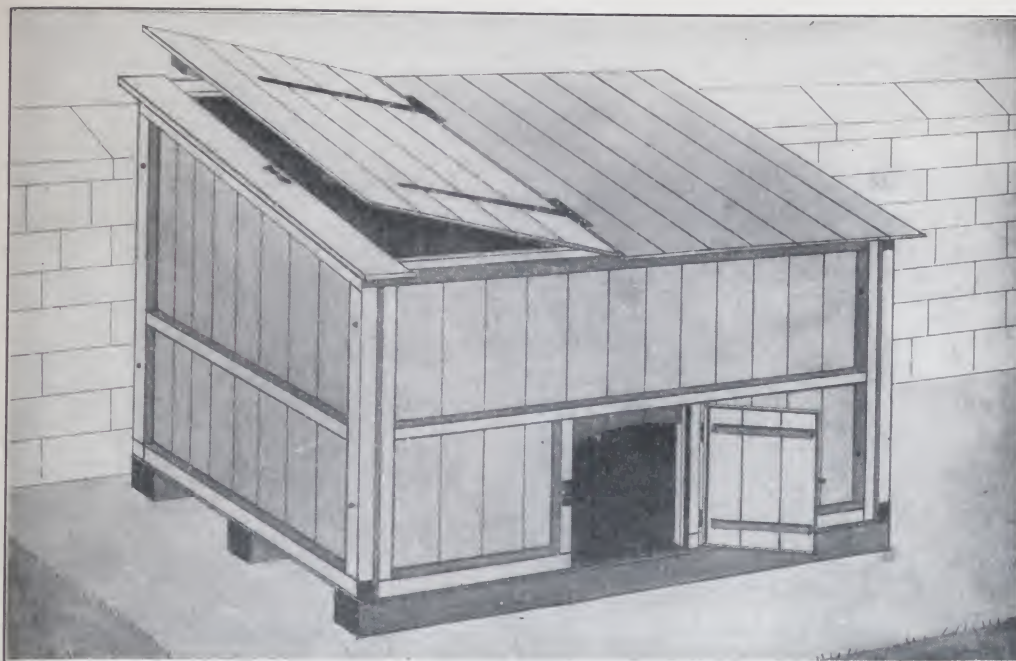

**THE "ELSAN" INDOOR CHEMICAL CLOSET.** Sanitary comfort indoors without water or drains. Guaranteed absolutely odourless, sanitary and hygienic. Very suitable for Sports Clubs Bungalows and anywhere in the country.

**WHAT IT IS AND HOW IT WORKS.** The "Elsan" closet is all steel, beautifully stove enamelled, and scientifically ventilated, quite portable, moved easily and quickly fitted anywhere. The outfit consists of ventilation chamber (glass enamelled), 9 gallon container, 7-ft. pipe, 2 elbows, wall collar and cowl, all enamelled with wooden Mahogany-coloured seat and lid at an inclusive price of £5/5/0 with one gallon tin of chemical included free. Sent carriage paid with plans for installation.

**INSTRUCTIONS.** One pint of chemical to one to two gallons of water put in the container on emptying once every three to four weeks. The cost of the "Elsan" chemical to last six months is 5/-.

## Sutcliffes' Coal Bunkers for Storing Coals.

Very Suitable for Small Houses, Workshops, etc.

Capacity 8 to 10 cwt.s.

Length.	Width.	Height, Front.	Height, Back.	Capacity.	Prices.
5ft.	3½ft.	3ft.	4ft.	10 cwt.s.	£4 10 0
4½ft.	3ft.	2½ft.	3½ft.	6 cwt.s.	£3 10 0

Carriage Paid to nearest Station England and Wales.

**VERY STRONG CONSTRUCTION THROUGHOUT.** A suitable place for storing coals is an absolute necessity for many of the smaller houses, offices and warehouses in large towns, etc. With this in view, we offer the above design with the fullest confidence. The four walls are built on lin. planed, tongued and grooved boards, securely nailed to extra thick framing; the floor is built on similar lines, and fixed to heavy floor joists; the roof is built on similar boards.

**SECTIONALLY BUILT. GO ANYWHERE. EASILY ERECTED IN ONE HOUR.** Being sectionally built it will go through any door way, and can be fixed up in the backyard or any handy place. All bolt holes are bored, the bolts are provided free, and the building does not take up much room. If a larger size is desired, we can quote you at any time on receipt of particulars

**VERY CONVENIENT DESIGN, EASY TO FILL AND EMPTY AS DESIRED.** Strength alone is not the only feature in Sutcliffes' coal bunkers, the design has been carefully studied in order that the coalman can easily tip in the coals, and the attendant obtain them in any quantity without fuss and waste.

**HINGED LID IN THE ROOF AND SHUTTER OUTLET IN FRONT. WHEN THE BAGS ARRIVE THEY CAN BE INSTANTLY TIPPED** in from the opening in the roof, and the hinged door outlet in front makes it possible to get a supply at any time and close up again quickly.

**TREATED FREE WITH PRESERVATIVE INSIDE AND OUTSIDE, AND CARRIAGE PAID.** The coal bunker is treated free with brown wood preservative, and is sent carriage paid to your nearest station, so you know the exact cost before you buy.

**IT IS REMARKABLE VALUE.** It would have been quite easy for us to place on the market a design of weaker construction and lower in price, but it would not be serviceable. It is necessary to have the strongest possible construction for a coal bunker, and Sutcliffes' design can be depended on to give at least ten to fifteen years solid wear.

# Sutcliffes' Delightful Kiddies' Swings.

Extra Strong.

Perfectly Safe.

Price, 35/-.

**LET THE KIDDIES HAVE A GOOD TIME.** If you have a little spare ground either in the garden or on the lawn, or even in the backyard, you cannot use it more profitably than by providing one of Sutcliffe's Swings. They are perfectly safe, built strong enough for either the biggest children or even adults, are easy to erect, and sent out absolutely complete to the smallest detail. When your swing arrives you will be astonished at the remarkable value given; every swing is honestly cheap at 42/- The kiddies will have hundreds of hours of real fun, and a good swing is one of the best investments you can make for children of both sexes. All swings are nicely finished, attractive in design, and will give over 10 year's wear.

**TREMENDOUSLY STRONG.** Many swings are built on slender lines and are barely safe for even the smallest kiddies, but in this design we have purposely gone in for great strength in order to place safety first and avoid the slightest possibility of accidents.

**IT'S THE WEIGHT OF TIMBER THAT COUNTS.** The two uprights are 4in. x 3in. thick, nicely planed and 10ft. in length, standing 8ft. out of the ground. The base and up to the dotted lines in sketch are simply sunk 2ft. in the ground, then the swing is ready for use. The rope is also extra strong, special safety rings are included complete with bolts and nuts. The seat is about 18in. x 8in. wide. The lower portions up to dotted lines are treated with special wood preservative to prevent rot. Two finials are included at the top to give a striking appearance. The swing is delivered carriage paid to your nearest station, and sent out on the fullest approval. Unless you are perfectly satisfied on every point, cash will be refunded without either quibble or argument.

## SIZE AND PRICE.

## Sutcliffes' Revolving Sprinklers.

For Watering Lawns and Gardens in Hot Weather.

These are very strongly made, supplied with four or eight arms and centre rose.

These sprinklers throw an ornamental spray over an area of 40ft. in diameter, and saturate the ground thoroughly.

The head and arms are of polished brass, nickel-plated, with heavy cast-iron stand painted dark green.

The brass tail piece will take  $\frac{1}{2}$ in.,  $\frac{3}{4}$ in. or  $\frac{1}{2}$ in. hose, and the height is 3ft. 6ins.

## PRICES—

# Sutcliffes' Garden Tents and Shelters.

During the summer months, in all gardens and on all lawns, etc., a really handsome garden shelter is almost a necessity, and we are quite sure that any one of the designs shown on this page will be exceptionally serviceable.

All of them are listed at very reasonable figures, and in each case we guarantee complete satisfaction.

THE "LEAMINGTON" GARDEN SHELTER stands out as being one of the best bargains obtainable in high-grade garden shelters. It has a superior polished folding frame with brass fittings, complete with pegs and bag.

Design No. H 547.—Size 6ft. wide, 5ft. 6in. deep from front of blind, 6ft. high.

Design No. H 548.—Size 6ft. wide 3ft. 4in. deep, and 6ft. high in front.

Carriage Paid to nearest Station England and Wales.

## The 'Universal' Lawn Tent.

DESIGN H860.

This is a really high-grade tent, and is one of attractive design, while it is most suitable for all gardens or large lawns. It is built from superior polished pine folding frame, size 12ft. x 8ft. x 8ft. high in centre, 6ft. walls, no centre pole, galvanised fittings, fringed valance, and double bracing lines. A special raised awning is fitted which prevents the formation by rain water of a hollow between awning and peak of tent. The folding frame facilitates single-handed erection.

PRICES—		£ s. d.
With Striped Canvas Cover ...	...	5 5 0 each.
With Green Rotproof Cover ...	...	6 5 0 "

These prices are carriage paid to any Station in England or Wales.

## Brown Wood Preservative for Covering all Wood Buildings.

Price in Two Gallon Cans, 5/6. Carriage, 1/6 extra.

This special brown wood preservative greatly increases the length of life of all wooden buildings. It is easily applied with any kind of soft brush, and is far cleaner and better than tar and much cheaper than paint.

A LITTLE GOES A LONG WAY Two gallons of Sutcliffes' wood preservative will cover a shed 20 ft. by 10 ft. on the outside, and you can do the work in one hour quite easily. Don't let your buildings rot away just for want of attention. If you can get your friends to join you and buy in bulk the prices are greatly reduced. Sutcliffes' guarantee this wood preservative to be just as represented, and excellent value.

Prices of Wood Preservative:

- In free two-gallon cans, 5/6. Carriage, 1/6 extra.
- In free five-gallon drums, 14/6. Carriage, 2/6 extra.
- In free 10-gallon barrels, 65/-. Carriage, 10/6 extra.

## Sutcliffes' Hammock Chair for Out-door Use.

DESIGN H528.

We have pleasure in offering to our friends some really substantial, well built and exceptionally reasonably priced hammock chairs for use in gardens, on lawns, and for all outdoor festivals, etc.

These are very heavily made. The Design H 528 has a hardwood frame, unvarnished and with jute seat. The price is 4/9 each, carriage forward, or if six seats are ordered, we are prepared to deliver carriage paid at the rate of 5/6 each.

## Sutcliffes' Hammock Chair with Canopy.

DESIGN H611.

This is a really strong and substantial garden seat; the canopy is exceptionally useful, especially in sunny weather, and the chair is very cosy and comfortable. It is built with a heavy birch frame, nicely varnished, with a turned support bar, and striped canvas seat and canopy.

The price is 14/- each, carriage paid to any Station within 100 miles; above this distance we charge 1/- extra.

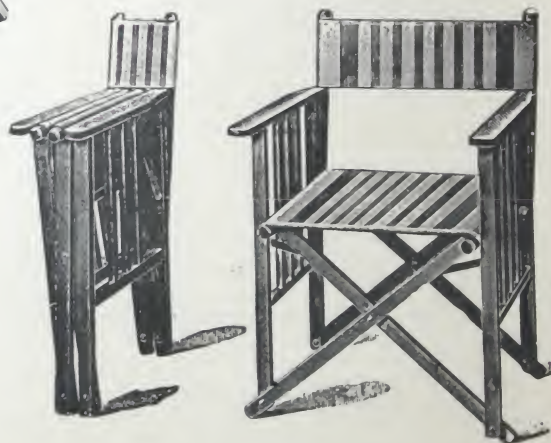

## Sutcliffes' Folding Arm Chair.

DESIGN H484.

This is a very comfortable folding chair built in hardwood, with canvas seat and back. It folds up very compactly and is exceptionally cosy and comfortable.

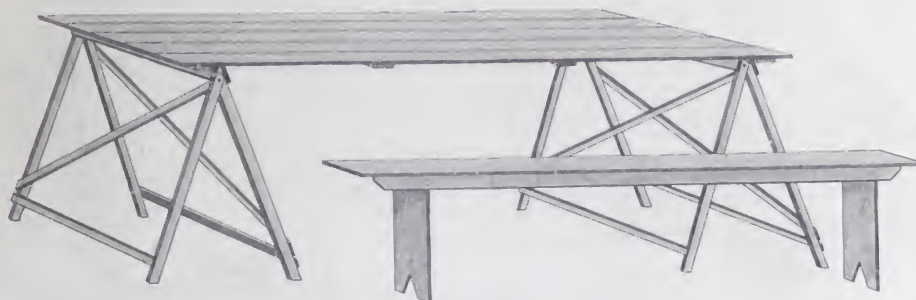

Width of the seat 18ins. Total weight 12lbs.

It is built from stout striped canvas, price 12/6 each, carriage paid. In heavy green rotproof canvas, price 13/9 each, all carriage paid for cash with order, and sent out on a money back guarantee.

# Sutcliffes' Trestle Table and Forms, suitable for Clubs, Canteens, Sports' Pavilions, Marquees, etc.

## SIZES AND PRICES OF TRESTLE TABLES.

8ft.	2½ft.	2	22/6
10ft.	2½ft.	3	28/-
12ft.	2½ft.	3	34/-

Carriage Paid nearest station England and Wales on two and up.

## SIZES AND PRICES OF SUTCLIFFES' FORMS.

Length	Width	Height	Price
6ft.	9in.	18in.	10/6 each

Carriage Paid if ordered with Tables.

**REMARKABLE VALUE IN THESE LINES.** In order to meet the urgent demand for low priced tables and forms that can easily be stored away when not required, we have placed on the market the above designs, feeling confident they will give unbounded satisfaction to all purchasers, and lasting service.

**A VERY STRONG SPECIFICATION.** The tables are constructed on best quality 1½ in. planed, tongued and grooved boards, nailed to planed framing of ample strength; the folding trestles are 2ft. 4in. high, constructed on 2 by 1 planed framing, and can be easily folded and stored away when not in use.

**SPECIFICATION OF THE FORMS.** These are built on 1½ in. planed best quality deal, very strong throughout, and will give the fullest service. We guarantee both forms and tables to meet with the approval of all clients, and in the event of the slightest dissatisfaction from any point of view cash will be returned. Price for further sizes on application.

## Sutcliffes' 'Eton' Garden Seat.

In all gardens, whether large or small, a really good, strong, substantial seat is essential, and where substantial strength and price is the principle consideration, then we confidently recommend the "Eton" Garden Seat.

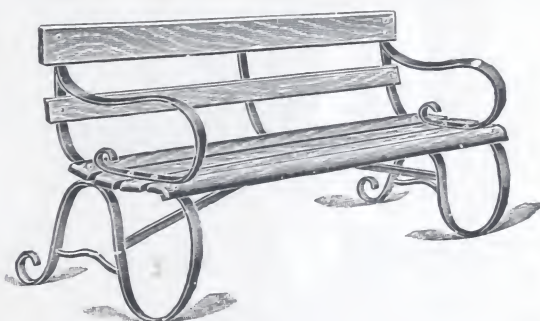

It is exceptionally heavily made with wrought-iron standards, painted a nice green colour; the seat portion and the back rails are from selected pitch pine, beautifully planed and nicely varnished.

The complete seat is exceptionally durable, and is made in two sizes, namely, 5ft. and 6ft. in length. We guarantee the fullest satisfaction to all buyers, and cash returned in full if these seats are not considered exceptionally good value for money.

Size 5ft. long, price £1 12s. 6d.

Size 6ft. long, price £1 15s. 0d.

Carriage paid to any Station up to 100 miles; above this distance we charge 2/6 extra

## Sutcliffes' 'Balmoral' Garden Seat

This particular design is especially suitable where a seat of great strength is essential, such as country by-paths, parks and pleasure grounds. It has heavy Japanned cast-iron ends with best quality varnished woodwork. The seat is cosy and comfortable, and one that can be thoroughly recommended to all clients.

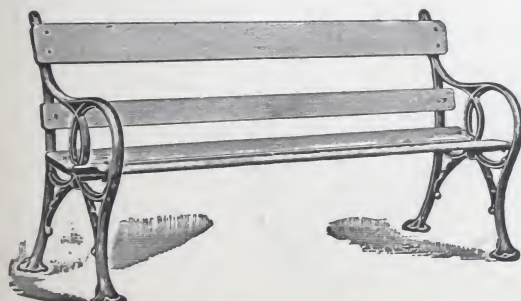

It is sent out on a money back guarantee of satisfaction, and we know that buyers will be well pleased with this particular bargain. It is made in three sizes as follows:—

5ft. long, price £2 7s. 6d.

5ft. 6in. long, price £2 9s. 6d.

6ft. long, price £2 12s. 0d.

Carriage paid right to your nearest Station if within 100 miles: above this distance 3/6 extra is charged

# Sutcliffes' Remarkable Value in Lawn Mowers.

## Model 'H' with Bronze Bearings.

**SPECIFICATION.** Driving wheels 9ins. diameter by 1½ins. tread, tread made with extra steel serrations to get a good grip on rough ground. Cutting cylinder 5½ins. diameter, fitted with five blades of best Sheffield steel. Lip-edge section bottom blade. Bronze bearing, with single screw adjustment and locking nut, fitted to all sizes. Extra smart finish in nice blue colour, and packed in separate box.

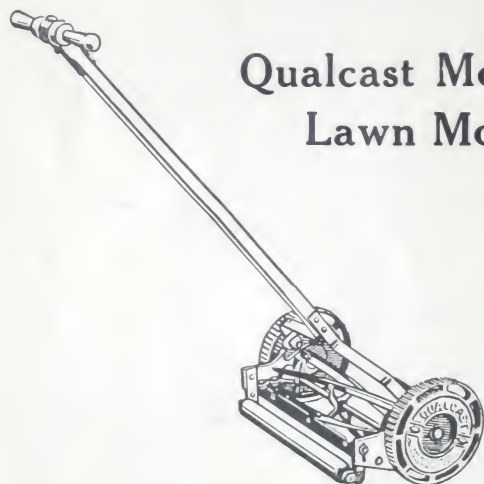

**WHAT THE MODEL "H" WILL DO.** This machine is of the high wheel type, and has been introduced to deal with the rough grass one finds under trees and in orchards, where one has to employ a man to use the scythe. The Model "H" used, say fortnightly, will deal comfortably with the long grass; it can also be adjusted to cut as closely as the Model "C."

All machines are sent out on the fullest approval for cash with order, and carriage paid to nearest Station.

### PRICES OF MODEL "H" LAWN MOWERS.

Width of Cut—10in.	12in.	14in.	16in.
40/-	42/-	44/-	46/-

Grass Boxes for all sizes, 10/- extra.

## Qualcast Model 'E' Lawn Mower.

Sutcliffes' offer the "Qualcast" Model "E" Lawn Mower with every confidence, and all buyers are guaranteed the fullest satisfaction or money will be returned in full. Every part is made in England, and is guaranteed for three years.

**SPECIFICATION.** Driving wheels 7in. diameter by 1½in. tread. Cutting cylinder 5in. diameter fitted with five blades all best Sheffield steel. Lip-edge section bottom blade. Spanner supplied which fits all nuts. Beautifully finished in a nice blue colour, and each machine packed in a separate box, and carriage paid for cash with order.

**Note.**—The 12in. and 14in. sizes are fitted with bronze bearings.

**WHAT IT WILL DO.** The "Qualcast" Model "E" will cut closely enough for either cricket pitch or tennis lawn, and is very easy running.

### PRICES OF MODEL "E" LAWN MOWERS.

Width of Cut—8in.	10in.	12in.	14in.
30/-	32/6	35/-	37/6

Grass Boxes in all sizes, 8/6 extra.

All Carriage Paid.

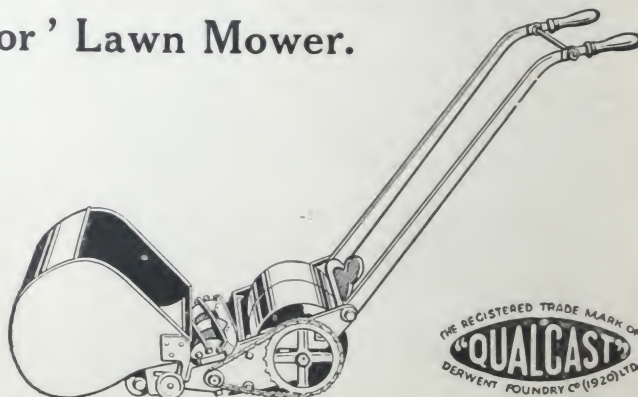

## The 'Qualcast Major' Lawn Mower.

This machine is undoubtedly the premier of its class. It is made in the 12in. size only, and fitted with all-metal grass box. It will cut a bowling green with ease, and runs so lightly that one man can use it. The handles are adjustable to suit the height of user.

This machine is in reality a Model de Luxe, and is one of the finest and best built lawn mowers obtainable at any price. It is sent out on the fullest approval terms—you have to be entirely satisfied before the sale is considered complete.

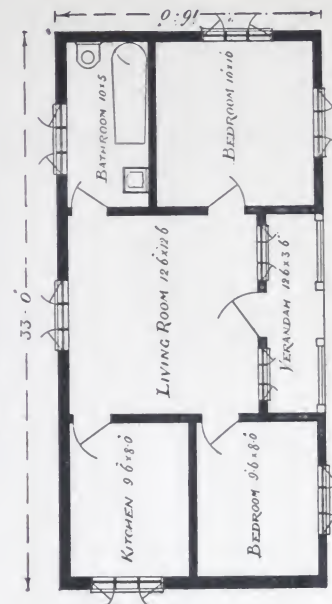

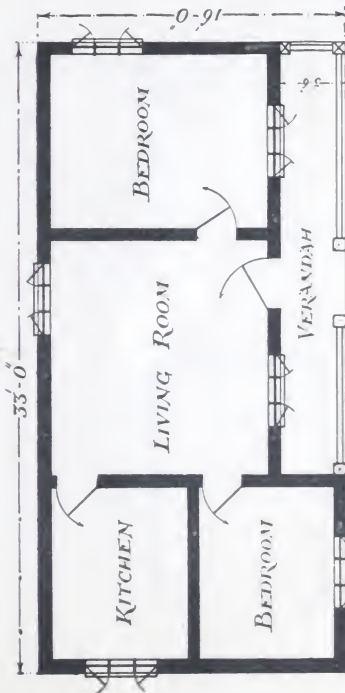

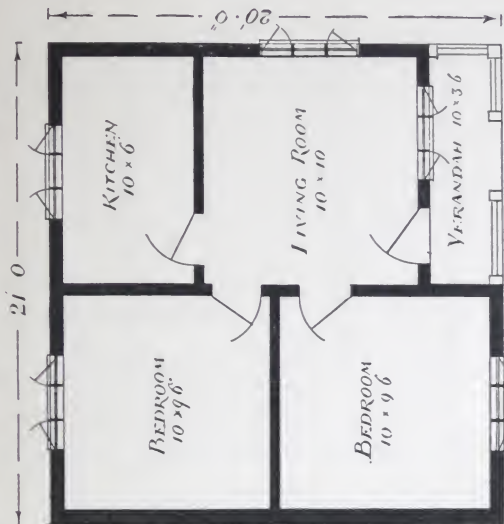

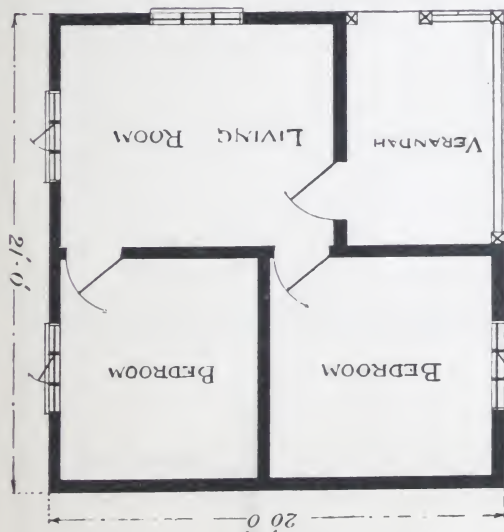

**SPECIFICATION.** Laminated steel chain drive on malleable iron sprockets. Cutting cylinder 5in. diameter, with eight blades of best Sheffield steel on three malleable iron spindles. Bottom blade of lip-edge section, split bronze bearings, wooden handle grips. Height of cut regulated by hand-wheel adjustment. Painted a nice rich blue colour, and all these models have grass boxes supplied free. All machines are sent carriage paid to nearest Station securely packed.

Price of the "Qualcast Major" Lawn Mower :  
£5 10s. 0d. carriage paid.
